BILLING CODE 7035-01-M

[Vol. No. OP1-083]

Motor Carriers; Permanent Authority Decision; Decision-Notice

Decided: March 16, 1981.

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR § 1100.240). See Ex Parte 55 (Sub-44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. §§ 11344 and 11349,* 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of an application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11348, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 1, Parker, Chandler and Taylor.

Agatha L. Mergenovich,

Secretary.

MC–F–14572, filed February 6, 1981. TOLBERT F. KERR (C.D. RIPPY AND WARD DEWITT, JR.-Trustees)(Kerr) (P.O. Box 8, Lascassas, TN 37130)—CONTINUANCE IN CONTROL—QUICK-WAY CARRIERS, INC. (Quick)(P.O. Box 8, Lascassas, TN 37130). Representative: Henry E. Seaton, 929 Pennsylvania Bldg., 425 13th St., N.W., Washington, DC 20004. Kerr seeks to continue in control of Quick upon the institution by Quick of operations, in interstate or foreign commerce, as a motor common carrier. Kerr, an individual controls Murfreesboro Freight Line Co., a common carrier pursuant to certificates issued in MC 36448. Condition: To eliminate the holding of duplicating authority by commonly controlled carriers, approval and authorization of this transaction is conditioned upon the prior cancellation of MC 36448 (Sub-7). (Hearing site: Nashville, TN)

Note.—Quick has filed as a directly related application its initial common carrier application, docketed MC 151190 (Sub-1), published in this same Federal Register issue.

[FR Doc. 81-8882 Filed 3-23-81; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule 251 of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the Federal Register on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

DEPARTMENT OF JUSTICE

Consent Decree In Action To Enforce Compliance With Clean Air Act; Growmark, Inc.

In accordance with Departmental Policy, 28 C.F.R. § 50.7, 38 Fed. Reg. 19029, notice is hereby given that a consent decree in *United States* v. *Growmark, Inc.*, was lodged with the United States District Court for the Central District of Illinois. The decree requires Growmark to comply with the applicable portion of the federally-approved Illinois state implementation

plan at three gasoline loading terminals it operates in Illinois and provides that Growmark will pay a civil penalty in the amount of $5,000.

The Department of Justice will receive for a period of thirty (30) days from the date of the notice, written comments relating to the proposed consent decree. Comments should be addressed to the Deputy Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530 and should refer to *United States* v. *Growmark, Inc.*, D.J. Ref. 90-5-2-1-344.

The consent decree may be examined at the office of the United States Attorney, Central District of Illinois, Room 312, U.S. Post Office and Federal Building, 600 East Monroe Street, Springfield, Illinois 62705, at the Region V office of the Environmental Protection Agency, Enforcement Division, 230 South Dearborn Street, Chicago, Illinois 60604, and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1254, Tenth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Angus MacBeth,

Deputy Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Office of Juvenile Justice and Delinquency Prevention

Prevention of Juvenile Delinquency Through Capacity Building—Cycle II; Cancellation of Proposed Guideline

Notice is hereby given that the Office of Juvenile Justice and Delinquency Prevention is canceling the proposed Guideline entitled Prevention of Juvenile Delinquency Through Capacity Building—Cycle II published for comment in the Federal Register on January 23, 1981. (Vol. 46, No. 15, P. 7509–7510).

This cancellation is based on the following: (1) the Administration's budget request to Congress for FY 1982 eliminates funding for the Office of Juvenile Justice and Delinquency Prevention thereby necessitating that plans for new programs be canceled and that phase out procedures be initiated; (2) an examination of the costs related to the review, selection and processing of concept papers/applications indicate that the Capacity Building Cycle II initiative would not be cost-effective in relation to the funds available for award, and; (3) the initiative must be reassessed in terms of competing priorities for OJJDP funds.

Charles A. Lauer,

Acting Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[Docket No. M-81-11-M]

Armstrong and Armstrong; Petition for Modification of Application of Mandatory Safety Standard

Armstrong and Armstrong, P.O. Box 1873, Roswell, New Mexico 88201 has filed a petition to modify the application of 30 CFR 56.4-27 (fire extinguishers on self-propelled mining equipment) to its Chaves County Gravel Pit located in Chaves County, New Mexico. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that self-propelled mobile equipment be provided with a suitable fire extinguisher readily accessible to the equipment operator.

2. Petitioner is experiencing problems with the theft of fire extinguishers from its mobile equipment. Locks on the fire extinguishers have not proven to be a satisfactory solution.

3. Because the crusher site is above ground, petitioner states that in the event of a mobile equipment fire, the operator can stop and abandon the machine.

4. As an alternate method, petitioner proposes to keep the fire extinguishers at the control trailer. In the event of a fire, an extinguisher will be readily accessible to every person on the site to extinguish the fire.

5. Petitioner states that the proposed alternate method will at all times provide the same degree of safety to the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 23, 1981. Copies of the petition are available for inspection at that address.

Dated: March 17, 1981.

Frank A. White,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-81-24-C]

Cordero Mining Co.; Petition for Modification of Application of Mandatory Safety Standard

Cordero Mining Company, P.O. Box 1449, Gillette, Wyoming 82716 has filed

a petition to modify the application of 30 CFR 77.403a (mobile equipment; rollover protective structures (ROPS)) to its mine located in Campbell County, Wyoming. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that mobile equipment be equipped with rollover protective structures (ROPS).

2. Petitioner is seeking a modification to allow the use of a farm tractor without ROPS for preparation and seeding of mined land provided the surface does not exceed a 10 percent slope on areas in which this equipment would be subject to work.

3. In support of this request, petitioner states that:

a. Farm type tractors can safely work ten percent grades or less without the possibility of rolling over;

b. Farm tractors normally are factory constructed with roll-over protection, although not according to MSHA's standard for ROPS; and

c. Subcontracting reclamation work is of short duration on an annual basis (2–3 weeks).

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before (insert date 30 days from publication in the **Federal Register**). Copies of the petition are available for inspection at that address.

Dated: March 17, 1981.

Frank A. White,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-81-10-M]

Multi Mineral Corp.; Petition for Modification of Application of Mandatory Safety Standard

Multi Mineral Corporation, 715 Horizon Drive, Suite 380, Grand Junction, Colorado 81501 has filed a petition to modify the application of 30 CFR 57.21–22 (main intake and return air currents; requirements) to its U.S.B.M. No. 1 Shaft located in Rio Blanco County, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that the main intake and return air currents in mines be in separate shafts, slopes, or drifts.

2. As an alternate method, petitioner proposes to exhaust return air by means of vent tubing located in the shaft.

3. In support of the proposed alternate method, petitioner states that:

a. Exhaust ventilation is maintained at a velocity of approximately 65 miles per hour through 30-inch galvanized sheet metal ventilation ducts installed in the shaft;

b. The ventilation ducts are built of 40-foot lengths of 20-gauge spun pipe connected by neoprene joints, with damper controls at each level to adjust air flow;

c. The ventilation system is surveyed weekly for leaks and is carefully maintained.

4. Petitioner states that the proposed alternate method will provide at all times the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. BILLING CODE 4510-43-M

Summary of Decisions Granting in Whole or in Part Petitions for Modification

AGENCY: Mine Safety and Health Administration (MSHA), Department of Labor.

ACTION: Notice of affirmative decisions issued by the Administrators for Coal Mine Safety and Health and Metal and Nonmetal Mine Safety and Health on petitions for modification of the application of mandatory safety standards.

SUMMARY: Under section 101(c) of the Federal Mine Safety and Health Act of 1977, the Secretary of Labor may modify the application of a mandatory safety standard to a mine if the Secretary determines either or both of the following: that an alternative method exists at the petitioner's mine that will guarantee no less protection for the miners affected than that provided by the standard, or that the application of the standard to the petitioner's mine will result in a diminution of safety to the affected miners.

Summaries of petitions received by the Secretary appear periodically in the **Federal Register**. Final decisions on these petitions are based upon the petitioner's statement, comments and information submitted by interested persons and a field investigation of the conditions at the petitioner's mine. The Secretary has granted or partially granted the requests for modification submitted by the petitioners listed below. In some instances the decisions are conditioned upon the petitioner's compliance with stipulations stated in the decision.

FOR FURTHER INFORMATION CONTACT:

The petitions and copies of the final decisions are available for examination by the public in the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203.

Dated: March 17, 1981.

Frank A. White,

Director Office of Standards, Regulations and Variances.

Affirmative Decisions on Petitions for Modification

Granted with conditions.
M-79-156-C	44 FR 65219	Island Creek Coal Company	30 CFR 75.1710	Use of cabs or canopies on roof bolting machines in heights of 48" or less would result in a diminution of safety. Granted with conditions.
M-79-176-C	44 FR 75741	Dispatch Q Corp	30 CFR 75.805	Proposed use of junction boxes constructed of 1/8 inch steel and equipped with insulated strain clamps considered acceptable alternate method. Granted with conditions.
M-79-216-C	44 FR 75742	Leeco, Inc	30 CFR 75.1405	Proposed method to connect haulage equipment with a metal tongue and coupling pins considered acceptable alternative to automatic couplers. Granted with conditions.
M-79-225-C	45 FR 10041	The New River Co for Ohio-Atlas Construction Co	30 CFR 75.1400	Proposed examination of the wire rope and hoist during each shift and removal from service damaged or worn wire rope considered acceptable alternate method. Granted with conditions.
M-79-230-C	45 FR 2915	The New River Co	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous miners, shuttle cars and roof bolting machines would result in a diminution of safety in specified low mining heights. Granted with conditions.
M-79-233-C	45 FR 2915	Preston Energy, Inc	30 CFR 75.1710	Use of cabs or canopies on shuttle cars in heights of 48" or less would result in a diminution of safety. Granted with conditions.
M-79-278-C	45 FR 19478	Kaiser Steel Corp	30 CFR 75.1100-3	Due to freezing winter conditions which would render waterline ineffective, proposed draining of waterline, closing of main valve, tagging of main valve for identification and locating responsible person on surface at all times considered acceptable method of fire control from October through April. Granted with conditions.
M-79-286-C	45 FR 6192	Bishop Coal Co	30 CFR 75.326	Due to high rate of methane liberation, petitioner's proposal to use belt entry as an intake airway and to install a carbon monoxide detection system along the belt entry considered acceptable alternate method of compliance. Granted with conditions.
M-79-292-C	45 FR 28587	M.S.W. Coal Co	30 CFR 75.1400	Proposed operation of man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope above the main connecting device considered acceptable alternative method. Granted with conditions.
M-79-297-C	45 FR 7321	Clinchfield Coal Co	30 CFR 75.326	Due to high rate of methane liberation, petitioner's proposed installation of carbon monoxide detection system in the belt entries considered acceptable alternate method of compliance. Granted with conditions.
M-80-5-C	45 FR 20587	Mountain Top Coal Co	30 CFR 75.1400	Proposed operation of man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope above the main connecting device considered acceptable alternative method. Granted with conditions.
M-80-7-C	45 FR 20605	Eastover Mining Co	30 CFR 75.1405	Proposal to have lever arm moved up to raise the coupling pin to uncouple equipment without requiring persons to go between the cars and coupling from outside by lowering the lever arm by means of a light rod considered acceptable alternate method. Granted with conditions.
M-80-8-C	45 FR 20587	Star Coal Company	30 CFR 75.1400	Proposed operation of man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope above the main connecting device considered acceptable alternative method. Granted with conditions.
M-80-10-C	45 FR 20589	Republic Steel Corp	30 CFR 75.305	Due to adverse roof conditions, petitioner's proposal to establish air monitoring checkpoints on specified return airways considered acceptable alternative to making weekly inspections of the airways. Granted with conditions.
M-80-32-C	45 FR 28169	John Bolce Co	30 CFR 75.301	Proposed airflow reduction in petitioner's mine, which would maintain a safe and healthful atmosphere considering acceptable alternate method of compliance. Granted with conditions.
M-80-51-C	45 FR 28579	Consolidation Coal Co	30 CFR 75.1105	Proposed housing of pump station in a fireproof building equipped with an automatic fire suppression system considered acceptable alternate method of compliance. Granted with conditions.
M-80-55-C	45 FR 28724	Consolidation Coal Co	30 CFR 75.1105	Proposed housing of pump station in a fireproof building equipped with an automatic fire suppression system considered acceptable alternate method of compliance. Granted with conditions.
M-80-58-C	45 FR 29426	Eastern Associated Coal Corp	30 CFR 75.305	Due to poor roof conditions resulting from a previous fire, petitioner's proposal to establish and maintain air monitoring checkpoints on specified return airways considered acceptable method of compliance. Granted with conditions.
M-80-66-C	45 FR 32449	Jones & Laughlin Steel Corp	30 CFR 75.305	Due to adverse roof conditions, petitioner's proposal to establish air monitoring checkpoints on specified return airways considered acceptable alternative to making weekly examinations of the airways. Granted with conditions.
M-80-69-C	45 FR 35022	Cannelton Industries, Inc	30 CFR 75.305	Due to adverse roof conditions, petitioner's proposal to establish air monitoring checkpoints on specified return airways considered acceptable alternative to making weekly inspections of the airways. Granted with conditions.
M-80-70-C	45 FR 37648	Island Creek Coal Co	30 CFR 75.1100-2(a)(1)	Proposed extension of the waterline to the surface and connection through a cutoff valve to the main waterline considered acceptable alternate method of compliance. Granted with conditions.
M-80-87-C	45 FR 46820	United Castle Coal Co	30 CFR 75.1701	Petitioner's proposed method of drilling boreholes considered acceptable alternate method of compliance. Granted with conditions.
M-80-95-C	46 FR 12628	Consolidation Coal Co	30 CFR 75.1105	Proposed housing of pump station in a fireproof building equipped with an automatic fire suppression system considered acceptable alternate method of compliance. Granted with conditions.

Affirmative Decisions on Petitions for Modification—Continued

Docket No	Federal Register Notice	Petitioner	Regulations affected	Summary of findings
M-80-98-C	45 FR 42427	Jim Walter Resources, Inc	30 CFR 75.902	Proposed use of a bare (noninsulated) copper conductor as a safety ground conductor considered acceptable alternate method of compliance. Granted with conditions.
M-80-100-C	45 FR 46921	Jim Walter Resources, Inc	30 CFR 75.326	Due to high rate of methane liberation, petitioner's proposal to use belt entries as intake entries and install a carbon monoxide detection system along the belt entry considered acceptable alternate method of compliance. Granted with conditions.
M-80-101-C	45 FR 46921	Jim Walter Resources, Inc	30 CFR 75.326	Due to high rate of methane liberation, petitioner's proposal to use belt entries as intake entries and install a carbon monoxide detection system along the belt entry considered acceptable alternate method of compliance. Granted with conditions.

BILLING CODE 4510-43-M

Occupational Safety and Health Administration

Vermont State Standards; Approval

Background

Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with Section 18(e) of the Act and 29 CFR Part 1902. On October 16, 1973, notice was published in the **Federal Register** (38 FR 28658) of the approval of the Vermont plan and the adoption of Subpart U to Part 1952 containing the decision.

The Vermont plan provides for the adoption of Federal standards as State standards after public hearing. Section 1953.41 of 29 CFR provides that "Where any alteration in the Federal program could have an adverse impact on the 'at least as effective as' status of the State program, a program change supplement to the State plan shall be required." By letter dated April 8, 1980, from Joel R. Cherington, Commissioner, Vermont Department of Labor and Industry, to Edwin J. Riley, Jr., Assistant Regional Administrator, and incorporated as part of the plan, the State submitted the following as State standards comparable to Federal standards:

(a) 29 CFR Part 1910—Occupational Safety and Health Standards for General Industry, published by Commerce Clearinghouse, Inc., March 1, 1979, except for:

(i) 29 CFR 1910.1028, Benzene (not adopted because Federal benzene standard was vacated by the Supreme Court in "I.U.D. v. American Petroleum Institute," 100 S. Ct. 2884 (1980);

(ii) 29 CFR 1910.1029, Coke Oven Emissions (not proposed because there is no coke oven exposure or available supply of raw material within the State);

(iii) 29 CFR 1910.1043, Cotton Dust (not proposed because recent survey indicates no presence or use of unwashed cotton within the State);

(iv) 29 CFR 1910.1044, 1,2-dibromo-3-chloropropane (DBCP) (not adopted because there are no known manufacturers or users in the State);

(v) 29 CFR 1910.1046, Exposure to Cotton Dust in Cotton Gins (not adopted because investigation has shown that cotton ginning is not performed in the State);

(vi) 29 CFR 1910.19(d), Benzene and (f), Cotton Dust, Special Provisions for Air Contaminants (not adopted because Federal benzene standard was vacated by the Supreme Court in "I.U.D. v. American Petroleum Institute," 100 S. Ct. 2884 (1980), and there is no known exposure to cotton dust in the State);

Adoption of the above excepted standards will be considered if the current status changes.

(b) 29 CFR 1910.1025, Lead

In addition to and in place of the standard for lead as it appears in the Commerce Clearinghouse publication (29 CFR 1910.1025) the standard for exposure to lead, as amended and revised including all pending judicial stays by the U.S. Court of Appeals for the District of Columbia as they appeared in the Federal Register at:

i) 43 FR 52952, November 14, 1978;
ii) 44 FR 5446, January 26, 1979;
iii) 44 FR 14554, March 13, 1979;
iv) 44 FR 20960, April 6, 1979;
v) 44 FR 50338, August 28, 1979; and
vi) 44 FR 60961, October 23, 1979.

(c) 29 CFR Parts 1915, 1916, 1917, 1918, and 1919—Safety and Health Regulations for Maritime Employment as they appeared at 39 FR 22001, June 19, 1974 and amended at 42 FR 37672, July 22, 1977.

(d) 29 CFR Part 1928—Safety and Health Standards for Agriculture, except for 29 CFR 1928.113, Exposure to Cotton Dust in Cotton Gins (due to inapplicability in the State, as they appeared at 40 FR 18254, April 25, 1975; 41 FR 10195, March 9, 1976; 41 FR 22205, June 2, 1976; 41 FR 46568, October 22, 1976; and amended at 42 FR 37674, July 22, 1977 and at 42 FR 38666, July 29, 1977).

Whenever the terms "secretary" or "assistant secretary" are used in a rule adopted above, the terms shall mean the Commissioner of Labor and Industry.

To ensure that the Vermont job safety and health regulations coincided with Federal OSHA regulations, all previously existing Vermont Occupational Safety and Health regulations were repealed and the new ones (listed above) adopted. The new standards were first proposed on November 27, 1979 and public hearings were held on December 20 and 27, 1979. No adverse comments, either verbal or written, were filed. Consequently, the final package was filed for adoption with the Secretary of State on January 30, 1980 and the regulations took effect on February 4, 1980. The Vermont Legislative Review Committee completed its review and approval of the proposed rules during January and approved the adopted rules on February 11, 1980. The adoption of the above standards was completed pursuant to provisions of the Vermont Occupational Safety and Health Act (29 V.S.A. Sections 201(c)(2) and 224).

Decision

Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to or as effective as the Federal standards.

With regard to standards relating to; Coke Oven Emissions, Cotton Dust, and (DBCP) which were excepted from adoption in this notice, there currently are no worksites in the State where employees are exposed to the hazards covered by these standards. In the event of further activity in the State which would be covered, enforcement of the standard will be the responsibility of Federal OSHA, until such time as the State adopts the standards.

The State standards are hereby approved.

Location of Supplement for Inspection and Copying

A copy of the standards supplement along with the approved plan may be inspected and copied during normal business hours at the following locations: Vermont Department of Labor and Industry, Division of Occupational Safety, 116 State Street, Montpelier, Vermont 05602; U.S. Department of Labor—OSHA, 16-18 North Street, 1 Dock Square Building, 4th Floor, Boston, Massachusetts 02109; and Director of Federal Compliance and State Programs, U.S. Department of Labor—OSHA, 200 Constitution Avenue, N.W., Room N3619, Washington, D.C. 20210.

Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Vermont Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

a. The standards are essentially identical to the comparable Federal standards and are deemed to be at least as effective.

b. The standards were adopted in accordance with procedural requirements of State law and further participation would be unnecessary.

This decision is effective March 24, 1981.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Boston, Massachusetts, this 15th day of December, 1980.

Donald E. MacKenzie,

Regional Administrator.

BILLING CODE 4510-26-M

Office of Pension and Welfare Benefit Programs

[Application Nos. D-1649, D-1650, and D-2107]

Proposed Exemption for Certain Transactions Involving R & L Grell, Inc., Money Purchase Pension Plan, R & L Grell, Inc., Profit Sharing Plan, and R & L Grell, Inc., Defined Benefit Pension Plan, Located in Richvale, Calif.

AGENCY: Department of Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the following transactions: (1) the assignment of an option to purchase a parcel of land (the Land) to the R & L Grell, Inc. Money Purchase Pension Plan (Money Purchase Plan) and the R & L Grell, Inc. Profit Sharing Plan (Profit Sharing Plan), by Larry Grell, vice president of R & L Grell, Inc. (R & L), on behalf of Heather Farms, a partnership owned one-third by Larry Grell and two-thirds by R & L; (2) the offer of an interest in the Land by the Money Purchase Plan to the R & L Grell, Inc. Defined Benefit Plan (Defined Benefit Plan) and the acceptance of the offer by the Defined Benefit Plan; and (3) the proposed lease of the Land by the Money Purchase Plan and the Defined Benefit Plan (collectively, the Plans) to R & L; and (4) the proposed guarantee of I10R & L's lease payments by three principal shareholders of R & L. The proposed exemption, if granted, would affect the trustees, participants and beneficiaries of the Plans, R & L and other persons involved in the proposed transactions.

EFFECTIVE DATES: The exemption, if granted, would be effective September 12, 1978 for transaction one, March 28, 1980 for transaction two and the date the exemption grant is published in the Federal Register for transactions three and four.

DATES: Written comments and requests for a public hearing must be received by the Department on or before May 11, 1981.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of

Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Ave., N.W., Washington, D.C. 20216, Attention: Application Nos. D-1649, D-1650 and D-2107. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Sandler of the Department, telephone (202) 523-8195. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of three applications for exemption from the restrictions of sections 406(a), 406 (b)(1) and (b)(2) and 407(a) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The proposed exemption was requested in applications filed by the trustees of the Plans pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). The applications were originally filed with both the Department and the Internal Revenue Service. However, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The applications contain representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the applications on file with the Department for the complete representations of the applicants.

1. The Money Purchase Plan and the Defined Benefit Plan each have five participants. As of February 29, 1980, the Money Purchase Plan had assets of approximately $144,000 and the Defined Benefit Plan had assets of approximately $321,000. The trustees of the Plans are Roy Grell, president of R & L, Lawrence Grell, secretary of R & L, and Larry Grell.

2. R & L is engaged in the farming business in California. The Land, comprised of 124.45 acres and located in Richvale, California, was offered for sale by an independent third party seller (Seller) at a price of $285,200. On September 12, 1980, Larry Grell executed an option at a cost of $42,780 to purchase the Land. The cost of the option was to be credited against the $285,200 purchase price. The option was immediately assigned on behalf of Heather Farms, for no consideration, to the Profit Sharing Plan and the Money Purchase Plan. Each Plan paid the Seller one-half of the option price. The Profit Sharing Plan was terminated effective February 28, 1979 and its assets were rolled over into the Money Purchase Plan.

3. In letters dated December 26, 1978 and August 3, 1979, Mr. Michael L. Evans, an independent appraiser, stated that the option purchase price of the Land was lower, on a per acre basis, than the prices for which comparable properties in the area had recently been sold. He also stated that the Land was a particularly good investment for the Plans in that demand for this type of land is very high and that rental and resale prospects are excellent. Furthermore, Tri County Bank (Tri County), an independent bank, was given sole authority to decide whether the Plans should exercise the option and lease the Land to R & L. By letter dated March 27, 1980, Tri County approved both transactions and stated that the purchase of the Land and the lease to R & L were good investments, both of which would be beneficial to the Plans. Tri County also stated that the terms of the purchase and lease were better than arm's length for the Plans. R & L represents that the amount by which the rental exceeds fair market rental value will not cause the annual additions to the accounts of the Money Purchase Plan participants to exceed the limitations of section 415 of the Code.

4. The Money Purchase Plan exercised the option, offered a one-third interest in the Land to the Defined Benefit Plan and on March 28, 1980, the Plans purchased the Land from the Seller at the option purchase price of $285,200. The Money Purchase Plan purchased an undivided two-thirds interest which represented approximately 39 percent of its assets and the Defined Benefit Plan purchased the remaining undivided one-third which represented approximately 43 percent of its assets. The Plans made a total down payment of $80,200 which included the $42,780 already paid for the option.

5. The balance of $205,000 is to be paid by the Plans in the form of a purchase money mortgage at an annual interest rate of 10 percent with a term of 14 years. There will be annual payments of principal and interest until the principal balance is fully amortized. From 1981 through 1989, there will be annual principal payments of $10,000. From 1990 through 1994, the principal payments will be $23,000.

6. The initial term of the proposed lease of the Land to R & L is for five years and the Plans have the sole discretion to renew the lease for two additional five-year terms. The lease would be triple net and the annual rental would be the greater of: (1) 40 percent of the gross income from the crops grown on the land; or (2) 15 percent of the annually and independently appraised fair market value of the land. In the August 3, 1979 letter mentioned above, Mr. Evans stated that the rental terms of the proposed lease were favorable compared to rental terms for similar farm property in the area. Mr. Evans stated that similar rents in the area vary from 25 percent to 33 ⅓ percent of gross income. It is represented that the rental payments will fully amortize the annual principal and interest payments and all other expenses of the land. In fact, a net positive cash flow is projected in each year of the mortgage.

7. The net worth of R & L is currently in excess of $2 million. There are personal guarantees by the three trustees of the Plans, who collectively hold 61 percent of the outstanding stock of R & L, to ensure full compliance with all terms and conditions of the lease. More specifically, upon default by R & L, the three trustees guarantee that the lease payments due will be made to the Plans until such time as the property is sold or leased to another tenant. The current collective net worth of the three trustees is $2.75 million.

8. Furthermore, upon default by R & L, Tri County, on the Plans' behalf, could, in its sole discretion, either (a) sell the Land and pay off the purchase obligation, or (b) relet the Land and continue amortization of the purchase obligation.

9. Tri County has agreed to monitor the lease on an annual basis to ensure compliance with all terms and conditions of the exemption and to assume sole responsibility for any decisions to be made regarding the lease on the Plans' behalf.

10. In summary, the trustees of the Plans represent that the criteria of section 408(a) of the Act have been satisfied due to the following:

a. The transactions are in the best interests of the Plans' participants and beneficiaries;

b. An independent farm property manager, Tri County, approved the exercise of the option and the proposed

lease and will also monitor the lease on an on-going basis;

c. R & L has a net worth in excess of $2 million and there also are personal guarantees of R & L's lease obligations by three principal shareholders of R & L who have a collective net worth of $2.75 million;

d. The lease payments will fully amortize all principal and interest payments and all other expenses relating to the Land;

e. The rental payments are to be annually adjusted to reflect the higher of 15% of the appraised value of the Land or 40% of gross income from the crops the Land yields;

f. An independent appraiser states that the subject Land is in high demand and would be readily saleable or leaseable; and

g. The offer of an interest in the Land by the Money Purchase Plan to the Defined Benefit Plan and the acceptance of the offer by the Defined Benefit Plan was in the interests of both Plans because it facilitated the purchase of the Land. It also enabled the Defined Benefit Plan to participate in the transactions discussed herein, which was to its benefit for the above-stated reasons.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value, such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

Notice to Interested Persons

Notice of the proposed exemption will be provided to all interested persons including all participants and beneficiaries of the Plans by first class mail within 15 days of the publication of the proposed exemption in the Federal Register. The notice will include a copy of the proposed exemption and will specifically inform each recipient of his/her right to comment on and/or request a hearing with regard to the proposed exemption within the period set forth above.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 406(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement to section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 406(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 406(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply: (1) effective September 12, 1978, to the assignment of the option to purchase the Land by Larry Grell on behalf of Heather Farms to the Money Purchase Plan and the Profit Sharing Plan; (2) effective March 28, 1980, to the offer of an interest in the Land by the Money Purchase Plan to the Defined Benefit Plan and the acceptance of the offer by the Defined Benefit Plan; (3) to the proposed lease of the Land by the Plans to R & L, provided that the terms and conditions of the proposed lease are at least as favorable to the Plans as those they could obtain from an unrelated third party; and (4) to the personal guarantees of R & L's lease payments by Larry Grell, Lawrence Grell and Roy Grell.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions that are the subject of the exemption.

Signed at Washington, D.C., this 17th day of March, 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Mangement Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-2233]

Proposed Exemption for Certain Transactions Involving the Parker-Hannafin Corporation Pension and Retirement Income Plans, Located in Cleveland, Ohio

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the sale of two undivided one-half interests in a 31.4 acre parcel of real property located in Irvine, California

(the Property) by the Parker-Hannafin Corporation (the Employer) to the Ameritrust Company (Ameritrust), as Trustee for the Parker-Hannafin Corporation Pension and Retirement Income Plans (the Plans), if the Property is rezoned for commercial use. The proposed exemption, if granted would affect the Employer, the Plans, Ameritrust and other persons participating in the transactions.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before May 25, 1981.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D–2233. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Hamilton of the Department of Labor, telephone (202) 523–7462. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a) and 406(b) (1) and (2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The proposed exemption was requested in an application filed on behalf of the Plans, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plans are defined benefit plans with an estimated 13,982 participants. As of June 30, 1980, the Plans had assets with an aggregate market value in excess of $63,000,000.

2. The trustees of the Plans (the Trustees) are Ameritrust, trustee of the trust maintained in conjunction with the retirement plans for salaried employees of the Employer; and Central National Bank of Cleveland, the trustee of the trust maintained in conjunction with the hourly pension plans of the employer. Ameritrust is also the trustee of the Real Estate Collective Trust, which was established to invest in real estate for the Plans.

3. No officers of the Employer serve as directors of the Trustees, nor do any officers of the Trustees serve as directors of the Employer. Both Trustees have loan commitments to the Employer. Ameritrust has a $16,200,000 loan outstanding with the Employer, which may be increased to a maximum of $27,000,000. Central National Bank of Cleveland has a $6,000,000 loan outstanding with the Employer, which may be increased to a maximum of $9,000,000. These loan commitments to the Employer represent less than 1% of the total loan commitments of each of the Trustees.

4. The Employer, a worldwide, full-line manufacturer of fluid power systems and related components, was incorporated in Ohio in 1938.

5. The Applicants request that an exemption be granted to permit the sale of the Property by the Employer to Ameritrust, as trustee of the Real Estate Collective Trust. If the Property is rezoned to enable it to be used for commercial purposes, the Employer proposes to sell, as soon as reasonably possible, an undivided one-half interest in the Property to Ameritrust. In the fiscal year subsequent to the granting of the proposed exemption, the Employer will sell the remaining undivided one-half interest in the Property to Ameritrust. The Employer's fiscal year commences on July 1 and ends on June 30. The proposed purchase price is $13,670,000, the fair market value of the Property as determined by an independent appraisal submitted by Coldwell Banker Real Estate Appraisal Service on October 28, 1980.

6. The Property, which is now owned by the Employer, is subject to a 75 year ground lease (the Lease) with the Koll Company (Koll), an unrelated party. Koll is a major real estate development firm in California. Under the terms of the Lease, Koll has sought to have the Property rezoned from a research and light industry classification to a commercial classification. Koll may, until May 1, 1981, terminate the Lease if such rezoning is not obtained. Ameritrust, as the lessor of the Property, may until September 1, 1981, terminate the Lease if such rezoning cannot be obtained. However, the Employer and Ameritrust will engage in the proposed transaction only if the rezoning takes place.

7. Koll will pay a monthly base rent of $113,888.51. Moreover, an additional rent equal to 20% of the net cash flow from the Property will be paid by Koll to Ameritrust. Under the terms of the Lease, Koll has the option to purchase the Property, at an amount equal to its fair market value, at any time during the first six months of the 31st year of the Lease.

8. The applicant represents that the Lease is a sound investment vehicle for the Plans in that it allows diversification into real estate development with a minimum of time expended to properly monitor the investment. The Plans will not have to commit time and resources to the task of day-to-day property management. Also, based upon the Plans' investment in the Property ($13,670,000), the 31-year cash flow generated from the leasehold improvements, and the reversionary value of the sale of the land to Koll in the 31st year (if Koll exercises its option to purchase the Property), the Property will yield an internal rate of return of 22%.

9. The weighted annualized rate of return of the Plans for the four year period ending June 30, 1980 was 6.3%. The base rental which would be realized from the proposed transaction would be 10%, with additional substantial rental payments to be received from participations by the Plans in any net cash flow realized from the Property.

10. The applicants state that the Property will represent 17.8% of the total assets of the Plans, in 1981, 14% of the assets of the Plans in 1985, and less than 11% in 1990. These estimates were furnished to the Employer by the Wyatt Company, an actuarial and consulting firm in Cleveland, Ohio.

11. When the rezoning application is approved, Koll will develop the Property. The proposed development will consist of approximately 670,000 square feet of office space, a 500-room hotel and support commercial facilities.

12. Coldwell Banker Real Estate Consultation Services (Coldwell Banker), an independent real estate consulting firm, prepared a market and financial analysis of the proposed development of the Property by Koll. Coldwell Banker concluded that the proposed sale of the Property to

Ameritrust represents an exceptional investment opportunity for the Plans. Their report states that the proposed transaction will provide the Plans with a high quality secure investment. In addition, the report states that the investment combines a guaranteed return with excellent potential for appreciation and increased yield with minimum risk. Ameritrust would have complete unrestricted investment responsibility with respect to the Property and would be able to dispose of the Property at any time.

13. The Trustees recommend the proposed transaction. They agree that the acquisition of the Property by Ameritrust is a high quality, prudent, and secure investment. The Trustees also state they will critically review the proposed transaction as of the dates of the sales of the Property if the exemption is granted.

In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 408(a) of the Act because:

(1) no continued monitoring of the transaction by the Department will be required because it will not involve any ongoing business relationship between the Plans and the Employer;

(2) the proposed transaction represents an excellent investment opportunity for the Plans because the expected 10% rate of return along with potential for appreciation and increased yield will exceed the rate of return of the Plan's current investments;

(3) Coldwell Banker's market and financial analysis concludes that the proposed transaction represents an exceptional investment opportunity for the Plans; and

(4) the Trustees of the Plans have determined that the proposed transaction is in the interests of and protective of the Plans and their Participants and beneficiaries.

Notice to Interested Persons

The interested persons who will receive notice of the proposed transaction are: (1) all employees who are or may become eligible for a benefit under any one of the Plans; (2) all retired participants and former participants in receipt of benefit payments, or who have a vested deferred right to receive such payments at a later date, under any of the Plans; and (3) all collective bargaining agents under any of the Plans. Employees will be notified by posting the Notice of Pendency on the bulletin boards of the Employer, and copies of the Notice of Pendency will be mailed to the affected collective bargaining agents and to retired or terminated vested participants. The notices will be posted or mailed, as applicable, within 25 days after publication of the Notice of Pendency in the **Federal Register** and will contain a copy of the Notice of Pendency as published, and will inform the interested persons of their right to comments and/or to request a hearing within the period set forth in the Notice of Pendency.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of two undivided one-half interests in the Property (located at the northeast corner of Von Karmen Avenue and Michelson Drive in Irvine, California) by the Employer to Ameritrust as Trustee for the Plans, for a total of $13,670,000 provided this amount is no greater than the fair market value of the Property at the time of the sale.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 18th day of March 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-1752]

Proposed Exemption for Certain Transactions Involving Everett Clinic, Inc. Employees' Profit Sharing Trust Agreement Located in Everett, Wash.

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income

Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt: (1) the proposed lease (Proposed Lease) of real property by the Everett Clinic, Inc. Employees' Profit Sharing Trust Agreement (the Plan) to the Everett Clinic, Inc. (the Clinic), the Plan sponsor; and (2) the agreement by the Clinic to indemnify and hold the Plan harmless regarding the Proposed Lease. The proposed exemption, if granted, would affect the Plan, the Clinic and Plan participants and beneficaries.

DATES: Written comments and requests for a public hearing must be received by the Department on or before May 11, 1981.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D–1752. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Sandler of the Department, telephone (202) 523–8195. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of sections 406(a), 406(b)(1), 406(b)(2) and 407(a) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The proposed exemption was requested in an application filed by the trustees of the Plan, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975).

Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

1. The Plan is a profit sharing plan with approximately 125 participants and assets of approximately $4.9 million as of September 30, 1980. The Clinic is a multi-specialty medical clinic which was founded in 1922. It employs 34 physicians, 123 nurses and administrative personnel and 14 supervisory personnel.

2. An unrelated party, Olympic Bank of Everett, Washington (Olympic), was appointed named fiduciary for the Plan effective October 22, 1980 and given exclusive authority and discretion to manage and control the assets of the Plan. Prior to Olympic's appointment, the three Plan trustees, who are Clinic physician-shareholders, possessed investment authority.

3. In 1962, the Plan constructed a medical clinic at 39th and Colby Avenue in Everett, Washington and leased it to the Clinic. On June 28, 1974, a revised lease agreement (the 1974 Lease) was entered into by the Plan and the Clinic.

4. The Plan proposes to enter into a new lease, the Proposed Lease, to supersede and void the 1974 Lease as of the date an exemption grant is published in the **Federal Register**. The initial term of the Proposed Lease would be 15 years. The rental for the first five years would be $305,000 per year on a triple net basis, which was calculated by an independent appraiser, Macaulay & Associates, Ltd. (Macaulay), to be the property's fair market rental value as of Novermber 30, 1979, provided that this amount is not less than the fair market rental value on the date the exemption is granted. At the fifth and tenth anniversaries of the Proposed Lease, the rental will be adjusted to reflect then current fair market rental value as determined by an independent appraiser, provided that such rental is not less than the rental in the initial five years. The Employer represents that rental paid to the Plan by the Employer in excess of fair market rental value will not cause the annual additions to participants' accounts to exceed the limitations of section 415 of the Code.

5. The Proposed Lease provides for expansion, improvements or renovation to be made only by the Clinic, solely at the Clinic's expense, with any improvements belonging to the Plan at the termination of the Proposed Lease.

6. The Clinic has agreed to indemnify and hold the Plan harmless regarding any loss or damages to the leased premises. The Clinic's net worth as of October 31, 1980 was approximately $2.3 million.

7. Olympic has reviewed the Proposed Lease and has stated that it would be in the best interests of the Plan to enter into the Proposed Lease. Olympic has also agreed to monitor the Proposed Lease to ensure compliance with its terms and conditions.

8. In summary, it is represented that the proposed transactions satisfy the statutory criteria of section 408(a) due to the following:

a. Olympic, an independent Plan fiduciary, has reviewed the Proposed Lease and has stated that it would be in the Plan's best interests to enter into the Proposed Lease;

b. Olympic has exclusive authority and discretion to manage and control Plan assets and would monitor the Proposed Lease to ensure compliance with its terms and conditions;

c. The rental, which would be triple net, would be the fair market rental value as determined by an independent appraiser;

d. If the Proposed Lease is renewed, the rental could be no less than the rental in the initial five years of the Proposed Lease; and

e. The Clinic has agreed to indemnify and hold the Plan harmless regarding any loss or damages to the leased premises.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value, such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

Notice to Interested Persons

Notice of the pending exemption will be given to all interested persons including Plan participants, beneficiaries and terminated participants with vested interests within 15 days of the date the pending exemption is published in the **Federal Register**. Such notice will include a copy of the pending exemption and will inform each recipient of his right to comment on or request a hearing regarding the pending exemption. The notice will be posted on appropriate employee bulletin boards and will be mailed to all terminated participants with vested interests.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a), 406(b)(1), 406(b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to: (1) the Proposed Lease by the Plan to the Clinic, provided that the terms and conditions of the Proposed Lease are and will remain at least as favorable to the Plan as those it could obtain from an unrelated third party; and (2) the Clinic's agreement to indemnify and hold the Plan harmless regarding the Proposed Lease.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 17th day of March, 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-2192]

Proposed Exemption for Certain Transactions Involving the Profit Sharing Plan for the Employees of McKenney's Inc., and Affiliated Companies Located in Atlanta, Ga.

AGENCY: Department of Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the code). The proposed exemption would exempt: (1) the proposed sale of 100% of the common Stock (McKeps Stock) of McKeps Inc. (McKeps) by the Profit Sharing Plan for the Employees of McKenney's Inc., and Affiliated Companies (the Plan) to McKenney's Inc., (the Employer), the sponsor of the Plan and (2) the extension of credit in such sale by the Plan to the Employer. The proposed exemption, if granted, would affect the Employer, the participants and beneficiaries of the Plan and other persons participating in the transaction.

DATES: Written comments and requests for a public hearing must be received by the Department on or before May 4, 1981.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D-2192. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Richard Small of the Department, telephone (202) 523-88881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by the Employer, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan is a profit sharing plan and as of October 31, 1979, had 46 participants and assets of $223,634. The trustee of the Plan is the Trust Company Bank of Georgia (the Trustee). The Trustee is completely independent of the Employer and has the exclusive responsibility for the investment of the assets of the Plan.

2. On December 20, 1963, the Plan subscribed to the McKeps Stock. Upon incorporation, and continuing to the present date, McKeps has been wholly owned by the Plan. On July 26, 1965, the Plan authorized McKeps to construct a building (the Sylvan Road Building) at 2366 Sylvan Road, East Point, Georgia. The Sylvan Road Building so Constructed was leased by McKeps to the Employer for the period beginning March 1, 1966 and extending until February 28, 1981. The construction of the Sylvan Road Building was permanently financed by a $145,000, 15 year, 6 percent loan (the Sylvan Mortgage) from Northwestern National Life Insurance Company, through their agent, Scott Hudgens Realty and Mortgage, Inc. In connection with the construction of the Sylvan Road Building, it was necessary for McKeps to borrow $65,089.78 from the Plan. The $65,089.78 loan (the 1976 Loan) was entered into between McKeps and the Plan on November 20, 1967, at an annual rate of interest of 6 percent with annual payments extending for 17 years, or through November 20, 1984. The 17 year term and 6 percent rate of interest applicable to the 1967 Loan were substantially the same as the term and interest rate on the Mortgage. On May 9, 1972, McKeps borrowed an additional $40,000 from the Plan (the 1972 Loan). The terms of the 1972 Loan were 7 percent annual interest and a 15 year payment period from May 9, 1972, through May 31, 1987. The purpose of the 1972 Loan was to enable McKeps to pay a "boot" balance in connection with a like-kind exchange transaction on April 21, 1972 in which McKeps exchanged with an unrelated party, the Aircond-Atlanta Corp., the Sylvan Road Building for the land and building located at 1056 Moreland Industrial Boulevard, S.E. (the Moreland Property). At the time of this like-kind exchange the Sylvan Mortgage was also exchanged for the mortgage on the Moreland Property. Furthermore, at that time, the lease between the Employer and McKeps of the Sylvan Road Property was cancelled and a new lease between McKeps and the Employer for the Moreland Property was entered into on May 9, 1972, effective for a term of 15 years and one month from May 1, 1972, to May 31, 1987, with an option in favor of the Employer to renew the lease for an additional 10 years until May 31, 1997. The Moreland Property constitutes the only asset of McKeps.

3. The Trustee anticipates that in the near future several participants in the Plan having accounts in the Plan that exceed the value of the Plan's assets other than the McKeps Stock will retire. In this regard, the Trustee represents that the best interests of the participants and beneficiaries of the Plan would not be served if the Plan was forced to distribute benefits in the form of McKeps Stock, since the recipients would become minority shareholders in a privately held corporation, with no ready market for the sale of its stock and which historically has not paid dividends. The Employer is requesting an exemption which would permit it to purchase (the Purchase) the McKeps Stock and thus give the Plan the liquidity necessary to pay anticipated benefits.

4. Prior to the Trustee negotiating the terms of the Purchase, it obtained an independent appraisal of the Moreland Property performed by Kirkland & Company (Kirkland) located in Atlanta, Georgia. Kirkland represented that as of April 1, 1980, the Moreland Property had a market value of $320,000. The terms of the Purchase have been negotiated at arm's length between the Trustee and the Employer. The sale price of the McKeps Stock will be $376,633. The cash to the Plan at settlement will be $163,495 which has been adjusted for a $3,351 addition for cash owned by McKeps and a deletion of $5,047 for accrued expenses and income taxes due of McKeps.

At settlement on the Purchase, the Employer will assume the Moreland Property mortgage ($161,482) and the payments thereon. The Employer will also assume the 1967 Loan and the 1972 Loan (together, totalling $49,960) with the payments thereon with the exception that on June 30, 1984 the Employer will pay off the remaining principal balance on such loans.

5. Prior to the Trustee negotiating for the sale of the McKeps Stock to the Employer, the Trustee attempted to sell the Moreland Property to an independent third party. The Moreland Property was listed with the Hailey Realty Company in the spring of 1975 through the fall of 1977. No offers were made for the purchase of the Moreland Property. The Trustee represents that the difficulty encountered in the effort to sell the Moreland Property was due, in part, to a decline in property values generally in the area in which the Moreland Property is located. In this regard, the Trustee represents that the following events, occurring subsequent to the 1972 acquisition of the Moreland Property by McKeps, have contributed to the decrease in property values in this area: (1) uncertainty over whether proposed Georgia State Highways 485 and 166 will be constructed through the area (if constructed, substantial business disruption would occur); (2) recent major highway reconstruction on Moreland Industrial Boulevard has caused a substantial number of local businesses to close or relocate; and (3) recent construction of a large low income housing project in the proximity of the Moreland Property has also had a depressing impact on land values.

6. In summary, the applicant represents that the proposed transactions meet the statutory criteria for an exemption under section 408(a) of the Act as follows: (1) an independent Trustee approved and negotiated the terms of the Purchase; (2) an independent appraiser valued the Moreland Property; (3) the Purchase is necessary for the Plan to meet the obligations due to its participants; (4) the Moreland Property is in an area of declining property values; and (5) the Trustee was unable to sell the Moreland Property to an independent party.

Notice to Interested Persons

Within ten days of its publication in the **Federal Register** a copy of the notice of pendency and a statement informing participants and beneficiaries of the Plan of their right to comment or request a hearing within the prescribed time period will be provided to all participants and beneficiaries of the Plan.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person

from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to: (1) the proposed sale of the McKeps Stock by the Plan to the Employer for $378,633 subject to the conditions as described herein and provided that this is at least the fair market value of the McKeps Stock at the time of the sale; and (2) the extension of credit in such sale by the Plan to the Employer provided that the Plan will receive terms and conditions on the extension of credit at least equal to that which it would receive from an unrelated party in a similar transaction.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 17th day of March, 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-2371]

Proposed Exemption for Certain Transactions Involving Taylor Enterprises, Inc., Profit Sharing Plan Located in Mechanicsburg, Pennsylvania

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the proposed cash sale of a parcel of real property (the Property) located in Ocean City, Maryland by the Taylor Enterprises, Inc. Profit Sharing Plan (the Plan) to Taylor Enterprises, Inc. (the Employer,) a party in interest to the Plan. The proposed exemption, if granted, would affect the Plan fiduciaries, participants and beneficiaries and the Employer.

DATES: Written comments and requests for a public hearing must be received by the Department on or before May 11, 1981.

ADDRESSES: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D–2371. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Sandler of the Department, telephone (202) 523–8195. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by the Employer, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan is a profit sharing plan with eight participants and total assets of approximately $165,000 as of December 19, 1980. The Plan fiduciaires are the trustee, Commonwealth National Bank (the Bank), which is otherwise unrelated to the Plan and the Employer, and Charles Taylor, president and principal shareholder of the Employer.

2. On August 15, 1980, the Plan purchased the Property which is a two-bedroom condominium townhouse, from an unrelated third party for $78,900 with closing costs of $2668.18 for a total cost of $81,588.18. The Plan expended an additional $11,956.49 to furnish the Property and $695 for an extended deck. The Plan has therefore expended a total of $94,239.67 on the Property.

3. The Plan purchased the Property for its income and appreciation potential. However, the Property was placed with a rental agent on September 15, 1980 and has not as yet been rented. Furthermore, the applicant states it does not believe the Property's appreciation in value will be as great as originally anticipated. The applicant also states that Plan assets currently invested in the Property (currently representing approximately 57% of Plan assets) could be more productively invested elsewhere.

4. Therefore, the Plan proposes to sell the Property to the Employer for use in the Employer's business. An independent appraiser, Robert L. Jester, has appraised the Property and concluded that the fair market value was $82,900 as of December 10, 1980. This represents an increase in fair market value of $4,000 over the Plan's original purchase price. The purchase price will be the greater of (1) $98,239.67 ($94,239.67 in Plan expenditures plus the $4,000 appreciation in the Property) or (2) the sum of the fair market value at the time of sale plus all Plan expenditures from the time of purchase to the time of sale. The Employer represents that if the amount paid to the Plan by the Employer is in excess of the fair market value plus expenditures relating to the Property, such excess amount will not cause the annual additions to participants' accounts to exceed the limitations of section 415 of the Code. The purchase price will be paid to the Plan entirely in cash and their will be no sales commission.

5. In summary, the applicant represents that the proposed transaction satisfies the statutory criteria of section 408(a) of the Act due to the following:

a. the Property has been appraised by an independent appraiser;

b. the purchase price will be paid in cash;

c. the Plan fiduciaries represent that the Plan will be able to invest the sale proceeds in more productive investments;

d. the Plan will be reimbursed for all expenditures it has made regarding the Property; and

e. the Property will be sold at a profit.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Internal Revenue Code, including sections 401(a)(4), 404 and 415.

Notice to Interested Persons

Notice of the proposed exemption will be given to all interested persons including the participants and beneficiaries of the Plan, on or before April 8, 1981. The notice will contain a copy of the **Federal Register** Notice of Proposed Exemption and will inform each recipient of his right to comment on or request a hearing with regard to the proposed exemption. The notice will be hand-delivered or sent by first class mail to all interested persons.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusion benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Futhermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the sale of the Property by the Plan to the Employer for a cash purchase price of the greater of (1) $98,239.67 or (2) the sum of the fair market value of the Property at the time of sale plus all Plan expenditures relating to the Property from the time of purchase to the time of sale.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 17th day of March, 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-1268]

Proposed Exemption for Certain Transactions Involving the Thompson Steel Company, Inc., Pension Trust A Located in Canton, Massachusetts

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and from the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the sale of corporate bonds by the Thompson Steel Company, Inc. Pension Trust A (the Trust) to the Paul Revere Life Insurance Company (PRL), a party in interest as defined in section 3(14) of the Act. The proposed exemption, if granted, would affect Trust participants and beneficiaries, the trustees of the Trust (the Trustees), PRL, Thompson Steel Company, Inc. (Thompson Steel) and certain of their affiliates.

DATES: Written comments and requests for a public hearing must be received by the Department on or before May 4, 1981.

EFFECTIVE DATE: If the proposed exemption is granted, the exemption will be effective August 8, 1977.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D-1268. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Sandler of the Department, telephone (202) 523-8195. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and from the sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed on behalf of the Trust, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicants.

1. The Trust is the investment vehicle for five pension plans—Steelworkers Pension Plans Locals 773, 5211, 7659, 3234 and 3705.

2. In July of 1977, the Trustees (Robert Dearing, George Ryan and Fred Giles, all of whom were officers of Thompson Steel) decided to liquidate the Trust's holdings in stocks and bonds and to invest Trust funds in a minimum guarantee annuity. Consequently, the Trustees ordered the Trust's investment advisor, Paul Revere Equity Management Company (PREMCO) to liquidate the Trust's portfolio prior to December 31, 1977 in order to accomplish this changeover. At this time, PREMCO was wholly owned by Paul Revere Equity Sales Co. which was in turn wholly owned by PRL, thus making PRL a party in interest with respect to the Plan.

3. PREMCO offered all of the assets of the Trust for sale to PRL in order to save brokerage commissions for the Trust and PRL. PRL chose two bond issues from the Trust's portfolio. The first bonds sold, on August 8, 1977, were Montgomery Ward Credit 8¼ percent bonds due June 30, 2002. Their face value was $100,000 and they were sold for $99,375 cash, which was their market value on the date of sale, as determined by Salomon Brothers, an independent stockbroker. The second sale, on October 20, 1977, involved Diamond International Corp. 8.35 percent bonds due September 1, 2006. Their face amount was $100,000 and they were sold for $101,350 cash, which was their market value on the date of sale, as determined by Smith Barney, Harris Upham & Co., an independent stockbroker.

4. The market value determination utilized was based on a round lot transaction even though the issues involved were odd lots. Because of the round lot valuation and the absence of brokerage commissions, the Trust's proceeds from the sales, exceeded what would have been secured from any other purchaser.

5. The Trust's portfolio was liquidated as ordered by the Trustees, and the annuity contracts were purchased from Mutual of New York and Occidental Life Insurance Company. Neither of these companies is related to any of the parties involved in the transactions described herein.

6. It is represented that none of the parties involved in the subject transactions had any knowledge that these transactions were prohibited by the Act. Only July 31, 1978, PRL was notified by the Plan's outside counsel that the bond sales were prohbited transactions. The applicants emphasize that as soon as they were made aware that the bond sales were prohibited transactions, they immediately and voluntarily decided to correct the prohibited transactions by rescinding the bond sales. Accordingly, immediately after being notifed, PRL set into action the process by which PRL voluntarily corrected the prohibited transactions by rescinding the original bond sales on December 28, 1978. It is represented that the rescission satisfied the requirements for a "correction" pursuant to Foundation Excise Tax Regulation section 53.4941(e)-1(c).[1] Shortly after the correction, the applicants applied for the exemption described herein.

[1] Foundation Excise Tax Regulation section 53.4941(e)-1(c) applies to section 4975 prohibited transactions by reason of Temporary Pension Excise Tax Regulation section 141.4975-13. Under section 53.4941(e)-1(c)(1) of the Foundation Excise Tax Regulations, any correct pursuant to Code section 4941 is not an act of self-dealing and therefore not a prohibited transaction under section 4975 by reason of the section 141.4075-13 temporary regulation.

Similarly, the Department has determined that a correction of a prohibited transaction is not itself a prohibited transaction under section 406 of the act, provided that the correction complies with the section 141.4975-13 temporary regulation. Therefore, no exemption is being proposed for the resale of the bonds.

7. In summary, it is represented by the applicants that the bond sales satisfed the criteria of section 408(a) due to the following:

(1) they were on time occurrences for cash;

(2) no broker's commission was paid by the Trust

(3) they were made at a round lot valuation that was independently determined; and

(4) they were made as part of the liquidation of all Trust assets, and were corrected voluntarily as soon as it was learned they were prohibited transactions.

Notice to Interested Persons

Notice of the proposed exemption will be provided to all interested persons, including Thompson Steel, the Trustees, PREMCO, PRL and Trust participants and beneficiaries. This notice will contain a copy of the notice of pendency of the exemption was pubished in the **Federal Register**, as well as information on the right of interested persons to request a hearing or comment regarding the proposed exemption within the specified time period. The notice will be provided to Trust participants currently employed by Thompson Steel, within ten days after the publication of the notice of pendency, by posting it in all locations customarily used for employee communications. The notice will be mailed within the same ten day period to Trust participants who are not currently employed by Thompson Steel, beneficiaries, the Trustees of the Trust, PREMCO and PRL.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things require a fiduciary to discharge his duties respecting the plan, solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must cooperate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1) (E) and (F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the above described sale by the Trust to PRL, of Montgomery Ward Credit 8¼ percent bonds due June 30, 2002 and Diamond International Corp. 8.35 percent bonds due September 1, 2006, provided that the amount the Trust received for each sale of bonds was not less than their fair market value on the date of sale.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in this application are true and complete, and that the application accurately describes all material terms of the transactions which are the subject of the exemption.

Signed at Washington, D.C. this 17th day of March 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc. 81-8831 Filed 3-23-81; 8:45 am]

BILLING CODE 4510-29-M

[Exemption Applicant No. D-2219]

Withdrawal of Proposed Exemption for Certain Transactions Involving the United Cotton Goods Company, Inc.

In 45 FR 85847 of the Federal Register, dated December 30, 1980, the Department of Labor (the Department) published a notice of pendency of a proposed exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 and from certain taxes imposed by the Internal Revenue Code of 1954. The notice of pendency concerned an application filed by counsel on behalf of United Cotton Goods Company, Inc.

By letter dated February 26, 1981, the applicant's representative notified the Department that the applicant no longer sought an exemption for the transaction described in the above cited notice. Accordingly, the representative requested that the application for exemption be withdrawn from consideration by the Department.

Signed at Washington, D.C., this 18th day of March 1981.

Ian D. Lanoff,

Administrator for Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-2152]

Proposed Exemption for Certain Transations Involving the Utah Carpenters and Cement Masons Vacation Trust Fund Located in Salt Lake City, Utah

AGENCY: Department of Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act). The proposed exemption would exempt the transfer of certain forfeited funds from the Utah Carpenters and Cement Masons' Vacation Trust Fund (the Vacation Plan) to the Utah Carpenters and Cement Masons' Health and Welfare Trust Fund (the Welfare Plan). The proposed exemption, if granted, would affect the trustees, participants and beneficiaries of the Vacation Plan and of the Welfare Plan, and other persons participating in the transaction.

DATES: Written comments and request for a public hearing must be received by the Department of Labor on or before May 8, 1981.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D-2152. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Kathleen A. Bauer of the Department of Labor, telephone (202) 523-8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(b) (2) of the Act. The proposed exemption was requested in an application filed on behalf of the Vacation Plan, pursuant to section 408(a) of the Act and in accordane with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Summary of Facts and Representations

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Vacation Plan and the Welfare Plan are welfare plans established in accordance with section 302 of the Labor-Management Relations Act of 1947, as amended. The participants of both Plans are the same, i.e., certain employees covered by collective bargaining agreements between the Utah District Council of Carpenters and affiliated local unions (all of which are affiliated with the International Brotherhood of Carpenters, the Building and Construction Trade Council of Utah and with the AFL-CIO having jurisdiction over work performed in the State of Utah) and the Associated General Contractors of America, Utah Chapter, Utah Builders Bargaining Unit, and the Masonry Contractors' Association of Utah.

2. The Vacation Plan was established on or about December 1, 1966 to receive employer contributions commencing in approximately May, 1967. In accordance with collective bargaining agreements, employer contributions to the Vacation Plan terminated as of July 1975. The Vacation Plan is administered by a Board of Trustees consisting of five union representatives and five employer representatives. The same individuals who serve as Trustees of the Vacation Plan also serve as the Trustees of the Welfare Plan.

3. Under the terms of the Agreement and Declaration of Trust establishing the Vacation Plan (the Agreement), the sums credited to each participant's vacation account for work performed during the calendar year are distributed to participants on or about April 1 of the following year. The benefits are distributed in the form of checks mailed to the participants. According to the Agreement, any participant who fails to apply for his benefits within the time prescribed or who fails to cash his vacation check within 90 days following its date of issuance is deemed to have elected to contribute the amount of his benefit to the maintenance of the Vacation Plan. The check which was issued to the participant becomes void and any amounts so contributed are transferred to the administrative account of the Vacation Plan for legal utilization or disbursement as determined by the Trustees of the Vacation Plan.

4. Many vacation checks mailed to participants have been returned to the Vacation Plan because the participant has moved without leaving a forwarding address. When such checks are returned, the Vacation Plan furnishes to the Utah Carpenters and Cement Masons District Council and various affiliated local unions a list of participants whose checks were returned. The local unions review their records and also post the list for the membership to review in order to generate current address information for the listed participants. In addition, the employer who last submitted contributions on behalf of the missing participant is contacted to determine if the employer has a more current address for the participant. If the participant cannot be located the amount of the vacation check is deemed contributed to the maintenance of the Vacation Plan as outlined above.

5. The Trustees have administered the forfeiture provisions liberally, permitting a participant to apply for and receive vacation benefits after the 90-day period formally prescribed in the Agreement. At the time the Vacation Plan was terminated, the Trustees determined that no action would be taken with respect to the distribution of the forfeited funds until such time as all claims against the Vacation Plan had been presented. The Trustees further determined that four years from the termination was a reasonably sufficient period within which such claims would be presented. The Vacation Plan holds $77,477.17 which represents forfeitures for fiscal years 1973, 1974 and 1975. (All forfeitures accumulated up to 1973 were disbursed to participants in the form of a dividend.) The Trustees now propose to transfer that amount to the Welfare Plan. The proposed transfer of the forfeited funds has been approved by a vote of the various affiliated local unions as well as by a vote of the labor and management trustees of both Plans.

6. The Trustees have also determined that the Welfare Plan will indemnify the Vacation Plan against any and all claims, rights and interests that a prior plan participant could enforce against the Vacation Plan if any adverse consequences result from the transfer of the forfeited funds to the Welfare Plan.

7. It is represented that the proposed transaction will satisfy the statutory criteria of section 408(a) of the Act because: (1) it is a one-time transfer of assets between the Plans; (2) it will enhance the level of benefits currently being received by participants of the Welfare Plan; (3) it will eliminate the administrative costs which would otherwise be incurred by the Vacation Plan in distributing the forfeited funds to its remaining participants on a pro-rata basis; and (4) the rights of participants of the Vacation Plan are protected by means of the indemnification by the Welfare Plan for any future claims for forfeited benefits or other liabilities which may arise as a result of the transfer of the funds to the Welfare Plan.

Notice to Interested Persons

On or before April, 8, 1981, notice of the proposed exemption will be: (1) published in the monthly newsletter and mailed to members of Local 184 International Brotherhood of Carpenters and Joiners of America; (2) mailed to all affiliated local unions to be included in any monthly mailings of such locals, posted at all hiring halls frequented by members of such locals and generally made available at all meeting places; (3) mailed to all contributing and participating employers to be posted conspicuously in working places; and (4) posted at the offices of the Utah Carpenters' and Cement Masons' Health and Welfare Administrative Offices in Salt Lake City. The notice will include a copy of this notice of pendency and will inform interested persons of their right to comment and/or request a hearing with respect to the proposed exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(a) and 406(b) (1) and (3) of the Act;

(3) Before an exemption may be granted under section 408(a) of the Act the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(b)(2) of the Act shall not apply to the transfer by the Vacation Plan to the Welfare Plan of uncommitted reserves in the amount of approximately $77,000, together with any additional forfeitures which may accrue to the Vacation Plan due to the termination of the Plan.

The proposed exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C. this 17th day of March 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

Office of the Secretary

[TA-W-12,060]

Carmet Co., Materials Division, Madison Heights, Mich., Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was inititated on January 12, 1981 in response to a petition received on January 6, 1981 which was filed by the United Steel Workers of America on behalf of workers at the Carmet Company, Materials Division, Madison Heights, Michigan.

The petitioning group of workers are subject to an ongoing investigation for which a determination has not yet been issued (TA-W-10,585). Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed in Washington, D.C. this 17th day of March 1981.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 81-8937 Filed 3-23-81; 8:45 am]

BILLING CODE 4510-28-M

[TA-W-12,129]

Dana Corp., Ecorse, Mich.; Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on January 28, 1981 in response to a petition received on January 16, 1981 which was filed on behalf of workers at the Ecorse, Michigan plant of the Parish Division of Dana Corporation.

A negative determination applicable to the petitioning group of workers was issued on June 19, 1980 (TA-W-7665). The Department issued a negative determination regarding application for reconsideration on October 8, 1980. No new information is evident which would result in a reversal of the Department's previous determination. Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed in Washington, D.C. this 17th day of March 1981.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-10,985]

Rockwell International, Inc., Auto Mechanical Devices Division; Logansport, Ind., Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on September 22, 1980 in response to a worker petition received on September 15, 1980 which was filed on behalf of workers at Rockwell International, Incorporated, Auto Mechanical Devices Division, Logansport, Indiana.

A determination applicable to the petitioning group of workers was issued on December 15, 1980 (TA-W-8055). Workers engaged in employment related to the production of mechanical springs were denied eligibility to apply for adjustment assistance. Workers engaged in employment related to the production of suspension springs were certified eligible to apply for adjustment assistance. The expiration date of the certification is December 15, 1982.

No new information is evident which would result in a reversal of the Department's previous determination. Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, D.C. this 17th day of March 1981.

BILLING CODE 4510-28-M

[TA-W-10,705]

Weinman Pump Manufacturing Co., Columbus, Ohio; Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely.

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The investigation was initiated on September 15, 1980 in response to a petition which was filed by the United Steelworkers of America, Local 3970 on behalf of workers at Weinman Pump Manufacturing Company, Columbus, Ohio, a subsidiary of L.F.E. Corporation. Prior to July 11, 1980, workers at Weinman Pump produced and machined raw iron castings and assembled these castings into centrifugal pumps; since July 11, 1980 the workers have machined iron castings and assembled them into centrifugal pumps, but have not produced raw foundry castings.

With respect to all hourly workers, except those in the assembly, fabrication, and file bench/deburring departments, and with respect to all salaried workers engaged in employment related to the production of raw or machined pump castings at Weinman Pump Manufacturing Company, the investigation revealed that all of the requirements have been met.

L.F.E. Corporation is currently in the process of transferring all production of raw and machined pump castings from its Weinman Pump plant to a new company facility in Belfast, Northern Ireland. This process began when the Weinman foundry closed in July 1980 and will be completed between March and June 1981.

L.F.E. Corporation began importing raw castings from its Belfast facility in the second quarter of 1980, and machined castings in the fourth quarter of 1980. Total company imports of raw and machined pump castings increased steadily from the second through the fourth quarters of 1980, and are projected to increase further in the first quarter of 1981. The Belfast plant is scheduled to be supplying the Weinman Pump plant with most of its requirements for raw and machined pump castings by the second quarter of 1981.

With respect to hourly workers in the assembly (#3240), fabrication (#3347), and file bench/deburring (#3348) departments and salaried workers who are not engaged in employment related to the production of either raw or machined pump castings at Weinman Pump Manufacturing Company, the investigation revealed that criterion (3) has not been met.

Hourly workers assigned to the assembly, fabrication, and file bench/deburring departments at Weinman Pump Manufacturing Company are engaged in employment related to the assembly of centrifugal pumps and/or to the manufacture of non-foundry pump components. Workers in these departments and most salaried workers at Weinman Pump have not been engaged directly or indirectly in foundry or machine shop operations, and therefore have not been affected by the shutdown of the Weinman foundry or by increased company imports of pump castings.

U.S. imports of centrifugal pumps decreased in value terms in the period January-November 1980 compared to the period January-November 1979. U.S. exports greatly exceeded U.S. imports of centrifugal pumps throughout the 1975–1979 period. Sales of centrifugal pumps at Weinman Pump Manufacturing Company increased from 1978 to 1979 and in the first half of 1980 compared to the first half of 1979. Subsequent declines in plant sales took place during a period in which U.S. imports of centrifugal pumps declined.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with raw and machined pump castings produced at Weinman Pump Manufacturing Company, Columbus, Ohio, contributed importantly to the decline in production of pump castings and to the total or partial separation of all hourly workers, except those in the assembly, fabrication, and file bench/deburring departments, and of all salaried workers engaged in employment related to the production of raw or machined pump castings at that firm. In accordance with the provisions of the Act, I make the following certification:

All hourly workers of Weinman Pump Manufacturing Company, Columbus, Ohio, except those in the assembly, fabrication, and file bench/deburring departments, who became totally or partially separated from employment on or after July 1, 1980 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974; and

All salaried workers of Weinman Pump Manufacturing Company, Columbus, Ohio, who are engaged in employment related to the production of raw or machined pump castings, and who became totally or partially separated from employment on or after July 1, 1980 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

After careful review, I further determine that all hourly workers in the assembly (#3240), fabrication (#3347), and file bench/deburring (#3348) department, and all salaried workers who are not engaged in employment related to the production of raw or machined pump castings at Weinman Pump Manufacturing Company, Columbus, Ohio, are denied eligibility to apply for adjustment assistance under Section 233 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th of March 1981.

James F. Taylor,

Director, Office of Management, Administration and Planning.

BILLING CODE 4510-28-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards Subcommittee on Safety Philosophy, Technology and Criteria; Notice of Meeting

The ACRS Subcommittee on Safety Philosophy, Technology and Criteria will hold a meeting on April 8, 1981, in Room 1046, 1717 H Street, NW., Washington, DC to discuss matters related to the development of safety criteria for new (beyond NTCP) LWRs.

In accordance with the procedures outlined in the **Federal Register** on October 7, 1980, (45 FR 66535), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Wednesday, April 8, 1981—11:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Dr. Richard Savio (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EST.

Dated: March 17, 1981.

John C. Hoyle,

Advisory Committee Management Office

[FR Doc. 81-8783 Filed 3-23-81; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Reactor Operations

The ACRS Subcommittee on Reactor Operations will hold a meeting on Wednesday, April 8, 1981 in Room 1167 at 1717 H Street, N.W., Washington, DC. The Subcommittee will review Congressman Udall's inquiries on ATWS which were prompted by the June 28, 1980 Browns Ferry 3 partial failure to scram.

In accordance with the procedures outlined in the Federal Register on October 7, 1980, (45 FR 66535), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions during which the Subcommittee finds it necessary to discuss proprietary and Industrial Security Information. One or more closed sessions may be necessary to discuss such information. (Sunshine Act Exemption 4). To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Wednesday, April 8, 1981—1:00 p.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Richard K. Major (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m., EST.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting to protect proprietary and Industrial Security information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: March 17, 1981.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 81-8782 Filed 3-23-81; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on NRC Safety Research Program; Meeting

The ACRS Subcommittee on the NRC Safety Research Program will hold a meeting on April 8, 1981 in Room 1046, 1717 H Street, N.W., Washington, DC.

The Subcommittee will be considering predecisional budget information associated with the NRC's Long-Range Research Program Plan as requested by the Nuclear Regulatory Commission. In order to perform this review, the ACRS must be able to engage in frank discussion with members of the NRC Staff. For the reason just stated, such a discussion would not be possible if held in public session.

I have determined, therefore, that it is necessary to close this meeting to prevent frustration of this aspect of the ACRS' statutory responsibilities. The authority for such closure is Exemption 9(B) to the Government in the Sunshine Act (522b(c)(9)(B)).

Further information can be obtained by a prepaid telephone call to the Designated Federal Employee, Mr. Sam Duraiswamy (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., est.

Date: March 19, 1981.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 50-272]

Public Service Electric & Gas Co. et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 34 to Facility Operating License No. DPR-70, issued to Public Service Electric and Gas Company, Philadelphia Electric Company, Delmarva Power and Light Company and Atlantic City Electic Company (the licensees), which revised Technical Specifications for operation of the Salem Nuclear Generating Station, Unit No. 1 (the facility) located in Salem County, New Jersey. The amendment is effective as of the date of issuance.

The amendment revises the Radiological Technical Specifications to incorporate new requirements related to reactor decay heat removal capability.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated October 15, 1980, (2) Amendment No. 34 to License No. DPR-70, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Salem Free Public Library, 112 West Broadway, Salem, New Jersey. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 6th day of March, 1981.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-305]

Wisconsin Public Service Corp. et al.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory

Commission (the Commission) has issued Amendment No. 31 to Facility Operating License No. DPR–43, issued to Wisconsin Public Service Corporation, Wisconsin Power and Light Company, and Madison Gas and Electric Company (the licensees), which revised Technical Specifications for operation of the Kewaunee Nuclear Plant (the facility) located in Kewaunee, Wisconsin. The amendment was effective January 30, 1981.

The amendment was authorized by phone on January 30, 1981 and was confirmed by letter on the same date. The amendment revises the one-time extension of the test frequency interval for turbine stop and governor valves from monthly to a period of four months, said extended period to end April 30, 1981. After April 30, 1981, monthly tests will again be required. The amendment was authorized on an expedited basis to maintain the plant at a steady-state condition and avoid a shutdown transient shown by our evaluation to be unnecessary but required by Technical Specifications unless amended.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the request for amendment dated January 29, 1981, (2) the Commission's letter to the licensee dated January 30, 1981, (3) Amendment No. 31 to License No. DPR–43 and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Kewaunee Public Library, 314 Milwaukee Street, Kewaunee, Wisconsin 54216. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 9th day of March 1981.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Federal Employees Health Benefits Program; Termination of Los Padres Group Health Plan's Participation in the Program

AGENCY: Office of Personnel Management.

ACTION: Notice of health plan termination.

SUMMARY: Pursuant to the authority contained in section 8902 of title 5, United States Code, the Office of Personnel Management hereby announces that the participation of the Los Padres Group Health Plan, San Luis Obispo, California, in the Federal Employees Health Benefits (FEHB) Program has been terminated.

EFFECTIVE DATE: March 1, 1981.

FOR FURTHER INFORMATION CONTACT:

Karen J. Liebach, Compensation Group, Comprehensive Plans Division, Washington, D.C. 20415, 202–632–6176.

SUPPLEMENTARY INFORMATION: Due to the termination of the Los Padres Group Health Plan effective March 1, 1981, each Federal employee or annuitant enrolled in the plan who wishes to continue coverage under the FEHB Program must change to another plan offered in the area. The effective date of the change will be the first day of the first pay period beginning on or after March 1, 1981. To effect this change in health plans, the employee or annuitant should submit a completed Standard Form 2809 to his or her personnel office or retirement system. Benefits under the Los Padres plan will continue to be provided up to the date coverage under the new plan begins.

Office of Personnel Management.

Beverly McCain Jones,

Issuance System Manager.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 1–4192]

Canadian Javelin Limited, Common Stock, no par Value; Application To Withdraw From Listing and Registration

March 18, 1981.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 (the "Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock of Canadian Javelin Limited (the "Company") has been listed and registered on the Amex since 1959. Trading in the Company's stock on the Amex has been suspended since April 1975. The Company has registered its common stock with the National Association of Securities Dealers Automated Quotation System and feels that the dual listing would not be in the best interest of the Company or the holders of its common stock.

Any interested person may, on or before April 6, 1981, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81-8818 Filed 3-23-81; 8:45 am]

BILLING CODE 8010-01-M

Cincinnati Stock Exchange; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

The above named national securities exchange has filed applications with the Securities and Exchange Commission

pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Central Telephone & Utilities Corp., Common Stock, $2.50 Par Value (File No. 7-5882)
New York State Electric & Gas Corp., Common Stock, $5% Par Value (File No. 7-5883)

These securities are listed and registered on one or more other national securities exchanges and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before April 6, 1981 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[File No. 22-10971]

Jersey Central Power & Light Co.; Application and Opportunity for Hearing

March 17, 1981.

Notice is hereby given that Jersey Central Power & Light Company ("JCP&L") has filed an application pursuant to Section 310(b)(1)(ii) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeship of J. Henry Schroder Bank & Trust Company ("Schroder") under two existing indentures of JCP&L is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Schroder from acting as trustee under both of such indentures.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in that Section), it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that its trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under both of such indentures.

JCP&L alleges that:

(1) Effective July 31, 1973, New Jersey Power & Light Company ("NJP"), a New Jersey corporation, was merged into JCP&L, a New Jersey corporation, the applicant herein, pursuant to a Certificate of Merger filed July 30, 1973 to become effective July 31, 1973.

(2) An aggregate of $760,316,000 principal amount of First Mortgage Bonds are currently outstanding under the JCP&L indenture, dated as of March 1, 1946, as supplemented by 37 Supplemental Indentures thereto (the "JCP&L Indenture"). J. Henry Schroder Bank & Trust Company is acting as Successor Trustee under the JCP&L Indenture, which is qualified under the Act.

(3) An aggregate of $39,200,000 principal amount of First Mortgage Bonds are currently outstanding under the Mortgage and Deed of Trust, dated as of March 1, 1944, to Guaranty Trust Company of New York (now Morgan Guaranty Trust Company of New York), Trustee, as amended by 20 Supplemental Indentures thereto (the "NJP Indenture"). The NJP Indenture is qualified under the Act.

(4) Upon the effectiveness of the merger of NJP into JCP&L, JCP&L assumed all of NJP's obligations under the JCP&L Indenture.

(5) Morgan Guaranty Trust Company of New York, Trustee, under the NJP Indenture, has indicated to JCP&L that it desires to resign as Trustee, and Schroder has indicated its willingness to assume the role of Successor Trustee under the NJP Indenture.

(6) The First Mortgage Bonds issued under the JCP&L Indenture and the First Mortgage Bonds issued under the NJP Indenture are of equal rank and without priority or preference of either one over the other.

(7) While there are minor differences, the default provisions of JCP&L and NJP Indentures are substantially similar.

(8) The mortgage property that JCP&L acquired from NJP as a result of the merger and additions thereto is subject only to the first lien of the NJP Indenture, and JCP&L's mortgaged property and additions thereto is subject to the first lien of the JCP&L Indenture.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to such application which is a public document on file in the office of the Commission's Public Reference Section, 1100 L Street, N.W., Washington, D.C.

Notice is further given that any interested person may, not later than April 10, 1981 request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[Release No. 21964 (70-6561)]

Middle South Utilities, Inc.; Proposal To Issue and Sell Common Stock Pursuant To a Dividend Reinvestment and Stock Purchase Plan; Amendment of Plan To Include Employee Participation

March 16, 1981.

Notice is hereby given that Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935

("Act") designating Sections 6(a) and 7 of the Act and Rules 50(a)(5) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

By orders dated May 20, 1976, April 3, 1978, April 4, 1979 and May 12, 1980 (HCAR Nos. 19538, 20460, 20993 and 21566) Middle South was authorized to issue and sell from time to time through June 30, 1981, a maximum of 4,500,000 shares of its authorized but unissued common stock, $5 par value, pursuant to a Dividend Reinvestment and Stock Purchase Plan ("Plan"). Middle South has issued and sold 3,448,273 of the 4,500,000 so authorized and expects to sell the balance in the near future.

Middle South now proposes to issue and sell an additional authorized but unissued 8,000,000 shares of common stock ("Additional Common Stock") under the terms of the Plan. These additional shares should be sufficient to provide for the requirements of the Plan through December 31, 1982. Middle South intends to apply the proceeds from the sale of the Additional Common Stock toward the payment of short-term bank debt outstanding from time to time and for other corporate purposes.

Middle South also proposes to amend the Plan to permit employees of Middle South and its subsidiaries who are beneficial owners of Common Stock of Middle South through participation in the Employee Stock Ownership Plan of Middle South Utilities, Inc. and Subsidiaries and/or the Middle South Utilities System Savings Plan to participate in the Plan. These employees would join the Plan by making an initial cash payment. Thereafter, they would have cash dividends on shares in their Plan account, as well as any optional cash payments, invested in the purchase of additional shares of Common Stock of Middle South.

Middle South requests an exception from the competitive bidding requirements of Rule 50 pursuant to subparagraph (a)(5) for the issue and sale of the common stock pursuant to the Plan.

No state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

The fees, commissions and expenses to be incurred in connection with the proposed transaction in the first year are estimated to be $340,000 including $230,000 for bank fees and service charges, $25,000 for listing fees of stock exchanges, $25,000 for printing and engraving costs, and $20,000 for legal fees.

Notice is further given that any interested person may, not later than April 9, 1981, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated address and proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 21566; (70-6564)]

Middle South Utilities, Inc.; Proposed Issuance and Sale of Common Stock at Competitive Bidding

March 17, 1981.

Notice is hereby given that Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6(a) and 7 of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Middle South proposes to issue and sell at competitive bidding up to 10,000,000 authorized shares of common stock with $5 par value to underwriters or investment bankers who will promptly make a public offering of such shares. Middle South estimates that sale of 10,000,000 shares at a sale price of $12.50 per share would generate proceeds of $125,000,000; Middle South reserves the right to reduce the number of shares which shall constitute the additional common stock to less than 10,000,000 shares. In the event the company exercise this right, it will give appropriate notice of such reduction on a business day and not later than 28 hours prior to the time fixed for the presentation and opening of bids.

The net proceeds to be derived from the sale of the additional common stock will be applied toward the reduction of the then outstanding bank loans, presently estimted to be $154,000,000, made by various commercial banks to Middle South pursuant to a Credit Agreement, dated as of June 27, 1980, and approved by this Commission (HCAR No. 21628).

a statement of the fees and expenses incurred in connection with the proposed transaction will be provided by amendment.

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than April 10, 1981, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act or the Commission may grant exemption from such rules as provided in Rule 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in

this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[812-4672]

Mutual of Omaha Cash Reserve Fund, Inc.; Notice of Filing of Application for Order Pursuant to Section 6(c) of the Act Exempting Applicant From the Provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 Thereunder

March 18, 1981.

Notice is hereby given that Mutual of Omaha Cash Reserve Fund, Inc. ("Applicant"), 3102 Farnam Street, Omaha, Nebraska 68131, an open-end, diversified, management company registered under the Investment Company Act of 1940 ("Act"), filed an application on April 28, 1980, and an amendment thereto on March 9, 1981, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder, to the extent necessary to permit Applicant to value its assets using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it was organized as a Nebraska corporation on March 21, 1980, and its investment adviser is Mutual of Omaha Fund Management Company ("Adviser"). Applicant represents that its investment objective is to provide as high a level of current income as is consistent with preservation of capital and maintenance of liquidity by investing in a variety of money market instruments maturing in one year or less. Applicant states that it intends to invest in securities issued by the United States Treasury or guaranteed by the United States Government or its agencies, authorities or instrumentalities; certificates of deposit and bankers' acceptances issued by domestic banks and savings and loan institutions; corporate obligations rated Aa or better by Moody's Investors Service ("Moody's") or AA or better by Standard & Poor's Corporation ("S&P") at time of purchase; commercial paper rated Prime-1 by Moody's or A-1 by S&P at time of purchase; and repurchase agreements with respect to the foregoing obligations.

As here pertinent, Section 2(a)(41) of the Act defines value to mean: (1) with respect to securities for which market quotations are readily available, the market value of such securities, and (2) with respect to other securities and assets, fair value as determined in good faith by an investment company's board of directors.

Rule 22c-1 provides, in part, that no registered investment company or principal underwriter therefor issuing any redeemable security shall sell, redeem or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or to sell such security.

Rule 2a-4 provides, as here relevant, that the current net asset value of a redeemable security issued by a registered investment company used in computing its price for the purpose of distribution, redemption and repurchase shall be an amount which reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a-4 further states that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by an investment company's board of directors. Prior to the filing of the application, the Commission expressed its view that, among other things, Rule 2a-4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and it would be inconsistent generally with the provisions of Rule 2a-4 for a "money market" fund to value its portfolio instruments with over 60-day maturities on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977).

Applicant requests an exemption from the provisions of Section 2(a)(41) of the Act, and Rules 2a-4 and 22c-1 thereunder, to the extent necessary to permit it to value its portfolio securities using the amortized cost method of valuation. In support of its request, Applicant represents that its board of directors, has determined that, absent unusual circumstances, amortized cost value represents that fair value of its portfolio securities and that the amortized cost method of valuation will benefit both the Applicant and its shareholders. Applicant states that by using the amortized cost method of valuing its shares, investors would have the convenience of being able to value their holdings simply by knowing the number of shares which they own. Furthermore, Applicant maintains that by using the amortized cost method of valuation its net asset value per share would not vary as a result of realized and unrealized capital gains and losses.

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, transactions, from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant asserts that its application meets the standards of Section 6(c) of the Act in light of its management policies, and consents to the imposition of the following conditions to any order granting the requested relief:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the board of directors of Applicant undertakes—as a particular responsibility within the overall duty of care owned to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Include within the procedures to be adopted by the board of directors of the Applicant shall be the following:

(a) Review by the board of directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from the $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

[1] To fulfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of directors in the exercise of its discretion to be appropriate indicators of value which may

Continued

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the board of directors will promptly consider what action, if any, should be initiated by it.

(c) Where the board of directors believes the extent of any deviation from the $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the average maturity of portfolio instruments; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of its board of directors' considerations and actions taken in connection with the discharge of their responsibilities, as set forth above, to be included in the minutes of the boards of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which its board of directors determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by its board of directors.

6. Applicant will include in each of its quarterly reports, as an attachment to Form N–1Q, a statement as to whether any action pursuant to paragraph 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than April 13, 1981, at 5:30 p.m., submit to the Commission in writing, a request for a hearing on the application accompanied by a statement as to the nature of his or her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he or she may request that he or she be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81–8821 Filed 3–23–81; 8:45 am]

BILLING CODE 8010–01–M

include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

Pacific Stock Exchange, Inc.; Notice of Application for Unlisted Trading Privileges and of Opportunity for Hearing

March 16, 1981.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the common stock of:

Seagull Pipeline Corporation, Common Stock, $.10 Par Value (File No. 7–5881)

This security is listed and registered on one or more other national securities exchanges and is reported on the consolidated transaction reporting system.

Interested persons are invited to submit on or before April 8, 1981 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

March 16, 1981.

On December 23, 1981, the Philadelphia Stock Exchange, Inc. ("Phlx"), 17th Street and Stock Exchange Place, Philadelphia, PA 19103, filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b–4 thereunder, copies of a proposed rule change which would amend its listing fee schedule for stocks and warrants and for bonds and similar securities listed on the Phlx by

increasing the annual maintenance fee from $750 to $1,000 for one such listing by an issuer and by increasing from $150 to $250 the fee for each additional issue of securities listed by the same issuer. The proposed increase in listing fees would not apply to options.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 17435, January 9, 1981) and by publication in the Federal Register (46 FR 13023, February 23, 1981). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 500-1]

Troy Gold Industries Ltd.; Order of Trading Suspension

March 19, 1981.

It appearing to the Securities and Exchange Commission that there is a lack of current and accurate financial information relating to the securities of Troy Gold Industries Ltd., and that questions have been raised about the adequacy and accuracy of publicly disseminated information concerning its ore reserves and other matters, the Commission is of the opinion that the public interest and the protection of investors require a summary suspension of trading in the securities of Troy Gold Industries Ltd.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that over-the-counter trading in the securities of Troy Gold Industries Ltd. is suspended, for the period from 9:30 a.m. on March 19, 1981, and terminating at midnight (EST) on March 28, 1981.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 81-58]

Importation and Exportation of Coffee Under the International Coffee Agreement of 1976

AGENCY: Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This notice advises the importing and exporting community that import and export quotas for coffee have been established. Customs will administer these quotas through (1) limitation of importation of certain coffee, (2) prohibition of entry of other coffee without valid documentation, and (3) requirement of valid documentation of coffee exported or reexported from the United States. Accordingly, the text of the Customs operational guidelines and instructions to implement the above actions is reproduced below.

EFFECTIVE DATE: The Customs operational guidelines and instructions described in this document are effective on March 24, 1981.

FOR FURTHER INFORMATION CONTACT: David O. Ramsay, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2957).

SUPPLEMENTARY INFORMATION:

Background

International Coffee Agreement of 1976

The United States is a Contracting Party to the International Coffee Agreement of 1976 (ICA), signed at New York on February 27, 1976, and which entered into force for the United States provisionally on October 1, 1976, and on August 1, 1977, definitively. Under Article 70 of the ICA, that Agreement shall be considered as a continuation of the International Coffee Agreement of 1968 as Extended by Protocol. The ICA, unless extended, shall remain in force for a period of six years, until September 30, 1982.

The International Coffee Organization (Organization), established under the International Coffee Agreement of 1962, administers the provisions and supervises the operation of the ICA. Each Contracting Party to the ICA is a Member of the Organization (Member). The Organization functions through the International Coffee Council, the Executive Board, and the Executive Director and staff. The highest authority of the Organization is the International Coffee Council which consists of all the Members.

The United States joined the 1962, 1968, and 1976 International Coffee Agreements to help stabilize prices and export income of the developing producing countries. The United States also joined to help secure for consumers an adequate coffee supply at reasonable and stable prices.

The ICA, a treaty of the United States (28 UST 6401), was ratified by the Senate on August 23, 1976.

Among other things, the treaty requires Member importing countries, including the United States, to take specific actions to limit imports of coffee under conditions of low price. The treaty was not self-executing and the President had no authority at that time to impose such limitations.

Export quotas are the economic instrument under the ICA used to maintain prices. These quotas are tightened—thus reducing the available world supply of coffee—as prices fall through a "price band." At the lower end of the band, the most restrictive quota is in effect, and if prices exceed the upper end of the band, the quotas are removed.

When invoked, a world quota is divided among various producers, and basically is enforced by the Member importing countries, which require that all imported coffee bear a coffee stamp indicating the country of origin. Statistical information on coffee shipments is forwarded to the Organization in London, thus providing data on various nations' levels of export.

Enabling Legislation

Pub. L. 96-599, the "International Coffee Agreement Act of 1980" (the Act), was approved on December 24, 1980, to implement the treaty and to carry out the obligations of the United States under the ICA. The Act generally provides that the President may limit entry, and withdrawal from warehouse, of coffee exported from non-Members, and prohibit entry of coffee exported from Members when the coffee is not accompanied by appropriate documentation. In addition, the President may require that every export or reexport of coffee from the United States shall be accompanied by appropriate documentation. The President's authority is to be exercised in such a way as to protect American consumers against unwarranted price

increases as a result of actions taken under the ICA, or by two or more Members. If there is coffee price manipulation by two or more Members, the President shall request that the situation be remedied, either through relaxation of coffee export quotas or other actions. If the Members involved in price-increasing market manipulation fail "to remedy the situation within a reasonable time after a request for remedy," the President must suspend his authorities provided in the Act to implement the treaty until "effective market manipulation activities have ceased."

The Act also requires reports on the operation of the ICA and on international trade in coffee.

The authority provided in the Act will expire on September 30, 1982, so that the Congress will have an opportunity to review this matter in the near future.

Specifically, Section 2 of the Act provides that the President is authorized, in order to carry out and enforce the provisions of the ICA:

1. To regulate the entry of coffee for consumption, or withdrawal of coffee from warehouse for consumption, or any other form of entry or withdrawal of coffee such as for transportation or exportation, including, whenever quotas are in effect pursuant to the ICA, (i) the limitation of entry, or withdrawal from warehouse, of coffee imported from countries which are not members of the Organization, and (ii) the prohibition of entry of any shipment from any member of the Organization of coffee which is not accompanied either by a valid certificate of origin, a valid certificate of reexport, a valid certificate of reshipment, or a valid certificate of transit, issued by a qualified agency in such form as required under the ICA;

2. To require that every export or reexport of coffee from the United States shall be accompanied by a valid certificate of origin or a valid certificate of reexport, issued by a qualified agency of the United States designated by him, in such form as required under the ICA;

3. To require the keeping of such records, statistics, and other information, and the rendering of such reports, relating to the importation, distribution, prices, and consumption of coffee as he may from time to time prescribe; and

4. To take such other action, and issue and enforce such rules and regulations, as he may consider necessary or appropriate in order to implement the obligations of the United States under the ICA.

Delegation of Authority

As provided in section 4 of the Act, the President may exercise any powers and duties conferred on him by the Act through such agency or officer as he shall direct. Pursuant to Executive Order 12297 of March 12, 1981 (46 FR 16677), the President has delegated to the United States Trade Representative the functions vested in him by the Act. The Executive Order further provides that the United States Trade Representative may redelegate some or all of those functions to the head of another Executive agency.

By letters dated March 16, 1981, the United States Trade Representative has directed the Acting Commissioner of Customs to issue, and publish in the Federal Register, any necessary internal directives or operational procedures to implement the control provisions of the Act.

Decision Under ICA To Impose Quotas

Because of relevant price conditions, in a decision of the International Coffee Council (Council) concerning the entry into force of quotas, rendered in accordance with the provisions of paragraph (1) of Article 33 of the ICA, import and export quotas became effective from October 1, 1980. The initial global annual quota, in accordance with the provisions of Article 34 of the ICA, was set at 57.37 million "bags" (as defined in Article 3 of the ICA). In that decision, it was stated that importing Members shall implement on November 1, 1980, the Controls System of Certificates of Origin when Member Export Quotas Are in Effect.

For U.S. Customs Service purposes, the effective date of implementation of the quotas and controls system established by the Council decision is (upon date of publication in the **Federal Register**).

Drafting Information

The principal authors of this document were Charles D. Ressin and Todd J. Schneider, Regulations and Information Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices and the Treasury Department participated in its development.

Customs Actions When Quotas Are in Effect

Pursuant to section 4 of the Act, the U.S. Customs Service will (1) limit the entry, or withdrawal from warehouse, of coffee imported from non-Members, (2) prohibit entry of any shipment from any Member which is not accompanied by valid documentation, and (3) require that every export or reexport of coffee from the United States shall be accompanied by valid documentation.

Dated: March 18, 1981.

William T. Archey,

Acting Commissioner of Customs.

John P. Simpson,

Acting Assistant Secretary (Enforcement and Operations).

Customs Guidelines and Instructions

To administer the quota system established by the ICA and implemented by Pub. L. 96-599, the Duty Assessment Division, Office of Trade Operations, U.S. Customs Service, has formulated and distributed to Customs field personnel operational guidelines and instructions, the text of which is reproduced below:

Telex

To: All Regional Commissioners, Area, District and Port Directors of Customs.
Subject: Special procedures for the importation and exportation of coffee.
Reference: International Coffee Agreement, 1976 (treaties and other International Acts series 8063; 28 UST 6401).

On December 24, 1980, the President signed Pub. L. 96-599, authorizing full implementation of the procedures specified under the International coffee Agreement (ICA). Consequently, on March 24, 1981, Customs shall deny entry into the United States of any shipment of Coffee which does not comply with the following instructions.

A. Imports and Exports of Coffee From ICA Member Countries

1. Effective March 24, 1981, Customs officers shall require a valid certificate of orgin (form O), re-export (form R), re-shipment (form RS), or transit (form T), to be furnished on entry, of all shipments of coffee classified under item numbers 160.10, 160.20, and 160.21, Tariff Schedules of the United States (TSUS) which were exported from ICA member countries on or after November 1, 1980, except for those provided for in part F and shipments (a) proceeding through the U.S. on a through bill of lading; (b) entered for consumption in Puerto Rico; or (c) of green coffee from Hawaii shipped to the Continental United States. (A listing of ICA member countries is furnished as attachment I.)

2. Coffee exported from a member country prior to November 1, 1980, may be permitted entry if: (a) box 16 of approximate ICA form has been properly completed and is dated prior to November 1; or (b) the bill of lading is dated prior to November 1.

3. Samples of International Coffee Organization (ICO) forms O, R and RS, along with instructions for completion, were recently sent to your ports. Please pass to proper Customs officers.

4. Forms O, R, RS, and T are valid only if: (a) the certificate is marked "original" (duplicate or photostat copies are

unacceptable); (b) no more than nine months have elasped since the end of the quarter in which the certificate was issued; (c) the certificate covers only the coffee described at the time it was issued; and (d) the certificate has not previously been completed in Part B.

5. In addition, forms O, R, and RS must bear the stamp of the Customs Service of the member from which the coffee described has been imported, re-exported, or re-shipped, respectively.

6. The proper number of either ICO export or transit stamps with the code corresponding to the country of issue printed on the right half (*e.g.*, 18 for Mexico) must be affixed to the reverse side of form O or T respectively. (See attachment I for special instructions applicable to OAMCAF countries.)

7. Additionally, ICO export stamps used on form O must have the coffee year overprinted in a circle on the left half of the stamp, *e.g.*, (1) for 1980/81 coffee year.

8. ICO export stamps each a different color in kilogram denominations from 25 kg. up to 300,000 kg. differ from transit stamps which are overprinted with letter "T" and range from 5 kg. to 30,000 kg. They cannot be attached to separate sheet. The net weight of the green coffee or green coffee equivalent governs the amount of stamps required. Example, a consignment of 369 kg. requires export stamps to the value of 375 kg. or 305 kg. transit stamps, as appropriate. To find green equivalents apply the following conversion factors:

Dried coffee cherry—multiply net weight of dried coffee cherry by 0.50
Parchment coffee—multiply net weight of parchment coffee by 0.80
Roasted coffee—multiply the net weight of the roasted coffee by 1.19
Soluble coffee—multiply the net weight of the soluble or dried coffee solids contained in the soluble coffee by 3.00
Decaffeinated coffee—multiply the net weight of the decaffeinated coffee in green, roasted or soluble form by 1.00, 1.19 or 3.00 respectively

9. Importation of coffee is permitted if the number of the bags is equal to or less than number shown on the certificate provided the difference in net weight does not exceed one percent more than the net weight noted in the certificate. Example: certificate lists 20 bags at a net weight of 1200 kilograms and the Customs Officer finds 19 bags at a net weight of 1210 kilograms. Consequently, the coffee is permitted entry because the number of bags is less and the net weight does not exceed one percent more than the net weight on the certificate.

10. Customs Officers shall note in box 18 Part B of the respective certificates any differences between the certificate description of the coffee as to quantity, weight, marks and numbers and the actual shipment. If the information on the respective certificate concerning the country of destination is missing or is not accurate, the Customs Officer shall insert the correct information in the relevant box in Part A of the certificate before signing, dating and applying the customs stamp.

11. Valid certificates, completed in accordance with the foregoing instructions, shall be forwarded by Customs to the ICO within 30 days of the month of collection in securely packed batches of not more than 100.

B. Coffee Afloat and Re-Exports

1. If the holder of a valid certificate; form O, R, RS, or T, covering a parcel of coffee afloat wishes to split the shipment, the holder may, on surrending the certificate to a Customs Officer request the issue of form R.

(A) The Customs Officer should indicate in box 18 of form O, R, RS, or T (as appropriate) the exact quantity of coffee being entered at that port.

(B) Enter in box 15 of the form R being issued the following words: "shipment of coffee split while afloat. This certificate is in partial replacement of form (O, T, R, or RS, as appropriate) reference number———covering a parcel of———kgs/lbs."

(C) The original of the form R is issued to the applicant.

(D) The first copy of the form R should be attached to the relevant original form O, R, RS, or T and both forwarded to the ICO.

2. The form R is also issued by U.S. Customs for coffee re-exported after having been imported into the United States.

C. Imports of Coffee From Nonmember Countries

1. During the period March 24, 1981, and through September 30, 1981, not more than 7,936,200 pounds of coffee classifiable under items 160.10, 160.20 and 160.21 from countries other than member countries may be entered, or withdrawn from warehouse for consumption.

2. Coffee from nonmember countries shall be reported and released via the quota CRT. Reports shall indicate the actual quantity (in pounds, not converted) of coffee by TSUSA number. For items 160.1040, 160.2000, and 160.2100, the kind (roasted, souluble, dries, parchment, or liquid) shall be reflected in the remarks data field by using the first four letters, i.e., SOLU. If the country of exportation differs from the country of growth, the country of exportatic:: shall also be stated in the remarks/data field. Coffee exported from a nonmember country will be considered the growth of that country unless proof is submitted that it is the growth of another country.

3. Additionally, all importations of coffee from nonmember countries will continue to be reported to the ICO on ICO import return form I, which shall be completed in accordance with the instructions on the reverse side thereof. Importers or agents may reproduce additional copies of this form for their own use if so desired.

D. Hawaiian Coffee

1. For the exportation of coffee grown in Hawaii to member countries, a Customs Officer shall sign, date and stamp with a customs stamp boxes 16 and 17 on the original and both copies of the ICO certificate of origin form O, and verify that ICO export stamps equal to the net weight of the coffee are affixed to the reverse side of the original certificate. The Customs Officer shall then cancel the ICO stamps without obliterating them, fill in the reference number of the certificate, consisting of the U.S. country code number (69), the port code number; the consecutive number of the certificate (a new series of which shall begin on October 1 of each year); and the expiration date (nine months from the end of the quarter in which the certificate is issued). The original certificate shall be returned to the exporter; one copy (green) shall be sent to the ICO; and the remaining copy shall be retained in Customs files for four years.

2. In the case of exports of Hawaiian coffee to non-member countries, the above procedure shall apply, except: (a) coffee export stamps shall not be affixed to the original certificate of origin Form X; (b) the original and copies of the certificate shall be marked in bold print "shipment to non-members"; (c) the original shall not be returned to the exporter but shall be sent along with one copy (green) to the ICO.

3. Exporters of coffee grown in Hawaii can obtain ICO export stamps and ICO certificate of origin from the State Board of Agriculture. Correspondence in this regard should be addressed to Chairman, Board of Agriculture, State of Hawaii, P.O. Box 22159, Honolulu, Hawaii 96822.

E. Missing, Invalid, or Otherwise Unacceptable Documents

1. Upon entry, a bond on Customs form 7551, 7553 or 7595, equal to 10% of the value of the coffee but not exceeding $250,000 shall be posted for production of any missing ICO documentation. The bond liability assumed is in addition to any other bond liability required as a condition for entry of the commodity. If valid documentation is not produced within 60 days of the date of entry, liquidated damages in the full amount of the bond in the case of a single entry bond, or the amount determined necessary to accept entry in the case of a term-entry bond, shall be assessed, except that, upon written application to the District Director of Customs concerned, the period for producing the missing documentation may be extended for an additional 30 days. In the event of non-compliance, the procedures in Part 172, C.R. relating to liquidated damages, shall apply.

2. If the period of validity (nine months after end of the quarter of issuance) has lapsed prior to the surrender of forms O, R, RS, or T to Customs, the holder shall forward the certificate directly to the Executive Director of the ICO, with an application for the extension of the form's period of validity. In his application the holder shall state the reasons for the failure to use or exchange the certificate before its expiration and shall specify the present location of the coffee. If the coffee is held in a warehouse, the holder shall provide a written declaration by the manager of the warehouse identifying the coffee and confirming the period of storage.

3. Application for replacement of lost certificates should also be made by the holder directly to the Executive Director of the ICO.

F. Exemptions

1. The foregoing provisions do not apply to: the importation of samples and parcels up to a maximum net weight of 60 kg. of green coffee or the equivalent thereof namely: (a) 120 kg. of dried coffee cherry; or (b) 75 kg. of

parchment coffee; or (c) 50.4 kg. of roasted coffee; or (d) 20 kg. of soluble or liquid coffee.

G. General Guidance

(1) The address of the ICO is 22 Berners St., London W1P 4DD, England.

(2) A coffee year runs from 1 October to 30 September.

(3) For further information relative to these instructions, please call Coffee Program Manager at (FTS) 566–2957.

H. Superseded Material

Effective March 24, 1981, the following circulars and instructions are superseded: SPE –2–0:D:S dated September 21, 1979; manual supplement number 36B–01 dated January 25, 1979; and CIE 51/80 dated November 24, 1980.

Richard R. Rosettis,

Acting Director, Duty Assessment Division.

BILLING CODE 4810-22-M

Internal Revenue Service

[Delegation Order No. 67 (Rev. 15)]

Delegation of Authority

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: The specific authorization to sign the name of, or on behalf of, Roscoe L. Egger, Jr., Commissioner of Internal Revenue. The text of the Delegation Order appears below.

EFFECTIVE DATE: March 14, 1981.

FOR FURTHER INFORMATION CONTACT: Martha M. Seeman, PR:I, 1111 Constitution Ave., N.W., Room 3528, Washington, DC 20224 (202) 566–4273 (not a toll-free telephone number).

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the **Federal Register** for Wednesday, November 8, 1978.

Albert C. Shuckra,

Director, Internal Management Documents Division.

Delegation Order

Date of issue: March 14, 1981.

Effective date: March 14, 1981.

Subject: Signing the Commissioner's Name or on His Behalf.

Effective 12:01 A.M., March 14, 1981, all outstanding authorizations to sign the name of, or on behalf of, W. E. Williams, Acting Commissioner of Internal Revenue, are hereby amended to authorize the signing of the name of, or on behalf of, Roscoe L. Egger, Jr., Commissioner of Internal Revenue.

This Order supersedes Delegation Order No. 67 (Rev. 14), issued October 31, 1980.

Roscoe L. Egger, Jr.,

Commissioner.

BILLING CODE 4830-01-M

Office of the Secretary

[Department Circular, Public Debt Series—No. 9–81]

Treasury Bonds of 2001; Invitation for Tenders

Washington, March 18, 1981.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $1,750,000,000 of United States securities, designated Treasury Bonds of 2001 (CUSIP No. 912810 CU 0). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated April 2, 1981, and will bear interest from that date, payable on a semiannual basis on November 15, 1981, and each subsequent 6 months on May 15 and November 15, until the principal becomes payable. They will mature May 15, 2001, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations

and of coupon, registered, and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Thursday, March 26, 1981. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, March 25, 1981.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 95.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.5., must be made or completed on or before Thursday, April 2, 1981. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, March 30, 1981. When payment has been submitted with the tender and the purchace price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the

same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Supplementary Statement

The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the departmental procedures applicable to such regulations.

Paul H. Taylor,

Fiscal Assistant Secretary.

Part II

Department of Commerce

National Oceanic and Atmospheric Administration

Deep Seabed Mining; Regulations for Exploration Licenses

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 970

Deep Seabed Mining Regulations for Exploration Licenses

AGENCY: National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Proposed rules.

SUMMARY: Pub. L. 96-283, the Deep Seabed Hard Mineral Resources Act (the Act), establishes a program pursuant to which the Administrator of the National Oceanic and Atmospheric Administration (NOAA) is authorized to issue to eligible United States citizens licenses for exploration for deep seabed hard mineral resources and permits for the commercial recovery of such resources. The Act calls for NOAA to issue such regulations as are required by or are necessary and appropriate to implement this program. These proposed rules set forth the procedures and substantive requirements according to the terms of the Act pursuant to which U.S. citizens may apply for and NOAA will issue exploration licenses. NOAA seeks comments from interested persons on these proposed rules.

DATES: 1. Comments on these proposed rules must be submitted in writing on or before May 29, 1981.

2. Public hearings concerning these regulations will be held as follows:

a. April 24, 1981—Honolulu, Hawaii.

b. April 28, 1981—San Francisco, California.

c. May 8, 1981—Washington, D.C.

ADDRESSES: Comments should be mailed to: Office of Ocean Minerals and Energy, National Oceanic and Atmospheric Administration, Page Building 1, Suite 410, 2001 Wisconsin Avenue, N.W., Washington, D.C. 20235.

The public hearings will be held at the following locations:

a. Honolulu: Courtroom 4, U.S. Courthouse, 300 Ala Moana Boulevard (1:30 and 7:30 p.m.)

b. San Francisco: Coral Sea Room, Holiday Inn, Fishermen's Wharf, 1300 Columbus Avenue (1:30 and 7:30 p.m.)

c. Washington, D.C.: Room 4830, Commerce Department, 14th St. and Constitution Ave. (9:00 a.m.)

FOR FURTHER INFORMATION CONTACT: James P. Lawless, Office of Ocean Minerals and Energy, National Oceanic and Atmospheric Administration, Page Building 1, Suite 410, 2001 Wisconsin Avenue, N.W., Washington, D.C. 20235 Telephone: (202) 653-8257.

SUPPLEMENTARY INFORMATION: The Act was signed into law on June 28, 1980. It establishes a legal structure pursuant to which United States citizens may proceed with the exploration for and commercial recovery of deep seabed hard minerals (commonly referred to as "manganese nodules"), pending conclusion of an acceptable Law of the Sea Treaty which would address the same issue. The Act authorizes the Administrator of NOAA to issue to eligible U.S. citizens licenses for the exploration for deep seabed hard minerals (which licenses may not be issued before July 1, 1981) and permits for the commercial recovery of such minerals (which permits may not authorize commercial recovery to commence before January 1, 1988). The Act also authorizes NOAA, in consultation with the Secretary of State and the heads of other appropriate departments and agencies, to designate as reciprocating states those other nations which establish seabed mining programs which are compatible with and recognize the U.S. program. These reciprocal arrangements will provide a mechanism whereby each nation will recognize the rights of the others' miners.

These proposed regulations for the issuance of exploration licenses have been developed, consistent with the purposes of the Act, to establish a legal framework to facilitate the development of the new seabed mining industry in the United States, while assuring that such efforts proceed in a responsible and environmentally sensitive manner. The regulations are intended to provide the necessary degree of certainty to the industry, while also recognizing the need for flexibility in order to promote the development of deep seabed mining technology, and the usefulness of allowing initiative on behalf of miners to develop mining techniques and systems in a manner compatible with the requirements of the Act and these regulations. In this regard the regulations reflect an approach, pursuant to the Act, whereby the issues discussed ultimately will be addressed and evaluated on the basis of the application and exploration plan submitted by each applicant.

Earlier public comment. In developing these regulations, NOAA has pursued a continuing effort to provide for and encourage public participation. On July 28, 1980, NOAA published in the **Federal Register** and distributed an advance notice of proposed rulemaking (45 FR 49953), seeking comments and information for use in this rulemaking. In November 1980, after considering the responses received on the advance notice, NOAA issued a discussion paper on the major issues to be addressed in regulations. This paper was sent to interested persons and organizations, and a notice published in the **Federal Register** (45 FR 79088, November 28, 1980), seeking comments. Also, a public hearing was held on December 17, 1980, to receive comments. The proposed rules have been prepared after considering this series of comments.

Exploration licenses. The proposed regulations deal only with the requirements and procedures pertaining to exploration licenses. NOAA determined that it was neither necessary nor desirable to propose regulations at this time for commercial recovery permits. This conclusion was based substantially on comments from interested persons that it would be premature to do so. The Act prohibits commercial recovery until January 1, 1988, and current explorers have indicated an intent not to file commercial recovery permit applications until at least 1984. NOAA's decision also was based on the agency's own realization that the deep seabed mining industry is still evolving and that more information must be developed to form a rational basis for future decisions by industry and by NOAA in its implementation of the Act. Therefore, any attempt at this time to promulgate commercial recovery regulations would likely be counterproductive for both NOAA and the industry. During the interim, NOAA and the industry will develop the more extensive information base necessary for a reasoned approach to commercial recovery regulations. Meanwhile, these proposed regulations will allow miners to establish needed priorities of right in selected seabed areas and to continue necessary exploration activities in accordance with the Act.

Structure of the regulations. The proposed regulations are structured to present procedures and requirements in the approximate chronological order they will be encountered in the application process. They begin by setting out their underlying purpose and the basic legal premises established by the Act, as well as the definitions applicable to the rules. Next, the steps that the applicant and NOAA will follow are set forth mostly in Subparts B through E, while the more substantive discussion of major issues that arise during the course of issuing and operating under a license are found primarily in Subparts F, G, and H. Miscellaneous provisions, plus the primary procedural subparts, follow.

The reader also will note that a major portion of the regulations is devoted to procedures rather than to substantive requirements. Most of these procedural requirements are found in the Act. While the regulations could have been greatly shortened and their provisions much simpler by excluding the procedures and relying on reference to the Act for such provisions, NOAA has included these in the regulations for the convenience of the reader and the efficiency of being able to refer to one document for all relevant requirements and procedures. The regulations also include detailed provisions on uniform procedures for resolving conflicts among pre-enactment explorers, for formal hearings if requested, and for enforcement actions if such situations should arise. While these provisions are somewhat lengthy, they have been prepared and included primarily to assure due process for applicants and licensees.

Interagency cooperation. The Act provides for consultation and cooperation between NOAA and other Federal agencies in the issuance of exploration licenses, and urges the reduction in separate agency actions where possible. NOAA believes it can provide a useful role in this regard through the application review process. To this end, NOAA has identified for inclusion in applications the information needs of those agencies with review or permitting roles specifically identified in the Act. These are the Environmental Protection Agency (for National Pollutant Discharge Elimination System permits), the Coast Guard (for safety of life and property at sea) and the Attorney General and Federal Trade Commission (for antitrust review). NOAA also will be able to facilitate the needs of other agencies and the overall Federal review process for licenses by functioning as lead agency for the environmental impact statement on the issuance of each license.

Major issues. Many issues are addressed in the proposed regulations, and NOAA seeks comment on any of these. However, the major issues concerning which NOAA has discretion in implementing the Act are as follows (applicable sections are noted in parentheses):

1. The extent of information needed to determine the applicant's financial responsibility to engage in the proposed exploration. (§§ 970.201 and 970.401)

2. The extent of information needed to determine the applicant's technological capability to undertake the proposed exploration. (§§ 970.202 and 970.402)

3. The information specified for an applicant to include in its exploration plan. (§§ 970.203 and 970.404)

4. The extent of information or analysis to require on, and basis for evaluating potential environmental effects from, exploration activities. (§§ 970.203, 970.204, 970.506, and Subpart G)

5. Criteria and procedures for resolving overlapping applications by pre-enactment explorers. (§§ 970.302)

6. Criteria for evaluating the proposed size and location of an exploration area. (§§ 970.405 and 970.601)

7. Criteria for resolving potential conflicts on uses of the high seas and other international conflicts. (§§ 970.503, 970.504 and 970.505)

8. Criteria for determining whether there are undue threats to the safety of life and property at sea. (§§ 970.205 and Subpart H)

9. Criteria for terms, conditions and restrictions to be included in a license for the purpose of ensuring diligent exploration. (§§ 970.517 and 970.602)

10. Requirements in the form of license terms, conditions and restrictions relative to environmental impact monitoring and mitigation measures. (§§ 970.518, 970.522 and 970.702)

11. Provisions for terms, conditions and restrictions in licenses to avoid waste during mining and to allow the opportunity for future recovery of the unrecovered balance of nodules. (§§ 970.519 and 970.603)

In addition to the above major issues, NOAA especially invites comment on the following specific provisions.

Information on exploration. As part of an application, § 970.204(a) requires information for use by NOAA in preparing the mandated environmental impact statement (EIS) on the issuance of each license. It distinguishes between information needed for the period of exploration prior to equipment testing and that needed for addressing the impacts of such testing. For each of these two categories, the proposed rule also calls for information both on the surrounding environment and on the nature of proposed operations. Applicants may elect to submit the information either entirely with the application or in two stages, but they may not undertake equipment testing until at least 365 days after the second category of information is submitted to NOAA. This will be necessary to allow NOAA review and concurrence with the testing, and the filing of a final supplement to the EIS.

NOAA will develop a technical guidance document which will provide assistance for the agency and the applicant, in consultation, to identify the details on information needed for making the necessary environmental and other determinations required by the Act.

NOAA solicits comments on this approach.

Conflict resolution. In § 970.302, NOAA proposes procedures and criteria for resolving site conflicts among license applications filed by preenactment explorers. NOAA's general approach in these provisions is to encourage the quick resolution of conflicts and to discourage the continued creation of new conflicts. Comments are invited on these provisions, including the following specific issues.

—NOAA believes that applications filed by pre-enactment explorers must be in substantial compliance with the requirements for an application. However, in order to expedite the resolution of conflicts, the rules do not require a separate time period for NOAA's substantial compliance review before the 30-day amendment period allowed for applicants to remove initial conflicts (§ 970.302(a)(2) and (3)).

—The proposed rules preclude the knowing creation of conflicts among pre-enactment explorers (see the last sentence of § 970.302(a)(3)). This is intended to encourage the earliest identification of primary exploration areas and to prevent an indefinite series of new conflicts. Toward this end, NOAA also could specify in § 970.302(a)(4) the opening and announcing of amended applications immediately upon their filing. NOAA then would disallow conflicts, if any, created by subsequently filed amended applications.

—The proposed regulations state that the equities to be considered for purposes of determining the superior priority of right are those "pertaining to investment and programs related to development of the area in conflict" (§ 970.302(c)). While this allows NOAA to look beyond the area in conflict when considering equities, it so provides only if the applicant can show the relationship of the equities to such area.

—NOAA seeks to balance preserving the interests of pre-enactment explorers in the conflict resolution process with the national interest in not creating undue delay into deep seabed mining by new entrants. Generally, this can be accomplished by providing a time period for pre-enactment explorers to apply for areas they have explored. After this time period closes, such miners would not be deemed to have special priority as against new entrants (see § 970.302(f)). Alternatively, NOAA could

provide, during the time period when pre-enactment explorers are still entitled to special priority, a mechanism for pre-enactment explorers to respond to or rebut applications by new entrants for given areas. This would protect temporarily the pre-enactment explorer's special priority of right to an area for which a new entrant wished to apply.

—Administrative necessity and the need to protect the interests of U.S. miners will require the correlation of certain dates and procedures in both the U.S. domestic and reciprocating states conflict resolution procedures (e.g., the "opening date" for initial applications and procedures to allow notification to reciprocating states of the coordinates for each site). Thus, NOAA will consider procedures developed among reciprocating states as well as comments on these proposed rules in developing final domestic rules for conflict resolution.

Exempted activities. Proposed § 970.103(a)(2) reiterates the language of the Act relative to the types of activities for which no exploration license is required. NOAA believes that a definitive and useful expansion on this list could not be provided, and that the incentive for a person to file for a license and thus obtain priority of right to a certain exploration area probably is sufficient to discourage extensive effort without a license. NOAA seeks comments on if or how this list should be further explained or expanded in the regulations.

Fee. The Act provides that an applicant must pay a fee to reflect the reasonable administrative costs incurred in reviewing and processing the license application. NOAA is unable to predict with precision the amount of such costs, including those for possible formal hearings and related costs, which will be required during the approximately 15 month review period. However, after some analysis NOAA determined that $100,000 is a reasonable amount. This fee, which would be nonrefundable, will not include the cost of preparing an EIS on the license. Proposed § 970.209 provides that, if NOAA incurs any significant costs over this amount, the agency may make subsequent adjustment, yet avoid the need for frequent interim accounting or computations. NOAA seeks comments as to whether this is a reasonable approach to the administrative fee requirement.

Review of denial of certification. The proposed rules in § 970.407 allow the applicant to seek administrative review of the denial of certification by the Administrator, which review includes a formal hearing. This has been included for the benefit of applicants, although it is not required by the Act. NOAA seeks comments as to the usefulness or desirability of such optional administrative review.

Transfer of a license. The Act authorizes the transfer of a license if the Administrator determines the proposed transferee and his proposed activities meet the requirements of the Act, and if the transfer is in the public interest. NOAA was unable to identify any additional factors, beyond the requirements for issuance, which were appropriate to specify as a requirement for transfer. Thus the proposed rules in § 970.517 include the presumption that a transfer is in the public interest if it meets the requirements of the Act and these regulations. NOAA seeks comments as to what additional factors, if any, should be specified in the rules for this public interest determination.

Delineation methods. NOAA believes a uniform method must be used by applicants in delineating their exploration areas. In § 970.801(c), the proposed rules specify use of the 1866 Clarke Spheroid. NOAA solicits comments on whether this or another spheroid, or some other method, should be used.

Effects from benthic plumes. NOAA's programmatic EIS identifies for commercial recovery four types of effects which for long-term operations have the potential for creating significant effects—two relate to effects on benthic organisms from bottom disturbances and two relate to effects from a surface discharge. One of the effects may also be significant during the exploration phase—that is, the blanketing of benthic fauna and/or dilution of their food supply many kilometers away from the site of tests of scale-model mining equipment, which simulates commercial recovery, by fine sediments disturbed during the tests. Because it is currently unknown whether restricting tests to only part of the exploration area would be beneficial in limiting the affected area or if such an approach could be deterimental because of heavier blanketings, NOAA proposes to focus on this concern in research and monitoring activities and then implement mitigation measures if a significant adverse effect is detected. NOAA solicits comment on this approach to the above uncertainty.

Public participation funds. In its advance notice of proposed rulemaking, referenced above, NOAA made available $5,000 for the cost of certain public participation in these proceedings. The agency received applications for these funds, and all such funds have been used.

Environmental impact statement. Pursuant to section 109(c) of the Act, NOAA has prepared a draft programmatic environmental impact statement assessing the environmental impacts of exploration and commercial recovery in the area of the oceans in which such activities by any United States citizen will likely first occur under the authority of the Act. Public comment is welcome on that statement as well. Copies are available from the Office of Ocean Minerals and Energy (see the "ADDRESSES" section of this preamble.)

Alternative regulatory approoches. In order to benefit the decision making process and promote more informed public participation in developing the regulations, NOAA had identified and considered three alternative regulatory approaches. These are:

1. Fixed regulations;
2. Flexible regulations preceding license issuance; and
3. Flexible regulations both preceding and following license issuance.

NOAA has concluded that the fixed approach would provide the benefit of maximum certainty, but in most cases this benefit would be outweighed by the resulting lack of flexibility which is needed for this evolving industry. The specificity and certainty of this alternative can be provided and is appropriate, for instance, with respect to major issue number 8 above (safety of life and property at sea). In addition, a fixed approach has been selected for the procedural provisions referenced above, to conform to the Act where applicable and also to provide the certainty for which procedures are intended.

The second alternative approach has been selected for those issues which must be addressed by the time a license is issued. It is appropriate for such issues in that it provides the opportunity for innovation by potential miners and allows NOAA to take account of their individual approaches and circumstances, while allowing the certainty of resolving the issue by the time the license is issued. This approach has been selected for major issues number 1, 2, 3, 5, and 6 above.

The third alternative approach has been selected for those issues for which the Act allows NOAA to continue its review and consideration after a license is issued. This approach provides the benefit of flexible guidance to applicants for the issuance of a license, like the second alternative, yet allows the additional benefit of not imposing undue requirements on an applicant and

NOAA when such requirements are unnecessary for agency determinations prior to the issuance of a license. This approach has been selected for major issues number 4, 7, 9, 10 and 11 above, which also is consistent with the requirements of the Act.

Reciprocating states agreements. Before the Administrator of NOAA may designate a nation as a reciprocating state, the Act directs the Secretary of State to judge such a nation's seabed mining program on the basis of, among other criteria, compatibility with the Act and implementing regulations. NOAA proposes that these functions be addressed in two ways. First, NOAA in cooperation with the State Department will shortly publish for public information and comment a set of broad criteria which will guide decisions relating to designations of reciprocating states. While these criteria will not take the place of NOAA's future commercial recovery regulations, they will supplement these exploration regulations by outlining the factors which will be considered. Second, NOAA will incorporate in reciprocating state agreements the requirement for later consultations to assure development of compatible commercial recovery regulations.

Regulatory flexibility analysis. NOAA has conducted an analysis of the economic impact of the proposed rules on small entities, pursuant to Pub. L. 96-354. Because the persons subject to these proposed rules are, insofar as known, major corporations or subsidiaries and affiliates thereof or groups of such, NOAA does not anticipate any but incidental effects on small entities.

Executive Order 12291. NOAA has determined to publish these regulations as major rules under the new Executive Order 12291. However, section 308(a) of the Act requires NOAA to publish these proposed rules in the Federal Register not later than March 24, 1981, and therefore it was impracticable to follow the full procedures in the Executive Order for major rules prior to publishing them in proposed form. Although NOAA has proceeded to issue these rules according to the above schedule, under the exemption in Section 8(a)(2) of the Executive Order, the agency has requested consultation with the Office of Management and Budget to enable adherence to the requirements of the Executive Order to the maximum extent practicable. In this regard, NOAA is proceeding with the regulatory impact analysis specified in the Executive Order.

Accordingly, new subparts A–K are proposed to be added to Part 970. The text of these subparts read as follows:

Dated: March 18, 1981.

Samuel A. Lawrence,

Assistant Administrator for Management and Budget.

PART 970—DEEP SEABED MINING REGULATIONS FOR EXPLORATION LICENSES

Subpart A—General

970.100 Purpose.
970.101 Definitions.
970.102 Nature of licenses.
970.103 Prohibited activities and restrictions.

Subpart B—Applications

970.200 General.

Contents

970.201 Statement of financial resources.
970.202 Statement of technological experience and capabilities.
970.203 Exploration plan.
970.204 Environmental and use conflict analysis.
970.205 Vessel safety.
970.206 NPDES requirements.
970.207 Statement of ownership.
970.208 Antitrust information.
970.209 Fee.

Procedures

970.210 Substantial compliance with application requirements.
970.211 Reasonable time for full compliance.
970.212 Consultation and cooperation with Federal agencies.
970.213 Public notice, hearing and comment.
970.214 Amendment to an application.

Subpart C—Procedures for Applications Based on Exploration Commenced Before June 28, 1980

970.300 General.
970.301 Filing period for applications based on pre-enactment exploration.
970.302 Procedures and criteria for resolving conflict.

Subpart D—Certification of Applications

970.400 General.
970.401 Financial responsibility.
970.402 Technological capability.
970.403 Previous license and permit obligations.
970.404 Adequate exploration plan.
970.405 Appropriate exploration site size and location.
970.406 Fee payment.
970.407 Denial of certification.
970.408 Notice of certification.

Subpart E—Issuance/Transfer/Terms, Conditions and Restrictions

970.500 General.

Issuance/Transfer; Modification/Revision; Suspension/Revocation

970.501 Proposal to issue or transfer and of terms, conditions and restrictions.
970.502 Consultation and cooperation with Federal agencies.
970.503 Freedom of the high seas.
970.504 International obligations of the United States.
970.505 Breach of international peace and security involving armed conflict.
970.506 Environmental effects.
970.507 Safety at sea.
970.508 Denial of issuance or transfer.
970.509 Notice of issuance or transfer.
970.510 Objections to terms, conditions and restrictions.
970.511 Modification of terms, conditions and restrictions.
970.512 Suspension or modification of activities; suspension or revocation of licenses.
970.513 Revision of a license.
970.514 Scale requiring application procedures.
970.515 Duration of a license.
970.516 Approval of license transfers.

Terms, Conditions and Restrictions

970.517 Diligence requirements.
970.518 Environmental protection requirements.
970.519 Resource conservation requirements.
970.520 Freedom of the high seas requirements.
970.521 Safety at sea requirements.
970.522 Monitoring requirements.
970.523 Special terms, conditions and restrictions.
970.524 Other Federal requirements.

Subpart F—Resource Development Concepts

970.600 General.
970.601 Logical mining unit.
970.602 Diligent exploration.
970.603 Conservation of resources.

Subpart G—Environmental Effects

970.700 General.
970.701 Significant adverse environmental effects.
970.702 Monitoring and mitigation environmental effects.

Subpart H—Safety of Life and Property at Sea

970.800 General.
970.801 Criteria for safety of life and property at sea.

Subpart I—Miscellaneous

970.900 General.
970.901 Records to be maintained and information to be submitted by licensees.
970.902 Public disclosure of documents received by NOAA.
970.903 Relinquishment and surrender of licenses.
970.904 Amendment to regulations.
970.905 Computation of time.

Subpart J—Uniform Procedures

970.1000 Applicability.
970.1001 Formal hearing procedures.
970.1002 Ex parte communications.

Subpart K—Enforcement

970.1100 General.
970.1101 Assessment procedure.
970.1102 Hearing and appeal procedures.

970.1103 License sanctions.
970.1104 Remission of forfeitures.
970.1105 Observers.
970.1106 Proprietary enforcement information.
970.1107 Advance notice of civil actions.

Authority: 30 U.S.C. 1401 *et seq.*

Subpart A—General

§ 970.100 Purpose.

(a) *General.* The purpose of this part is to implement those responsibilities and authorities of the National Oceanic and Atmospheric Administration (NOAA), pursuant to Pub. L. 96-283, the Deep Seabed Hard Mineral Resources Act (the Act), to issue to eligible United States citizens licenses for the exploration for deep seabed hard minerals.

(b) *Purposes of the Act.* In preparing these regulations NOAA has been mindful of the purposes of the Act, as set forth in section 2(b) thereof. These include—

(1) Encouraging the successful conclusion of a comprehensive Law of the Sea Treaty, which will give legal definition to the principle that the hard mineral resources of the deep seabed are the common heritage of mankind and which will assure, among other things, nondiscriminatory access to such resources for all nations;

(2) Establishing, pending the ratification by, and entering into force with respect to, the United States of such a treaty, an interim program to regulate the exploration for and commercial recovery of hard mineral resources of the deep seabed by United States citizens;

(3) Accelerating the program of environmental assessment of exploration for and commercial recovery of hard mineral resources of the deep seabed and assuring that such exploration and recovery activities are conducted in a manner which will encourage the conservation of such resources, protect the quality of the environment, and promote the safety of life and property at sea;

(4) Encouraging the continued development of technology necessary to recover the hard mineral resources of the deep seabed; and

(5) Pending the ratification by, and entry into force with respect to, the United States of a Law of the Sea Treaty, providing for the establishment of an international revenue-sharing fund the proceeds of which will be used for sharing with the international community pursuant to such treaty.

(c) *Regulatory approach.* (1) These regulations incorparate NOAA's recognition that the deep seabed mining industry is still evolving and that more information must be developed to form the basis for future decisions by industry and by NOAA in its implementation of the Act. They also recognize the need for flexibility in order to promote the development of deep seabed mining technology, and the usefulness of allowing initiative by miners to develop mining techniques and systems in a manner compatible with the requirements of the Act and regulations. In this regard, the regulations reflect an approach, pursuant to the Act, whereby their provisions ultimately will be addressed and evaluated on the basis of exploration plans submitted by applicants.

(2) In addition, these regulations reflect NOAA's recognition that the difference in scale and effects between exploration for and commercial recovery of hard mineral resources normally requires that they be distinguished and addressed separately. This distinction is also based upon the evolutionary stage of the seabed mining industry referenced above. Thus, NOAA will issue separate regulations pertaining to commercial recovery, in Part 971 of this chapter.

§ 970.101 Definitions.

For purposes of this part, the term:

(a) "Act" means the Deep Seabed Hard Mineral Resources Act (Pub. L. 96-283; 94 Stat. 553; 30 U.S.C. 1401 *et seq.*);

(b) "Administrator" means the Administrator of the National Oceanic and Atmospheric Administration, or a designee;

(c) "Applicant" means an applicant for an exploration license pursuant to the Act and this part;

(d) "Affiliate" means any person—

(1) In which the applicant or licensee owns or controls more than 5% interest;

(2) Which owns or controls more than 5% interest in the applicant or licensee; or

(3) Which is under common ownership or control with the applicant or licensee.

(e) "Commercial recovery" means—

(1) Any activity engaged in at sea to recover any hard mineral resource at a substantial rate for the primary purpose of marketing or commercially using such resource to earn a net profit, whether or not such net profit is actually earned;

(2) If such recovered hard mineral resource will be processed at sea, such processing; and

(3) If the waste of such activity to recover any hard mineral resource, or of such processing at sea, will be disposed of at sea, such disposal;

(f) "Continental Shelf" means—

(1) The seabed and subsoil of the submarine areas adjacent to the coast, but outside the area of the territorial sea, to a depth of 200 meters or, beyond that limit, to where the depth of the superjacent waters admits of the exploitation of the natural resources of such submarine area; and

(2) The seabed and subsoil of similar submarine areas adjacent to the coast of islands;

(g) "Controlling interest", for purposes of paragraph (t)(3) of this section, means a direct or indirect legal or beneficial interest in or influence over another person arising through ownership of capital stock, interlocking directorates or officers, contractual relations, or other similar means, which substantially affect the independent business behavior of such person;

(h) "Deep seabed" means the seabed, and the subsoil thereof to a depth of ten meters, lying seaward of and outside—

(1) The Continental Shelf of any nation; and

(2) Any area of national resource jurisdiction of any foreign nation, if such area extends beyond the Continental Shelf of such nation and such jurisdiction is recognized by the United States;

(i) "Exploration" means—

(1) Any at-sea observation and evaluation activity which has, as its objective, the establishment and documentation of—

(i) The nature, shape, concentration, location, and tenor of a hard mineral resource; and

(ii) The environmental, technical, and other appropriate factors which must be taken into account to achieve commercial recovery; and

(2) The taking from the deep seabed of such quantities, of any hard mineral resource as are necessary for the design, fabrication, and testing of equipment which is intended to be used in the commercial recovery and processing of such resource;

(j) "Hard mineral resource" means any deposit or accretion on, or just below, the surface of the deep seabed of nodules which include one or more minerals, at least one of which contains manganese, nickel, cobalt, or copper;

(k) "International agreement" means a comprehensive agreement concluded through negotiations at the Third United Nations Conference on the Law of the Sea, relating to (among other matters) the exploration for and commercial recovery of hard mineral resources and the establishment of an international regime for the regulation thereof;

(l) "Licensee" means the holder of a license issued under this part to engage in exploration;

(m) "New entrant" means a person who was not engaged in exploration prior to the date of enactment of the Act (June 28, 1980);

(n) "NOAA" means the National Oceanic and Atmospheric Administration;

(o) "Permittee" means the holder of permit issued under NOAA regulations to engage in commercial recovery;

(p) "Person" means any United States citizen, any individual, and any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of any nation;

(q) "Pre-enactment explorer" means a person who was engaged in exploration prior to the date of enactment of the Act (June 28, 1980);

(r) "Reciprocating state" means any foreign nation designated as such by the Administrator under section 118 of the Act;

(s) "United States" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the United States Virgin Islands, Guam, and any other Commonwealth, territory, or possession of the United States; and

(t) "United States citizen" means

(1) Any individual who is a citizen of the United States;

(2) Any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of any of the United States; and

(3) Any corporation, partnership, joint venture, association, or other entity (whether organized or existing under the laws of any of the United States or a foreign nation) if the controlling interest in such entity is held by an individual or entity described in paragraph (t)(1) or (t)(2).

§ 970.102 Nature of licenses.

(a) A license issued under this part will authorize the holder thereof to engage in exploration within a specific portion of the sea floor consistent with the provisions of the Act, this part, and the specific terms, conditions and restrictions applied to the license by the Administrator.

(b) Any license issued under this part will be exclusive with respect to the holder thereof as against any other United States citizen or any citizen, national or governmental agency of, or any legal entity organized or existing under the laws of, any reciprocating state.

(c) A valid existing license will entitle the holder, if otherwise eligible under the provisions of the Act and implementing regulations, to a permit for commercial recovery from an area selected within the same area of the sea floor. Such a permit will recognize the right of the holder to recover hard mineral resources, and to own, transport, use, and sell hard mineral resources recovered, under the permit and in accordance with the requirements of the Act.

§ 970.103 Prohibited activities and restrictions.

(a) *Prohibited activities and exceptions.*

(1) Except as authorized under Subpart C of this part, no United States citizen may engage in any exploration or commercial recovery unless authorized to do so under—

(i) A license or a permit issued pursuant to the Act and implementing regulations;

(ii) A license, permit, or equivalent authorization issued by a reciprocating state; or

(iii) An international agreement which is in force with respect to the United States.

(2) The prohibitions of paragraph (a)(1) of this section will not apply to any of the following activities:

(i) Scientific research, including that concerning hard mineral resources;

(ii) Mapping, or the taking of any geophysical, geochemical, oceanographic, or atmospheric measurements or random bottom samplings of the deep seabed, if such taking does not significantly alter the surface or subsurface of the deep seabed or significantly affect the environment;

(iii) The design, construction, or testing of equipment and facilities which will or may be used for exploration or commercial recovery, if such design, construction or testing is conducted on shore, or does not involve the recovery of any but incidental hard mineral resources;

(iv) The furnishing of machinery, products, supplies, services, or materials for any exploration or commercial recovery conducted under a license or permit issued under the Act and implementing regulations, a license or permit or equivalent authorization issued by a reciprocating state, or under an international agreement; and

(v) Activities, other than exploration or commercial recovery activities, of the Federal Government.

(3) No United States citizen may interfere or participate in interference with any activity conducted by any licensee or permittee which is authorized to be undertaken under a license or permit issued by the Administrator to a licensee or permittee under the Act or with any activity conducted by the holder of, and authorized to be undertaken under, a license or permit or equivalent authorization issued by a reciprocating state for the exploration or commercial recovery of hard mineral resources. For purposes of this section, interference includes physical interference with activities authorized by the Act, this part, and a license issued pursuant thereto; the filing of specious claims in the United States or any other nation; and any other activity designed to harass deep seabed mining activities authorized by law. Interference does not include the exercise of any rights granted to United States citizens by the Constitution of the United States, any Federal or State law, treaty, or agreement or regulation promulgated pursuant thereto.

(4) United States citizens must exercise their rights on the high seas with reasonable regard for the interests of other states in their exercise of the freedoms of the high seas.

(b) *Restrictions on issuance of licenses or permits.* The Administrator will not issue—

(1) Any license or permit after the date on which an international agreement is ratified by and enters into force with respect to the United States, except to the extent that issuance of such license or permit is not inconsistent with such agreement;

(2) Any license or permit the exploration plan or recovery plan of which, submitted pursuant to the Act and implementing regulations, would apply to an area to which applies, or would conflict with:

(i) Any exploration plan or recovery plan submitted with any pending application to which priority of right for issuance applies under this part;

(ii) Any exploration plan or recovery plan associated with any existing license or permit; or

(iii) Any equivalent authorization which has been issued, or for which formal notice of application has been submitted, by a reciprocating state prior to the filing date of any relevant application for licenses or permits pursuant to the Act and implementing regulations;

(3) A permit authorizing commercial recovery within any area of the deep seabed in which exploration is authorized under a valid existing license if such permit is issued to a person other than the licensee for such area;

(4) Any exploration license before July 1, 1981, or any permit which authorizes

commercial recovery to commence before January 1, 1988;

(5) Any license or permit the exploration plan or recovery plan for which applies to any area of the deep seabed if, within the 3-year period before the date of application for such license or permit:

(i) The applicant therefor surrendered or relinquished such area under an exploration plan or recovery plan associated with a previous license or permit issued to such applicant; or

(ii) A license or permit previously issued to the applicant had an exploration plan or recovery plan which applied to such area and such license or permit was revoked under section 106 of the Act; or

(6) A license or permit, or approve the transfer of a license or permit, except to a United States citizen.

Subpart B—Applications

§ 970.200 General.

(a) *Who may apply; how.* Any United States citizen may apply to the Administrator for issuance or transfer of an exploration license. Applications must be submitted in the form and manner prescribed in this subpart.

(b) *Place, form and copies.* Applications for the issuance or transfer of exploration licenses must be submitted in writing, verified and signed by an authorized officer or other authorized representative of the applicant, in 25 copies, to the following address: Office of Ocean Minerals and Energy, National Oceanic and Atmospheric Administration, Suite 410, Page 1 Building, 2001 Wisconsin Avenue, N.W., Washington, D.C. 20235.

(c) *Use of application information.* The contents of an application, as set forth below, must provide NOAA with the information necessary to make determinations required by the Act and this part pertaining to the issuance or transfer of an exploration license. Thus, each portion of the application should identify the requirement in this part to which it responds. In addition, the information will be used by NOAA in its function under the Act of consultation and cooperation with other Federal agencies or departments in relation to their programs and authorities, in order to reduce the number of separate actions required to satisfy Federal agencies' responsibilities.

(d) *Pre-application consultation.* To assist in the development of adequate applications and assure that applicants understand how to respond to the provisions of this subpart, NOAA will be available for pre-application consultations with potential applicants.

(e) *Priority of right.*

(1) Priority of right for issuance of licenses to pre-enactment explorers will be established pursuant to Subpart C of this part.

(2) Priority of right for issuance of licenses to new entrants will be established on the basis of the chronological order in which license applications, which are in substantial compliance with the requirements established under this subpart, pursuant to § 970.210, are filed with the Administrator.

(3) Applications must be received by the Office of Ocean Minerals and Energy on behalf of the Administrator before a priority can be established.

(f) *Request for confidential treatment of information.* If an applicant wishes to have any information in his application treated as confidential, he must so indicate pursuant to § 970.902.

Contents

§ 970.201 Statement of financial resources.

(a) *General.* The application must contain information sufficient to demonstrate to the Administrator the financial resources of the applicant to carry out, in accordance with this part, the exploration program set forth in the applicant's exploration plan. The information must show that the applicant possesses the funds necessary to cover the estimated costs of the exploration program or that the applicant has reasonable assurance of obtaining the necessary funds, or a combination of the two. The information must be sufficient for the Administrator to make a determination on the applicant's financial responsibility pursuant to § 970.401.

(b) *Contents.* In particular, the information on financial resources must include:

(1) A description of how the applicant intends to finance the exploration program;

(2) The estimated cost of the exploration program;

(3) A financial statement, income statement and a balance sheet for the applicant for the two preceding years, accompanied by an opinion of a certified public accountant;

(4) If the applicant is affiliated with another company or other companies, the affiliate companies' most recent financial statements, including an income statement and a balance sheet, accompanied by an opinion of a certified public accountant; and

(5) The credit rating and bond rating of the applicant, and affiliates.

§ 970.202 Statement of technological experience and capabilities.

(a) *General.* The application must contain information sufficient to demonstrate to the Administrator the technological capability of the applicant to carry out, in accordance with the regulations contained in this part, the exploration program set out in the applicant's exploration plan. It must contain sufficient information for the Administrator to make a determination on the applicant's technological capability pursuant to § 970.402.

(b) *Contents.* In particular, the information on technological experience and capabilities must include:

(1) A description of the exploration equipment to be used by the applicant in carrying out the exploration program;

(2) A description of the environmental monitoring equipment to be used by the applicant in monitoring the environmental effects of the exploration program; and

(3) The experience of the applicant in using this or similar equipment.

§ 970.203 Exploration plan.

(a) *General.* Each application must include an exploration plan which describes the applicant's projected exploration activities during the period to be covered by the proposed license. Generally, the exploration plan must demonstrate to a reasonable extent that the applicant's efforts will lead to commercial recovery by the end of the 10-year license period. In particular, the plan must include sufficient information for the Administrator, pursuant to this part, to make the necessary determinations pertaining to the certification and issuance or transfer of a license and to the development and enforcement of the terms, conditions and restrictions for a license.

(b) *Contents.* The exploration plan must contain:

(1) The activities proposed to be carried out during the period of the license;

(2) A description of the area to be explored, including its delineation according to § 970.601;

(3) The intended exploration schedule; which must be responsive to the diligence requirements in § 970.602. The schedule should include an approximate projection for the exploration activities planned, such as the following:

(i) Conducting survey cruises to determine the location and abundance of nodules as well as the sea floor configuration, ocean currents and other physical characteristics of potential commercial recovery sites;

(ii) Assaying nodules to determine their metal contents;

(iii) Designing and testing system components onshore and at sea;

(iv) Designing and testing scale-model mining systems which simulate commercial recovery;

(v) Designing and testing scale-model processing systems to prove concepts and designing and testing systems which simulate commercial processing;

(vi) Evaluating the continued feasibility of commercial scale operations based on technical, economic, legal, political and environmental considerations; and

(vii) Applying for permits needed to construct and operate commercial scale facilities;

(4) A description of the methods to be used to determine the location, abundance, and quality (i.e., assay) of nodules, and to measure physical conditions in the area which will affect nodule recovery system design and operations (e.g., seafloor topography, seafloor geotechnic properties, and currents);

(5) A description of research and development activities for components of a nodule recovery system and of the system, or systems, planned to prove commercial recovery system concepts and demonstrate the ability to deliver a continuous flow of nodules to the surface. This description should address such factors as nodule collection technique, seafloor sediment rejection subsystem, mineship nodule separation scheme, pumping method, anticipated equipment test areas, and details on the testing plan;

(6) An estimated schedule of expenditures, which must be responsive to the diligence requirements as discussed in § 970.602; and

(7) Measures to protect the environment and to monitor the effectiveness of environmental safeguards and monitoring systems for commercial recovery. These measures must take into account the provisions in §§ 970.506, 970.518, 970.522 and Subpart G of this part.

§ 970.204 Environmental and use conflict analysis.

(a) *Environmental information.* To enable NOAA to implement better its responsibility under section 109(d) of the Act to develop an environmental impact statement (EIS) on the issuance of an exploration license, the application must include information for use in preparing NOAA's EIS on the environmental impacts of the activities proposed by the applicant. It must present physical, chemical and biological information for the exploration area. This information should include relevant environmental information, if any, obtained during past exploration activities, but need not duplicate information obtained during NOAA's DOMES Project. Planned activities in the area, including equipment and systems to be tested, as well as their environmental implications, also must be described to the best of the applicant's ability. The applicant may include all information with his application, or he may elect to delay submission of detailed and specific information pertaining to system tests and equipment. However, applicants so electing should plan to submit the latter information at least 365 days prior to the test, and if it is submitted subsequent to the original application such tests may not be undertaken in the absence of concurrence by NOAA and the filing of any required final supplement to the EIS. NOAA will develop a technical guidance document which will provide assistance for the agency and the applicant, in consultation, to identify the details on information needed in each case. NOAA may refer to such information for purposes of other determinations under the Act as well. NOAA also will seek to facilitate other Federal decisions on exploration activities by functioning as lead agency for the EIS on the application and related actions by other agencies, including those pertaining to onshore impacts.

(b) *Use conflict information.* To assist the Administrator in making determinations relating to potential use conflicts between the proposed exploration and other activities in the exploration areas, pursuant to §§ 970.503, 970.505, and 970.520, the application must include information known to the applicant with respect to such other activities.

§ 970.205 Vessel safety.

In order to provide a basis for the necessary determinations with respect to the safety of life and property at sea, pursuant to §§ 970.507, 970.521 and Subpart H of this part, the application must contain the following information, except for those vessels under 300 gross tons which are engaged in oceanographic research if they are used in exploration.

(a) *U.S. flag vessel.* The application must contain a demonstration or affirmation that any United States flag vessel utilized in exploration activities will possess a current valid Coast Guard Certificate of Inspection (COI). To the extent that the applicant knows which United States flag vessel he will be using, the application must include a copy of the COI.

(b) *Foreign flag vessel.* The application must also contain information on any foreign flag vessels to be used in exploration activities, which responds to the following requirements. To the extent that the applicant knows which foreign flag vessel he will be using, the application must include evidence of the following:

(1) That any foreign flag vessel whose flag state is party to the International Convention for Safety of Life at Sea, 1974 (SOLAS 74) possesses current valid SOLAS 74 certificates;

(2) That any foreign flag vessel whose flag state is not party to SOLAS 74 but is party to the International Convention for the Safety of Life at Sea, 1960 (SOLAS 60) possesses current valid SOLAS 60 certificates; and

(3) That any foreign flag vessel whose flag state is not a party to either SOLAS 74 or SOLAS 60 meets all applicable structural and safety requirements of a United States flag vessel.

(c) *Supplemental certificates.* If the applicant does not know at the time of submitting an application which vessels he will be using, he must submit the applicable certification for each vessel before the cruise on which it will be used.

§ 970.206 NPDES requirements.

(a) *Applicability.* Section 109(e) of the Act specifically establishes that requirements pertaining to National Pollutant Discharge Elimination System (NPDES) permits pursuant to the Clean Water Act apply to any discharge of a pollutant from a vessel or other floating craft engaged in exploration.

(b) *Information required.* In order to provide sufficient information to accomplish NOAA's role under section 103(e) of the Act of consultation and cooperation and to obtain a determination on an NPDES permit, the application should include the following:

(1) EPA Form 1-General (see the Environmental Protection Agency (EPA) consolidated permit and application form regulations, 33 CFR Parts 122 and 124, at 45 FR 33555, May 19, 1980); and

(2) EPA Form 2C–NPDES (see 45 FR 33567). The information in these forms will be used by EPA to make a determination on a NPDES permit for the proposed exploration activities, including the determination pursuant to the EPA Ocean Discharge Criteria under section 403(c) of the Clean Water Act (40 CFR Part 125, Subpart M, at 45 FR 65942, October 3, 1980). To facilitate EPA's determination, NOAA has addressed in the programmatic EIS

relating to this part the ten considerations listed in 40 CFR 125.122, from the perspective of deep seabed mining exploration activities.

§ 970.207 Statement of ownership.

The application must include sufficient information to demonstrate that the applicant is a United States citizen, as required by § 970.103(b)(6), and as defined in § 970.101(t). In particular, the application must include:

(a) Name, address, and telephone number of the United States citizen responsible for exploration operations to whom notices and orders are to be delivered; and

(b) A description of the citizen or citizens engaging in such exploration, including:

(1) Whether the citizen is a natural person, partnership, corporation, joint venture, or other form of association;

(2) The state of incorporation or state in which the partnership or other business entity is registered;

(3) The name of registered agent or equivalent representative and places of business;

(4) Certification of essential and nonproprietary provisions in articles of incorporation, charter or articles of association; and

(5) The name of each member of the association, partnership, or joint venture, including information about the participation of each partner and joint venturer and/or ownership of stock.

§ 970.208 Antitrust information.

(a) *General.* Section 103(d) of the Act specifically provides for antitrust review of applications by the Attorney General of the United States and the Federal Trade Commission.

(b) *Contents.* In order to provide information for this antitrust review, the application must contain the following:

(1) A copy of each agreement between any parties to any joint venture which is applying for a license, provided that said agreement relates to deep seabed hard mineral resource exploration or mining;

(2) The identity of any affiliate of any person applying for a license;

(3) For each applicant and affiliate of an applicant, for the two preceding years:

(i) The annual tons and dollar value of production and purchases in the United States of each of copper, nickel, cobalt, and manganese minerals;

(ii) The annual tons and dollar value of sales to and in the United States of copper, nickel, cobalt, and manganese minerals;

(iii) The annual tons and dollar value of production and sale to and in the United States of each metal refined from minerals containing copper, nickel, cobalt, and manganese;

(iv) Copies of the annual report, balance sheet and income statement;

(v) Copies of each document submitted to the Securities and Exchange Commission; and

(4) All market studies, surveys and other memoranda, in the custody or control of the applicant or affiliate of the applicant, commenting upon the future prospects for deep seabed hard mineral resource mining.

(c) *Supplementary information.* After reviewing the application submitted to NOAA, the Assistant Attorney General in charge of the Antitrust Division, or the Federal Trade Commission, may request such additional information from the applicant or his affiliate as they deem necessary adequately to fulfill their responsibility under section 103(d) of the Act. Such information must be supplied not later than 30 days after requested by the Assistant Attorney General or the Federal Trade Commission.

§ 970.209 Fee.

(a) *General.* Section 104 of the Act provides that no application for the issuance or transfer of an exploration license will be certified unless the applicant pays to NOAA a reasonable administrative fee, which must reflect the reasonable administrative costs incurred in reviewing and processing the application.

(b) *Amount.* In order to meet this requirement, the application must include a nonrefundable fee payment of $100,000, payable to the National Oceanic and Administration, Department of Commerce. If NOAA incurs any significant costs in excess of this amount in reviewing and processing an application, the agency subsequently will determine those costs and the applicant will be required to submit additional payment prior to issuance or transfer of the license.

Procedures

§ 970.210 Substantial compliance with application requirements.

(a) Priority of right for the issuance of licenses to new entrants will be established on the basis of the chronological order in which license applications which are in substantial compliance with the requirements established under this subpart are filed with the Administrator pursuant to § 970.200.

(b) In order for an application to be in substantial compliance with the requirements of this subpart, it must include information specifically identifiable with and materially responsive to each requirement contained in §§ 970.201 through 970.209.

(c) The Administrator will make a determination as to whether the application is in substantial compliance. Within 30 days after receipt of an application, he will issue written notice to the applicant regarding such determination. The notice will identify, if applicable, in what respects the application is not in either full or substantial compliance.

§ 970.211 Reasonable time for full compliance.

Priority of right will not be lost in case of any application filed which is in substantial but not full compliance, as specified in § 970.210, if the Administrator determines that the applicant, within 60 days after issuance to the applicant by the Administrator of written notice that the application is in substantial but not full compliance, has brought the application into full compliance with the requirements of this subpart.

§ 970.212 Consultation and cooperation with Federal agencies.

(a) Promptly after his receipt of an application, the Administrator will distribute a copy of the application to each other Federal agency or department which has programs or activities within its statutory responsibilities which would be affected by the activities proposed in the application. Based on its legal responsibilities and authorities, each such agency or department may, not later than 60 days after it receives a copy of the application which is in full compliance with this subpart, recommend certification of the application, issuance or transfer of the license, or denial of such certification, issuance or transfer. The advice or recommendation by the Attorney General or Federal Trade Commission on antitrust review, pursuant to § 970.208, may be submitted within 90 days after their receipt of a copy of the application which is in full compliance with this subpart. NOAA will use the benefits of this process of consultation and cooperation to facilitate necessary Federal decisions on the proposed exploration activities, pursuant to the mandate of section 103(e) of the Act to reduce the number of separate actions required to satisfy Federal agencies' statutory responsibilities.

(b) In any case in which a Federal agency or department recommends a denial, it will set forth in detail the manner in which the application does

not comply with any law or regulation within its area of responsibility and will indicate how the application may be amended, or how terms, conditions or restrictions might be added to the license to assure compliance with such law or regulation.

(c) A recommendation from another Federal agency or department for denying or amending an application will not affect its having been in substantial compliance with the requirements of this subpart, pursuant to § 970.210, for purposes of establishing priority of right. However, pursuant to section 103(e) of the Act, NOAA will cooperate with such agencies and with the applicant with the goal of resolving the concerns raised and satisfying the statutory responsibilities of these agencies.

§ 970.213 Public notice, hearing and comment.

(a) *Notice and comments.* The Administrator will publish in the Federal Register notice of receipt of each application for an exploration license. Subject to § 970.902, interested persons will be permitted to examine the materials relevant to such application. Interested persons will have at least 60 days after publication of such notice to submit written comments to the Administrator.

(b) *Hearings.* (1) The Administrator will hold a public hearing on the application and the draft EIS prepared on it pursuant to section 109(d) of the Act in an appropriate location, and may employ such additional methods as he deems appropriate to inform interested persons about each application and to invite their comments thereon.

(2) If the Administrator determines there exists one or more specific and material factual issues which require resolution by formal processes, at least one formal hearing will be held in the District of Columbia in accordance with the provisions of Subpart J of this part. The record developed in any such formal hearing will be part of the basis of the Administrator's decisions on an application.

(c) Hearings held pursuant to this section and other procedures will be consolidated insofar as practicable with hearings held and procedures employed by other agencies.

§ 970.214 Amendment to an application.

After an application has been submitted to the Administrator, but before a determination is made on the issuance or transfer of a license, the applicant must submit an amendment to the application if required by a significant change in the circumstances represented in the original application and affecting the requirements of this subpart. Applicants should consult with NOAA to determine if changes in circumstances are sufficiently significant to require submission of an amendment. The application, as amended, would then serve as the basis for determinations by the Administrator under this part. For each amendment judged by the Administrator to be significant, he will provide a copy of such amendment to each other Federal agency and department which received a copy of the original application, and also will provide for public notice, hearing and comment on the amendment pursuant to § 970.213. Such amendment, however, will not affect the priority of right established by the filing of the original application. After the issuance of or transfer of a license, any revision by the licensee will be made pursuant to § 970.513.

Subpart C—Procedures for Applications Based on Exploration Commenced Before June 28, 1980

§ 970.300 General.

Pursuant to section 101(b) of the Act, any United States citizen who was engaged in exploration before the effective date of the Act (June 28, 1980) qualifies as a pre-enactment explorer and may continue to engage in such exploration:

(a) If he applies for a license pursuant to Subpart B of this part with respect to such exploration within the time period specified in section § 970.301; and

(b) Until such license is issued to such applicant or a final administrative or judicial determination is made affirming the denial of certification of the application for, or issuance of, such license.

§ 970.301 Filing period for applications based on pre-enactment exploration.

Any United States citizen who intends to file an application based on preenactment exploration must notify the Administrator of this intent within 20 days after the effective date of this part and must submit information to confirm that he was engaged in pre-enactment exploration. He also must submit any application to be based upon pre-enactment exploration within 90 days after the effective date of this part. Such applications must be in substantial compliance with the requirements of Subpart B of this part, pursuant to § 970.210(b) and (c). Applications not filed within this 90-day period will not be considered to be based upon pre-enactment exploration. During this 90-day period only applications based on pre-enactment exploration will be accepted. The Administrator will not open such applications until a date which in advance will be announced in writing to each applicant and in the Federal Register, such date to be in accordance with agreement with reciprocating states. In no event, however, will they be opened until after the above 90-day period.

§ 970.302 Procedures and criteria for resolving conflict.

(a) *Multiple applications for the same area of the deep seabed.*

(1) *General.* In any case in which two or more applications based upon pre-enactment exploration propose logical mining units referring to all or part of the same area of the deep seabed, the Administrator will apply the procedures and principles of this section to resolve the conflicts. This section applies only to conflicts among applications submitted in the United States. Conflicts between a U.S. application and a foreign application will be resolved according to the measures provided for among reciprocating states.

(2) *Notification of conflicts.* If the Administrator determines that one or more conflicts exist between or among applications, he will send written notice of the conflicts to each applicant concerned. The notice will describe the part or parts of the proposed logical mining units in conflict. Upon receipt of the notice of conflict, the applicants involved in the conflict may elect to resolve the conflict by voluntary amendment, or, if all parties to a conflict agree, may proceed directly to binding dispute settlement.

(3) *Voluntary resolution of conflicts.* Each applicant involved in a conflict may elect to resolve the conflict by amending his application to eliminate all or part of that area of his proposed logical mining unit in conflict. Such applicant may, in amending his application, select one or more alternative locations that, in lieu of his relinquished proposed logical mining unit or in addition to that part of the original proposal not relinquished, will constitute a logical mining unit in accordance with § 970.601. The applicant must submit the amendment to his application within 30 days after receipt of a notice of conflict. The date of filing of the amendment will be deemed to be the date on which the application was originally filed. Alternative locations applied for in the amended application must be limited to areas for which no applications are pending before the Administrator or a reciprocating state.

(4) *Action on amended applications.* (i) The Administrator will open each amended application at the same hour on the first business day following the close of the 30-day amendment period. Immediately after opening the amended applications, the Administrator will announce the names of the applicants submitting amendments and the location of their proposed logical mining units, as amended.

(ii) If the amended application proposes a logical mining unit that is not in conflict with any other logical mining unit proposed by a pre-enactment explorer, the Administrator will initiate processing and review of the application. To the extent practicable, the deadlines for certification and issuance provided in §§ 970.400 and 970.500, respectively, will run from the date of the original filing.

(iii) If conflicts among proposed logical mining units continue to exist after the voluntary amendment under this section, the Administrator:

(A) Will act in accordance with paragraph (b) of this section to resolve the conflict; and

(B) Will, if an applicant so requests, proceed in accordance with this part, with review of that portion of the application that is not in conflict with another application. The Administrator will proceed with such review only if the applicant advises the Administrator in writing that loss of the area in conflict will not materially affect the applicant's ability to perform the exploration program set forth in his application. The request by an applicant for the Administrator to proceed with process and review of the non-conflicting portion of the application, and any fees paid or expenses incurred by an applicant with respect to such processing and review, will not be taken into account when applying the equitable principles described in paragraph (c) of this section.

(b) *Conflict resolution.* (1) If the Administrator finds that a conflict between applications exists after the 30-day period for resolution by voluntary amendment in paragraph (a) expires, he will send written notice of the remaining conflict to each applicant concerned with the conflict, including the location of those portions of the proposed logical mining units in conflict. The applicants will have 45 days from the date of issuance of the notice to:

(i) Agree in writing to a final resolution of the conflict; or

(ii) Agree in writing to submit the conflict to a binding conflict resolution procedure of the applicants' choice. This procedure must be one that is normally capable of making a final determination on the merits of the conflict within one year after submission of the dispute.

(2) If, at the end of the 45-day period specified in paragraph (b)(1) of this section, the applicants have not entered into an agreement as specified in paragraph (b)(1)(i) or (b)(1)(ii) of this section, then the Administrator will notify each applicant in writing that the conflicting applications will be resolved by the Administrator after a formal hearing is held concerning the conflicting applications.

(3) Any formal hearing held pursuant to paragraph (b) (2) will be held in accordance with Subpart J of this part, except that:

(i) The General Counsel of NOAA will not as a matter of right be a party to the hearing; however, the General Counsel may be admitted to the hearing by the administrative law judge as a party or as an interested person pursuant to § 970.1001(f)(2) and (3); and

(ii) The judge will take such actions as he deems necessary and appropriate to conclude the hearing and transmit a recommended decision to the Administrator not later than the 120th day following the date on which the matter was referred to the judge.

(c) *Equitable principles.* In determining the superior priority between or among conflicting applications, the judge and the Administrator will apply principles of equity. The equities considered when determining the superior priority of right to a site the subject of a conflicting application will be only the equities pertaining to investment and programs related to development of the area in conflict.

(1) *Primary principles.* The following principles must be taken into account with respect to each applicant:

(i) The date on which each applicant, or predecessor in interest, or component organization thereof, commenced exploration activities;

(ii) The continuity of such exploration between the date when it was commenced and the date of submission of the application;

(iii) The extent of such exploration, taking into account the intensity of the exploration program and the amount and quality of the data collected; and

(iv) The amount of funds expended with respect to such exploration. An appropriate discount rate may be applied to aid in the equitable comparison of expenditures made in different years.

(2) *Secondary principles.* In addition to the principles of equity listed in paragraph (c)(1) of this section, other principles of equity may be considered, but will be given secondary importance in balancing the equities between or among the applicants.

(d) *Resolution by subunits.* (1) In some cases it may be useful to resolve conflicting applications by comparing the relative equities of the applicants with respect to various portions or subunits of the area of the deep seabed subject to overlapping claims.

(2) If each applicant involved in the conflict agrees to the procedure described in the preceding sentence, the judge or the Administrator may elect to subdivide disputed areas into a number of subunits of equal predetermined size and shape. Subunits immediately inside the perimeter of the area of the deep seabed subject to the overlapping claims may be of a size smaller in area, and of a different shape along one or more sides, than the subunits of equal predetermined size and shape.

(3) The subunits should be small enough to allow a well-focused and specific comparison of exploration activities conducted in, and equities assignable to, each subunit; however, each subunit should be large enough that an efficient and diligent commercial recovery operation would require at least one year to mine the area of the deep seabed represented by the subunit.

(4) The judge or the Administrator will, after determining the relative equities of each applicant with respect to each subunit, grant priority of right to each subunit to the applicant who has the superior equitable position with respect to that subunit. To the extent practicable, the assignment of subunits will be made on the basis of contiguity to each applicant's proposed logical mining unit not in dispute.

(e) *Processing of resolved applications.* After conflicts between or among applications have been resolved pursuant to this subpart, the Administrator will process the resolved applications according to this part.

(f) *Effect on priorities of new entrants.* A pre-enactment explorer is entitled to priority of right, over a new entrant, for any area in which he has engaged in exploration. A pre-enactment explorer will not be deemed to have engaged in exploration within an area if, with respect to that area, he has not filed an application within the time period specified in § 970.301. Such application may include an amendment, which is filed by the end of the 45-day conflict resolution period provided for in paragraph (b)(1) of this section, with respect to another area where exploration has been conducted.

Subpart D—Certification of Applications

§ 970.400 General.

(a) Certification is an intermediate step between receipt of an application for issuance or transfer of a license and its actual issuance or transfer. It is a determination which focuses on the eligibility of the applicant.

(b) Before the Administrator may certify an application for issuance or transfer of a license, he must determine that issuance of the license would not violate any of the restrictions in § 970.103(b). He also must make written determinations with respect to the requirements set forth in § 970.401 through 970.406. This will be done after consultation with other departments and agencies pursuant to § 970.212.

(c) To the maximum extent possible, the Administrator will endeavor to complete certification of an application within 100 days after submission of an application which is in full compliance with Subpart B of this part. If final certification or denial of certification has not occurred within 100 days after such submission of the application, the Administrator will inform the applicant in writing of the pending unresolved issues, the agency's efforts to resolve them, and an estimate of the time required to do so.

§ 970.401 Financial responsibility.

(a) Before the Administrator may certify an application for an exploration license he must find that the applicant has demonstrated that, upon issuance or transfer of the license, the applicant will be financially responsible to meet all obligations which he may require to engage in the exploration proposed in the application.

(b) In order for the Administrator to make this determination, the applicant must show to the Administrator's satisfaction that he possesses the finances or has reasonable assurance of obtaining the finances necessary to carry out, in accordance with the provisions contained in this part, the exploration program set forth in his exploration plan.

§ 970.402 Technological capability.

(a) Before the Administrator may certify an application for an exploration license, he must find that the applicant has demonstrated that, upon issuance or transfer of the license, the applicant will have the technological capability to engage in the proposed exploration.

(b) In order for the Administrator to make this determination, the applicant must demonstrate to the Administrator's satisfaction that the applicant will possess, at the time of issuance or transfer of the license, the technology and expertise, as needed, to carry out the exploration program set forth in his exploration plan.

§ 970.403 Previous license and permit obligations.

In order to certify an application, the Administrator must find that the applicant has satisfactorily fulfilled all obligations under any license or permit previously issued or transferred to the applicant under the Act.

§ 970.404 Adequate exploration plan.

Before he may certify an application, the Administrator must find that the proposed exploration plan of the applicant meets the requirements of § 970.203.

§ 970.405 Appropriate exploration site size and location.

Before the Administrator may certify an application, he must approve the size and location of the exploration area selected by the applicant. The Administrator will approve the size and location of the area unless he determines that the area is not a logical mining unit pursuant to § 970.601.

§ 970.406 Fee payment.

Before the Administrator may certify an application, he must find that the applicant has paid the license fee as specified in § 970.209.

§ 970.407 Denial of certification.

(a) The Administrator may deny certification of an application if he finds that the requirements of this subpart or the requirements for issuance or transfer under §§ 970.503 through 970.507 have not been met.

(b) When the Administrator proposes to deny certification he will send to the applicant, and publish in the **Federal Register**, written notice of intention to deny certification. Such notice will include:

(1) The basis upon which the Administrator proposes to deny certification; and

(2) If the basis for the proposed denial is a deficiency which the Administrator believes the applicant can correct:

(i) The action believed necessary to correct the deficiency; and

(ii) The time within which any correctable deficiency must be corrected (the period of time may not exceed 180 days except as specified by the Administrator for good cause).

(c) The Administrator will deny certification:

(1) On the 30th day after the date the notice is sent to the applicant, under paragraph (b) of this section, unless before such 30th day the applicant files with the Administrator a written request for an administrative review of the proposed denial; or

(2) On the last day of the period established under paragraph (b)(2)(ii) in which the applicant must correct a deficiency, if such deficiency has not been corrected before such day and an administrative review requested pursuant to paragraph (c)(1) is not pending or in progress.

(d) If a timely request for administrative review of the proposed denial is made by the applicant under paragraph (c)(1) of this section, the Administrator will promptly begin a formal hearing in accordance with Subpart J of this part. If the proposed denial is the result of a correctable deficiency, the administrative review will proceed concurrently with any attempts to correct the deficiency, unless the parties agree otherwise or the administrative law judge orders differently.

(e) If the Administrator denies cetification, he will send to the applicant written notice of the denial, including the reasons therefor.

(f) Any final determination by the Administrator granting or denying certification is subject to judicial review as provided in Chapter 7 of Title 5, United States Code.

§ 970.408 Notice of certification.

Upon making a final determination to certify an application for an exploration license, the Administrator will promptly send written notice of his determination to the applicant.

Subpart E—Issuance/Transfer/Terms, Conditions and Restrictions

§ 970.500 General.

(a) *Proposal.* After certification of an application pursuant to Subpart D of this part, the Administrator will proceed with a proposal to issue or transfer a license for the exploration activities described in the application.

(b)(1) *Terms, conditions and restriction.* Within 180 days (or such longer period as the Administrator may establish for good cause shown in writing) after certification, the Administrator will propose terms and conditions for, and restrictions on, the proposed exploration which are consistent with the provisions of the Act and this part as set forth in §§ 970.517 through 970.524. The Administrator will propose these in writing to the applicant. Also, public notice thereof will be provided pursuant to § 970.501, and they will be included with the draft

of the EIS on the issuance of a license which is required by section 109(d) of the Act.

(2) If the Administrator does not propose terms, conditions and restrictions within 180 days after certification, he will notify the applicant in writing of the reasons for the delay and will indicate the approximate date on which the proposed terms, conditions and restrictions will be completed.

(c) *Findings.* Before issuing or transferring an exploration license, the Administrator must make written findings on the requirements in § 970.503 through 970.507. These findings will be made after considering all information submitted with respect to the application and proposed issuance or transfer. He will make a final determination on issuance or transfer of a license, and will publish a final EIS on that action, within 180 days (or such longer period of time as he may establish for good cause shown in writing) following the date on which proposed terms, conditions and restrictions, and the draft EIS, are published.

Issuance/Transfer; Modification/ Revision; Suspension/Revocation

§ 970.501 Proposal to issue or transfer and of terms, conditions and restrictions.

(a) *Notice and comment.* The Administrator will publish in the **Federal Register** notice of each proposal to issue or transfer, and of terms and conditions for, and restrictions on, an exploration license. Subject to § 970.902, interested persons will be permitted to examine the materials relevant to such proposals. Interested persons will have at least 60 days after publication of such notice to submit written comments to the Administrator.

(b) *Hearings.*

(1) The Administrator will hold a public hearing in an appropriate location and may employ such additional method as he deems appropriate to inform interested persons about each proposal and to invite their comments thereon.

(2) If the Administrator determines there exists one or more specific and material factual issues which require resolution by formal processes, at least one formal hearing will be held in the District of Columbia in accordance with the provisions of Subpart J of this part. The record developed in any such formal hearing will be part of the basis for the Administrator's decisions on issuance or transfer of, and of terms, conditions and restrictions for, the license.

(c) Hearings held pursuant to this section will be consolidated insofar as practicable with hearings held by other agencies.

§ 970.502 Consultation and cooperation with Federal agencies.

Prior to the issuance or transfer of an exploration license, the Administrator will continue the consultation and cooperation with other Federal agencies which were initated pursuant to § 970.212. He also will consult, prior to any issuance, transfer, modification or renewal of a license, with any affected Regional Fishery Management Council established pursuant to section 302 of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1852) if the activities undertaken pursuant to such license could adversely affect any fishery within the Fishery Conservation Zone, or any anadromous species or Continental Shelf fishery resource subject to the exclusive management authority of the United States beyond such zone.

§ 970.503 Freedom of the high seas.

(a) Before issuing or transferring an exploration license, the Administrator must find that the exploration proposed in the application will not unreasonably interfere with the exercise of the freedoms of the high seas by other nations, as recognized under general principles of international law.

(b) In making this finding, the Administrator will recognize that exploration for hard mineral resources of the deep seabed is a freedom of the high seas. In the exercise of this right, each licensee must act with reasonable regard for the interests of other nations in their exercise of the freedoms of the high seas.

(c)(1) In the event of a conflict between the exploration program of an applicant or licensee and a competing use of the high seas by another nation or its nationals, the Administrator, in consultation and cooperation with the Department of State and other interested agencies, will enter into negotiations with that nation to resolve the conflict. To the maximum extent possible the Administrator will endeavor to resolve the conflict in a manner that will allow both uses to take place in a manner in which neither will unreasonably interfere with the other.

(2) If both uses cannot be conducted harmoniously in the area subject to the exploration plan, the Administrator will decide whether to issue or transfer the license, taking into account:

(i) The comparative detriments to the national interests involved;

(ii) The historic uses of the area;

(iii) The comparative injury to the competing uses of locating elsewhere;

(iv) The competing equities between the uses, taking into consideration the duration and continuity of the uses and the amount of funds expended; and

(v) Other factors which the Administrator determines to be relevant.

§ 970.504 International obligations of the United States.

Before issuing or transferring an exploration license, the Administrator must find that the exploration proposed in the application will not conflict with any international obligation of the United States established by any treaty or international convention in force with respect to the United States.

§ 970.505 Breach of international peace and security involving armed conflict.

Before issuing or transferring an exploration license, the Administrator must find that the exploration proposed in the application will not create a situation which may reasonably be expected to lead to a breach of international peace and security involving armed conflict.

§ 970.506 Environmental effects.

Before issuing or transferring an exploration license, the Administrator must find that the exploration proposed in the application cannot reasonably be expected to result in a significant adverse effect on the quality of the environment, taking into account the analyses and information in any applicable EIS prepared pursuant to section 109(c) or 109(d) of the Act. This finding also will be based upon the considerations and approach in § 970.701.

§ 970.507 Safety at sea.

Before issuing or transferring an exploration license, the Administrator must find that the exploration proposed in the application will not pose an inordinate threat to the safety of life and property at sea. This finding will be based on the requirements reflected in §§ 970.205 and 970.801.

§ 970.508 Denial of issuance or transfer.

(a) The Administrator may deny issuance or transfer of a license if he finds that the applicant or the proposed exploration activities do not meet the requirements of this part for the issuance or transfer of a license.

(b) When the Administrator proposes to deny issuance or transfer, he will send to the applicant, and publish in the **Federal Register**, written notice of such intention to deny issuance or transfer. Such notice will include:

(1) The basis upon which the Administrator proposes to deny issuance or transfer; and

(2) If the basis for the proposed denial is a deficiency which the Administrator believes the applicant can correct:

(i) The action believed necessary to correct the deficiency; and

(ii) The time within which any correctable deficiency must be corrected (the period of time may not exceed 180 days except as specified by the Administrator for good cause).

(c) The Administrator will deny issuance or transfer:

(1) On the 30th day after the date the notice is sent to the applicant under paragraph (b) of this section, unless before such 30th day the applicant files with the Administrator a written request for an administrative review of the proposed denial; or

(2) On the last day of the period established under paragraph (b)(2)(ii) in which the applicant must correct a deficiency, if such deficiency has not been corrected before such day and an administrative review requested pursuant to paragraph (c)(1) is not pending or in progress.

(d) If a timely request for administrative review of the proposed denial is made by the applicant under paragraph (c)(1) of this section, the Administrator will promptly begin a formal hearing in accordance with Subpart J of this part. If the proposed denial is the result of a correctable deficiency, the administrative review will proceed concurrently with any attempt to correct the deficiency, unless the parties agree otherwise or the administrative law judge orders differently.

(e) If the Administrator denies issuance or transfer, he will send to the applicant written notice of the denial, including the reasons therefor.

(f) Any final determination by the Administrator granting or denying issuance of a license is subject to judicial review as provided in Chapter 7 of Title 5, United States Code.

§ 970.509 Notice of issuance or transfer.

If the Administrator finds that the requirements of this subpart have been met, he will issue or transfer the license along with the appropriate terms, conditions and restrictions. Notification thereof will be made in writing to the applicant and in the Federal Register.

§ 970.510 Objections to terms, conditions and restrictions.

(a) The licensee may file a notice of objection to any term, condition or restriction in the license. The licensee may object on the grounds that any term, condition or restriction is inconsistent with the Act or this part, or on any other grounds which may be raised under applicable provisions of law. If the licensee does not file notice of an objection within the 60-day period immediately following the licensee's receipt of the notice of issuance or transfer under § 970.509, he will be deemed conclusively to have accepted the terms, conditions and restrictions in the license.

(b) Any notice of objection filed under paragraph (a) of this section must be in writing, must contain the precise legal basis for the objection, and must provide information relevant to any underlying factual issues deemed by the licensee as necessary to the Administrator's decision upon the objection.

(c) Within 90 days after receipt of the notice of objection, the Administrator will act on the objection and publish in the Federal Register, as well as provide to the licensee, written notice of his decision.

(d) If, after the Administrator takes final action on an objection, the licensee demonstrates that a dispute remains on a material issue of fact, the Administrator will provide for a formal hearing which will proceed in accordance with Subpart J of this part.

(e) Any final determination by the Administrator on an objection to terms, conditions or restrictions in a license after the formal hearing provided in paragraph (d) is subject to judicial review as provided in Chapter 7 of Title 5, United States Code.

§ 970.511 Modification of terms, conditions and restrictions.

(a) After issuance or transfer of any license, the Administrator, after consultation with interested agencies and the licensee, may modify any term, condition, or restriction in such license for the following purposes:

(1) To avoid unreasonable interference with the interests of other nations in their exercise of the freedoms of the high seas, as recognized under general principles of international law. This determination will take into account the considerations listed in § 970.503;

(2) If relevant data and other information (including, but not limited to, data resulting from exploration activities under the license) indicate that modification is required to protect the quality of the environment or to promote the safety of life and property at sea;

(3) To avoid a conflict with any international obligation of the United States, established by any treaty or convention in force with respect to the United States, as determined in writing by the President; or

(4) To avoid any situation which may reasonably be expected to lead to a breach of international peace and security involving armed conflict, as determined in writing by the President.

(b) The procedures for objection to the modification of a term, condition or restriction will be the same as those for objection to an original term, condition or restriction under § 970.510. Public notice of modifications under this section will be made according to § 970.514.

§ 970.512 Suspension or modification of activities; suspension or revocation of licenses.

(a) The Administrator may:

(1) In addition to, or in lieu of, the imposition of any civil penalty under Subpart K of this part, or in addition to the imposition of any fine under Subpart K, suspend or revoke any license issued under this part, or suspend or modify any particular activities under such a license, if the licensee substantially fails to comply with any provision of the Act, this part, or any term, condition or restriction of the license; and

(2) Suspend or modify particular activities under any license, if the President determines that such suspension or modification is necessary:

(i) To avoid any conflict with any international obligation of the United States established by any treaty or convention in force with respect to the United States; or

(ii) To avoid any situation which may reasonably be expected to lead to a breach of international peace and security involving armed conflict.

(b) Any action taken by the Administrator in accordance with paragraph (a)(1) will proceed pursuant to the procedures in § 970.1103. Any action taken in accordance with paragraph (a)(2) will proceed pursuant to paragraphs (c) through (i) of this section.

(c) Prior to taking any action specified in paragraph (a)(2) the Administrator will publish in the Federal Register, and send to the licensee, written notice of the proposed action. The notice will include:

(1) The basis of the proposed action; and

(2) If the basis for the proposed action is a deficiency which the Administrator believes the licensee can correct:

(i) The action believed necessary to correct the deficiency; and

(ii) The time within which any correctable deficiency must be corrected (this period of time may not exceed 180

days except as specified by the Administrator for good cause).

(d) The Administrator will take the proposed action:

(1) On the 30th day after the date the notice is sent to the licensee, under paragraph (c) of this section, unless before such 30th day the licensee files with the Administrator a written request for an administrative review of the proposed action; or

(2) On the last day of the period established under paragraph (c)(2)(ii) in which the licensee must correct the deficiency, if such deficiency has not been corrected before such day and an administrative review requested pursuant to paragraph (d)(1) is not pending or in progress.

(e) If a timely request for administrative review of the proposed denial is made by the licensee under paragraph (d)(1) of this section, the Administrator will promptly begin a formal hearing in accordance with Subpart J of this part. If the proposed denial is the result of a correctable deficiency, the administrative review will proceed concurrently with any attempt to correct the deficiency, unless the parties agree otherwise or the administrative law judge orders differently.

(f) The Administrator will serve on the licensee, and publish in the **Federal Register**, written notice of the action taken including the reasons therefor.

(g) Any final determination by the Administrator to take the proposed action is subject to judicial review as provided in Chapter 7 of Title 5, United States Code.

(h) The issuance of any notice of proposed action under this section will not affect the continuation of exploration activities by a licensee, except as provided in paragraph (i).

(i) The provisions of paragraphs (c), (d), (e) and (h) will not apply when:

(1) The President determines by Executive Order that an immediate suspension of a license, or immediate suspension or modification of particular activities under such license, is necessary for the reasons set forth in paragraph (a)(2); or

(2) The Administrator determines that immediate suspension of such a license, or immediate suspension or modification of particular activities under a license, is necessary to prevent a significant adverse effect on the environment or to preserve the safety of life or property at sea, and the Administrator issues an emergency order requiring such immediate suspension. However, the licensee may seek administrative review of such emergency suspension or modification imposed under this paragraph after it has been imposed. The Administrator will determine whether any administrative review granted will be in the form of an informal or formal hearing.

§ 970.513 Revision of a license.

(a) During the term of an exploration license, the licensee may submit to the Administrator an application for a revision of the license or the exploration plan associated with it. NOAA recognizes that changes in circumstances encountered, and in information and technology developed, by the licensee during exploration may require such revisions. In some cases it may even be advisable to recognize at the time of filing the original license application that although the essential information for issuing or transferring a license as specified in §§ 970.201 through 920.208 must be included in such application, some details may have to be provided in the future in the form of a revision. In such instances, the Administrator may issue or transfer a license which would authorize exploration activities and plans only to the extent described in the application.

(b) The Administrator will approve such application for a revision upon a finding in writing that the revision will comply with the requirements of the Act and this part.

(c) A change which would require an application to and approval by the Administrator as a revision is a change in one or more of:

(1) The bases for certifying the original application pursuant to §§ 970.401 through 970.406;

(2) The bases for issuing or transferring the license pursuant to §§ 970.503 through 970.507; or

(3) The terms, conditions and restrictions issued for the license pursuant to §§ 970.517 through 970.524.

§ 970.514 Scale requiring application procedures.

(a) A proposal by the Administrator to modify a term, condition or restriction in a license pursuant to § 970.511, or an application by a licensee for revision of a license or exploration plan pursuant to § 970.513, is significant and must be followed by the full application procedures in this part if it would result in other than an incidental:

(1) Increase in the size of the exploration area; or

(2) Change in the location of the area.

An incidental increase or change is that which equals two percent or less of the original exploration area, so long as such adjustment is contiguous to the licensed area.

(b) All proposed modifications or revisions other than described in paragraph (a) will be acted on after a notice thereof is published by the Administrator in the **Federal Register**, with a 60-day opportunity for public comment. On a case-by-case basis, the Administrator will determine if other procedures, such as a public hearing in a potentially affected area, are warranted.

§ 970.515 Duration of a license.

(a) Each exploration license will be issued for a period of 10 years.

(b) If the licensee has substantially complied with the license and its associated exploration plan and requests an extension of the license, the Administrator will extend the license on terms, conditions and restrictions consistent with the Act and this part for a period of not more than 5 years.

(c) Successive extensions may be requested, and will be granted by the Administrator, based on the criteria, and for the length of time, specified in paragraph (b) of this section.

§ 970.516 Approval of license transfers.

(a) The Administrator may transfer a license after a written request by the licensee. After a licensee submits such a request to the Administrator, the proposed transferee will be deemed an applicant for an exploration license, and will be subject to the requirements and procedures of this part.

(b) The Administrator will transfer a license if the proposed transferee and exploration activities meet the requirements of the Act and this part, and if the proposed transfer is in the public interest. The Administrator will presume that the transfer is in the public interest if it meets the requirements of the Act and this part.

Terms, Conditions, and Restrictions

§ 970.517 Diligence requirements.

The terms, conditions and restrictions in each exploration license must include provisions to assure diligent development. The Administrator will establish these pursuant to § 970.602.

§ 970.518 Environmental protection requirements.

(a) Each exploration license must contain such terms, conditions and restrictions, established by the Administrator, which prescribe actions the licensee must take in the conduct of exploration activities to assure protection of the environment. The Administrator will establish these pursuant to § 970.702.

(b) Before establishing the terms, conditions and restrictions pertaining to

environmental protection, the Administrator will consult with the Administrator of the Environmental Protection Agency, the Secretary of State and the Secretary of the department in which the Coast Guard is operating. He also will take into account and give due consideration to the information contained in the final EIS prepared with respect to that proposed license.

§ 970.519 Resource conservation requirements.

For the purpose of conservation of natural resources, each license issued under this part will contain, as needed, terms, conditions and restrictions which have due regard for the prevention of waste and the future opportunity for the commercial recovery of the unrecovered balance of the hard mineral resources in the license area. The Administrator will establish these pursuant to § 970.503.

§ 970.520 Freedom of the high seas requirements.

Each license issued under this part must include such restrictions as may be necessary and appropriate to ensure that the exploration activities do not unreasonably interfere with the interests of other nations in their exercise of the freedoms of the high seas, as recognized under general principles of international law, such as fishing, navigation, submarine pipeline and cable laying, and scientific research. The Administrator will consider the factors in § 970.503 in establishing these restrictions.

§ 970.521 Safety at sea requirements.

The Secretary of the department in which the Coast Guard is operating, in consultation with the Administrator, will require in any license issued under this part, in conformity with principles of international law, that vessels documented under the laws of the United States and used in activities authorized under the license comply with conditions regarding the design, construction, alteration, repair, equipment, operation, manning and maintenance relating to vessel and crew safety and the promotion of safety of life and property at sea. These requirements will be established with reference to Subpart H of this part.

§ 970.522 Monitoring requirements.

Each exploration license must require the licensee:

(a) To allow the Administrator to place appropriate Federal officers or employees as observers aboard vessels used by the licensee in exploration activities to:

(1) Monitor such activities at such time, and to such extent, as the Administrator deems reasonable and necessary to assess the effectiveness of the terms, conditions, and restrictions of the license; and

(2) Report to the Administrator whenever such officers or employees have reason to believe there is a failure to comply with such terms, conditions, and restrictions;

(b) To cooperate with such officers and employees in the performance of monitoring functions; and

(c) To monitor the environmental effects of the exploration activities in accordance with a monitoring plan developed by NOAA and to submit such information as NOAA finds to be necessary and appropriate to assess environmental impacts and to develop and evaluate possible methods of mitigating adverse environmental effects. This environmental monitoring plan and reporting will respond to the concerns and procedures discussed in Subpart G of this part.

§ 970.523 Special terms, conditions, and restrictions.

Although the general criteria and standards to be used in establishing terms, conditions, and restrictions for a license are set forth in this part, as referenced in §§ 970.517 through 970.522, the Administrator may impose special terms, conditions, and restrictions for the conservation of natural resources, protection of the environment, or the safety of life and property at sea when required by differing physical and environmental conditions.

§ 970.524 Other Federal requirements.

Pursuant to § 970.212, another Federal agency, upon review of an exploration license application submitted under this part, may indicate how terms, conditions, and restrictions might be added to the license, to assure compliance with any law or regulation within that agency's area of responsibility. In response to the intent, reflected in section 103(e) of the Act, to reduce the number of separate actions to satisfy the statutory responsibilities of these agencies, the Administrator may include such terms, conditions, and restrictions in a license.

Subpart F—Resource Development Concepts

§ 970.600 General.

Several provisions in the Act relate to appropriate mining techniques or mining efficiency. These raise what could be characterized as resource development issues. In particular, under section 103(a)(2)(D) of the Act, the applicant will select the size and location of the area of an exploration plan, which will be approved unless the Administrator finds that the area is not a "logical mining unit." Also, pursuant to section 108 of the Act the applicant's exploration plan and the terms, conditions and restrictions of each license must be designed to ensure diligent development. In addition, for the purpose of conservation of natural resources, section 110 of the Act provides that each license is to contain, but only as needed, terms, conditions, and restrictions which have due regard for the prevention of waste and the future opportunity for the commercial recovery of the unrecovered balance of the resources.

§ 970.601 Logical mining unit.

(a) In the case of an exploration license, a logical mining unit is an area of the deep seabed which can be explored under the license, and within the 10-year license period, in an efficient, economical and orderly manner with due regard for conservation and protection of the environment, taking into consideration the resource data, other relevant physical and environmental characteristics, and the state of the technology of the applicant as set forth in the exploration plan. In addition, it must be of sufficient size to allow for intensive exploration.

(b) Approval by the Administrator of a proposed exploration logical mining unit will be based on a case-by-case review of each application. In order to provide a proper basis for this evaluation, the applicant's exploration plan should describe the seabed topography, the location of mineral deposits and the nature of planned equipment and operations. Also, the exploration plan must show the relationship between the area to be explored and the applicant's plans for commercial recovery volume, to the extent projected in the exploration plan. Generally, it will be presumed that the above considerations would result in an exploration area not larger than 80,000 square kilometers; however, a larger area may be approved upon a showing by the applicant that the area will meet the standards set forth in this section.

(c) In delineating an exploration area, the applicant need not include unmineable areas. Thus, the area need not consist of contiguous segments, as long as each segment would be efficiently mineable and the total proposed area constitutes a logical mining unit. In describing the area, the

applicant must present the metes and bounds thereof, using the Universal Transverse Mercator System for the 1866 Clarke Spheroid.

(d) At the applicant's option, for the purpose of satisfying a possible obligation under a future Law of the Sea Treaty, the exploration area proposed may be up to 160,000 square kilometers, which can be divided into two exploration sites of equal estimated commercial value. The application should specify if this option is chosen.

§ 970.502 Diligent exploration.

(a) Each licensee must pursue diligently the activities described in his approved exploration plan. This requirement applies to the full scope of the plan, including environmental safeguards and monitoring systems. To help assure this diligence, terms, conditions and restrictions which the Administrator issues with a license will require such periodic reasonable expenditures for exploration by the licensee as the Administrator may establish, taking into account the size of the area of the deep seabed to which the exploration plan applies and the amount of funds which is estimated by the Administrator to be required during exploration for commercial recovery of hard mineral resources to begin within the time limit established by the Administrator. However, such required expenditures will not be established at a level which would discourage exploration by persons with less costly technology than is prevalently in use.

(b) In order to fulfill the diligence requirement, the applicant first must propose to the Administrator an estimated schedule of activities and expenditures pursuant to § 970.203(b) (3) and (6). The schedule must show, and the Administrator must be able to make a reasonable determination, that the applicant can complete his exploration activities within the term of the license. In this regard, there must be a reasonable relationship between the size of the exploration area and the financial and technological resources reflected in the application. Also, the exploration must clearly point toward developing the mine site and beginning commercial recovery operations before the end of the 10-year license period.

(c) Ultimately, the diligence requirement will involve a retrospective determination by the Administrator, based on the licensee's reasonable conformance to the approved exploration plan. Such determination, however, will take into account the need for some degree of flexibility in an exploration plan. It also will include consideration of the needs and stage of development of each licensee, again based on the approved exploration plan. In addition, the determination will take account of legitimate periods of time when there is no or very low expenditure, and will allow for a certain degree of flexibility for changes encountered by the licensee in such factors as its resource knowledge and financial considerations.

(d) In order for the Administrator to make determinations on a licensee's adherence to the diligence requirements, the licensee must submit a report annually reflecting its conformance to the schedule of activities and expenditures contained in the license. In case of any changes requiring a revision to an approved license and exploration plan, the licensee must advise the Administrator in accordance with § 970.514.

§ 970.503 Conservation of resources.

(a) With respect to the exploration phase of seabed mining, the requirement for the conservation of natural resources, encompassing due regard for the prevention of waste and the future opportunity for the commercial recovery of the unrecovered balance of the hard mineral resources in the area to which the license applies, may not be particularly relevant. Thus, since the Act requires such terms, conditions and restrictions only as needed, exploration licenses will require such provisions only if the Administrator deems necessary. However, mining systems development described in a license application and exploration plan could involve sustained reliability and endurance tests, which could in turn result in more than insignificant recovery. If so, there may be a need to set some guidelines in a license pursuant to § 970.519.

(b) If the Administrator establishes in a license such terms, conditions and restrictions relating to conservation of resources, he will employ a balancing process in the consideration of the state of the technology, the processing system utilized and the value and potential use of any waste, the environmental effects of the exploration activities, economic and resource data, and the national need for hard mineral resources.

(c) Based on the review of each exploration plan, the Administrator may include in a license the requirement for a licensee to submit information during the term of the license period on specified activities which may result in the waste, or affect the future opportunity for recovery, of hard mineral resources.

Subpart G—Environmental Effects

§ 970.700 General.

Congress, in authorizing the exploration for hard mineral resources under the Act, also enacted provisions relating to the protection of the marine environment from the effects of exploration activities. For example, before the Administrator may issue a license, pursuant to section 105(a)(4) of the Act he must find that the exploration proposed in an application cannot reasonably be expected to result in a significant adverse effect on the quality of the environment. Also, the Act requires in section 109(b) that each license issued by the Administrator must contain such terms, conditions and restrictions which prescribe the actions the licensee must take in the conduct of exploration activities to assure protection of the environment. Furthermore, the Act in section 105(c)(1)(B) provides for the modification by the Administrator of any term, condition or restriction if relevant data and other information indicates that modification is required to protect the quality of the environment. In addition, section 114 of the Act specifies that each license issued under the Act must require the licensee to monitor the environmental effects of the exploration activities in accordance with guidelines issued by the Administrator, and to submit such information as the Administrator finds to be necessary and appropriate to assess environmental impacts and to develop and evaluate possible methods of mitigating adverse environmental effects.

§ 970.701 Significant adverse environmental effects.

(a) *Activities with no significant impact.* NOAA believes that the following exploration activities are very similar or identical to activities considered in section 6(c)(3) of NOAA Directives Manual 02-10, and therefore have no potential for significant environmental impact, and will require no further environmental assessment.

(1) Gravity and magnetometric observations and measurements;

(2) Bottom and sub-bottom acoustic profiling or imaging without the use of explosives;

(3) Mineral sampling of a limited nature such as those using either core, grab or basket samplers;

(4) Water and biotic sampling, if the sampling does not adversely affect shellfish beds, marine mammals, or an endangered species, or if permitted by

the National Marine Fisheries Service or another Federal agency;

(5) Meteorological observations and measurements, including the setting of instruments;

(6) Hydrographic and oceanographic observations and measurements, including the setting of instruments;

(7) Sampling by box core, small diameter core or grab sampler, to determine seabed geological or geotechnical properties;

(8) Television and still photographic observation and measurements;

(9) Shipboard mineral assaying and analysis; and

(10) Positioning systems, including bottom transponders and surface and subsurface buoys filed in *Notices to Mariners*.

(b) *Activities with potential impact.* (1) NOAA research has identified at-sea testing of recovery equipment and the operation of processing test facilities as activities which have some potential for significant environmental impacts during exploration. However, the research has revealed that only a limited number of the effects from such activities are expected to have potential for significant adverse environmental impact.

(2) The programmatic EIS documents four at-sea effects of deep seabed mining which cumulatively during commercial recovery have the potential for significant effect. These include the following:

(i) *Destruction of benthos in and near the collector track.* Present information reflects that the impact from this effect during mining tests under exploration licenses will be extremely small.

(ii) *Blanketing of benthic fauna and dilution of food supply away from mine site subareas.* The settling of fine sediments disturbed by tests under a license of scale-model mining systems which simulate commercial recovery could adversely affect benthic fauna by blanketing, dilution of their food supply, or both. Because of the anticipated slow settling rate of the sediments, the affected area could be quite large. However, research results are insufficient to conclude that this will indeed be a problem. Therefore, pursuant to § 970.702, this potential effect will be analyzed as part of monitoring and research efforts, and mitigation measures will be imposed if a significant adverse effect is detected.

(iii) *Potential entry of trace metals into the food web.* The potential for a significant effect during the exploration period mining tests is expected to be indiscernable and remote.

(iv) *Surface plume effect on fish larvae.* The impact of demonstration-scale mining tests during exploration is expected to be insignificant.

(3) If processing facilities are to be used for testing during exploration, NOAA also will assess their impacts in site-specific EIS's.

(c) *NOAA approach.* In making determinations on significant adverse environmental effects, the Administrator will draw on the above conclusions and other findings in NOAA's programmatic environmental statement and site-specific statements issued in accordance with the Act. He will issue licenses with terms, conditions and restrictions containing, as appropriate, environmental protection or mitigation requirements (pursuant to § 970.518) and monitoring requirements (pursuant to § 970.522). The focus of NOAA's environmental efforts will be on environmental research and on monitoring during mining tests to acquire more information on the environmental effects of deep seabed mining. If these efforts reveal that modification is required to protect the quality of the environment, NOAA then may modify terms, conditions and restrictions pursuant to § 970.511.

§ 970.702 Monitoring and mitigation of environmental effects.

(a) *Monitoring.* If an application is determined to be otherwise acceptable, the Administrator will specify an environmental monitoring plan as part of the terms, conditions and restrictions developed for each license. This monitoring strategy will be devised to insure that the exploration activities do not deviate significantly from the approved exploration plan and to determine if the assessment of the plan's acceptability was sound. The plan, among other things, will include monitoring the effects of the benthic plume, to resolve the uncertainty identified in § 970.701(b)(2)(ii). NOAA also will develop a technical guidance document, to include parameters pertaining to the upper and lower water column and operational aspects, which document will provide assistance in developing monitoring plans in consultation with applicants.

(b) *Mitigation.* Monitoring and continued research may develop information on future needs for mitigating environmental effects. If such needs are identified, terms, conditions and restrictions can be modified appropriately.

Subpart H—Safety of Life and Property at Sea

§ 970.800 General.

The Act contains requirements, in the context of several decisions, that relate to assuring the safety of life and property at sea. For instance, before the Administrator may issue a license, section 105(a)(5) of the Act requires that he find that the proposed exploration will not pose an inordinate threat to the safety of life and property at sea. Also, under section 112(a) of the Act the Coast Guard, in consultation with NOAA, must require in any license or permit issued under the Act, in conformity with principles of international law, that vessels documented in the United States and used in activities authorized under the license comply with conditions regarding the design, construction, alteration, repair, equipment, operation, manning and maintenance relating to vessel and crew safety and the safety of life and property at sea. In addition, under section 105(c)(1)(B) of the Act, the Administrator may modify terms, conditions and restrictions for a license if required to promote the safety of life and property at sea.

§ 970.801 Criteria for safety of life and property at sea.

Response to the safety at sea requirements in essence will involve vessel inspection requirements. These inspection requirements may be identified by reference to present laws and regulations. The primary inspection statutes pertaining to United States flag vessels are: 46 U.S.C. 86 (Loadlines); 46 U.S.C. 395 (Inspection of seagoing barges over 100 gross tons); 46 U.S.C. 367 (Inspection of sea-going motor vessels over 300 gross tons); and 46 U.S.C. 404 (Inspection of vessels above 15 gross tons carrying freight for hire). All United States flag vessels will be required to meet existing regulatory requirements applicable to such vessels. This includes the requirement for a current valid Coast Guard Certificate of Inspection, as specified in § 970.205. Being United States flag, these vessels will be under United States jurisdiction on the high seas and subject to domestic enforcement procedures. With respect to foreign flag vessels, the SOLAS 74 or SOLAS 60 certificate requirements specified in § 970.205 apply.

Subpart I—Miscellaneous

§ 970.900 General.

This subpart contains miscellaneous provisions pursuant to the Act which are relevant to exploration licenses.

§ 970.901 Records to be maintained and information to be submitted by licensees.

(a)(1) In addition to the information specified elsewhere in this part, each licensee must keep such records, consistent with standard accounting principles, as the Administrator may specify with each license. Such records must inlcude information which will fully disclose expenditures for exploration for hard mineral resources in the area under license, and such other information as will facilitate an effective audit of such expenditures.

(2) The Administrator and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access, for purposes of audit and examination, to any books, documents, papers, and records of licensees which are necessary and directly pertinent to verify the expenditures referred to in paragraph (a)(1).

(b) In addition to the information specified elsewhere in this part, each applicant or licensee will be required to submit to the Administrator at his request such data or other information as he may reasonably need for purposes of making determinations with respect to the issuance, revocation, modification, or suspension of the license in question; compliance with the biennal Congressional report requirement contained in section 309 of the Act; and evaluation of the exploration activities conducted by the licensee. At a minimum, licensees must submit an annual written report, within 90 days after each anniversary of the license issuance or transfer, of exploration activities and expenditures to address the diligence requirements in § 970.602, and of environmental monitoring to address the requirements of § 970.522(c).

§ 970.902 Public disclosure of documents received by NOAA.

(a) *Purpose.* This section provides a procedure by which persons submitting information pursuant to this part may request that certain information not be subject to public disclosure. The substantiation requested from such persons is intended to assure that NOAA has a complete and proper basis for determining the appropriateness of withholding or releasing the identified information if a public request is received.

(b) *Written requests for confidential treatment.* (1) Any person who submits any information pursuant to this part, which information is considered by him to be a trade secret or commercial or financial information which is privileged or confidential, may request that the information be afforded confidential treatment.

(2) Requests for confidential treatment of information must be in writing and must be submitted at the time of submission of the information. Information subject to the request must be segregated from information for which confidential treatment is not being requested and each page (or segregable portion of each page) subject to the request must be clearly marked with the legend "Confidential Treatment Requested." Where this marking proves impracticable, a cover sheet containing the legend must be securely attached to the compilation of information.

(c) *Substantiation of request for confidential treatment.* (1) Any request for confidential treatment must include a statement of the basis for believing that the information is deserving of confidential treatment which addresses the issues relevant to a determination whether the information is a trade secret or commercial or financial information which is privileged or confidential. Such statement itself will be treated as confidential to the extent permitted by applicable law.

(2) Issues addressed should include:

(i) The commercial or financial nature of the information;

(ii) The nature of the competitive advantage enjoyed as a result of possession of the information;

(iii) The nature of the competitive harm which would result from public disclosure of the information;

(iv) The extent to which the information has been disseminated to employees and contractors of the person submitting the information;

(v) The extent to which persons other than the person submitting the information possess, or have access to, the same information; and

(vi) The nature of the measures taken to protect the information from disclosure.

(3) No determination as to whether confidential treatment is warranted will be made until a request for disclosure of the information is made pursuant to this section.

(d) *Requests for disclosure.* (1) Any request for disclosure of information submitted pursuant to this part must be made in accordance with the requirements of 15 CFR Part 903.

(2) Upon receipt of a request for disclosure, the Administrator will determine, in consultation with the NOAA Office of General Counsel, whether confidential treatment is warranted. If the Administrator determines that confidential treatment is not warranted he will promptly notify the person requesting confidential treatment. Such notice will be given by expeditious means such as telephone, telegraph or express mail. No information subject to the request for confidential treatment will be released until the expiration of 10 calendar days from the date of issuance of such notice. In all other respects, requests for the records containing information submitted pursuant to this part will be handled in accordance with 15 CFR Part 903.

§ 970.903 Relinquishment and surrender of licenses.

(a) Any licensee may at any time, without penalty:

(1) Surrender to the Administrator a license issued to the licensee; or

(2) Relinquish to the Administrator, in whole or in part, any right to conduct any exploration activities authorized by the license.

(b) Any licensee who surrenders a license or relinquishes any such right will remain liable with respect to all violations and penalties incurred, and damage to persons or property caused, by the licensee as a result of activities engaged in by the licensee under such license.

§ 970.904 Amendment to regulations.

The Administrator may at any time amend the regulations in this part as the Administrator determines to be necessary and appropriate in order to provide for the conservation of natural resources, protection of the environment, and the safety of life and property at sea. Such amended regulations will apply to all exploration activities conducted under any license issued or maintained pursuant to this part; except that any such amended regulations which provide for conservation of natural resources will apply to exploration conducted under an existing license during the present term of such license only if the Administrator determines that such amended regulations providing for conservation of natural resources will not impose serious or irreparable economic hardship on the licensee. Any amendment to regulations under this section will be made pursuant to the procedures in Subpart J of this part, except that § 970.1001(f)(1) will not apply. Instead, the parties of right to the hearing will be limited to the Administrator. Other persons may file a request under § 970.1001(f)(2) or (3) to participate in the hearing.

§ 970.905 Computation of time.

Saturdays, Sundays, and Federal Government holidays will be included in

computing the time period allowed for filing any document or paper under this part, but when such time period expires on such a day, such time period will be extended to include the next following Federal Government work day. Also, filing periods expire at the close of business on the day specified, and for the office specified.

Subpart J—Uniform Procedures

§ 970.1000 Applicability.

The regulations of this subpart govern the following proceedings conducted by NOAA under this part.

(a) All adjudicatory hearings required by section 116(b) of the Act to be held on the following actions upon a finding by the Administrator that one or more specific and material issues of fact exist which require resolution by formal process, including but not limited to:

(1) All applications for issuance or transfer of licenses;

(2) All proposed terms, conditions and restrictions on a license; and

(3) All proposals to significantly modify a license;

(b) Hearings conducted under section 105(b)(3) of the Act on objection by a licensee to any term, condition and restriction in a license, or to modification thereto, where the licensee demonstrates, after final action by the Administrator on the objection, that a dispute remains as to a material issue of fact;

(c) Hearings conducted in accordance with section 106(b) of the Act pursuant to a timely request by an applicant or a licensee for review of:

(1) A proposed denial of issuance or transfer of a license; or

(2) A proposed suspension or modification of particular activities under a license after a Presidential determination pursuant to section 106(a)(2)(B) of the Act;

(d) Hearings conducted in accordance with section 308(c) of the Act to amend regulations for the purpose of conservation of natural resources, protection of the environment, and safety of life and property at sea;

(e) Hearings conducted in accordance with § 970.407 on a proposal to deny certification of an application; and

(f) Hearings conducted in accordance with § 970.302 to determine priority of right among pre-enactment explorers.

§ 970.1001 Formal hearing procedures.

(a) *General.* (1) All hearings described in paragraph (a) of § 970.1000 are governed by 5 U.S.C. 554–557 and the procedures contained in this section. section.

(2) Hearings held under this section will be consolidated insofar as practicable with hearings held by other agencies.

(b) *Decision to hold a hearing.* Whenever the Administrator finds that a formal hearing is required by the provision of this part he will provide for a formal hearing.

(c) *Assignment of administrative law judge.* Upon deciding to hold a formal hearing, the Administrator will refer the proceeding to the NOAA Office of Administrative Law Judges for assignment to an Administrative Law Judge to serve as presiding officer for the hearing.

(d) *Notice of formal hearing.*

(1) The Administrator will publish notice of the formal hearing in the **Federal Register** at least 15 days before the beginning of the hearing, and will send written notice by registered or certified mail to any involved applicant or licensee, and to all persons who submitted written comments upon the aciton in question, testified at any prior informal hearing on the action or filed a request for the formal hearing under this part.

(2) Notice of a formal hearing will include, among other things:

(i) Time and place of the hearing;

(ii) The name and address of the person(s) requesting the formal hearing or a statement that the formal hearing is being held by order of the Administrator;

(iii) The issues in dispute which are to be resolved in the formal hearing;

(iv) The due date for filing a written request to participate in the hearing in accordance with paragraphs (f)(2) and (f)(3) of this section; and

(v) Reference to any prior informal hearing from which the issues to be determined arose.

(e) *Powers and duties of the administrative law judge.* Judges have all the powers and duties necessary to preside over the parties and proceedings and to conduct fair and impartial hearings, as specified by 5 U.S.C 554–557 and this section, including the power to:

(1) Regulate the course of the hearing and the conduct of the parties, interested persons and others submitting evidence, including but not limited to the power to require the submission of part or all of the evidence in written form if the judge determines a party will not be prejudiced thereby, and if otherwise in accordance with law;

(2) Rule upon requests submitted in accordance with paragraph (f)(2) of this section to participate as a party, or requests submitted in accordance with paragraph (f)(3) of this section to participate as an interested person in a proceeding, by allowing, denying, or limiting such participation;

(3) Hold conferences in accordance with paragraph (i) of this section for the simplification or, if appropriate, settlement of the issues by consent of the parties or to otherwise expedite the proceedings;

(4) Administer oaths and affirmations;

(5) To the extent authorized by law, rule upon requests for, and issue, subpoenas for the attendance and testimony of witnesses and the production of books, records, and other evidence upon proper application under paragraph (p) of this section;

(6) Rule on discovery requests, establish discovery schedules, and take or cause depositions or interrogatories to be taken;

(7) Rule on requests for protective orders to protect persons in the discovery process from undue burden or expense, or for other good cause;

(8) Require, at or prior to any hearing, the submission and exchange of evidence;

(9) Rule upon offers of proof and evidence and receive, exclude and limit evidence as set forth in paragraph (j)(3) of this section;

(10) Introduce documentary or other evidence into the record;

(11) Examine and cross-examine witnesses;

(12) Consider and rule upon motions, procedural requests, and similar matters;

(13) Take such measures as may be necessary, such as sealing of portions of the hearing record, to protect proprietary and privileged information and information consisting of trade secrets and confidential commercial and financial information;

(14) Schedule the time and place of the hearing, or the hearing conference, continue the hearing from day-to-day, adjourn the hearing to a later date or a different place, and reopen the hearing at any time before issuance of the recommended or initial decision, all in the judge's discretion, having due regard for the covenience and necessity of the parties;

(15) Establish rules, consistent with applicable law, for media coverage of the proceedings and for the closure of the hearing in the interest of justice;

(16) Strike testimony of a witness refusing to answer a question ruled to be proper;

(17) Make and file decisions in conformity with this subpart; and

(18) Take any action authorized by the rules in this section or in conformance with 5 U.S.C. 554–57.

Hearings

(f) *Participation.* (1) Parties to the formal hearing will include:

(i) The NOAA General Counsel;

(ii) Any involved applicant or licensee; and

(iii) Any other person determined by the judge, in accordance with paragraph (f)(2) below, to be eligible to participate as a full party.

(2) Any person desiring to participate as a party in a formal hearing must submit a request to the judge to be admitted as a party. The request must be submitted within 10 days after the date of mailing or publication of notice of a decision to hold a formal hearing, whichever occurs later. Such person will be allowed to participate if the judge finds that the interests of justice and a fair determination of the issues would be served by granting the request. The judge may entertain a request submitted after the expiration of the 10 days, but such a request may only be granted upon an express finding on the record that:

(i) Special circumstances justify granting the request;

(ii) The interests of justice and a fair determination of the issues would be served by granting the request;

(iii) The requestor has consented to be bound by all prior written agreements and stipulations agreed to by the existing parties, and all prior orders entered in the proceedings; and

(iv) Granting the request will not cause undue delay or prejudice the rights of the existing parties.

(3)(i) Any interested person who desires to submit evidence in a formal hearing must submit a request within 10 days after the dates of mailing or publication of notice of a decision to hold a formal hearing, whichever occurs later. The judge may waive the 10 day rule for good cause, such as if the interested person, making this request after the expiration of the 10 days, shows that he lacked prior knowledge of the formal hearing, and the evidence he proposes to submit may significantly affect the outcome of the proceedings.

(ii) The judge may permit an interested person to submit evidence at any formal hearing if the judge determines that such evidence is relevant to facts in dispute concerning the issue(s) being adjudicated. The fact that an interested person may submit evidence under this paragraph at a hearing does not entitle the interested person to participate in other ways in the hearing unless allowed by the judge under paragraph (f)(3)(iii) below.

(iii) The judge may allow an interested person to submit oral testimony, oral arguments or briefs, or to cross-examine witnesses or participate in other ways, if the judge determines:

(A) That the interests of justice would be better served by allowing such participation by the interested person; and

(B) That there are compelling circumstances favoring such participation by the interested person.

(g) *Definition of issues.* Whenever a formal hearing is conducted pursuant to this section the Administrator may certify the issues for decision to the judge, and if the issues are so certified, the formal hearing will be limited to those issues.

(h) *Obligation to submit evidence and raise issues before a formal hearing is held.* Whenever a formal hearing is conducted pursuant to a request by an applicant or licensee for review of a denial of issuance or transfer of a license in accordance with section 106(a)(4) of the Act, or pursuant to an objection to any term, condition, or restriction in a license in accordance with section 105 (b)(3) or (c)(4) of the Act, no party or interested person may submit evidence which was not submitted previously for the administrative record on the action, unless good cause is shown for the failure to submit it. No issues may be raised by any party or interested person that were not submitted to the administrative record on the action unless good cause is shown for the failure to submit them. Good cause includes the case where the party seeking to raise the new issues or introduce new information shows that it could not reasonably have ascertained the issues or made the information available at a prior stage in the administrative process; or that it could not have reasonably anticipated the relevance or materiality of the information sought to be introduced.

(i) *Conferences.* (1) At any time the judge considers appropriate, he may upon his own motion or the motion of any party or interested person, direct the parties and interested persons, or their attorneys, to meet (in person, by telephone conference call, or otherwise) in a conference to consider:

(i) Simplification of the issues;

(ii) Settlements, in appropriate cases;

(iii) Stipulations and admissions of fact, and contents and authenticity of documents;

(iv) Exchange of evidence, witness lists, and summaries of expected testimony;

(v) Limitation of the number of witnesses; and

(vi) Such other matters as may tend to expedite the disposition of the proceedings.

(2) The record will show how the matters were disposed of by order and by agreement in such conferences.

(j) *Appearance and presentation of evidence.* (1) A party or interested person may appear at a hearing under this section in person, by attorney, or by other representative.

(2) Failure of a party to appear at a hearing:

(i) Constitutes waiver of the right to a hearing under this section;

(ii) Constitutes consent of the party to the making of a decision on the record of the hearing; but

(iii) Will not be deemed to be a waiver of the right to be served with a copy of the judge's decision.

(3) *Evidence.* (i) The order of presentation of evidence will be at the judge's discretion.

(ii) The testimony of witnesses will be upon oath or affirmation administered by the judge and will be subject to such cross-examination as may be required for a full and true disclosure of the facts. The formal rules of evidence do not apply, but the judge will exclude evidence which is immaterial, irrelevant, nonprobative, or unduly repetitious. Hearsay evidence is not inadmissable as such.

(iii) If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination or the failure to limit such scope, the party must state briefly the grounds for such objections. Rulings on each objection will appear in the record.

(iv) Formal exception to an adverse ruling is not required.

(v) At any time during the proceedings, the judge may require a party or a witness to state his position on any issue, and theory in support of such position.

(vi) Upon the failure of a party or interested person to effect the appearance of a witness or the production of a document or other evidence ruled relevant and necessary to the proceeding, the judge may take appropriate action as authorized by law.

(4) *Authority of judge to expedite adjudication.* To prevent unnecessary delays or an unnecessarily large record, the judge may:

(i) Limit the number of witnesses whose testimony may be cumulative;

(ii) Strike argumentative, repetitious, cumulative, immaterial, nonprobative or irrelevant evidence;

(iii) Take necessary and proper measures to prevent argumentative,

repetitious, or cumulative cross-examination; and

(iv) Impose such time limitations on arguments as the judge determines appropriate, having regard for the volume of the evidence and the importance and complexity of the issues involved.

(5) *Official notice.* Official notice may be taken of any matter not appearing in evidence in the record, which is among the traditional matters of judicial notice, or concerning which the Department of Commerce, by reason of its functions, is deemed to be expert, or of a nonprivileged document required by law to be filed with, or prepared or published by a government body, or of any reasonably available public document. The parties will be given adequate notice, at the hearing or otherwise before the judge's decision, of the matters so noticed, and upon timely request by a party will be given reasonable opportunity to show the contrary.

(6) *Record.* (i) The judge or the Administrator will arrange for a verbatim tape or other record of any oral hearing proceedings. An official transcript will be prepared and copies may be obtained upon written request filed with the reporter and upon payment of the fees at the rate provided in the agreement with the reporter.

(ii) The official transcript, exhibits, briefs, requests, and other documents and papers filed will constitute the exclusive record for the decision on the issues concerning which the hearing was held.

(iii) The record developed in any hearing held pursuant to section 116(b) of the Act will be part of the basis for the Administrator's decision to take any action referred to in section 116(a) of the Act.

(k) *Interlocutory appeals.* (1) At the request of a party or on the judge's own motion, the judge may certify to the Administrator for review a ruling which does not finally dispose of the proceeding if the judge determines that such a ruling involves a controlling question of law and that an immediate appeal therefrom may materially advance the ultimate disposition of the matter.

(2) Upon certification by the judge of an interlocutory ruling for review, the Administrator wil expeditiously decide the matter, taking into account any briefs in this respect filed by the parties within 10 days after certification. The Administrator's order on an interlocutory appeal will not be considered the final decision of the Administrator except by operation of other provisions in this section.

(3) No interlocutory appeal will lie as to any ruling not certified to the Administrator by the judge. Objections to non-certified rulings will be a part of the record and will be subject to review at the same time and in the same manner as the Administrator's review of the judge's initial or recommended decision.

(l) *Decisions.*—(1) *Proposed findings of fact and conclusions of law.* The judge will allow each party to file with the judge proposed findings of fact, and in appropriate cases conclusions of law, together with a supporting brief expressing the reasons for such proposals. Such proposals and briefs must be filed within 10 days after the hearing or within such additional time as the judge may allow. Such proposals and briefs must refer to all portions of the record and to all authorities relied upon in support of each proposal. Reply briefs must be submitted within 10 days after receipt of the proposed findings and conclusions to which they respond, unless the judge allows additional time.

(2) *Recommended decision.* As soon as practicable, but normally not later than 90 days after the conclusion of the formal hearing, the judge will evaluate the record of the formal hearing and prepare and file a recommended decision with the Administrator. The decision will contain findings of fact, when appropriate, conclusions regarding all material issues of law, and a recommendation as to the appropriate action to be taken by the Administrator. The judge will serve a copy of the decision on each party and upon the Administrator.

(3) *Final decision.* (i) As soon as practicable, but normally not later than 60 days after receipt of the recommended decision, the Administrator will issue a final decision. The final decision will include findings of fact and conclusions regarding material issues of law or discretion, as well as reasons therefor. The final decision may accept or reject all or part of the recommended decision.

(ii) With respect to hearings held pursuant to section 116(b), the Administrator may defer announcement of his findings of fact until the time he takes final action with respect to any action described in section 116(a).

(iii) The Administrator will base the final decision upon the record already made except that the Administrator may issue orders:

(A) Specifying the filing of supplemental briefs; or

(B) Remanding the matter to the judge for the receipt of further evidence, or otherwise assisting in the determination of the matter.

Miscellaneous

(m) *Motions and requests.* Motions or requests must be filed in writing with the judge or must be stated orally and made part of the hearing record. Each motion or request must state the particular order, ruling or action desired, and the grounds therefor.

(n) *Witnesses and fees.* Witnesses subpoenaed will be paid the same fees and mileage, and in the same manner, as are paid for like services in the District Court of the United States for the district in which the hearing is located.

(o) *Depositions.* (1) Any party desiring to take the deposition of a witness must make application in writing to the judge, setting forth the reasons why such deposition should be taken; the time when, the place where, and the name and mailing address of the person before whom the deposition is requested to be taken; the name and address of each witness to appear for deposition; and the subject matter concerning which each witness is expected to testify.

(2) Depositions may be taken orally or upon written interrogatories before any person designated by the judge.

(3) Such notice as the judge may order will be given for the taking of a deposition, but this ordinarily will not be less than 5 days' written notice when the deposition is to be taken within the United States and ordinarily will not be less than 20 days' written notice when the deposition is to be taken elsewhere.

(4) Each witness testifying upon deposition will be sworn and any party will have the right to cross-examine. The questions propounded and the answers thereto, together with all objections made, will be reduced to writing, read to the witness, signed by the witness unless waived, and certified by the person presiding. Thereafter, the person presiding will deliver or mail a copy of the document to each party. Subject to such objection to the questions and answers as were noted at the time of taking the deposition which would be valid were the witness personally present and testifying, such deposition may be read and offered in evidence by any party taking it as against any party who was present or represented at the taking of the deposition or who had due notice thereof.

(p) *Subpoenas.* A party may request the judge to issue, or the judge on the judge's own motion may issue, a subpoena for the attendance and testimony of witnesses and for production of documentary or other evidence. Applications for subpoenas must be in writing and must specify the

general relevance and reasonable scope of the evidence sought to be produced.

(q) *Extension of time.* The time for the filing of any document under this section may be extended by the judge if:

(1) The request for the extension of time is made before or on the final date allowed for the filing; and

(2) The judge, after giving written or oral notice to and considering the views of all other parties (when practicable), determines that there is good reason for the extension.

(r) *Filing and service of documents.* (1) Whenever the regulations in this subpart or in an order issued hereunder require a document to be filed within a certain period of time, such document will be considered filed as of the date of the postmark, if mailed, or (if not mailed) as of the date actually delivered to the office where filing is required. Time periods will begin to run on the day following the date of the document, paper, or event which begins the time period.

(2) All submissions must be signed by the person making the submission, or by the person's attorney or other authorized agent or representative.

(3) Service of a document must be made by delivering or mailing a copy of the document to the known address of the person being served.

(4) Whenever the regulations in this subpart require service of a document, such service may effectively be made on the agent for the service of process or on the attorney for the person to be served.

(5) Refusal of service of a document by the person, his agent, or attorney will be deemed effective service of the document as of the date of such refusal.

(6) A certificate of the person serving the document by personal delivery or by mailing, setting forth the manner of the service, will be proof of the service.

§ 970.1002 Ex parte communications.

(a) "Ex parte communication" means an oral or written communication not on the public record with respect to which reasonable prior notice to all parties is not given, but does not include requests for status reports.

(b) Except to the extent required for disposition of *ex parte* matters as authorized by law, upon assignment of a matter to an administrative law judge and until the final decision of the Administrator is effective under these regulations, no *ex parte* communication relevant to the merits of the proceeding shall be made, or knowingly caused to be made:

(1) By the judge or by an agency employee involved in the decisional process of the proceeding to any interested person outside the Department of Commerce; or

(2) By an interested person outside the Department of Commerce to the judge or to any agency employee involved in the decisional process of the proceeding.

(c) An agency employee or judge who makes or receives a prohibited communication must place in the hearing record the communication and any response thereto and the judge, or Administrator, as appropriate, may take action in this respect consistent with this part, the Act, and 5 U.S.C. 556(d) and 557(d).

(d) This section does not apply to communications to or from the agency representative; however, the agency representative may not participate or advise in the initial or recommended decision of the judge or the Administrator's review thereof except as witness or counsel in the proceeding in accordance with this subpart. In addition, the judge may not consult any person or party on the substance of the matter in issue unless on notice and opportunity for all parties to participate.

(e) This section will not apply to communications concerning national defense or foreign policy matters. Any communications on those subjects to or from an agency employee or from employees of the United States Government involving intergovernmental negotiations are permitted if the communicator's position with respect to those matters cannot otherwise be fairly presented for reasons of foreign policy or national defense. Communications described in this paragraph are not considered part of the record.

Subpart K—Enforcement

§ 970.1100 General.

(a) *Purpose and scope.* (1) Section 302 of the Act authorizes the Administrator to assess a civil penalty, in an amount not to exceed $25,000 for each violation, against any person found to have committed an act prohibited by section 301 of the Act. Each day of a continuing violation is a separate offense.

(2) Section 106 of the Act describes the circumstances under which the Administrator may suspend or revoke a license, or suspend or modify activities under a license, in addition to or in lieu of imposing of a civil penalty, or in addition to imposing a fine.

(3) Section 306 of the Act makes provisions of the customs laws relating to, among other things, the remission or mitigation of forfeitures, applicable to forfeitures of vessels and hard mineral resources. The Administrator is authorized to entertain petitions for administrative settlement of property seizures made under the Act which would otherwise proceed to judicial forfeiture.

(4) Section 114 of the Act authorizes the Administrator to place observers on vessels used by a licensee under the Act to monitor compliance and environmental effects of activities under the license.

(5) Section 117 of the Act describes the circumstances under which a person may bring a civil action against a alleged violator or against the Administrator for failure to perform a nondiscretionary duty, and directs the Administrator to issue regulations governing procedures prerequisite to such a civil action.

(6) The regulations in this subpart provide uniform rules and procedures for the assessment of civil penalties (§§ 970.1101–970.1102), and license sanctions (§ 970.1103); the remission or mitigation of forfeitures (§ 970.1104); observers (§ 970.1105); protection of certain information related to enforcement (§ 970.1106); and procedures requiring persons planning to bring a civil action under section 117 of the Act to give advance notice (§ 970.1107).

(b) *Filing and service of documents.* (1) Filing and service of documents required by this subpart shall be in accordance with § 970.1001(a). The method for computing time periods set forth in § 970.1001(a) also applies to any action or event, such as payment of a civil penalty, required by this subpart to take place within a specified period of time.

(2) If an oral or written request is made to the Administrator within 10 days after the expiration of a time period established in this subpart for the required filing of documents, the Administrator may permit a late filing if the Administrator finds reasonable grounds for an inability or failure to file within the time periods. All extensions will be in writing. Except as provided by this paragraph, by § 970.1101(b) or by order of an administrative law judge, no requests for an extension of time may be granted.

§ 970.1101 Assessment procedure.

(a) *Notice of violation and assessment (NOVA).* (1) A notice of violation and assessment (NOVA) will be issued by the Administrator and served personally or by registered or certified, mail, return receipt requested, upon the person alleged to be subject to a civil penalty (the respondent). A copy of the NOVA will similarly be served upon the affected licensee, and the owner of an

affected vessel (defined in paragraph (f) of this section), if the licensee or owner is not the respondent. Although no specific form is prescribed, the NOVA will contain:

(i) A concise statement of the facts believed to show a violation;

(ii) A specific reference to the provisions of the Act, regulations, license, or order allegedly violated;

(iii) The findings and conclusions upon which the Administrator based the proposed assessment; and

(iv) The amount of penalty proposed to be assessed.

(2) In respect to the amount of civil penalty, the Administrator will take into account information available to the agency concerning the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the respondent, any history of prior offenses, good faith demonstrated in attempting to achieve timely compliance after being cited for the violation, and such other matters as justice may require.

(3) The NOVA may also contain an initial proposal for compromise or settlement of the case. The Administrator may also attach documents which illuminate the facts believed to show a violation. The NOVA will advise the respondent of the respondent's rights at that point in the proceeding, and will be accompanied by a copy of regulations governing civil enforcement procedures, this subpart and the applicable provisions of Subpart J of this part.

(b) *Procedures upon receipt of NOVA.* (1) The respondent shall have 30 days from receipt of the NOVA in which to respond. During this time the respondent may:

(i) Accept the proposed penalty or compromise penalty, if any, by taking the actions specified in the NOVA;

(ii) Seek to have the NOVA amended or modified as prescribed in paragraph (b)(2) of this section;

(iii) Request a hearing, as prescribed in paragraph (b)(5) of this section;

(iv) Take no action, in which case the NOVA becomes final in accordance with paragraph (c) of this section; or

(v) Request an extension of the time allowed to respond to the NOVA under paragraph (b)(3) of this section.

Options, (ii), (iii), (iv) and (v) above may also be exercised by the affected licensee or the owner of an affected vessel.

(2) The respondent, the affected licensee or the owner of an affected vessel may seek amendment or modification of the NOVA to conform to the facts or law as that person sees them by notifying the Administrator at the telephone number or address specified in the NOVA. Where amendment or modification is sought, the Administrator will either amend the NOVA or decline to amend it, and will so notify the respondent, affected licensee or owner, as appropriate.

(3) The respondent, affected licensee or owner of an affected vessel may, within the 30-day period specified in paragraph (b)(1) of this section, request an extension of time to respond. The Administrator may grant an extension of up to 30 days unless the Administrator determines that the requestor could, exercising reasonable diligence, prepare a response within the 30-day period specified in paragraph (b)(1) of this section. If the Administrator does not respond to the request within 48 hours of its receipt by the Administrator, the request will be granted automatically for the extension requested, up to a maximum of 30 days. A telephonic response to the request within the 48-hour period will be considered effective response, and will be followed by written confirmation.

(4) The Administrator may, for good cause, grant an additional extension beyond the 30-day period specified in paragraph (b)(3).

(5) If the respondent, the affected licensee, or the owner of an affected vessel wishes a hearing, a written and dated request shall be served either in person or by certified or registered mail, return receipt requested, at the address specified in the NOVA. The requestor shall either attach a copy of the relevant NOVA or refer to the relevant NOAA case number.

(6) Any denial, in whole or in part, of any request under this section which is based upon untimeliness will be made in writing.

(7) The Administrator may, in the Administrator's discretion, treat any communication from a respondent, an affected licensee, or owner as a request for a hearing pursuant to paragraph (b)(5).

(c) *Final decision.* (1) If no request for a hearing is filed under paragraph (b)(5) of this section, the NOVA becomes effective and constitutes the final decision and order of the Administrator on the 30th calendar day after service of the NOVA, or on the last day of any delay period granted under § 970.1100(b)(2) or paragraph (b)(3) or (b)(4) of this section.

(2) If a request for hearing is filed in accordance with paragraph (b)(5) of this section, the date of the final decision will be as provided in § 970.1102.

(d) *Payment of final assessment.* (1) The respondent shall make full payment of the civil penalty assessed within 30 days after the date upon which the assessment becomes effective as the final decision and order of the Administrator under paragraph (c) of this section or § 970.1102(k); or, if judicial review of the assessment is initiated under section 302(b) of the Act during the 30-day period, within 10 days after the appropriate court has entered final judgment in favor of the Administrator, unless the court's order provides otherwise. Payment shall be made by mailing or delivering to the Administrator at the address specified in the NOVA a check or money order made payable in United States currency in the amount of the assessment to the "Treasurer of the United States."

(2) Upon any failure to pay the civil penalty assessed, the Administrator may request the Attorney General of the United States to recover the amount assessed in any appropriate district court of the United States, or may take action under paragraph (e) of this section. In any court action under this paragraph (d)(2), the validity and appropriateness of the final order imposing the civil penalty is not subject to review.

(e) *Compromise of civil penalty.* (1) In his or her sole discretion, the Administrator may compromise, modify, remit, or mitigate, with or without conditions, any civil penalty, imposed under this subpart, or which is subject to imposition, unless a court action, brought either under section 302(b) of the Act to review a civil penalty or under section 302(c) of the Act to recover a civil penalty, is pending in a court of the United States.

(2) The compromise authority of the Administrator under this paragraph (e) is in addition to any similar authority provided in the Act or in this subpart, and may be exercised either upon the initiative of the Administrator or in response to a request by the alleged violator or other interested person.

(3) If the Administrator acts under this paragraph (e) prior to issuing of a NOVA or after a final assessment becomes payable under paragraph (d) of this section, the Administrator will prepare a document indicating the action taken and citing this paragraph (e) and section 302(d) of the Act as authority. Once the case has been assigned for hearing under § 970.1102 (a), the Administrator will, except in unusual circumstances, defer any compromise action under this paragraph (e) until the administrative law judge has rendered an initial decision in the matter. Neither the existence of the compromise authority of the Administrator under this paragraph (e)

nor the Administrator's exercise thereof at any time changes the date upon which an assessment becomes final or payable.

(4) If compromise action is requested or otherwise becomes appropriate for the Administrator's consideration during the pendency of a petition for relief from forfeiture filed under § 970.1104, the Administrator may consolidate, consistent with the provisions of § 970.1104, consideration of the two matters.

(f) *Application of this section to licensees and vessel owners.* (1) This section applies to affected licensees. "Affected licensee" means the holder of a license issued under the Act which license may be subject to sanctions as a result of civil penalty proceedings under this subpart.

(2) This section also applies to owners of affected vessels. "Affected vessel" means any vessel of the United States that may be liable *in rem* for any civil penalty assessed as a result of civil penalty proceedings under this subpart.

§ 970.1102 Hearing and appeal procedures.

(a) *Beginning of hearing procedures.* Following receipt of a written request for hearing timely filed under § 970.1101(b), the Administrator will begin procedures under this section by forwarding the request, a copy of the NOVA, and any response thereto to the NOAA Office of Administrative Law Judges, which will docket the matter for hearing. Written notice of the referal will promptly be given to the respondent, the affected licensee, and the owner of an affected vessel (if the licensee or owner is not the respondent), with the name and address of the attorney representing the Administrator in the proceedings (the agency representative). Thereafter, all pleadings and other documents shall be filed directly with the NOAA Office of Administrative Law Judges, and a copy shall be served on the opposing party (respondent or agency representative).

(b) *Ex parte communications.* Upon assignment of the case to an administrative law judge and until an assessment or other action on the matter becomes effective under these regulations as the final administrative decision of the Administrator, ex parte communications shall be governed by the regulations set forth in § 970.1002. However, § 970.1002 will not be interpreted to diminish the authority of the Administrator under § 970.1101(e).

(c) *Duties and powers of judge.* To the extent consistent with this subpart, the administrative law judge has all powers and responsibilities enumerated in § 970.1001(e) except that paragraph (e)(2) thereof does not apply. Instead, the judge has the power to rule on a request to participate as a party in the proceedings by allowing, denying, or limiting such participation, except that the respondent, the affected licensee, the owner of an affected vessel, and the agency representative will be parties. The judge will, prior to ruling, ascertain the views of the other parties and base the ruling on whether the request is from a person who could be directly and adversely affected by the final decision and who may contribute materially to the disposition of the proceedings.

(d) *Participation by parties.* (1) The respondent, the affected licensee, the owner of an affected vessel, the agency representative, and, to the extent permitted by the judge, any other party, may appear in person, by counsel, or by other representative, and may examine and cross-examine witnesses to the extent required for a full and true disclosure of the facts, present documentary or other evidence in support of that party's case or defense, and conduct oral argument at the close of testimony. This paragraph shall not be interpreted to diminish the powers and duties of the judge provided in paragraph (c) of this section.

(2) Failure of any party to appear at the hearing will be deemed a waiver of the right to a hearing and consent to the making of a decision on the record of the hearing.

(e) *Appearance and presentation of evidence.* Appearance and the presentation of evidence are governed by in § 970.1001(k).

(f) *Settlements.* An agreement by respondent and the agency representative to settle the matter, if filed before an assessment or other action in the case becomes effective under these regulations as the final decision of the Administrator, will terminate the proceedings, and vacate any initial or administrative appellate decision which has been issued. However, if settlement is reached before the judge submits the initial decision and certifies the record under paragraph (i) of this section, the judge may require submission of a copy of the agreement solely to assure that the judge's consideration of the case is completed and to order the matter dismissed on the basis of the agreement.

(g) *Interlocutory appeals.* Appeals of interlocutory rulings by the judge under this subpart are governed by § 970.1001(k), except that objections to rulings not certified to the Administrator by the judge are subject to review at the same time and in the same manner as the Administrator's review of the initial decision of the judge upon any appeal therefrom under paragraph (j) of this section.

(h) *Proposed findings and conclusions.* Unless a different schedule is established in the discretion of the judge, the parties may file proposed findings of fact and conclusions of law, together with supporting briefs, within 30 days after the judge closes the hearing. Reply briefs may be submitted within 15 days after receipt of the proposed findings and conclusions to which they respond, unless the judge sets a different schedule.

(i) *Initial decision.* (1) After expiration of the period provided in paragaph (h) of this section for filing reply briefs, the judge will render a written initial decision upon the record in the case, setting forth:

(i) Findings and conclusions, and the reasons or basis therefor, on all material issues of fact, law, or discretion presented on the record. In determining the amount of a penalty assessment, the judge is not bound by the amount proposed or assessed in the NOVA, or elsewhere, but will decide the matter *de novo*, stating the reasons in view of the factors as set forth in section 302(a) of the Act and § 970.1101(a)(2);

(ii) Reasons for rejecting fundings and conclusions proposed by the parties;

(iii) A statement of facts officially noticed and relied upon in the decision, if the parties have not previously been advised of such notice; and

(iv) Such other matters as the judge considers appropriate, including recommendations, if any, regarding forfeiture action and license sanctions.

(2) The judge will submit the initial decision to the Administrator, serve copies on the parties, and transmit to the Administrator the record of the proceeding together with a certification to the effect that, to the best of the judge's knowledge and belief, the record is a complete and accurate compilation of all evidence and other documents in the proceeding, except in such particulars as are specified.

(j) *Appeals.* (1) Any party may appeal the initial decision of the judge by filing a notice of appeal with the Administrator, within 45 days after the date of the initial decision. The notice of appeal shall concisely state such exceptions as the appellate takes to the initial decision and shall contain citations to the record or other authority relied upon. The appellant shall serve a copy of the notice of appeal on the other parties.

(2) The Administrator will decide the appeal upon the record already made,

except that the Administrator may issue orders:

(i) Specifying the filing of supplemental briefs; or

(ii) Remanding the matter to the judge for receipt of further evidence other assistance in the determination of the matter. The decision of the Administrator will be in writing and will state the reasons for accepting or rejecting the exceptions taken by the appellant. To the extent the Administrator's decision is silent as to a material issue of fact, law, or discretion presented on the record, the decision will be deemed to adopt the findings and conclusions thereon, and the reasons or basis therefor, contained in the initial decision.

(k) *Final decision.* (1) Unless notice of appeal is timely filed in accordance with paragraph (j) of this section, the initial decision of the judge becomes effective and constitutes the final decision and order of the Administrator on the 45th calendar day after the date it is rendered.

(2) If a notice of appeal is timely filed as provided in paragraph (j) of this section, the Administrator's decision becomes effective and constitutes the final decision and order of the Administrator on the date the decision is issued, or as otherwise specified by the Administrator in the decision.

(3) Payment of any assessment which becomes final under this paragraph (k) shall be made in accordance with § 970.1101(d).

(l) *Application of this section to affected licensees and vessel owners.* The provisions of this section apply to affected licensees and owners of affected vessels as defined in § 970.1101(f).

§ 970.1103 License sanctions.

(a) *Application of this section.* This section governs the suspension or revocation of any license issued under the Act, or the suspension or modification of any particular activity or activities under a license, which suspension, revocation or modification is undertaken in addition to, or in lieu of, imposing a civil penalty under this subpart, or in addition to imposing a fine.

(b) *Basis for sanctions.* The Administrator may act under this section with respect to a license issued under the Act, or any particular activity or activities under such a license, if the licensee substantially fails to comply with any provision of the Act, any regulation or order issued under the Act, or any term, condition, or restriction in the license.

(c) *Nature of sanctions.* In the Administrator's discretion and subject to the requirements of this section, the Administrator may take any of the following actions or combinations thereof with respect to a license issued under the Act:

(1) Revoke the license;

(2) Suspend the license, either for a specified period of time or until certain stated requirements are met, or both; or

(3) Modify any activity under the license, as by imposing additional requirements or restraints on the activity.

(d) *Notice of sanction.* (1) The Administrator will prepare a notice of sanction (NOS) setting forth the sanction to be imposed and the basis therefor. The NOS will state:

(i) A concise statement of the facts believed to show a violation;

(ii) A specific reference to the provisions of the Act, regulation, license, or order allegedly violated;

(iii) The nature and duration of the proposed sanction;

(iv) The effective date of the sanction, which is 30 days after the date of the notice unless the Administrator establishes a different effective date under paragraph (d)(4) or paragraph (e) of this section;

(v) That the licensee has 30 calendar days from receipt of the notice in which to request or waive a hearing, under paragraph (f) of this section; and

(vi) The determination made by the Administrator under paragraph (e)(1) of this section, and any time period that the Administrator provides the licensee under paragraph (e)(1) to correct a deficiency.

(2) If a hearing is requested in a timely manner, the sanction becomes effective under paragraph (g) of this section, unless the Administrator provides otherwise under paragraph (d)(4) of this section.

(3) The NOS will be served personally or by registered or certified mail, return receipt requested, on the licensee. The Administrator will also publish in the **Federal Register** a notice of his intention to impose a sanction.

(4) The Administrator may make the sanction effective immediately or otherwise no earlier than 30 days after the date of the NOS if the Administrator finds, and issues an emergency order summarizing such finding and the basis therefor, that an earlier date is necessary to:

(i) Prevent a significant adverse effect on the environment; or

(ii) Preserve the safety of life and property at sea.

If the Administrator acts under this paragraph (d)(4), the Administrator will serve the emergency order as provided in paragraph (d)(3) of this section.

(5) The NOS will be accompanied by a copy of regulations governing civil enforcement procedures, this subpart and the applicable provisions of Subpart J of this part.

(e) *Opportunity to correct deficiencies.* (1) Prior to issuing the NOS, the Administrator will determine whether the reason for the proposed sanction is a deficiency which the licensee can correct. Such determination, and the basis therefor, will be set forth in the NOS.

(2) If the Administrator determines that the reason for the proposed sanction is a deficiency which the licensee can correct, the Administrator will allow the licensee a reasonable period of time, up to 180 days from the date of the NOS, to correct the deficiency. The NOS will state the effective date of the sanction, and that the sanction will take effect on that date unless the licensee corrects the deficiency within the time prescribed or unless the Administrator grants an extension of time to correct the deficiency under paragraph (e)(3) of this section.

(3) The licensee may, within the time period prescribed by the Administrator under paragraph (e)(2) of this section, request an extension of time to correct the deficiency. The Administrator may, for good cause shown, grant an extension. If the Administrator does not grant the request, either orally or in writing before the effective date of the sanction, it will be considered denied.

(4) When the licensee believes that the deficiency has been corrected, the licensee shall so advise the Administrator in writing. The Administrator will, as soon as practicable, determine whether or not the deficiency has been corrected and advise the licensee of such determination.

(5) If the Administrator determines that the deficiency has not been corrected by the licensee within the time prescribed under paragraph (e)(2) or (e)(3) of this section, the Administrator may:

(i) Grant the licensee additional time to correct the deficiency, for good cause shown;

(ii) If no hearing has been timely requested under paragraph (f)(1) of this section, notify the licensee that the sanction will take effect as provided in paragraph (e)(2) or (e)(3) of this section; or

(iii) If a request for a hearing has been timely filed under paragraph (f)(1) of this section, and hearing proceedings have

not already begun, or if the Administrator determines under paragraph (f)(3) of this section to hold a hearing, notify the licensee of the Administrator's intention to proceed to a hearing on the matter.

(f) *Opportunity for hearing.* (1) The licensee has 30 days from receipt of the NOS to request a hearing. However, no hearing is required with respect to matters previously adjudicated in an administrative or judicial hearing in which the licensee has had an opportunity to participate.

(2) If the licensee requests a hearing, a written and dated request shall be served either in person or by certified or registered mail, return receipt requested, at the address specified in the NOS. The request shall either attach a copy of the relevant NOS or refer to the relevant NOAA case number.

(3) If no hearing is requested under paragraph (f)(2) of this section, the Administrator may nonetheless order a hearing if the Administrator determines that there are material issues of fact, law, or equity to be further explored.

(g) *Hearing and decision.* (1) If a timely request for a hearing under paragraph (f) of this section is received, or if the Administrator orders a hearing under paragraph (f)(3) of this section, the Administrator will promptly begin proceedings under this section in the manner provided in § 970.1102.

(2) The hearing and appeal procedures in § 970.1102 apply to any hearing held under this section.

(3) If the proposed sanction is the result of a correctable deficiency, the hearing will proceed concurrently with any attempt to correct the deficiency unless the parties agree otherwise or the administrative law judge orders differently.

(4) The Administrator will serve notice of the initial and final decision on the licensee in the manner described by paragraph (d)(3) of this section.

§ 970.1104 Remission of forfeitures.

(a) *Application of subpart.* (1) Authorized enforcement officers are empowered by section 304 of the Act to seize any vessel (together with its gear, furniture, appurtenances, stores, and cargo) which reasonably appears to have been used in violation of the Act, if necessary to prevent evasion of the enforcement of this Act, or of any regulation, order or license issued pursuant to the Act. Enforcement agents may also seize illegally recovered or processed hard mineral resources, as well as other evidence related to a violation. Section 306 of the Act provides for the judicial forfeiture of vessels and hard mineral resources. This section establishes procedures for filing with the Administrator a petition for relief from forfeitures incurred or pending.

(2) For purposes of this subpart, the "remission or mitigation of a forfeiture" or "relief from forfeiture" means action by the Administrator, following coordination as necessary with other Federal agencies and the courts, to release from the custody of the United States property seized and subject to forfeiture under the Act, or part of such property, upon compliance with any terms and conditions set by the Administrator, such as payment of a stated amount in settlement of the forfeiture aspects of a violation. Although the Administrator may properly combine consideration of a petition for relief from forfeiture with other consequences of a violation of the Act, the Administrator's remission or mitigation of a forfeiture is not dispositive of a criminal charge under section 303 of the Act, or a civil penalty or sanction under this subpart, unless the Administrator expressly so states in the decision. Remission or mitigation of a forfeiture is in the nature of executive clemency granted in the sole discretion of the Administrator only when consistent with the purposes of the Act and the provisions of this section.

(b) *Petition for relief from forfeiture.* (1) Any person having an interest in a vessel, hard mineral resource, or other property seized and subject to forfeiture under the Act may file a petition for relief from the forfeiture. The petition shall be addressed to the Administrator and filed, within 60 days after the seizure, by mailing or delivering it to the Director, Office of Ocean Minerals and Energy at the address specified in § 970.200(b).

(2) The petition need not be in any particular form, but shall set forth the following:

(i) A description of the property seized;

(ii) The date and place of the seizure;

(iii) The interest of petitioner in the property, supported as appropriate by bills of sale, contracts, mortgages, or other satisfactory evidence;

(iv) The facts and circumstances relied upon by the petitioner to justify the remission or mitigation;

(v) Any request for release under paragraph (f) of this section of all or part of the seized property pending final decision on the petition, together with any offer of payment to protect the Government's interest that petitioner makes in return for such release, and the facts and circumstances relied upon by petitioner in the request; and

(vi) The signature of petitioner, petitioner's attorney, or other authorized agent.

(3) A false statement in a petition will subject petitioner to prosecution under 18 U.S.C. 1001.

(c) *Investigation.* The Administrator will promptly investigate the facts and circumstances shown by the petition and the seizure, and may appoint an examiner to find the facts, by informal hearing on sworn testimony or otherwise, and to prepare a report with recommendations.

(d) *Decision on petition.* (1) After the investigation specified in paragraph (c) of this section, the Administrator will decide the matter and notify petitioner. The Administrator may remit or mitigate the forfeiture, on such terms and conditions as under the Act and the circumstances the Administrator deems reasonable and just, if the Administrator finds:

(i) That the forfeiture to which the property is subject was incurred without willful negligence and without any intention on the part of the petitioner to violate the Act, regulation, order, or license;

(ii) That other circumstances justify remission or mitigation of the forfeiture.

(2) Unless the Administrator determines no valid purpose would thereby be served, the Administrator will condition a decision to remit or mitigate a forfeiture upon the submission by petitioner of an agreement, in a form satisfactory to the Administrator, to hold the United States and its officers or agents harmless from any claim based on loss of or damage to seized property. If the petitioner is not the beneficial owner of the property, the Administrator may also require petitioner to submit such an agreement executed by the beneficial owner.

(e) *Compliance with decision.* A decision by the Administrator to remit or mitigate the forfeiture upon stated conditions, as upon payment of a specified amount, is effective for 60 days after the date of the decision. If the petitioner does not within such period comply with the stated conditions, in the manner prescribed by the decision, or make arrangements satisfactory to the Administrator for later compliance, the matter will promptly be referred to the Attorney General of the United States to effect judicial forfeiture in full of the seized property to the United States under section 306 of the Act.

(f) *Release of seized property pending decision.* (1) Upon request in the petition for relief from forfeiture, and taking account of any interim report or recommendation of an examiner

appointed under paragraph (c) of this section, the Administrator may order the release, pending final decision on the petition, of all or part of the seized property upon payment by petitioner of the full value of the property to be released or such lesser amount as the Administrator in the Administrator's sole discretion deems sufficient to protect the interests served by the Act.

(2) If the Administrator grants the request, the Administrator will deposit the amount paid by petitioner in a suspense account maintained for that purpose. The amount deposited will for all purposes be considered to represent property seized and subject to forfeiture under the Act, and payment of the amount by petitioner constitutes a waiver of any claim of defective seizure, custody and control, commingling of proceeds, or related defenses. The Administrator will keep records of amounts deposited in the suspense account and will retain the deposits pending the Administrator's further order under section 304 of the Act or a court order under section 308 of the Act.

(3) The provisions of paragraph (d)(2) of this section apply to a release of property made under this paragraph (f).

§ 970.1105 Observers.

(a) Each licensee, upon notification by the Administrator, shall allow an observer duly authorized by the Administrator to board and accompany any vessel used by the licensee on any or all of the licensee's activities for the purpose of observing and reporting on:

(1) The effectiveness of the terms, conditions and restrictions of the license;

(2) Compliance with the Act, regulations and orders issued under the Act and the license terms, conditions and restrictions; and

(3) The environmental and other effects of the licensee's activities under the license.

(b) The Administrator may notify a licensee, by certified or registered mail, return receipt requested, that the Administrator plans to place an observer aboard a vessel used by the licensee in exploration activities.

(c) A licensee who is notified under paragraph (b) of this section that he is required to carry an observer aboard a vessel used for exploration activities shall notify the official specified in the Administrator's letter at least five days in advance of the departure of each exploration voyage to facilitate observer placement. A licensee who fails to comply with this section may not legally engage in exploration activities for which a license is required under the Act.

(d) Each licensee, owner or operator of an exploration vessel aboard which an observer is assigned shall:

(1) Allow the observer to use the vessel's equipment and personnel as necessary for the transmission and receipt of messages;

(2) Allow the observer access to and use of the vessel's navigation equipment and personnel as necessary to determine the vessel's location;

(3) Provide all other reasonable cooperation and assistance to enable the observer to carry out his duties; and

(4) Provide accommodations and food to the observer aboard the vessel which are equivalent to those provided to officers of the vessel.

(e) The Administrator will provide for payment of all reasonable costs directly related to the quartering and maintaining of observers on board exploration vessels.

(f) To the maximum extent practicable, observation duties when aboard the exploration vessel will be carried out in a manner that minimizes interference with the licensee's activities under the license.

(g) Licensees and other persons are reminded that the Act (see, for example, sections 301(3) and 301(4)) makes it unlawful for any person subject to section 301 of the Act to interfere with any observer in the performance of the observer's duties.

§ 970.1106 Proprietary enforcement information.

(a) Proprietary and privileged information seized or maintained under Title III of the Act concerning a person or vessel engaged in exploration will not be made available for general or public use or inspection.

(b) Although presentation of evidence in a proceeding under this subpart is not deemed general or public use of information, the Administrator will, consistent with due process, move to have records sealed, under § 970.1101(e)(13) or other applicable provisions of law, in any administrative or judicial proceeding where the use of proprietary or privileged information is required to serve the purposes of the Act.

§ 970.1107 Advance notice of civil actions.

(a) *Actions against alleged violators.* (1) No civil action may be filed in a United States District Court under section 114 of the Act against any person for alleged violation of the Act, or any regulation, or license term, condition, or restriction issued under the Act, until 60 days after the Administrator and any alleged violator receive written and dated notice of alleged violation.

(2) The notice shall contain:

(i) A concise statement of the facts believed to show a violation;

(ii) A specific reference to the provisions of the Act, regulation or license allegedly violated; and

(iii) Any documentary or other evidence of the alleged violation.

(b) *Actions against the Administrator.* (1) No civil action may be filed in a United States District Court under section 114 of the Act against the Administrator for an alleged failure to perform any act or duty under the Act which is not discretionary until 60 days after receipt by the Administrator of a written and dated notice of intent to file the action.

(2) The notice shall contain:

(i) A specific reference to the provisions of the Act, regulation or license believed to require the Administrator to perform a nondiscretionary act or duty;

(ii) A precise description of the nondiscretionary act or duty believed to be required by such provision;

(iii) A concise statement of the facts believed to show a failure to perform the act or duty; and

(iv) Any documentary or other evidence of the alleged failure to perform the act or duty.

Office of Management and Budget

Budget Rescission and Deferral; Cumulative Referral

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescission and Deferral; Cumulative Report

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 33 proposals to rescind a total of $2.8 billion in budget authority previously provided by the Congress, and one new deferral of $8.0 million.

The details of the rescission proposals and the deferral are contained in the attached reports.

Ronald Reagan

THE WHITE HOUSE,
March 19, 1981.

SUMMARY OF SPECIAL MESSAGES
FOR FY 1981

(in thousands of dollars)

	Rescissions	Deferrals
Eighth special message:		
New items	2,796,776	8,004
Effect of eighth special message	2,796,776	8,004
Previous special messages	11,960,769	8,577,188
Total amount proposed in special messages	14,757,545 a/	8,585,192 b/

a/ This amount represents budget authority except for $751.8 million involving authority to incur obligations for direct loans.
b/ This amount represents budget authority except for $61,756 thousand involving the deferral of outlays only (D81-198).

Rescission Proposal No: R81-123

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. 96-536): $774,367,000
Bureau: National Oceanic and Atmospheric Administration	Other budgetary resources: 100,250,000
Appropriation title & symbol: Operations, Research, and Facilities 13X1450	Total budgetary resources: 874,617,000
	Amount proposed for rescission: $36,493,000
OMB identification code: 13-1450-0-1-306	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program: ☐ Yes ☐ No	☐ Other
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: Selected low-priority programs in the National Oceanic and Atmospheric Administration (NOAA) are proposed to be curtailed or terminated in order to reduce Federal spending. The programs and amounts involved are as follows:

- Salmon Tagging with Japan - A study to determine the continent of origin of selected species of salmon would be terminated. The study is not considered essential to the fishery data analysis program. ($800,000)
- Conversion of Pacific Region Headquarters, National Weather Service, to an Administrative Office - The proposed reduction would consolidate managerial and administrative functions. This consolidation would have no impact on the provisions of weather services to the public. ($348,000)
- Oceanographic Instrumentation - These funds would enhance research and development on instruments which may be used for collection of shallow water data. Present base funding for designing, developing, testing, and evaluating oceanographic instrumentation is adequate for continuing support of NOAA's marine programs. ($100,000)
- Pascagoula Fisheries Laboratory Renovation and Expansion - These funds would improve the laboratory facilities and provide additional space. Improvements made to the facility through reprogramming in 1980 are felt to be adequate ($650,000)
- Flood Program - These funds would provide for installation, testing, and evaluation of a prototype flash flood warning system for Appalachian counties, which include the Big Sandy River Basin. Proceeding with installation of equipment in the Big Sandy River Basin is inconsistent with existing NWS plans. The effects of the ongoing program should be evaluated before

Additional programs are recommended for rescission from the funding transferred from the Promote and Develop Fishery Products and Research Pertaining to American Fisheries appropriation. This proposed action would delete funds above the January request for the following programs: Marine resources monitoring,

- Flood Program - These funds would provide for installation, testing, and evaluation of a prototype flash flood warning system for Appalachian counties, which include the Big Sandy River Basin. Proceeding with installation of equipment in the Big Sandy River Basin is inconsistent with existing NWS plans. The effects of the ongoing program should be evaluated before expanding the effort. Adequate funds are currently available for this purpose. ($325,000)

- Purchase of Local Warning Radars - The proposed action includes deletion of funds to purchase radars for Tupelo, Mississippi; Tucson, Arizona; and Savannah, Georgia. The purchase of these radars is unnecessary since each of these areas is adequately covered by other network radars. ($1,845,000)

- NOAA Undersea Research Program - The proposed action reduces funds for three new regional undersea research programs. The effect of reducing these regional programs in 1981 would not be significant. ($800,000)

- Anadromous Grants - The reduction of $2,000,000 will maintain the program at its 1980 level in 1981. A significant impact on anadromous fish resources is not expected through deletion of these funds. ($2,000,000)

- Campeche Oil Spill - The proposed action would reduce the level of funding for the assessment of the social, environmental, and economic damage resulting from the IXTOC-I oil spill. The impact of the reduced level of funding is minimal due to the length of elapsed time since the spill occurred (1979). ($500,000)

- Striped Bass - The proposed action would reduce the scope of the studies regarding the causes of the decline in striped bass stocks. This reduction would result in the termination of these studies as FY 1980 funds are used up. ($750,000)

- Vessel Buy-Back Program - This new program would help alleviate some of the intense fishing pressure on salmon resources in the Northwest by reducing the number of available vessels/licenses. Implementation of the buy-back program at a reduced level will not have an adverse effect on the overall program due to the likely time required to initiate the program. Additionally, States are expected to provide a 50% matching share reducing the need for Federal funds. ($10,000,000)

- National Oceanic Satellite System (NOSS) - The proposed action will postpone the establishment of the NOSS program which would have been executed jointly by NOAA, National Aeronautics and Space Administration (NASA), and Department of Defense (DOD). All three agencies would participate in all levels of program activity. Much of the data that would have been collected by NOSS is currently collected or can be made available through other means. ($6,000,000)

Additional programs are recommended for rescission from the funding transferred from the Promote and Develop Fishery Products and Research Pertaining to American Fisheries appropriation. This proposed action would delete funds above the January request for the following programs: Marine resources monitoring, assessment and prediction $3,175,000; Commercial fisheries grants to States, $2,500,000; Regional Fishery Management Councils $800,000; Restore and enhance fisheries in the Columbia River $1,100,000; additional base fisheries programs $2,400,000; and Sea Grant increase for marine education $3,000,000. Since these unrequested funds are part of the uncommitted balance in the Promote and Develop appropriation, the rescission of this funding would not affect the funding of continuing fishery programs. Additional funds in these areas are not required to carry out effective programs in 1981.

Estimated Effects: The rescission of these funds would reduce Federal spending for FY 1981 and 1982, without hampering the carrying out of NOAA's overall mission.

Outlay Effects: (In millions of dollars)

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Operations, Research, and Facilities

Of the funds provided for "National Oceanic and Atmospheric Administration, Operations, research, and facilities" by P.L. 96-536, $38,491,000 are rescinded.

Rescission Proposal No: RS1-124

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. 96-536): $ 25,705,000
Bureau: National Telecommunications and Information Administration	Other budgetary resources: 11,510
Appropriation title & symbol: Public Telecommunications Facilities. Planning and Construction 13x0551	Total budgetary resources: 25,716,510
	Amount proposed for rescission: $ 25,716,510
CFDA identification code: 13-0551-0-1-303	Legal authority (in addition to sec. 1012): ☐ Anti-deficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The public telecommunications facilities program provides grants for planning and construction of noncommercial telecommunications facilities to help extend and improve the delivery of public telecommunications services. The program has succeeded in establishing and extending the availability of public T.V. and radio to over 90% of the American public and has, therefore, achieved the fundamental objectives of the legislation which created it. This action is an integral part of the President's comprehensive economic plan for achieving overall spending reductions by eliminating low priority programs. The rescission of $25,716,510 will terminate this program in FY 1981.

Estimated Effects: The effects of terminating this program will be that local interest groups will need to further identify and use other sources of funding if they wish to add to or enhance the capabilities of the already substantial public T.V. and radio system. Further, the continued expansion of satellite and cable systems through private sector initiatives will effectively soften the impact of the program's termination on the public.

Outlay Effects: (in millions of dollars)

Justification:

The Impact Aid Maintenance and Operations program provides assistance to local education agencies that have been adversely affected by the loss of revenues due to nontaxable lands defined as Federal property within their boundaries. Section 2 of Title I of the Act of September 30, 1950, as amended, provides assistance to school districts that have suffered a partial loss of tax base due to certain U.S. acquisitions of real property. Section 3 of the Act provides payments to assist school districts to finance the cost of educating children who reside and/or whose parents work on Federal property or are in the uniformed services.

Since many school districts receiving aid under this program have been over-compensated for the effects of the Federal burden, a rescission is proposed that will limit payments to school districts under sections 2 and 3 to 90 percent of the amounts otherwise payable in 1981.

Estimated Effects:

The proposed reduced funding level which would result from the rescission will provide payments for all eligible school districts [illegible] for [illegible] behalf of all eligible children (estimated to be 2,233,000 in 1981). By making payments at 90 percent of the amount appropriated for 1981, a savings of $66,500,000 from the Continuing Resolution level of $740 million for the Maintenance and [illegible]

Justification:

Grants for Disadvantaged, authorized by Title I of the Elementary and Secondary Education Act, support compensatory educational services designed to increase the educational attainment of economically disadvantaged children to a level appropriate for children of their age. Funds to support programs designed and implemented by local educational agencies (LEAs) are provided through two mechanisms. Basic grants are made to school districts according to the number of children from low-income families, and, within districts according to the schools with the greatest number of such children. Additional assistance is provided to districts with high concentrations of children from low-income families. Grants to State educational agencies (SEAs) support special educational services to children of migratory workers; handicapped children in State-operated or State-supported schools and children who have left such schools and are participating in programs conducted by local educational agencies; and neglected and delinquent children in State-operated or State-supported institutions.

Improving Local Educational Practice, authorized by Title IV-C of the Elementary and Secondary Education Act, provides grants to State educational agencies to support local educational agencies' efforts at developing and implementing innovative solutions to a variety of educational problems.

Strengthening State Educational Agency Management, authorized by Title V-B of the Elementary and Secondary Education Act, provides grants to State educational agencies to apply effective management practices to a variety of educational issues and to improve State leadership and services for elementary and secondary education programs, including the coordination of Federal programs.

Bilingual Education, supports grants to school districts, demonstration projects, training awards, material development and other support services intended to assist children of limited English proficiency improve their ability to read, write and speak English while they make progress in subject matter skills.

Territorial Assistance, provides general aid to education in the Virgin Islands and assists teacher training in Guam, American Samoa, the Northern Mariana Islands and Trust Territory of the Pacific Islands.

Ellender Fellowships, provides a grant to the Close-Up Foundation to fund fellowships for economically disadvantaged secondary school youth and their teachers. These students and teachers spend one week in Washington attending seminars on current issues and meeting with leaders from the three branches of government.

As part of the President's overall economic recovery plan, funding for many programs, including these, is proposed for reduction. The purpose of the proposed rescissions is to reduce government spending and, thereby control one source of inflationary pressure. Moreover, neither Improving Local Educational Practice nor Strengthening State Educational Management is, in a time of fiscal restraint, a high priority program. The projects supported by Title IV-C are not necessarily targeted to national needs or national priority populations. Title V-B grants represent additional Federal funds devoted to administration.

In addition, a rescission of the $5,000,000 appropriated for Territorial Assistance is proposed because sufficient funds are available from statutory set-asides in programs such as ESEA Title I, Title IV-C and Education for the Handicapped and from a variety of discretionary programs to meet the general needs addressed by these programs. Also, under the consolidated grant program established by P.L. 95-134, the Insular Areas have enhanced opportunities to target currently available Federal funds on their most urgent needs. A rescission of $750,000 of the amount available for Ellender Fellowship is proposed because local organizations have demonstrated their capacity to support the Close-Up Foundation's activities independent of Federal funding.

Estimated Effects:

Grants for Disadvantaged. Rescinding a total of $878,744,000 of the funds appropriated for Title I programs would reduce the number of disadvantaged children served in local educational agency compensatory education programs to 4,132,000, roughly 1,379,000 fewer than would be served by the original

DEPARTMENT OF EDUCATION

DEPARTMENT OF EDUCATION
Office of Elementary and Secondary Education
Elementary and Secondary Education

Of the funds provided under this head in Public Law 96-536, $878,744,000 of the amount provided for title I, parts A and B, $51,400,000 of the amount provided for title IV, part C, $12,750,000 of the amount provided for title V, part B, and $43,741,000 of the amount provided for title VII of the Elementary and Secondary Education Act, and $5,000,000 provided for sections 1525 and 1525 of the Education Amendments of 1978, and $750,000 of the amount provided for Public Law 95-561 are rescinded: Provided, that of the amount remaining for title I, parts A and B of the Elementary and Secondary Education Act, $108,750,000 shall be for the purpose of section 117, $216,000,000 shall be for the purposes of subpart 1 of such part B, $423,750,000 shall be for the purposes of subpart 2 of such part B, and $28,312,000 shall be for the purposes of subpart 3 of such part B and any reductions required thereby shall be proportionate among the States: Provided further, that, notwithstanding the provisions of section 197 of the Elementary and Secondary Education Act, a State may receive, pursuant to subpart 1 of title I, part B of such Act, an amount which is less than 100 per centum of the amount that State received in the prior fiscal year under subpart 1 of such part B, but not less than 85 per centum of that amount: Provided further, That, notwithstanding the provisions of section 193(a), the allocation of a local educational agency under subpart 1 of title I, part A of the Elementary and Secondary Education Act may be reduced to less than 85 per centum of its allocation under subpart 1 of such part A for the preceding fiscal year, but not to less than 75 per centum of that amount: Provided further, That, notwithstanding the provisions of sections 504(a)(3) and 523(c), none of the funds provided for title IV, part C of the Elementary and Secondary Education Act may be expended for the purposes of title V, part B of the Elementary and Secondary Education Act.

Estimated Effects:

Grants for Disadvantaged. Rescinding a total of $878,744,000 of the funds appropriated for Title I programs would reduce the number of disadvantaged children served in local educational agency compensatory education programs to 4,132,000, roughly 1,379,000 fewer than would be served by the original appropriation. Within this decrease, a cut of 66,000 children served would be attributable to reducing the amount available for Concentration Grants by $36,250,000. The number of migratory children receiving services under the State Agency Migrant program would drop to roughly 300,000, 100,000 fewer than the original estimate. The number of children served under the State Agency Handicapped and State Agency Neglected and Delinquent programs may decline as well. It is more likely, however, that the relevant institutions will reduce the quality and extent of services in line with the reduced amount available per child. There would be $522 available per child in the handicapped institutions, down from $696 and $562 available per child in institutions for neglected and delinquent, down from $750.

Comparable reductions in the set-asides for State Administration and Evaluation will provide similar results in the State educational agencies' monitoring activities and the Department of Education evaluation efforts.

Improving Local Educational Practices. Rescinding $41,400,000 from the total available for Title IV-C grants will reduce the number of local educational agency projects by 1,600, leaving a total of 2,600.

Strengthening State Educational Agency Management. A reduction of $12,750,000 in Title V-B funds will reduce the number of State educational agency activities supported from 500 to 380 and the number of State personnel supported from 1,600 to 1,200.

Bilingual Education. The rescission of $43,741,000 proposed for Bilingual Education will reduce the number of capacity-building grants to local educational agencies from 564 to 385, demonstration projects from 60 to 41 and bilingual desegregation grants from 32 to 26. Comparable cutbacks will occur in materials development, coordination and dissemination activities.

Territorial Assistance. Rescinding the funds appropriated for Territorial Assistance would eliminate $5,000,000 of what is essentially general aid.

Ellender Fellowships. Rescinding $750,000 of the funds appropriated for Ellender Fellowships would eliminate approximately 1,500 fellowships.

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Education	New budget authority (P.L. 96-536 ___) $ 932,658,455
Bureau Office of Vocational and Adult Education	Other budgetary resources 411,327,398
Appropriation title & symbol: Vocational and Adult Education 9110400 21X0400 910/10400 911/20400	Total budgetary resources 1,343,985,853
	Amount proposed for rescission $ 238,777,000
OMB identification code: 91-0400-0-1-501	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☒ Yes ☐ No	☐ Other
Type of account or fund: ☒ Annual September 30, 1981 ☒ Multiple-year September 30, 1982 (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Vocational and Adult Education appropriation provides funds for activities designed to provide individuals with the skills, education and training they need to seek and secure gainful employment, to develop linkages between schools and communities, and to enhance individual participation in the nation's social and economic arenas. A rescission of $238,777,000 is requested as part of the President's plan to reduce Federal spending.

The Vocational Education Act of 1963, as amended, primarily provides formula grants to States. The Federal role in vocational education has been to increase the availability of programs through the stimulation of State and local support, provide increased access to vocational training for special populations, encourage males and females to enter vocational areas traditionally dominated by the opposite sex, and support applied research, product dissemination, and evaluation. Each activity funded under the Vocational Education Act will be equitably reduced in order to achieve a total rescission of $196,011,000. In 1981, State and local contributions to the vocational education effort are expected to overmatch Federal funding by 11 to 1. Because of this, the level of participation in vocational education programs during the 1981-82 school year, when the rescinded funds would have been used, will not be seriously affected by this proposal.

The Adult Education Act provides formula grants to support programs that assist adults age 16 and older who do not have a high school diploma or its equivalent. States also use these funds for programs to assist adults of limited English proficiency, for residents of rural and urban areas with high unemployment rates, and for institutionalized adults. The rescission request will reduce funding from $120 million to $90 million.

The Career Education Incentive program provides formula based, matching funds to State education agencies for infusing career awareness and career education into existing educational programs and curricula. Funds are also set aside for aid to Outlying Areas and for discretionary activities. The rescission request will reduce the program from $15 million to $10 million.

The Community Schools program authorizes discretionary and State formula grants to support the use of public school facilities for the coordinated delivery of educational and social services to the community. The 1981 Continuing Resolution provides $10 million to initiate the formula grant program. A rescission is proposed in order to fund only discretionary grants at the level of $3,138,000. Funding the discretionary portion rather than the formula grant portion will target scarce budgetary resources to areas that have, or are prepared to start, community schools programs.

The Consumers' Education program awards grants and contracts to prepare the public for effective participation as informed consumers in the marketplace. The revised 1981 request will result in a decrease in funding from $3,617,000 to $2,713,000.

Estimated Effects:

Because of the State and local overmatch of Federal funds for activities under the Vocational Education Act, the proposed rescission will not seriously hamper the vocational education effort. Nationwide, the Federal contribution for this effort would be reduced from an average rate of $45 per enrollee to $34 per enrollee.

Formula grants in vocational education-- Basic Grants, Program Improvement and Supportive Services, Programs for the Disadvantaged, Consumer and Homemaking, and State Planning Grants -- will continue at about 75 percent of the 1980 level. States and localities have a great deal of flexibility within the law to use these funds to meet their own most pressing needs. Funds will continue to go to all States and Outlying Areas for State advisory councils, but in 1981 awards will be made according to the terms of section 105 of the Vocational Education Act. Activities funded under Programs of National Significance will continue in 1981, but at an equitably reduced level. The National Occupational Information Coordinating Committee will be reduced to $2,243,100 and the National Center for Research in Vocational Education, as well as other contract awards, will be similarly reduced. The reduction in the Bilingual Vocational Training program will cause the elimination of four training projects and a decrease of 20 percent in the number of teachers and students trained.

The decrease of $30 million in the Adult Education State Grant program will result in an estimated 570,000 fewer students out of 2,270,000 being served. Reports indicate that State and local contributions to the adult education effort continue to increase and will help alleviate the effects of the proposed rescission.

The effect of the Federal decrease of $5 million in the Career Education Incentive

Rescission Proposal No: R81-128

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

The decrease of $30 million in the Adult Education State Grant program will result in an estimated 570,000 fewer students out of 2,270,000 being served. Reports indicate that State and local contributions to the adult education effort continue to increase and will help alleviate the effects of the proposed rescission.

The effect of the Federal decrease of $5 million in the Career Education Incentive program will be to reduce formula grants to States and Outlying Areas. A greater number of States (30 compared to 17) will receive the minimum award of $125,000. Although funding for discretionary activities will be reduced by $325,000 and the average award will decrease, the number of discretionary activities will remain the same.

Subsequent to the proposed rescission, the Community Schools program will fund discretionary grants to local education agencies (approximately 25), nonprofit agencies (approximately 6), State education agencies (approximately 25), and institutions of higher education (approximately 6).

The proposed rescission in Consumers' Education will reduce the number of capacity building grants awarded. In 1981, approximately 42 awards, instead of 87 , will be made. Grant awards will average $45,000.

Type of account or fund: [ ] Annual [ ] Multiple-year (expiration date) [X] No-year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other

Justification:

This program enables students and parents to borrow from over 17,000 banks and other lenders to help pay the costs of education or training at over 8,000 participating universities, colleges, and vocational schools. In most States, this program is administered through State and private nonprofit "guarantee agencies" which serve as intermediate loan insurers, default collectors, and providers of various services to lenders. In the remaining States, and in certain circumstances, loans are directly insured by the Education Department.

The Federal government pays the interest obligation of student borrowers while they are in school and during certain grace and deferment periods. The borrower's interest obligation is now generally nine percent for new borrowers. In addition to the interest subsidy, a special interest allowance is paid quarterly to lenders based on outstanding student and parent loan volume. By statutory formula, this allowance assures lenders a total yield equal to the quarterly average 91-day Treasury bill rate plus 3 1/2 percent. (This was a total of 18 percent for the first quarter of fiscal year 1981.) The Federal government is liable for costs associated with defaults, death, disability and bankruptcy of borrowers. Non-interest-bearing advances are made to guarantee agencies to support their insurance of student and parent loans, which are generally 100 percent reinsured by the Federal government. The Federal government is also authorized to pay administrative allowances to participating schools, and to guarantee agencies, based on annual volume.

R81-128

DEPARTMENT OF EDUCATION
Office of Postsecondary Education
Student Loan Insurance

Notwithstanding any other provision of law, $1,847,026,000 shall be available during 1981 for program activities under this head. Notwithstanding provisions of the Higher Education Act, new loans to student borrowers under the Guaranteed Student Loan Program shall be limited to estimated educational costs minus other financial assistance for the loan period and expected family contribution (as determined using a need analysis schedule approved by the Secretary of Education). No Federal interest benefits shall be paid on behalf of borrowers of new loans made under the Guaranteed Student Loan Program, no Federal special allowance shall be paid to lenders on loans to parents under this program, and the interest on loans to parents which are guaranteed under this program shall be set by the lender except that it shall not exceed the level reflecting the interest rate on Treasury securities of comparable maturities plus a percentage established by the Secretary of Education in consultation with the Secretary of the Treasury. Notwithstanding Part B, section 428 (c) of the Higher Education Act, no amounts shall be reserved for, or paid to, educational institutions to meet administrative expenses for academic year 1980-81. Notwithstanding other provisions of law, whenever necessary to protect the financial interests of the United States, the Secretary of Education may take over collection responsibility on any defaulted loan on which a reinsurance claim has been paid.

Under the law as now amended, a dependent student may borrow up to $12,500 during his/her undergraduate career and his/her parents may borrow an additional $15,000--all on attractive, Federally subsidized terms, and with no family financial need or income limitation.

The amount of this rescission request results from proposed enactment of several major cost-reducing program modifications (contained in the proposed appropriations language).

The following legislative amendments are proposed in conjunction with both the 1982 budget and this 1981 rescission request:

- Limitation of student loan amounts to "remaining need," i.e., educational costs minus all other financial assistance and also minus a reasonable "expected family contribution" determined using a commonly-used need analysis method.
- Elimination of the "special allowance" subsidy on parent loans, with the interest rate set by the lender up to a Treasury bill indexed level.
- Elimination of the in-school (and deferment and grace period) interest subsidy on student loans.
- Elimination of the educational institution administrative allowance.

These program changes are designed to curtail the recent rapid escalation of program costs, while improving equity in the distribution of Federal subsidies. The current high level of loan subsidies gives Federally guaranteed borrowing an artificial attractiveness which may encourage dangerously high levels of debt, discourage saving, discourage the use of otherwise available family resources, and unnecessarily inflate the level of Federal credit activity in the economy.

The educational institution allowance authorized since 1976 under the Guaranteed Student Loan program has never been funded. In view of the general need for Federal expenditure restraint and the newly increased administrative allowances available to educational institutions under the three "campus-based" Federal student aid programs, an additional institutional allowance is not necessary.

This rescission request assumes that the proposed program changes will be in effect in time to affect new loan volume in the fourth quarter of fiscal year 1981.

Estimated Effects:

This rescission would result in a reduction in 1981 student loan volume from about $6 billion to $4.2 billion, and reduction in student loan recipients from 2.6 to 2.2 million. Parent loan volume would also be reduced from about $1 billion to $900 million, and the number of parent loan recipients would decrease from one billion to 600 million.

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Education	New budget authority (P.L. 96-536): $408,063,316
Bureau: Office of Postsecondary Education	Other budgetary resources: 16,941,872
Appropriation title & symbol: Higher and Continuing Education 9110201 910/10201 911/20201 91X0201	Permanent indefinite: 2,000,000
	Total budgetary resources: 427,005,189
CFDA identification code: 91-0201-0-1-502	Amount proposed for rescission: $49,239,000
Grant program: ☒ Yes ☐ No	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Type of account or fund: ☒ Annual ☒ Multiple-year Sept. 30, 1981 Sept. 30, 1982 (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:	Program	Amount Proposed for Rescission
Education Outreach, Title I, Part B of the Higher Education Act, is a new authority designed to increase access to postsecondary education for adults and non-traditional learners. This new authority includes a ten percent setaside for Federal discretionary grants. The remainder of the funds are distributed to the States on a formula basis for comprehensive statewide planning, information services, and continuing education. Funds are also provided to the States for administration of the programs. All funds, except the State administration funds, are proposed for rescission as postsecondary planning, information services and continuing education are viewed as areas of State and institutional responsibility. State administration funds will be used to close out the old University Community Service and Continuing Education program.		$12,800,000
Veterans Cost of Instruction program provides grants to postsecondary institutions to encourage recruitment of, and special services to, eligible veterans. The number of veterans enrolled in postsecondary education has been declining in recent years. The institutions should now be able to provide services to the smaller number of veterans through their traditional counseling, tutoring and other service programs on campus.		12,039,000
Public Service and Mining Fellowships programs support grants to institutions of higher education to provide fellowship assistance respectively for students obtaining advanced training for a career in public service and for students of exceptional ability who are undertaking advanced training in domestic mining and mineral fuel conservation. Funds are proposed for rescission because there already is a substantial number of qualified persons to fill public service jobs and the attractive financial rewards associated with jobs in mining-related fields have served as a significant incentive in encouraging students to enter this field of study.		3,150,000
Law School Clinical Experience program supports demonstrations of training programs in clinical legal experience. Funds are proposed for rescission because the Federal objective of demonstrating the value of clinical experience in the education and training of law students has been met.		$ 3,000,000
Architectural Barrier Removal program provides funds to the States based on a statutory formula. There is a twenty-four percent setaside for public community colleges. Eligible institutions are those whose costs for renovation to comply with Section 504 of the Rehabilitation Act of 1973 exceed 5% of their annual educational and general expenditures or whose renovation costs exceed $600,000. Eligible institutions apply to the States which hold a competition based on criteria established in the State plan approved by the Secretary. The administrative burden in this program is considerable. The program will have only a small impact on the nation's campuses, and given its administrative requirements, it is recommended for rescission.		10,000,000
International Education and Foreign Language Studies: Domestic Programs provide grants to strengthen U. S. institutions' teaching, research and dissemination activities in modern foreign languages and area and international studies; increase the understanding of U. S. citizens about the cultures, actions and policies of other nations; and increase and strengthen the pool of trained international specialists. Funds are proposed for rescission because a substantial amount has already been spent to support these programs. More than $270 million in discretionary funds have been provided since the inception of this program in 1959. The rescission of these funds is a necessary part of the President's plan to reduce government spending. No discernible negative effect on the overall goals of the programs should result from the rescission. The initiation of new projects will merely be deferred until 1982.		4,000,000
International Education and Foreign Language Studies: Overseas Programs provide grants to increase mutual understanding between the people of the United States and the people of other countries by means of educational and cultural exchange, and to increase the number of foreign language and world area specialists in this country. Funds are proposed for rescission because a substantial amount has already been spent to support these programs. More than $45 million in discretionary funds have been provided since the inception of this program in 1964. The rescission of these funds is a necessary part of the President's plan to reduce government spending. No discernible negative effect on the overall goals of the programs should result from the rescission. The initiation of new projects will merely be deferred until 1982.		3,200,000
Law Related Education program provides grants to give persons, as part of basic education, knowledge and skills pertaining to the law, the legal system, and the legal process and to help children, youth and adults become more informed and effective citizens. The purpose of the rescission proposed here is to reduce government spending and thereby control one source of inflationary pressure. The rescission will have negligible effect on the overall goals of the program. In 1982 the purposes of this program will be included in State Education Block Grants.		250,000
Total proposed for rescission		$49,239,000

R81-129

DEPARTMENT OF EDUCATION
Office of Postsecondary Education

Higher and Continuing Education

Of the funds appropriated under this head in Public Law 96-536 for fiscal year 1981, $12,800,000 of the amount appropriated for title I, part B, $4,900,000 of the amount appropriated for title VI, $12,039,000 appropriated for section 420, $3,150,000 of the amount appropriated for title IX, part B, and $3,000,000 appropriated for title IX, part E of the Higher Education Act, $3,200,000 of the amount appropriated for the Mutual Educational and Cultural Exchange Act of 1961, $500,000 of the amount appropriated for title III, part A, and $250,000 of the amount appropriated for title III, part C of the Elementary and Secondary Education Act are rescinded and, of the amount made available under this head in Public Law 96-304 for fiscal year 1981, $10,000,000 available for title VII, part A are rescinded: Provided, that the funds appropriated in Public Law 96-536 for title IX, part B are available notwithstanding the provisions of sections 922(b)(2) and 922(e) of the Higher Education Act: Provided further, that $2,200,000 of the amount appropriated in Public Law 96-536 for title I, part B of the Higher Education Act is available only for section 115(d).

Estimated Effects:

The rescission of $12,800,000 appropriated for the Educational Outreach programs will eliminate approximately 25 Federal discretionary grants for continuing education as well as formula grants to the 57 States and territories for comprehensive planning, information services, and continuing education.

The rescission of $12,039,000 appropriated for Veterans Cost of Instruction will eliminate grants to approximately 1,025 institutions of higher education to provide services to an estimated 326,000 enrolled veterans.

The rescission of $3,150,000 appropriated for Public Service and Mining Fellowships will eliminate approximately 238 public service fellowships and 137 mining fellowships.

The rescission of $3,000,000 appropriated for the Law School Clinical Experience program will result in termination of the program.

The rescission of $10,000,000 appropriated for the Architectural Barrier Removal Program in 1980 and deferred to 1981 will eliminate grants to the 57 States and outlying areas and to approximately 300 institutions.

The rescission of $4,800,000 appropriated for the International Education and Foreign Language Studies: Domestic Programs will reduce the size of the grant to 80 national centers, eliminate 73 academic year and 56 summer fellowships, 22 undergraduate programs, 8 research grants, and 9 international understanding projects.

The rescission of $3,200,000 appropriated for the International Education and Foreign Language Studies: Overseas Programs will eliminate 14 group projects abroad, 36 faculty research abroad projects, 57 doctoral dissertation research abroad projects, 6 foreign curriculum consultants, and 7 bilateral projects.

The rescission of $250,000 appropriated for the Law-Related Education program will eliminate 5 grants which serve elementary and secondary students, 2 exemplary projects on law-related education for adults, and 1 technical assistance and program development contract.

Short-term technology research and development will be phased out; the industry is

Rescission Proposal R81-130

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Energy	New budget authority (P.L. 96-367, P.L. 96-69, P.L. 97-257): $2,268,784,000
Bureau: Energy Programs	Other budgetary resources: 452,740,818
Appropriation title & symbol: Energy Supply, Research and Development Activities - Operating Expenses 89X0224	Total budgetary resources: 2,721,494,818
	Amount proposed for rescission: $ 126,609,000
OMB Identification code: 89-0224-0-1-271	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year _____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

Solar $57,136,000

This proposed rescission is predicated on the new, healthier environment for commercial solar technologies, brought about by the establishment of sound energy pricing policies, primarily through the decontrol of crude oil prices, and extensive solar tax credits. The inequities and inefficiencies built into previous energy pricing policies have prevented solar energy from achieving its true potential. It is now possible to shift the focus of the Department's solar activities from costly near-term development, demonstration, and commercialization efforts to longer-range research and development projects that are too risky for private firms to undertake. Therefore, funds totalling $57,136,000 for near-term technology development and commercialization activities are proposed for rescission. The Administration believes that these activities should be pursued by the private sector in response to normal market forces. No reduction is proposed for longer-term, high risk (but potentially high payoff) research and development.

Note: Additional FY 1981 funds totalling $34,562,000 are proposed for reprogramming out of the solar energy program and into other Energy Supply, Research and Development Activities, Operating Expenses, Appropriation programs.

Geothermal - $9,500,000

Confirmation of a viable geopressured resource by well drilling along the Gulf Coast will be slightly delayed while better well sites are selected.

Short-term technology research and development will be phased out for industry to pursue.

Commercialization activities, principally reservoir confirmation drilling, will be reduced in FY 1981 in anticipation of full assumption of these activities by the private sector during FY 1982.

Hydropower - $24,846,000

It is proposed to terminate feasibility study loans and demonstration grants for small hydropower projects. The program's objective, revitalization of the small hydropower industry in the U.S., has been largely achieved, as evidenced by the tremendous growth of applications at the Federal Energy Regulatory Commission for preliminary permits and licenses. Additionally, sufficient incentives are provided through a 21 percent investment tax credit and through loan programs in the Department of Agriculture.

The termination of the small hydropower feasibility studies and licensing loans should have no overall effect on the level of small hydro project activity although some individual projects could be delayed until they secure other financing. Rescission is also requested for the construction grant funds for the two Nashua, New Hampshire, projects. There is no justification for 100% Federal financing of these projects because the technology is well proven and economically feasible. The effect of the rescission will be that the city of Nashua will have to arrange a general obligation bond issue for financing.

Electric Energy Systems - $4,115,000

This rescission is requested because the Electric Energy Systems' program is phasing out development and demonstration programs that can and should be supported by the private sector and focusing on longer-term high-risk research.

The estimated effects of this rescission are:

- reduction in Power Delivery activities of $1.5 million which reduces superconducting technology work and cable designs;
- reduction in System Architecture and Integration activities of $2.3 million phasing out New Technology Integration planning methods which can be adopted by utilities; and
- reduction of $0.3 million of carryover funds for program direction which is not needed to support current positions.

Energy Storage Systems - $19,333,000

Due to the establishment of sound energy pricing policies and other Federal incentives, this program can concentrate on the most promising long term, generic technology developments. The private sector can be expected to pursue promising near-term technologies on their own in response to market forces. Hence, funds for near-term technology development efforts totalling $19,333,000 are proposed for rescission.

Environment - $3,979,000

Biological and Environmental Research

Funds in the amount of $3,979,000 are proposed for rescission on the grounds that short-term, site specific chemical characterization and toxicology is an area of applied research more appropriately managed as part of an industrial research, development and commercialization program.

In order to facilitate the commercialization of energy technologies, funds were appropriated for research on the biological and ecological effects of products, effluents, emissions, and wastes from a variety of energy technologies. This research encompasses both longer-term generic investigations and shorter-term, highly-targeted applied research to provide early environmental information for specific processes. New policies being developed to increase the private sector's contribution to technology demonstration dictate that the short-term, focused site specific research activities are an industrial responsibility. The continuing program would emphasize advanced research to understand and define health and environmental impacts of Departmental technology research and development programs. It is estimated that termination of these efforts will not impede near-term commercialization because essential environmental activities to assure regulatory compliance will be required of the industry.

Environmental Assessments

Reduction in funding of $3,000,000 is proposed due to the elimination of ineffective and duplicative efforts addressed adequately by other offices or agencies.

Energy-related environmental areas affected include nuclear radiation, air quality, water quality and availability, energy facility siting and land management, energy transportation, urban and community impacts, and energy technologies being slated for curtailment. For example, DOE-funded water-for-energy assessments performed by the Water Resources Council will be eliminated as these involve a high degree of duplication of similar efforts required to be performed by DOE under the National Environmental Policy Act. Urban and community impact analyses will be performed by the technology offices which propose projects which have potential urban and community impact.

Environmental and Safety Engineering

Funding of $1,000,000 is proposed for rescission for environmental control evaluation studies of energy technologies. This reduction is due to the elimination of environmental control evaluations which are unnecessary to formulate energy-related environmental policy judgments, and other evaluations at specific demonstration sites which no longer will be DOE-supported. It is estimated that this reduction will have no effect on the Department's ability to make judgments of the environmental control technology aspects of new energy technologies.

Program Direction

Funds totaling $1,000,000 are proposed for rescission in Environmental Program Direction as a result of employment reductions related to reductions and redirection of environmental programs. The end-of-year allowable staffing level is being reduced from 234 full-time permanent (FTP) positions to 220 FTP positions. In terms of staff effort, this results in a reduction of 24 staff years from 234 to 210 staff years. The reduction of $1,000,000 assumes an average salary cost of $41,000.

Technical Assessment Projects - $3,000,000

Funds in the amount of $3,000,000 are proposed for rescission from the Advanced Technology Projects program. This will reduce program funding in FY 1981 from $8,000,000 to $5,000,000 and will result in termination of near-term projects that the private sector can undertake on its own.

Estimated Effects:

Near-term development and commercialization of new energy technologies and low priority environmental research and assessments will be eliminated or reduced by a total of $126,609,000.

PROPOSED RESCISSION OF BUDGET AUTHORITY
Submitted Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Energy	New budget authority (P.L. 96-367): $ 181,287,000
Bureau: Energy Programs	Other budgetary resources: 46,382,278
Appropriation title & symbol: Energy Supply, Research and Development Activities - Plant and Capital Equipment 89X0225	Total budgetary resources: 227,669,278
	Amount proposed for rescission: $ 7,967,000
OMB identification code: 89-0225-0-1-271	Legal authority (no additional authority required): ☐ Antideficiency Act ☐ Other
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

Funds were provided for construction of the Fusion Materials Irradiation Test Facility (FMIT) at Richland, Washington. The FMIT facility was proposed to provide the capability to determine the effects of the fusion environment on candidate reactor materials. This facility would provide the information base and confirmation for materials selection for mid- and long-term facilities of the fusion program. This rescission action proposes to terminate the project and rescind $7,967,000. In spite of cost reductions resulting from preliminary redesign efforts, overall resource limitations together with project cost escalations and the requirement to maintain a primarily scientific base program resulted in a decision to terminate this project. Other portions of the program will enhance their research efforts to increase the knowledge base in this area.

Estimated Effects:

The Fusion Materials Irradiation Test Facility, a low priority magnetic fusion project, will not be constructed.

Outlay Effects: (in millions of dollars)

Justification: 1/

Advanced Environmental Control Technology. Funds totalling $3,000,000 for advanced flue gas desulfurization (FGD) are proposed for reduction. The program has focused on dry scrubbing technologies which are actively being pursued by the private sector. This rescission is proposed because the Administration believes such demonstrations will continue to be funded by private industry.

Coal Liquefaction. A total of $10,000,000 is proposed for reduction in FY 1981. These funds were intended primarily for subsidizing the design of the W.R. Grace Coal to gasoline facility, funding SRC pilot plant activities at Wilsonville, Alabama, and providing technical support for demonstration plants. A reduced level of effort will be needed for catalyst development for Fischer-Tropsch synthesis and in-house support at Pittsburgh Energy Technology Center. These terminations are consistent with the Administration's position that the SFC can more effectively encourage industry involvement in synthetic fuel projects and that industry should be responsible for conducting the necessary technical support work associated with commercializing coal liquefaction processes.

Combustion Systems. Funds in the amount of $3,000,000 for the Rivesville [illegible] AFB boiler and $1,750,000 for coal-oil mixtures are proposed for reduction. The Rivesville boiler has served its purpose by identifying problem areas in fluidized bed technology.

1/ Program reductions shown in the justification section totalling $67,450,000 include the effects of withdrawing a $1,518,000 supplemental request for increased pay costs.

Coal-oil mixtures substitute coal for a portion of the oil used in utility and industrial boilers. Funds are proposed for rescission because successful application of this technology has been demonstrated in past and current DOE and industry projects.

Heat Engines and Heat Recovery. Reductions are proposed of $3,000,000 in the directly fired and $2,000,000 in the low grade heat recovery project. The directly fired heat cycles activity was originally initiated to address technical problems anticipated in the use of coal derived liquid fuels in stationary diesels and gas turbines. The low grade heat recovery project will develop technology to utilize waste heat primarily at federal facilities. The proposed rescissions allow the program to focus on the High Temperature Turbine Technology project.

MHD* No funds have been requested in FY 1982 for MHD. In order to facilitate the phase out of DOE efforts, a reduction of $6,000,000 is proposed in FY 1981 for engineering development and supporting research. Efforts in engineering development which will not be conducted include combustor development and the Advanced Power Train Program. In addition, supporting research diagnostic efforts will not be conducted and reductions will be made in the Coal Fired Flow Facility, and Component Development Integration Facility. Consistent with Administration policy, continued responsibility for development and demonstration of MHD will become the responsibility of private industry.

Mining R&D. Reductions are proposed in the amount of $8,000,000 in the areas of coal preparation, underground coal mining and surface coal mining. The refocusing of the Mining R&D program will be committed to developing a technology base that encompasses longer range, higher risk projects.

Surface Coal Gasification. FY 1981 funds of $5,000,000 are proposed for reduction related to the Hygas and peat activities. Modification to the Hygas pilot plant to prepare it for operation with peat feedstock was planned for FY 1981. Proceeding would not be useful, given the Administration's position to cease efforts in support of the peat program in FY 1982. In addition, $5,000,000 in Hygas conceptual design funds are proposed for reduction. These funds were intended to finance an unsolicited proposal submitted by the Texas Gas Transmission Corporation and the Commonwealth of Kentucky for a phase zero design study for a Federally Supported Coal Demonstration Project using Hygas technology.

Enhanced Oil Recovery. A reduction of $2,000,000 is proposed to align the FY 1981 program with the refocused FY 1982 program, supporting critical in-house, long-range research activities not requiring significantly higher levels of government support.

Enhanced Gas Recovery. Funds are proposed for reduction in the amount of $3,000,000 based on the expectation that gas exploration activities will continue to increase in response to the pricing effects of the natural gas policy act. Because industry has both the technical and financial resources to continue with the development of these resources, maintaining continued government research and development support at past levels is unnecessary.

* Magneto Hydro Dynamics

Estimate Effects:

Advanced Environmental Control Technology. Industry progress in the development of scrubbers which produce a dry disposable waste product has been excellent; hence a

Enhanced Gas Recovery. The proposed rescission will reduce activities for resource assessment work and DOE research on reservoir properties. Minor impacts will also occur in direct drilling research, stress tool use, and diagnostic instrumentation on multi-well test experiments.

Estimate Effects:

Advanced Environmental Control Technology. Industry progress in the development of scrubbers which produce a dry disposable waste product has been excellent; hence a reduction in federal involvement in this area will not significantly effect development of this technology.

Coal Liquefaction. It is the Administration's position that industry should be responsible for conducting demonstrations and commercializing liquefaction technologies with the assistance of the SFC. Ongoing projects which could be supported by the Synthetic Fuels Corporation (SFC) are recommended for SFC funding rather than continued DOE support.

Heat Engines and Heat Recovery. The proposed rescissions impact minimally upon ongoing programs while yielding maximum cost savings for FY 1981. Specifically, Phase II implementation of the low NO_x combustor and material efforts will be delayed; Paducah and Portsmouth waste heat recovery projects will cancel design activities; and there will be a delay in issuance of a Program Opportunity Notice (PON) for the Oak Ridge design.

Combustion Systems. Impact is minimal since more modern designs now exist which obviate the need for further data from the Rivesville facility. In the coal-oil mixtures area, successful application of CCM technology has already been demonstrated in past and current DOE and industry projects.

MHD. Facilities will be closed out and other ongoing efforts will be brought to an orderly conclusion. As a result MHD will become the responsibility of industry with support from the SFC as necessary.

Mining R&D. Certain hardware development and demonstration and near term technology development will be terminated and an orderly phase out of cost-shared field testing and demonstration will begin. It will be left to industry to demonstrate the feasibility of near term technologies.

Surface Coal Gasification. Since there is considerable private sector interest in developing peat resources and since much of the required technology is already in use in other countries, a rescission is proposed for the FY 1981 test programs. The technologic problems in this technology are not judged to be so severe as to warrant continued federal support for near term activities. In addition, funding of a phase zero design study for the Hygas coal gasification demonstration will be proposed for a rescission. Plants using advanced technology can be supported by the SFC.

Enhanced Oil Recovery. The proposed rescission is judged to have little effect on the development of technologies in this area. Industry will continue to perform research and development. The immediate effects of the rescission will be to delay engineering and site preparation for DOE proposed field tests on thermal recovery methods from tar sands and reduce tests on steam drive efficiency for heavy oil. Both of these areas are currently being pursued by the industry.

Enhanced Gas Recovery. The proposed rescission will reduce activities for resource assessment work and DOE research on reservior properties. Minor impacts will also occur in direct drilling research, stress tool use, and diagnostic instrumentation on multi-well test experiments.

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Energy	New budget authority (P.L. 96-514 and 96-126) $ 862,107,000
Bureau Energy Programs	Other budgetary resources 83,405,000
Appropriation title & symbol: Energy Conservation 89X0215	Total budgetary resources 945,512,000
	Amount proposed for rescission $ 306,045,000
OMB identification code: 89-0215-0-1-999	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☒ Yes ☐ No	☐ Other
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

Rescissions are proposed for Building and Community Systems, including Residential/Commercial Retrofit and Conservation Service ($51.77 million); Industrial Energy Conservation ($46.7 million); Transportation Energy Conservation ($38.65 million); State and Local Programs ($116.925 million); and Energy Impact Assistance ($52 million). These Federal conservation programs are no longer necessary and, in some instances, impede private initiative by imposing too great a regulatory burden. Motivated by rising energy costs and substantial Federal tax credits, individuals, businesses and other institutions are undertaking major conservation efforts on their own. This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

Buildings and Community Systems:

- Building Systems - The Buildings Energy Performance Standards project will be phased out and the number of auditors trained in energy conservation measures will be reduced.
- Community Systems - The District Heating and Cooling Systems projects will be phased out. Efforts to support business community participation in conservation activities will be phased out.
- Consumer Products - The technological development of energy-conserving equipment, such as heat pumps, and the certification and enforcement of the appliance standards program will be phased out.
- Federal Programs - The transfer of technology between the Department of Energy and private sector audiences will be phased out.
- Residential/ Commercial Retrofit - The number of innovative energy conservation delivery demonstrations will be reduced.
- Residential/Commercial Conservation Service - Training for approximately 6,000 energy conservation auditors will be eliminated. Technical assistance to States and utilities to facilitate the planning process for the Commercial and Apartments Conservation Service will be eliminated.

Industrial Energy Conservation: Various ongoing research and development activities will be phased out and terminated. Examples of such activities include two industrial heat pump projects, a recuperator system project, an oxygen enrichment development project, a waste lube oil refining project, three advanced cogeneration systems projects, three aluminum process development projects, and two food process improvement projects. The rescission would also cause stretchout of projects on an externally-fired Brayton cogeneration system, computer control applications, and conversion of waste to liquid fuels.

Transportation Energy Conservation: Reductions will be made to advanced heat engine research and development, electric and hybrid vehicle development and public information outreach activities. Research and development on alternative fuels will be delayed.

State and Local Programs: There will be weatherization of about 7,000 fewer low-income dwelling units and retrofit of about 2,700 fewer public and nonprofit school and hospital buildings with energy conservation measures. All further grants to States for emergency planning will be stopped.

Energy Impact Assistance: $52.0 million in grants to States for public facilities planning and site acquisition required by communities as a result of new energy resource development will be eliminated.

Justification:

The Administration is proposing to phase out the home health agency start-up grant program. This proposal requires rescission of $4 million. There are already over 3,000 home health agencies operating in the U.S. today. Continued support of the small, marginal program is no longer justified. Moreover, Medicare and Medicaid home health reimbursement--$947 million in 1980--is much more important to the maintenance of home health agencies than this small grant program.

Rescission Proposal No: 81-134

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 1,083,909,000

Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

The programs covered by this rescission proposal are the primary care research demonstration program, the Title X family planning program, the home health services grant program, the Maternal and Child Health (MCH) training program, the MCH research program, and the Public Health Service hospital and clinic system.

The primary care research and demonstration program--formerly the health underserved rural area (HURA) program--has been in existence for more than five years and has funded over 100 projects designed to demonstrate innovative ways of delivering health services. After this extended period of funding, the process of deliverying primary health care services in various settings has been adequately demonstrated. This proposal would rescind $2.172 million in funds provided under the Continuing Resolution to begin phase out of the program by the end of FY 1981.

The Title X family planning program funds over 5,000 family planning clinics throughout the United States, yet it is only a part of an over $1 billion Federal family planning effort which includes at least five other programs--maternal and child health, community health centers, Title XX social services, Medicaid, and the adolescent health services program. The need for additional family planning services--particularly considering an investment of this size--has not been demonstrated, especially since the eligibility limit for subsidized services has been raised to 250% of national poverty guidelines.

The Administration is proposing to phase out the home health agency start-up grant program. This proposal requires rescission of $4 million. There are already over 3,000 home health agencies operating in the U.S. today. Continued support of the small, marginal program is no longer justified. Moreover, Medicare and Medicaid home health reimbursement--$947 million in 1980--is much more important to the maintenance of home health agencies than this small grant program.

In lieu of proposing funding for primary care R&D, Title X family planning and home health programs in 1982, the President has proposed two consolidated grants to States for health services and preventive health services. Under this proposal, States will have the flexibility to fund programs which they consider high-priority.

The MCH training and research programs rescission of $4.057 million represents the first phase of a transfer of these responsibilities to the Health Resources Administration and the National Center for Health Services Research, respectively, where they can be more effectively performed.

The 8 hospital and 37 clinic system of the Public Health Service is proposed for closure or transfer to community use. This proposal is based primarily on the following grounds:

— a special, free, medical services benefit for merchant seamen, the primary beneficiary group, is inequitable;

— the system is generally underused with less than half of its services provided for the primary beneficiary, merchant seamen;

— the hospitals aggravate currently overbedded conditions in the eight cities in which they are located; and

— the largest secondary beneficiary, Department of Defense active duty personnel, can be served in currently underutilized hospitals located in all 8 affected areas.

Reductions are proposed for hospital renovation totalling $1.387 million.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:
Primary Care Research Demonstration. This rescission will reduce the number of projects from 33 to 24. All 33 projects proposed for funding in 1981 are continuations of ongoing projects which are nearing completion. The essential research and demonstration activities have been completed and the projects are principally engaged in further data analysis. Tentative conclusions can be drawn from the findings to date and little more is to be gained by continuing these analytical efforts.

Title X Family Planning. This rescission is not a reduction of the $162 million base and all 5,125 clinics funded by Title X will be maintained so that the impact on services will be minimal.

Home Health. The phase-out of the $4 million home health agency grant program will eliminate support for 45 service grants and 21 training grants. These grants were designed strictly for start-up costs with the bulk of Federal support for operating costs scheduled to come from Medicare and Medicaid. The small amount lost per project--$60,000--should be easily recouped from other sources.

MCH training and research. The partial rescission of the MCH training and research programs--$4 million out of the $25.5 million available for these programs under the Continuing Resolution--will reduce training slots from 6,956 to 6,250 and research grants from 30 to 33.

PHS hospitals. This phase-out plan would eliminate the medical benefit for merchant seamen and require the other large beneficiary groups--DOD and the Coast Guard--to seek services in existing underutilized DOD facilities. Funds will be used to provide services, under contract, for medically indigent community residents receiving care in PHS hospitals through 1982.

Of the funds provided for "Health Services" for fiscal year 1981 in P.L. 96-536, $11,618,000 are rescinded.

Rescission Proposal No: 881-135

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 250,427,000
Bureau Centers for Disease Control	Other budgetary resources 20,000,000
Appropriation title & symbol Preventive Health Services 7310943	Total budgetary resources 270,427,000
	Amount proposed for rescission $ 38,520,000 1/
CMB identification code: 75-0943-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

The proposed rescission includes $27,000,000 in health incentive 314(d) grants provided to State health authorities for public health services. These categorical grants constitute a relatively small share of total State and local expenditures for public health. In lieu of proposing funding for this program in 1982, the President has proposed two consolidated block grants to States for health services. Under this proposal, States will have the flexibility to fund programs such as health incentive grants if such grants are considered a high priority.

Rescissions totalling $11,520,000 are also proposed for low priority activities in the following Centers for Disease Control programs: chronic diseases, $200,000; other environmental hazards, $648,000; occupational safety and health (OSH) research, $3,320,000; OSH training, $6,991,000; technology development and application, $169,000; and program management, $192,000. Essential activities under these programs will be continued.

1/ An additional $11,498,000 for risk reduction and health education ($1,976,000), chronic diseases ($294,000), other environmental hazards ($700,000), occupational safety and health research ($3,087,000), training ($4,552,000) and scientific and technical services ($467,000), technology development and application ($200,000), and program management ($222,000) are planned to be proposed for rescission if additional 1981 funding is provided for these programs after the present continuing resolution expires on June 5, 1981.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

Rescission Proposal No: 881-136

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

Health incentive grants -$27,000,000. The effect of this rescission is to eliminate a Federal share in the cost of public health programs for which State and local health agencies have the primary authority.

The proposed rescission would eliminate funding for health incentive grants used primarily for non-institutional personal health services.

Chronic diseases - $200,000. The proposed rescission would reduce programs designed to identify cadaveric kidneys available for transplantation and reduce epidemiologic and laboratory studies on arthritis.

Other environmental hazards - $649,000. This proposed rescission would reduce activities on the human aspects of exposures to toxic chemicals.

Occupational safety and health research - $3,320,000. Occupational safety and health training - $6,991,000. The proposed rescission would reduce funding for low priority research and training grants for occupational safety and health, including energy control technologies and funding for Educational Resource Centers.

Technology development and application - $169,000. The proposed rescission would reduce funding for low priority hospital acquired infections activities.

Program management - $192,000. Under the proposed rescission, low priority administrative management support services would be reduced.

Rescission Proposal No: R81-136

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $721,788,000
Bureau National Institutes of Health	Other budgetary resources 100,000
Appropriation title & symbol: National Cancer Institute 75X0849	Total budgetary resources 721,888,000
	Amount proposed for rescission $17,986,000
CFS identification code: 75-0849-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:
The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $17,986,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is enacted for the full fiscal year, an additional $7,400,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:
The amount proposed for rescission is composed of program decreases totalling $18,146,000, partially offset by a program increase of $160,000. The details are discussed below.

Research Grants. Research projects grants will be reduced by 20 awards and $2,439,000. Research programs to be effected include: carcinogenesis by three awards and $301,000; biological carcinogenesis by two awards and $97,000; tumor biology research by five awards and $580,000; immunological research by one award and $164,000; preclinical treatment by nine awards and $1,031,000 ; and clinical treatment which will maintain the same numbers of awards, but will be reduced by $266,000. The total revised 1981 funding for research grants will be $347.4 million. This compares with a level of $321.3 million in 1980.

Research Career Program. This program will be increased by four awards and $160,000 in order to stimulate the number of researchers who eventually enter the research professions. This adjustment is necessary to achieve program balance.

Task Forces and Clinical Cooperative Groups. Reductions include decreases in Cancer Task Forces and Clinical Cooperative Groups totalling $1,388,000. The Cancer Task Forces, which fund the organ site program, will be reduced by four awards and $500,000.Cancer Task Forces support a planned and integrated research effort oriented toward cancer at a specific site. The clinical cooperative groups will be reduced by 19 awards and $888,000. Clinical cooperative groups support clinical trials and evaluations of the efficacy of the various forms of cancer therapy.

Cancer Centers. Support for Cancer Centers will be reduced by $1,596,000. At this level, all existing centers will continue to receive support. These centers serve as focal points for basic and clinical research activities, and for education, training and community outreach.

Research Training. The Administration is proposing to eliminate the indirect costs and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $7,228,000. Additionally, the number of trainees planned under the Continuing Resolution will be reduced by 47 full time equivalents (FTEs), for a revised level of 1,394 trainees. In total, this area will be reduced by $8,369,000 in FY 1981.

Research and Development Contracts. Contracts will be reduced by $2,654,000, or eight contracts. This reduction includes a decrease in support available for chemo-prevention activities, involving studies of retinoids, analogues of vitamin A, which appear to have the ability to prevent the development of certain forms of invasive cancer. Also affected are certain carcinogenic efforts. It will be necessary to curtail research efforts to characterize and evaluate new biological response modifiers as they are identified.

Intramural Research. The intramural research program, which gives research scientists the opportunity for basic and applied research and clinical investigation to solve major health problems, will be reduced by $700,000 through reduced purchases of equipment and biological and chemical resources for research.

Cancer Control. The Cancer Control Program will be reduced by $1,000,000 precluding new project starts and reducing some ongoing projects. This program is concerned with the entire health care continuum, and includes prevention, screening, diagnosis, pretreatment evaluation, treatment, rehabilitation and continuing care activities.

Rescission Proposal No: R81-137

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 406,281,000
Bureau National Institutes of Health	Other budgetary resources 100,000
Appropriation title & symbol National Heart, Lung and Blood Institute 7510872	Total budgetary resources 406,381,000
	Amount proposed for rescission $ 11,120,000
OMB identification code: 75-0872-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Administration is committed to Federal support of biomedical research activities. But as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $11,120,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 6, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $12,748,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects. The proposed rescission of $11,120,000 would affect the following under the Continuing Resolution.

Research Projects. Competing projects would be reduced by 18 grants and $2,174,000. The revised program level would be 464 competing projects and $88.1 million. This compares with $66.5 million in 1980.

Research Centers. Research centers would be individually negotiated downward to achieve an overall centers' reduction of 5 percent, or a savings of $3,000,000. The revised funding level would be $62.0 million.

Research Career Awards. This program would be reduced by $281,000. The revised program would support an estimated 223 investigators at a level of $9.0 million.

Research Training. The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $3,297,000. Additionally, the proposal will reduce the number of trainees planned under the Continuing Resolution by 32 full time equivalent (FTE) for a revised level of 500 trainees and a savings of $496,000.

Intramural Research. A reduction of $1,656,000, or 5 percent, would result in reducing the purchase of scientific equipment. The revised funding level would be $31.4 million.

Direct Operations. A reduction of $216,000 is proposed. The revised funding level would be $19.9 million.

Justification: The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $700,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $1,285,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

Research Training. The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $607,000. Additionally, the number of trainees planned under the Continuing Resolution will be reduced by six for a revised level of 201 and a savings of $93,000.

Justification:
The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $3,943,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year an additional $7,236,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:
Research Project Grants. The reduction of $2,672,000 will reduce the number of grants funded by 33. These reductions will include 12 fewer grants for Diabetes Endocrinology and Metabolism, seven fewer grants for Arthritis, Musculoskeletal and Skin Diseases, seven fewer grants for Digestive Diseases and Nutrition and seven fewer grants for Kidney Disease, Urology and Hematology. The revised funding level is $247.0 million to support 2,558 grants. This compares to a level of $219.7 million in 1980.

Research Training:
The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $1,371,000. The level of trainees will remain at 779 during the Continuing Resolution. The total revised funding level is $14.6 million.

Rescission Proposal No: R81-140

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 185,364,000
Bureau National Institutes of Health	Other budgetary resources 69,000
Appropriation title & symbol: National Institute of Neurological and Communicative Disorders and Stroke 7810086	Total budgetary resources 185,433,000
	Amount proposed for rescission $ 4,388,000
CFDA Identification code: 79-0886-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $4,388,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $2,086,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

Research Training: The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $2,357,000. Additionally, the proposal will maintain 488 trainees, the same number of trainees planned under the Continuing Resolution. The revised funding level is $6.6 million.

Intramural Research. The reduction of $944,000 will delay the full implementation of the Positron Emission Tomography (PETT) initiative including purchase of peripheral equipment. Development of the planned communicative disorders clinical branch will be delayed or postponed. Further development of brain tumor research would be delayed, including development of tumor models and the evaluation of long-term effects of brain tumors and rehabilitation of patients. The revised funding level would be $34.3 million.

Direct Operations. The reduction of $200,000 will defer completion of the microfilming of case records for the collaborative perinatal study. Support of workshops and conferences on hearing, speech, and language disorders would be delayed or postponed. The revised funding level would be $12.9 million.

Program Management. The reduction of $125,000 would delay the final phase of computer programming and data entry for the Institute's newly developed program information system. This system would provide data for budget and program planning, and for inquiries regarding support of the Institute's research programs. The revised funding level would be $2.2 million.

Research and Development Contracts: The reduction of $762,000 would eliminate a study of the endocrinological parameters (hormone production) in experimental anticonvulsant drugs. A new stroke clinical research program would not be initiated. A clinical trial on the pharmacologic prevention of post-traumatic epilepsy would be reduced or not funded at all. The revised funding level for research and development contracts would be $15.8 million.

Rescission Proposal No: R81-141

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 161,887,000
Bureau National Institutes of Health	Other budgetary resources 10,000
Appropriation title & symbol	Total budgetary resources 161,897,000
National Institute of Child Health and Human Development 75X0844	Amount proposed for rescission $ 4,119,000
CFS identification code: 75-0844-0-1-450	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☒ Yes ☐ No	☐ Other
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $4,119,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $3,629,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:
Research Training. The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $1,260,000. Additionally, the proposal will reduce the number of trainees by 13 for a revised level of 701 and a savings of $140,000.

Research Project Grants. This program would be reduced by 10 competing grants and $1,100,000 which would result in the funding of 265 competing grants for $28,300,000. These grants support investigations principally in reproductive and developmental biology.

Research Center Grants. The reduction of $500,000 would decrease the level of support for several centers. The number of centers which are planned to be funded under the Continuing Resolution would remain at 33. Other research would be reduced by one Research Career Development Award for $19,000.

Research and Development Contracts. Research and Development Contracts would be reduced by 10 contracts and $800,000 to a level of 95 contracts for $15,200,000.

Intramural Research. The proposed reduction would eliminate equipment purchases and other services by $300,000 for a new level of $16,900,000.

RESCISSION PROPOSAL NO. R81-141

DEPARTMENT OF HEALTH AND HUMAN SERVICES
National Institutes of Health
National Institute of Child Health and Human Development

Of the funds provided for "National Institute of Child Health and Human Development" for fiscal year 1981 in P.L. 96-536, $4,119,000 are rescinded, and funds under this head may be expended without regard to the provisions of section 472(b)(5) of the Public Health Service Act.

Rescission Proposal No: R81-142

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Health and Human Services	New budget authority (P.L. 96-536): $57,242,000
Bureau: National Institutes of Health	Other budgetary resources: 60,000
Appropriation title & symbol: National Eye Institute 7810807	Total budgetary resources: $57,302,000
	Amount proposed for rescission: $3,856,000
CFS identification code: 75-0807-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $3,856,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $840,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects: The amount proposed for rescission is composed of program decreases totalling $4,016,000, partially offset by a program increase of $160,000. The details are discussed below.

Research Training: The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards Program. This would reduce research training by $594,000. Additionally, the proposal will reduce the number of trainees planned under the Continuing Resolution by 13 for a revised level of 114 and a savings of $245,000.

Research Projects: The proposed rescission will result in decreasing competing research projects grants by 12 grants for a level of $84,996,000. The reductions by program are as follows: Retinal and Choroidal Diseases, 6 grants, $578,000; Corneal Diseases, 2 grants, $169,000; Cataract, 2 grants, $140,000; Glaucoma, 1 grant, $122,000; Sensory and Motor Disorders of Vision, 1 grant, $159,000. The revised funding level is an increase of $8.9 million over 1980.

Research Career Awards: To refine program balance in the context of the overall budget reduction, this activity is being increased by four awards and $160,000.

Contracts: Under the rescission, the amount available for research and development contracts would be $4,301,000, $1,500,000 less than originally proposed in the budget. As a result, ongoing contracts would be supported at a reduced level.

Intramural Laboratory and Clinical Research: The purchase of equipment ($205,000) for the Ambulatory Care Research Facility will be delayed.

Direct Operations: Information Transfer initiatives will not be funded which will result in the delay of information dissemination initiatives ($210,000).

Program Management: Brochures designed specifically for the lay person will not be prepared in FY 1981. ($134,000) Plans to expand information dissemination will be postponed.

Outlay Effect: (in millions of dollars)

Of the funds provided for "National Eye Institute" for fiscal year 1981 in P.L. 96-536, $3,856,000 are rescinded, and funds under this head may be expended without regard to the provisions of section 472(b)(5) of the Public Health Service Act.

Rescission Proposal No: RSI-143

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 70,946,000
Bureau National Institutes of Health	Other budgetary resources 5,613,000
Appropriation title & symbol	Total budgetary resources 76,559,000
National Institute of Environmental Health Sciences 7510862	Amount proposed for rescission $ 2,179,000
CFDA identification code: 75-0862-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $2,179,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $3,877,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

Research Training. The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce training by $69,000. The level of trainees will remain at 467 during the Continuing Resolution.

Research Grants. Research grants will be reduced by 3 competing grants totalling $298,000. Total revised funding is $32.7 million, an increase of $4.3 million over 1980.

R&D Contracts. A decrease of $700,000 will maintain the commitment base but will cut out new contracts in toxicity test development and validation.

Intramural. A decrease of $1,112,000 will reduce funding for laboratory supplies and materials and large scientific equipment.

Rescission Proposal No: RS1-144

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Health and Human Services	New budget authority (P.L. 96-536): $84,880,000
Bureau: National Institutes of Health	Other budgetary resources: 100,000
Appropriation title & symbol: National Institute of Aging 7810943	Total budgetary resources: 84,980,000
	Amount proposed for rescission: $1,393,000
CFS identification code: 75-0943-0-1-551	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $1,393,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 6, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $620,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:
Research Grants: The proposed rescission will reduce research project grants by 3 grants and $371,000, and other research grants by 5 grants and $284,000. Total revised funding is $43.2 million to support 403 grants.

Research Training: The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce research training by $463,000. Additionally, the proposal will reduce the number of trainees planned under the Continuing Resolution by 15 full-time equivalent trainees and a savings of $171,000. The level for trainees will be 183 with a revised funding level of $2,312,000.

Intramural Research: A reduction of $304,000 is proposed for intramural research. This would result in reducing the rate women are added to the research cohort in the Baltimore Longitudinal Study.

Outlay Effects: (in millions of dollars)

Rescission Proposal No: R81-145

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 170,779,000
Bureau National Institutes of Health	Other budgetary resources 7,390,000
Appropriation title & symbol: Research Resources 7510848	Total budgetary resources 178,169,000
	Amount proposed for rescission $ 3,714,000
CFDA identification code: 75-0848-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The Research Resources appropriation supports the development and maintenance of resources - advanced tools, materials, specialized environments for research, expanded capability for ethnic minority faculty and students, and improved quality for biomedical science.

The Administration is committed to Federal support of biomedical research activities, but as part of a general effort to achieve economies and reduce lower priority activities, a rescission of $3,714,000 is proposed for this appropriation from the 1981 Continuing Resolution through June 5, 1981. If the Continuing Resolution is extended for the full fiscal year, an additional $7,031,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:
Research Training: The Administration is proposing to eliminate the indirect cost and institutional allowances paid under the National Research Service Awards program. This would reduce training by $184,000.

Research Centers: A reduction of $1,836,000 is proposed for support of research centers. This would result in four fewer general clinical research centers.

Biomedical Research Support: A reduction of $1,694,000 is proposed. Since the funds are distributed to all eligible institutions on a formula basis, the decrease would result in slight reductions among all recipients.

Outlay Effects: (in million of dollars)

Grant program ☐ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

Funds provided by the Congress in excess of the January budget request totalling $341,000 are proposed for rescission.

This rescission proposal is an integral component of President's Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

As a result of the rescission, the development of two components of the Chemical Substances Information Network, the Chemical Base Directory and the Chemical Structure and Nomenclature System in the Toxicology Information Program will be spread over several years. The end products will be completed at a later date than originally planned.

Outlay Effects: (in millions of dollars)

Subtotal	$ 244,644	$ 22,147	$ 10,011	$212,486

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and action to remove unnecessary regulatory burdens.

Program Activity	New a/ Budget Authority	(In thousands of dollars) Proposed Rescissions Under P.L. 96-536	Remainder a/ of FY 1981	Revised a/ 1981 Funding
Alcoholism				
Research	22,251	243	297	21,711
Training	5,821	—	374	5,447
Project Grants/Contracts .	73,000	1,018	1,244	70,738
Grants to States ..	50,000	47,188	2,812	—
Subtotal	$ 151,072	$ 48,449	$ 4,727	$ 97,896
Program Support/ Management	77,482	—	— b/	77,482
Total	$1,042,382	$ 98,370	$ 54,782 b/	$889,230

a/ Assumes funding level provided by P.L. 96-536 is extended for the remainder of FY 1981.

b/ In addition, the supplemental of $4,510,000 included in the January budget to cover 1981 pay raises has been reduced by $1,732,000 to a new supplemental request of $2,878,000.

Research. 1981 reductions are proposed to slow the rate of growth of funding for ADAMHA biomedical research and to reduce the level of funding for social sciences research below current levels. Across the board restraints in Federal spending--including biomedical research--are necessary for economic recovery; social sciences research has been reduced substantially because this research has been less productive.

Research Training. The level of support for trainees in social science areas has been reduced. In addition, institutional overhead has been eliminated from the National Research Service Act research training awards because the Federal Government should not pay higher costs to support a research trainee than are normally charged for a non-federally supported student at the same institution.

Clinical Training. The supply of mental health professionals, who have good earnings prospects, is now generally adequate and Federal subsidies for such training are no longer necessary. As a result, no funding for new starts will be requested in 1981 and 1982. Federal support for ADAMHA clinical training will be phased out by the end of 1982.

Services. In view of the Administration's intent that the States should play an increased role in the funding and management of public service programs supported within their jurisdictions, this rescission would eliminate all new and competing service project grant and contract funds not awarded to date and terminate support for the alcohol and drug abuse formula grant programs.

A total of $98,370,000 is proposed for rescission under the current continuing resolution. If the Continuing Resolution is enacted for the full fiscal year, an additional $54,782,000 will be proposed for rescission.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and action to remove unnecessary regulatory burdens.

Estimated Effects:

This rescission would reduce increases in funding for ADAMHA research, provide for reductions in ADAMHA training and service project grants, and terminate funding for State formula grants for alcohol and drug abuse. This rescission will also reduce funding for new or competing project grants and contracts below the level proposed under the continuing resolution but will still allow about $40 million for new awards in research and research training. It is expected that the States will continue to support service programs in alcohol, drug abuse, and mental health which are of high State priority.

Of the funds provided for "Alcohol, Drug Abuse, and Mental Health" for fiscal year 1981 in P.L. 96-536, $98,370,000 are rescinded, and the funds remaining in this account may be expended without regard to the provisions of section 472(b)(5) of the Public Health Service Act.

Rescission Proposal No: 81-149

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Health and Human Services	New budget authority (P.L. 96-536) $ 491,634,000
Bureau Health Resources Administration	Other budgetary resources 2,741,000
Appropriation title & symbol: Health Resources 7510712	Total budgetary resources 494,375,000
	Amount proposed for rescission $ 131,781,000 1/
OMB identification code: 75-0713-0-1-550	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

The programs for which rescissions are proposed are included within the Health Resources appropriation and are administered by the Health Resources Administration's Bureau of Health Planning and Resources Development and the Bureau of Health Professions Education.

The primary purpose of the Bureau of Health Planning programs is to control health care cost through a network of 213 local health systems agencies and 57 State health planning and development agencies. Because the planning program and its regulatory process have not proved effective in controlling costs on a national basis and inhibits market forces needed to strengthen competition and provide less costly services, the Administration is proposing a phase-out of the entire program by fiscal 1983. The proposed rescission for local planning reflects the first step of this phase-out.

Programs of the Bureau of Health Professions Education have as their primary purpose expanding the supply of health professionals in the United States. During the 1960's and 1970's, the supply of health professionals has increased dramatically, primarily as a result of Federal subsidies to expand numbers of health professions students and training programs. The current supply of health professionals is adequate and an oversupply for most specialties is now predicted prior to 1990. The proposed rescission for health professions training programs reflects a shift in emphasis from general institutional support to more targeted Federal assistance directed toward those programs which have the greatest potential for addressing the following major objectives:

- maintaining a sufficient supply of primary care providers;
- promoting equity of opportunity for minority and disadvantaged students;
- improving geographic and specialty distribution; and
- encouraging more efficient utilization of health personnel.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

A rescission of $131.8 million is proposed in 1981 through June 5, 1981, from funds available under P.L. 96-536 for health planning and health professions distributed as follows.

Estimated Effects:

Local Planning Agencies - ($13,568,000) 1/. This program provides grants for Local Health Systems Agencies which are primarily responsible for developing comprehensive, long-range health systems plans for their local communities, along with action strategies for implementing these plans. Agencies then attempt to implement the plans either through independent negotiation or by using one of several mechanisms authorized by the statute.

Health Professions Education--Start-up - ($1,790,000). The purpose of start-up grants is to provide support to new schools of medicine, osteopathy, dentistry, public health, veterinary medicine, optometry, pharmacy or podiatry so that they may accelerate the beginning date of instruction or substantially increase enrollments. Because of a current and growing oversupply of physicians and other health professionals, increasing the capacity of health professions institutions is no longer a desirable objective.

The remaining $.9 million has been approved for reprogramming to the financial distress program to provide additional support to Meharry Medical College. The rescission would result in the elimination of support for 4 projects which would have received continuation grants in 1981.

Allied Health - Special Projects Grants and Contracts - ($4,200,000). This program provides grants and contracts to assist eligible entities in meeting costs of projects to establish regional or State systems for improved coordination, training and credentialing of allied health personnel. The revised funding level of $1.0 million would support 13 continuation awards, 1 contract and 12 cooperative agreements (REDEIC) at a reduced rate. This represents a reduction of 9 continuation projects and 47 new awards from the number which could be supported by the amount currently available in 1981.

Allied Health - Advanced Traineeships - ($1,300,000). This program provides grants to public or non-profit institutions, organizations, or agencies for the support of both long and short-term advanced traineeship programs at the post professional level. Support for 42 projects and 175 long-term and 1,313 short-term training slots would be eliminated as a result of the rescission.

Dental Extenders - ($1,900,000). This program provides additional training to dental hygienists and dental assistants to qualify them to perform newly-delegated functions formerly performed by dentists. The amount proposed for rescission would have supported 7 continuation and 17 new

Student Assistance - Health Professions Student Loans - ($16,500,000). The purpose of the student loans program is to provide long-term, seven percent interest loans up to $2,500 per year, plus tuition, to health professions

Student Assistance - (Health Professions Student Loans - ($16,000,000). The purpose of the student loan program is to provide long-term, low interest loans up to $2,500 per year, plus tuition, to health professions students (HSO/HDP). These loan funds are given to schools who then make awards to students. The total reduction of $16.5 million from the health Professions Student Loan program would eliminate support to 111 schools which would have provided loans to 11,000 additional students.

Special Education Program - Health Professions Education Improvement and Training, Development, Demonstration, and evaluation of targeted health manpower activities such as those emphasizing humanistic medicine, environmental and occupational health, health manpower development, special problems of aging, human nutrition, and development of regional systems of continuing education and preventive medicine. Support for 25 projects in these areas would be eliminated.

Special Educational Programs—Emergency Medical Training - ($3,000,000). The program provides grants and contracts for the training of physicians and other health professionals in life-saving techniques under emergency situations. The training is of short duration and is provided essentially to meet local needs. Support for 22 projects, 3 contracts and for training for 6,468 emergency medical services personnel would be eliminated as a result of the proposed rescission.

Nursing Capitation Grants ($21,000,000). Nurse Practitioners ($10,000,000). Projects ($7,500,000) and Advanced Nurse Traineeships ($3,500,000). A reduction of $21.7 million is proposed for these activities. Nursing supply problems that may exist in certain geographic and specialty areas are not directly related to the existing capacity of nursing schools, which is adequate to meet overall needs. Consequently, these funds are not necessary for addressing national priorities with respect to nursing. This reduction would result in 1,130 schools not receiving support through formula funding (466 Baccalaureate, 382 Associate Degree and 142 Diploma); reduce 3 new nurse practitioner projects; reduce 10 new special project grants/contracts and eliminate 20 current Advanced Nurse Training awards.

Health Professions Education - Nurse Traineeships - ($3,000,000). The purpose of this program is to provide support to eligible public or non-profit institutions who then make traineeship awards to individual professional nurses who are pursuing advanced educational preparation. The rescission would eliminate support for 125 grants.

General Dentistry Residencies and Training - ($4,000,000). This program provides grants to plan, develop, and implement programs to provide dental residents with advanced skills in the general practice of dentistry. The rescission would eliminate funding in 1981 for 14 continuation and 20 new projects assisting 240 students. Both this and the following 2 rescission proposals specifically reflect the Administration's assessment that the current supply of dental health professionals is adequate.

Dental Extenders - ($1,200,000). This program provides additional training to dental hygienists and dental assistants to qualify them to perform newly-delegated functions formerly performed by dentists. The amount proposed for rescission would have supported 7 continuation and 17 new projects assisting approximately 1,121 students and faculty.

Dental Team Practice - ($1,000,000). The Dental Team Practice Training Program teaches dental students to organize and manage multiple auxiliary dental team practices in lieu of traditional solo practices. Future dentists are taught how to conduct dental practices through the utilization of dental extenders, dental hygienists and other auxiliaries. The $1 million proposed for rescission will eliminate the funding of 8 continuation projects benefitting 430 dental students.

Public Health Dental Projects - ($3,100,000). This program provides grants to accredited schools of public health and to other public or nonprofit private educational entities to support the improvement and expansion of existing programs in biostatistics or epidemiology, health administration, health planning, health policy analysis and planning, environmental or occupational health, nutrition, and maternal and child health. The $3,100,000 proposed for rescission will eliminate new starts in 1981 by reducing 40 new projects, assisting 1,000 public health students.

Health Administration Grants - ($3,000,000). Grants are awarded to public or nonprofit private educational entities, including schools of social work but excluding schools of public health, in order to support the expansion and improvement of graduate programs in health administration, hospital administration and health planning. The $3,000,000 proposed for rescission will eliminate 25 formula grants benefitting 1,640 students in 1981.

Public Health Traineeships - ($3,100,000). Traineeships are awarded to full-time students in schools of public health and other public or nonprofit institutions which provide graduate or specialized training in public health. These grants provide financial support to students for tuition and living expenses. This program supports graduate or specialized training of health professional personnel in public health fields such as biostatistics, epidemiology, nutrition, environmental health, occupational health, health administration, health planning, health policy analysis, preventive medicine or dentistry, and maternal and child health. The proposed rescission would eliminate support to 1,100 students in public health training.

Health Administration Traineeships - ($1,100,000). Grants are awarded to public or nonprofit educational institutions, including graduate schools of social work but excluding schools of public health to support traineeships for graduate study in accredited programs in health administration, hospital administration, or health policy analysis and planning. The proposed rescission would reduce the formula funding amount to 25 public or nonprofit educational institutions, eliminating support for 300 students in health administration training.

Family Medicine Residencies and Training - ($16,000,000). This rescission is designed to eliminate all new starts under this program. This program supports grants and contracts to hospitals, schools of medicine, osteopathy, and other public or private nonprofit entities to provide a combination of allopathic and predoctoral training. This program also authorizes assistance in meeting the cost of supporting trainees in such programs, who plan to specialize or work in the practice of family medicine. This level will still support nearly 4,000 faculty and trainees.

General Internal Medicine and Pediatrics - ($6,000,000). This rescission is designed to eliminate all new starts under this program. These grant and contract programs assist medical and osteopathic schools with projects to plan, develop, and operate approved residency programs in internal medicine or pediatrics. These programs emphasize training for the practice of general internal medicine or general pediatrics and provide financial assistance (in the form of traineeships and fellowships) to residents who are participating in these programs and who plan to practice general internal medicine or general pediatrics. The programs supported under this authority must emphasize ambulatory care, comprehensive health care and non-clinical areas relevant to the practitioner of general internal medicine and general pediatrics. This rescission will reduce the number of projects supported by 32. The first year residency positions and total residency positions supported by these projects will be reduced by 234 and 739 respectively.

Physician Assistants - ($1,000,000). This rescission is designed to eliminate all new starts under this program. This program, through grants or contracts to schools of medicine and osteopathy, and other public or nonprofit private entities, supports costs to plan, develop, operate, or maintain physician assistant training programs and the training of physician assistant faculty. Programs supported must develop and use (1) methods designed to encourage graduates of the program to work in health personnel shortage areas; and (2) methods for placing graduates in positions for which they have been trained. The proposed rescission would reduce the number of projects supported by 3, thus reducing the number of trainees by 266 and reducing the number of faculty members trained by 14.

Health Resources Administration
Health Resources

Of the funds provided for "Health Resources" for fiscal year 1981 in P.L. 96-370, $121,791,000 are rescinded: Provided, that the funds appropriated under this head in P.L. 96-370 shall be available notwithstanding the limitations of sections 785(c) and 791(c) of the Public Health Service Act.

Rescission Proposal No: 881-190

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Outlay Effects: (in millions of dollars)

Rescission Proposal No: 81-130

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Health and Human Services	New budget authority (P.L. 96-536): $1,263,134,440
Bureau: Human Development Services	Other budgetary resources: 3,181,000
Appropriation title & symbol: Human Development Services 7511636	Total budgetary resources: 1,266,315,440
	Amount proposed for rescission: $10,100,000
CFDA identification code: 75-1636-0-1-999	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☒ Annual ☐ Multiple-year _____ (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

The amount available in the Continuing Resolution (P.L. 96-536) for Social Services and Senior Centers is $257,000,000 (on an annualized basis). This amount includes $10,000,000 more than the 1981 Budget request to help States assume the additional costs of transferring responsibilities from nutrition to social services as required by the Older Americans Act Amendments of 1978. The amendments, however, required that this transfer be completed by the end of fiscal year 1980. No evidence is available which indicates that States will require the additional resources to complete the transfer in fiscal year 1981. Therefore, a rescission of $10 million is proposed.

In addition, the amount available in the Continuing Resolution for the Federal Council on Aging is $581,000 (on an annualized basis). Since the functions of the Council could be assumed by the Administration on Aging or other agencies concerned with the well-being of the elderly, a rescission of $.1 million is proposed.

This rescission proposal is an integral component of President Reagan's comprehensive economic plan for spending reductions, tax reductions, and actions to remove unnecessary regulatory burdens.

Estimated Effects:

This proposal would save $10 million which is no longer needed by States to accomplish the transfer of responsibilities under the Older Americans Act Amendments. The proposed rescission for the Federal Council on Aging will reduce ongoing activities in the area of improvements in long term care policies, participation in and follow-up plans, and the comprehensive study of programs operated under the Older Americans Act.

Human Development Services

Of the funds provided for "Human Development Services" for fiscal year 1981 in P.L. 96-536, making further continuing appropriations for the fiscal year 1981, $10,100,000 are rescinded.

Rescission Proposal No: RSI-151

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Housing and Urban Development	New budget authority (P.L. 96-526): $ 10,000,000
Bureau: Housing Programs	Other budgetary resources: 13,334,395
Appropriation title & symbol: Congregate Services Program 869/40178 860/40178 861/40178	Total budgetary resources: 23,334,395
	Amount proposed for rescission: $ 10,000,000
OMB identification code: 86-0178-1-604	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☐ Annual ☒ Multiple-year September 30, 1984 (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: This program is currently being operated as a demonstration program out of funds appropriated for fiscal years 1979 and 1980. This demonstration program is testing whether providing contracts directly with local public housing agencies to supply congregate services is more effective than alternative Health and Human Services (HHS) and other social service programs. Funds appropriated for 1981 are not required to carry out the evaluation of this program. Thus, providing continued funding for the program is premature and would suggest that the Federal Government is committed to operating this type of social service program in the Department of Housing and Urban Development when this is not the case.

Estimated Effects: The 1981 appropriation now proposed for rescission would have provided meal services and supportive services to an estimated 700 elderly residents of public housing and housing for the elderly or handicapped. However, such services are also available through other Federal social service programs as well as social service agencies of State and local governments. The proposed rescission will have no effect on the evaluation of this program now being conducted by the Office of Policy Development and Research of the Department of Housing and Urban Development.

Report Pursuant to Section 1012 of P.L. 93-344

Rescission Proposal No: 881-151

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Federal Mine Safety and Health Review Commission	New budget authority (P.L. 96-536): $2,120,000
Bureau:	Other budgetary resources: —
Appropriation title & symbol: Salaries and Expenses 9512000	Total budgetary resources: 2,120,000
	Amount proposed for rescission: $186,000
OMB identification code: 95-0900-0-1-154	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☐ Yes ☒ No	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	

Justification: This appropriation provides for adjudication of contested Labor Department enforcement actions under the Federal Mine Safety and Health Amendments Act of 1977.

This rescission proposal reflects reestimates of the Commission's personnel and other resources requirements, as well as reductions in travel and equipment procurement. The savings from these actions are part of the President's comprehensive economic plan for reduced Federal spending. This rescission is proposed as a reserve for savings in accordance with the Antideficiency Act (31 U.S.C. 665).

Anticipated Effects: The rescission will have minimal impact on the Commission since most of the funds proposed for rescission would not be obligated before lapsing at the end of the fiscal year. Hearings and decisions on contested cases may be slightly delayed as a result of travel reductions, but no major programmatic effects are anticipated.

Outlay Effects: (in thousands of dollars)

Salaries and Expenses

Of the funds provided for the Federal Mine Safety and Health Review Commission, "Salaries and expenses," for fiscal year 1981 in P.L. 96-536, $186,000 are rescinded.

Rescission Proposal No: 881-152

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Community Services Administration	New budget authority (P.L. 96-536): $41,000,000
Bureau:	Other budgetary resources: -0-
Appropriation title & symbol: Community Services Program 8110500	Total budgetary resources: 41,000,000
	Amount proposed for rescission: $6,000,000
OMB identification code: 91-0500-0-1-999	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☒ Yes ☐ No	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	

Justification: This rescission proposes to eliminate the National Youth Sports Program. There is no evidence that this program contributes to Community Services Administration's objective of assisting low-income families achieve economic self-sufficiency. Further, it duplicates activities and programs sponsored by other Federal, State and local government agencies. The program had already been scheduled for discontinuation in 1982. The proposal to advance this date is an integral part of President Reagan's policy of reducing Federal spending by eliminating ineffective and duplicative programs.

Anticipated Effects: This rescission proposal would result in cancellation of this program in 1981.

Outlay Effects: (in millions of dollars)

1981 Outlay Estimate Without Rescission	1981 Outlay Estimate With Rescission	Outlay Savings 1981	1982	1983	1984

COMMUNITY SERVICES ADMINISTRATION

Community Services Program

Of the funds provided for the "National Youth Sports Program" for fiscal year 1981 in P.L. 96-536, making further continuing appropriations for the fiscal year 1981, $6,000,000 are rescinded.

Rescission Proposal No: 881-134

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Postal Service	New budget authority (P.L. 96-536): $ 1,593,217,000
Bureau:	Other budgetary resources: ---
Appropriation title & symbol: Payment to the Postal Service Fund 18X1001	Total budgetary resources: $ 1,593,217,000
	Amount proposed for rescission: $ 250,000,000
OMB identification code: 18-1001-0-1-372	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: The President has stated that he believes the Postal Service has been unable to live within its means. The Administration believes that Federal subsidies act as disincentives for the Postal Service to realize operational efficiencies, thus slowing its progress toward financial independence.

The public service subsidy, $250,000,000 of which is proposed for rescission, compensates the Postal Service for the costs incurred by maintaining services that are not self-sustaining.

Estimated Effects: The Administration believes that this rescission will encourage the Postal Service to take additional measures to manage the national mail system more effectively. The Postmaster General has stated that the Postal Service will, when faced with reduced subsidies, realize economies through increased productivity rather than reductions in service.

Outlay Effect: (in millions of dollars)

Rescission Proposal No: 881-133

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Tennessee Valley Authority	New budget authority (P.L. 96-367): $ 287,563,000
Bureau:	Other budgetary resources: 87,304,000
Appropriation title & symbol: Tennessee Valley Authority Fund 6434110	Total budgetary resources: 374,867,000
	Amount proposed for rescission: $ 177,000,000
OMB identification code: 99-4110-0-3-999	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: Funds totalling $177,000,000 of the $210,000,000 provided in fiscal years 1980-1981 for the Coal Gasification Demonstration Project are proposed for rescission. The rescission is proposed primarily because of the project's limited technological benefit and high cost.

- The project, from a technology standpoint, is unnecessary. Current plans are to utilize a proven technology which is already in use throughout the world.
- The plant and estimated operational costs, including environmental requirements, are quite high (estimates are now up to $6 billion for construction alone) and appear to be uneconomic from the viewpoint of product marketability.
- Operation of the plant is predicated on construction of a pipeline to connect with an existing gas system. This cost has not been factored into the project nor has TVA sponsored any planning for this aspect of the project.
- The project overlaps responsibilities of the Synthetic Fuels Corporation which was established by Congress to fund projects like this. The information benefits from this project are not large enough to justify the substantial project costs. These benefits would also be available from SFC sponsored projects.

Estimated Effects: The effect of this rescission would be to terminate this project. Preliminary work on the project would be halted. The effect on the demonstration of coal gasification technology would not be adversely affected because of the SFC's and Department of Energy's activities in this area.

TENNESSEE VALLEY AUTHORITY

Tennessee Valley Authority Fund

Of the funds appropriated under this head in P.L. 96-367 making appropriations for Energy and Water Development and in P.L. 96-304 making supplemental appropriations for Energy and Water Development, $177,000,000 are rescinded.

Deferral No: DS1-104

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Health and Human Services	New budget authority (P.L. 96-536): $13,900,000
Bureau: Social Security Administration	Other budgetary resources: 31,100,364
Appropriation title & symbol: Limitation on Administrative Expenses 7858704 (Construction) 1/	Total budgetary resources: 44,000,364
	Amount to be deferred: Part of year: $ ____ Entire year: 8,003,808
OMB identification code: 75-0007-0-7-601	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other ____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification:

The Continuing Resolution (P.L. 96-536) provided $13.5 million for the Limitation on Administrative Expenses (Construction) of the Social Security Administration. These amounts remain available until expended in recognition of the long leadtime between the provision of funds and their use in carrying out authorized construction projects. SSA does not expect to need $8,003,808 of these funds during FY 1981. These funds are deferred for the remainder of this fiscal year and will be used for program requirements in FY 1982 or later years. This deferral action is taken pursuant to the Antideficiency Act (31 U.S.C. 665).

Estimated Effects:

Funds remaining available in FY 1981 will permit SSA to carry out its construction program in an orderly manner. No currently planned construction would be delayed by this deferral.

Outlay Effect:

This deferral action has no effect on outlays.

1/ This account was subject to a similar deferral during 1980 (D80-47)

[illegible]

The attached rescission proposal (RS1-102) substitutes for the version of RS1-102 that was transmitted to the Congress on Tuesday, March 17, 1981. The version of this proposal transmitted on March 17 was inadvertently prepared using a deferral report form rather than a rescission proposal form. The attached proposal has been prepared using the correct form.

Rescission Proposal No: RS1-102

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency: Veterans Administration Bureau:	New budget authority (P.L. 96-526): $423,774,000 Other budgetary resources: 853,523,000 Total budgetary resources: 1,277,297,000
Appropriation title & symbol: Construction, Major Projects 36X0110	Amount proposed for rescission: $162,160,000
OMB identification code: 36-0110-0-1-703 Grant program: ☐ Yes ☒ No	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act ☐ Other
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

This account provides funds for constructing, altering and improving the facilities under the jurisdiction of the Veterans Administration. This rescission proposes the cancellation of construction plans for VA hospitals in Baltimore, Maryland and Camden, New Jersey. These two areas are heavily overbedded and well-served by community and private hospitals. In each instance, there are three other VA hospitals within commuting distance which are underutilized at present.

Estimated Effects:

Two proposed VA hospitals will not be built. However, adequate health care for eligible veterans will continue to be available.

Outlay Effect: (in millions of dollars)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.
Comments on this program are still invited.
Comments should be submitted to the

Day-of-the-Week Program Coordinator,
Office of the Federal Register,
National Archives and Records Service,
General Services Administration,
Washington, D.C. 20408.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last Listing March 18, 1981; last cumulative listing for the 96th Congress (1980), January 7, 1981.

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

18534 **Grant Programs—Prisons** Justice/NIJ announces competitive research grants to study the methods for alleviating racial tension in prisons; apply by 4–30–81

18532 **Securities** SEC publishes final rule regarding allocation of consolidated income tax liability by registered holding companies and their subsidiaries; effective 3–25–81

18539 **Securities** Treasury/Sec'y announces interest rate of 12⅝ percent per annum on Notes of Series P–1983

18538 **Securities** Treasury/Sec'y announces auction of Series D–1988 Notes

18560 **Postal Service** PS proposes establishment of optional endorsement line in the address block or label; comments by 4–24–81

18536 **Alcohol, Tobacco, and Firearms Violations** Treasury/ATF increases the rate of compensation that is paid to appraisers of property seized as subject to forfeiture; effective 3–25–81

18535 **Securities** SEC publishes interpretative release concerning investment bankers and banks in Rule 70 under the Public Utility Holding Company Act of 1935

18531 **Securities** SEC adopts notice-of-sales forms for transactions; effective 4–24–81

18534 **Imports** Trade amends tariff schedules of the United States with respect to color television receivers from the Republic of Korea and Taiwan

18666 **Migratory Birds** Interior/FWS proposes 1981–82 Migratory Bird Hunting regulations in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands (Part II of this issue)

18568 **Antidumping** Commerce/ITA gives notice of preliminary results of antidumping duty order regarding spun acrylic yarn from Italy; effective 3–25–81

18542 **Sunshine Act Meetings**

The President

Proclamation 4827 of March 20, 1981

Pan American Day and Pan American Week, 1981

By the President of the United States of America

A Proclamation

Since its first observance fifty years ago, Pan American Day has served as an annual reminder of the common ideals of the nations of this hemisphere, further strengthening our peoples' bonds.

Commitment to such common goals among nations is an example for the world. Such cooperation has as its first priority the resolution of differences through peaceful conciliation and arbitration. The Organization of American States has provided a valuable framework for such progress to be made.

Through increased awareness and mutual cooperation, the Pan American nations strive to promote peace and stability in the region, as well as economic, social and cultural development. Pan American Day commemorates the voluntary cooperation of our countries in achieving solidarity of purpose while maintaining individuality of culture and tradition.

On this Pan American Day of 1981, the people of the United States extend warm greetings to their neighbors in the Americas, and reaffirm their commitment to the spirit of solidarity, the ideals and purposes of the Inter-American system, and their active support of the Organization of American States.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim Tuesday, April 14, 1981, as Pan American Day, and the week beginning on April 12, 1981, as Pan American Week; and I urge the Governors of the fifty States, and the Governor of the Commonwealth of Puerto Rico, and officials of the other areas under the flag of the United States of America to honor these observances with appropriate activities and ceremonies.

IN WITNESS WHEREOF, I have hereunto set my hand this 20th day of March in the year of our Lord nineteen hundred eighty-one, and of the Independence of the United States of America the two hundred fifth.

Ronald Reagan

Proclamation 4828 of March 20, 1981

Cancer Control Month

By the President of the United States of America

A Proclamation

This year an estimated 805,000 Americans will be diagnosed as having cancer. About 134,000 cancer patients will die who might have been saved by earlier diagnosis and prompt treatment.

While cancer is often called the disease Americans fear most, it is also now one of the most manageable chronic diseases in our country. We are approaching the day when, through surgery, chemotherapy and radiotherapy, half of the most serious forms of cancer can be cured.

Although we still face an enormous struggle in treating this disease, we must reaffirm today our ultimate goal—the cure of all those struck by this dread disease.

In addition to improving treatment for cancer patients, we must also reduce the incidence of this disease. In view of increasing evidence that a majority of cancers are related to environment and life-style, the major effort of Federal research today is in these areas.

Vigorous cancer research, directed to both treatment and prevention, must continue. All of us look to the day when this disease has been eradicated as a major threat to American lives.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of April 1981 as Cancer Control Month, and I invite the Governors of the States and the Commonwealth of Puerto Rico, and the appropriate officials of all other areas under the United States flag to issue similar proclamations.

To give emphasis to this serious problem and to encourage the determination of the American people to meet it, I also ask the medical and health professions, the communications industries, and all other interested persons and groups to unite during this appointed time in public reaffirmation of our Nation's abiding commitment to control cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this 20th day of March in the year of our Lord nineteen hundred and eighty-one, and of the Independence of the United States of America the two hundred and fifth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 46, No. 57
Wednesday, March 25, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 20

Environmental Radiation Protection Standards for Nuclear Power Operations

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations to incorporate the existing Environmental Protection Agency requirement for certain uranium fuel cycle licensees to comply with the EPA's "Environmental Radiation Protection Standards for Nuclear Power Operations". These standards require certain uranium fuel cycle facilities to be operated such that releases of radioactive materials and resulting radiation doses to the public are below specified limits. The amendments also require licensees to submit reports to NRC when those standards have been or may be exceeded.

EFFECTIVE DATES: The effective dates for the existing requirement to comply with EPA's 40 CFR Part 190 are already specified in 40 CFR 190.12: December 1, 1979 for most operations; December 1, 1980 for uranium mills; and January 1, 1983 for discharges of krypton-85 and iodine-129. The effective date for these amendments to 10 CFR Part 20 is June 23, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. John W. N. Hickey, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone: (301) 443–5906).

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission (NRC) is amending its regulations in 10 CFR Part 20, "Standards for Protection Against Radiation," to incorporate the existing Environmental Protection Agency (EPA) requirement for compliance with 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations." The EPA published 40 CFR Part 190 on January 13, 1977 (42 FR 2858). In accordance with a Memorandum of Understanding between EPA and the former Atomic Energy Commission (38 FR 24936, September 11, 1973), NRC is responsible for enforcing the provisions of 40 CFR Part 190 for NRC licensees.

Title 40 CFR Part 190 requires certain uranium fuel cycle facilities to be operated so that releases of radioactive material and resulting radiation doses to the public are below specified limits. The effective dates for compliance are December 1, 1979 for most operations; December 1, 1980 for uranium mills; and January 1, 1983 for discharges of krypton-85 and iodine-129. The regulation provides that under certain circumstances variances may be granted by the regulatory agency responsible for enforcing 40 CFR Part 190.

The amendments to NRC regulations state that NRC licensees must comply with 40 CFR Part 190, and require licensees to submit reports to NRC when 40 CFR Part 190 limits have been or may be violated.

The NRC has submitted these amendments to the Comptroller General for such review as may be appropriate under the Federal Reports Act, as amended, 44 U.S.C. 3512. The date on which the reporting requirement of this rule becomes effective reflects inclusion of the 45-day period which that statute allows for such review (44 U.S.C. 3513(c)(2)).

As discussed in the notice of proposed rulemaking, the Commission has concluded that an environmental impact statement for the amendments is not required, because they will not significantly affect the quality of the human environment.

The amendments were published for public comment on April 17, 1980 (45 FR 26072), with comments requested by June 16, 1980. Timely comments were received from Northeast Utilities, Duke Power Company, Consumers Power Company, and the County of San Diego. The public comments are available for free inspection or copying for a fee at the NRC Public Document Room, 1717 H Street, Washington, D.C. 20555. No significant adverse comments or questions were received on the proposed amendments during the public comment period.[1] Therefore, they are being published in final form with only one minor change. Following is a discussion of the issues raised by the public comments.

1. One comment stated that the amendments were unnecessary because licensees are already required to comply with 40 CFR Part 190. The purpose of the amendments is to incorporate the existing 40 CFR Part 190 requirements into NRC regulations to make it more clear that compliance with 40 CFR Part 190 is required.

2. One comment stated that the requirements of 40 CFR Part 190 and 10 CFR Part 50 Appendix I should be combined, because both regulations relate to radioactive releases from nuclear power reactors. This is not practical because 40 CFR Part 190 also applies to fuel cycle facilities other than power reactors, and because the two regulations are not identical. However, whenever possible, the NRC staff is avoiding unnecessary duplicative requirements for reactors by combining release limits and reporting requirements for 40 CFR Part 190 with existing Appendix I requirements in individual licensees' technical specifications.

3. One comment expressed concern that 40 CFR Part 190 applied to combined radiation doses from all fuel

[1] In October, 1980 approximately four months after the comment period closed, several operators of uranium mills jointly filed later comments on this proposed rule. They basically requested the Commission to defer implementation of the NRC program to enforce Part 190 at uranium mills. Recognizing that their comments were late, these operators requested in the alternative that their filing be treated as a petition to rescind any NRC regulations imposing Part 190 requirements on uranium mills. In a separate action, the American Mining Congress also moved the Commission in October, 1980 to stay implementation and enforcement of Part 190 at NRC licensed uranium mills. The Commission is currently considering these filings. However, the issuance of these amendments as a final rule needs not be delayed. For the most part, these amendments simply incorporate into 10 CFR Part 20 the NRC's already existing responsibility to enforce 40 CFR Part 190 at fuel cycle facilities including uranium mills. Issuance of these amendments as a final rule does not modify that responsibility. Thus, because these amendments do not change the status quo regarding the Commission's authority, they can be issued before the Commission reaches a decision on pending requests to delay enforcement of Part 190.

cycle facilities, making it difficult to determine compliance. EPA addressed this issue when 40 CFR Part 190 was published. EPA stated: "* * * in the vast majority of situations, the sum of all reasonably postulable contributions from sources other than the immediate site will be small compared to these standards and should be ignored in assessing compliance" (42 FR 2858, January 13, 1977).

4. One comment pointed out that 40 CFR Part 190 allows for licensees to obtain variances to exceed 40 CFR Part 190 limits under temporary and unusual conditions, and requested NRC to specify procedures for obtaining such variances. Because variances will be considered only in unusual cases, it is preferable to treat each case on an individual basis. This is consistent with existing NRC regulations, which do not specify procedures for obtaining variances to exceed regulatory limits. Rather, 10 CFR § 20.501 states, "The Commission may, upon application by any licensee or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not result in undue hazard to life or property."

One minor clarifying change related to variances was made to the proposed rule. When a licensee submits to NRC a report of excessive radioactive releases, the description of corrective steps taken or planned shall include the schedule for achieving conformance with 40 CFR Part 190 and associated license conditions. This is consistent with 40 CFR 190.11, which requires that a regulatory agency granting a variance should make public the schedule for achieving conformance with 40 CFR Part 190.

5. One comment stated that licensees should have 60 days to report violations of 40 CFR Part 190 to NRC, rather than the 30 days specified in the proposed rule. The reason given was that licensees need more time to perform calculations associated with assessing compliance. The NRC staff has concluded that the 30-day requirement is reasonable. Specific license conditions which implement this requirement for individual facilities will allow reasonable time to gather data and perform dose calculations as appropriate.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, the following amendments are published as a document subject to codification.

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

1. A new paragraph (c) is added to § 20.105 to read as follows:

§ 20.105 Permissible levels of radiation in unrestricted areas.

* * * * *

(c) In addition to other requirements of this part, licensees engaged in uranium fuel cycle operations subject to the provisions of 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations," shall comply with that part.

2. Paragraph (f) of § 20.106 is revised, and a new paragraph (g) is added, to read as follows:

§ 20.106 Radioactivity in effluents to unrestricted areas.

* * * * *

(f) The provisions of paragraphs (a) through (e) of this section do not apply to disposal of radioactive material into sanitary sewerage systems, which is governed by § 20.303.

(g) In addition to other requirements of this part, licensees engaged in uranium fuel cycle operations subject to the provisions of 40 CFR Part 190, "Environmental Radiation Protection Standard for Nuclear Power Operations," shall comply with that part.

3. Paragraph (b) of § 20.405 is revised, and a new paragraph (c) is added, to read as follows:

§ 20.405 Reports of overexposures and excessive levels and concentrations.

* * * * *

(b) Any report filed with the Commission pursuant to paragraph (a) of this section shall include for each individual exposed the name, social security number, and date of birth, and an estimate of the individual's exposure. The report shall be prepared so that this information is stated in a separate part of the report.

(c) In addition to any notification required by § 20.403, each licensee shall make a report in writing within 30 days to the appropriate NRC Regional Office listed in Appendix D, with a copy to the Director of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, of levels of radiation or releases of radioactive material in excess of limits specified by 40 CFR Part 190, "Environmental Radiation Protection Standards for Nuclear Power Operations," or in excess of license conditions related to compliance with 40 CFR Part 190. Each report required under this paragraph shall describe the extent of exposure of individuals to radiation or to radioactive material; levels of radiation and concentrations of radioactive material involved; the cause of the exposure, levels or concentrations; and corrective steps taken or planned to assure against a recurrence, including the schedule for achieving conformance with 40 CFR Part 190 and associated license conditions.

BILLING CODE 7590-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 123

[Rev. 9, Amt. 17]

Disaster Loans; Changes in Eligibility

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: In recognition of severe funding limitations in the face of unprecedented demand for drought disaster assistance, changes in eligibility are necessary to assure the continuing availability of recovery assistance to all disaster victims. Due to the emergency nature of these changes, they will become effective March 19, 1981, for disaster loans approved on or after that date. The changes affect the rules for disaster declarations and will reduce the amounts of physical disaster loans (other than home loans) to not more than 60% of verified loss. Economic injury loans will not exceed $100,000. Business disaster loans will be made only to concerns unable to obtain the financial assistance from their own or their principals' resources or credit.

EFFECTIVE DATE: March 19, 1981.

FOR FURTHER INFORMATION CONTACT: Questions may be addressed to: Charles R. Hertzberg, Acting Director, Disaster Operations, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416, [202] 653-6574.

SUPPLEMENTARY INFORMATION: The drought catastrophes of the past summer have placed a severe strain on funds available for disaster assistance. In

addition, the critical national economic and fiscal circumstances preclude supplemental appropriations. The President has therefore directed that SBA adopt policies, forthwith, intended to ensure that SBA's Disaster Loan Fund operate within its total budgetary resources of $2.379 billion for the entire 1981 fiscal year. For these reasons, SBA avails itself of its authority pursuant to § 123.0(a) of its Disaster Loan regulation, 12 CFR 123.0(a), to change without advance notice certain regulations affecting disaster business loans. The Acting Administrator has determined that the need to resume Disaster Loan Assistance immediately to eligible persons in a rational and equitable way within the Small Business Administration's limited resources presents a circumstance contemplated by 13 CFR 101.9 and 123.0(a), thus rendering impracticable and contrary to the public interest any delay in the effectuation of these amendments. The rules for disaster home loans remain unchanged.

The amended regulations provide that disaster declarations will be made by SBA if at least 25 homes and/or businesses have suffered uninsured losses of at least 40% of their estimated fair replacement value, or at least 3 businesses have been damaged to the same extent and at least a quarter of the workforce in the community would be unemployed for at least 90 days as a result of such damage. The provision for a disaster declaration, based on 200 victims who have suffered any damage, is repealed.

No loan will be approved where SBA determines that the requested assistance is available to the damaged business either through the resources or the personal credit of the applicant concern or through its principals, as provided in 13 CFR 120.2(a)(2).

Physical disaster loan amounts will not exceed 60% of the verified loss suffered by a business concern. (It may be necessary, to insure repayment ability, that the remaining 40% will be required from other sources.) Economic injury disaster loans [Sec. 7(b)(2) of the Small Business Act, as amended (15 USC § 636)] will not be subject to the 60% limit but may not exceed $100,000.

The emergency nature of the circumstances surrounding the promulgation of these amendments makes public participation in this rulemaking procedure impractical and contrary to the public interest. SBA is publishing the rule as a final rule at this time, and is not providing an opportunity for public comment, in reliance on section 553(a)(2) of the Administrative Procedure Act ("APA"), 5 U.S.C. 553(a)(2) which provides that matters relating to loans, contracts and benefits are exempted from the public participation provisions of the Act. See also § 101.9 of SBA regulations, 13 CFR 101.9. In view of the APA exemption, no regulatory flexibility analysis is required by Pub. L. 96-354, 5 U.S.C. 603 and 604.

Finally, in accordance with section 6(a)(1) of Executive Order 12291, we are presently preparing and will transmit to the Director of the Office of Management and Budget as soon as practicable, a Regulatory Impact Analysis for these amendments.

Accordingly, and pursuant to the authority of section 5(b)(6) of the Small Business Act, as amended, 15 U.S.C. 634(b)(5), Part 123, Chapter I of Title 13 of the Code of Federal Regulations is amended as follows:

1. Section 123.1(a)(2) is revised to read as follows:

§ 123.1 General.

(a) *Disaster loan authority.* * * *

(2) Minimum damage requirements generally required for a declaration. A physical disaster declaration by the Administrator of SBA is based solely on physical property damage to items such as buildings, machinery, equipment, inventory, homes and the like of such an extent as to warrant such a declaration. The Administrator of SBA has no legal authority to make any physical disaster declaration based solely on the fact that economic injury has been incurred. The minimum amount of damage that SBA usually requires before making a physical disaster declaration is (i) At least 25 homes or 25 businesses, or a combination of at least 25 homes and businesses, in any county or other political subdivision that have sustained uninsured losses of at least forty (40) percent or more of their estimated fair replacement value. (Note: a business activity being conducted over several contiguous parcels of property, such as all growing crops in contiguous fields, is considered a single operation) or (ii) At least three businesses have sustained uninsured losses of at least forty (40) percent or more of their estimated fair replacement value and, as a result, 25 percent of the work force in the community would be unemployed for at least 90 days as a direct result of the physical damage.

* * * * *

§ 123.3 [Amended]

2. Section 123.3(a)(1) is revised to read as follows:

(a) *Physical-loss disaster assistance.* (1) The purpose of these loans is to restore a victim's home or homes (including a mobile home used as a residence of the applicant) or business property as nearly as possible to predisaster condition. Such business loans shall be made to the extent that the required financial assistance is not otherwise available from private sources, see § 120.2(a)(2) of this Chapter. A loan to an individual may be used to repair or replace damaged or lost furniture and other household belongings or personal effects, except for irreplaceable or extraordinarily expensive items. Funds may be used to repair or replace destroyed or damaged inventory, machinery, or equipment. If the disaster victim elects to construct a new home or new business facilities on a different site, the loan may be used for such purpose. However, any such loan shall not exceed the estimated cost of restoring or replacing the damaged or destroyed property. SBA's lien position shall be at least as strong as it would have been if the victim had restored in the original location; and loans to relocate a 1 to 4 family residential structure will be subject to the Real Estate Settlement Procedures Act of 1974.

3. Section 123.3(a)(2)(i) is revised to read:

(a) *Physical—less disaster assistance.* * * *

(2) *Refinancing.* * * *

(i) the property suffered uninsured damage of 30 percent or more of the market value at the time of the disaster, and * * *.

4. Section 123.3(b) is revised to read as follows:

* * * * *

(b) *Substantial economic injury assistance.* The purpose of these loans is solely to provide relief to small business concerns for substantial economic injury sustained as a result of a major or natural disaster declared by the President or Secretary of Agriculture, or SBA declared physical disaster. Personal and/or business resources must be used by the applicant to the greatest extent feasible to alleviate the injury incurred, see § 120.2(a)(2) of this Chapter. Loans may be used for working capital and to pay financial obligations which the borrower would have been able to pay had it not been for the loss of revenue resulting from the disaster. Unrealized net profits or a drop in sales not disaster-related may not be considered in arriving at the amount of injury incurred. No funds may be authorized which would provide for the payment of any dividends, distributions, bonuses, or for disbursements to owners, partners, officers, or stockholders not directly related to the performance of services.

5. Section 123.3(m)(2) is revised to read as follows:

* * * * *

(m) *Economic dislocation loan assistance.* * * *

(2) Refinancing of existing debt is permissible if such refinancing does not reduce the exposure of any other lender. Thus, refinancing is limited to debts owed to commercial lenders as defined in § 123.1(c)(2) who will participate with SBA in a guaranteed or immediate participation loan at least retaining their prior exposure, but in no event less than 10 percent.

§ 123.5 [Amended]

6. Section 123.5(a) is revised to read as follows:

(a) Physical disaster loans to businesses shall not exceed sixty (60) percent of the actual physical loss resulting from the disaster [except as permitted by §§ 123.3(a)(2) and 123.3(h)] and shall not [except for those described in § 123.3(h)] exceed $500,000 for SBA's share in the aggregate for any one disaster. Economic injury disaster loans [described in § 123.3(b)] shall not exceed the amount of economic injury and are subject to a maximum of $100,000. Economic injury loans under § 123.3 (c) through (l) are not subject to the $100,000 maximum.

* * * * *

7. Section 123.5(a)(1) is removed.

8. Section 123.5(a) (2) through (5) are hereby renumbered § 123.5(a) (1) through (4).

(Catalog of Federal Domestic Assistance Programs Nos. 59.002 (Economic Injury Disaster Loans) and 59.008 (Physical Disaster Loans))

Dated: March 19, 1981.

Roger H. Jones,

Acting Administrator.

BILLING CODE 8025-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 15, 16, 17, 18 and 21

Reporting Open Positions, Deliveries and Exchanges of Futures for Physicals

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is amending Parts 15–18 and 21 of its regulations pertaining to reporting requirements for contract markets, futures commission merchants (FCMs), foreign brokers and large traders. The amendments to Part 17 will require FCMs and foreign brokers to report the number of exchanges of futures for physicals (EFPs) and delivery notices issued or stopped against open futures positions in accounts which are being reported to the Commission. These amendments will allow the Commission to obtain more complete and timely surveillance information concerning EFPs and deliveries.

The Commission is also effecting amendments to its reporting and publication requirements which will enable the Commission to obtain open interest data from all contract markets and futures position data from all FCMs, foreign brokers and large traders which are determined exclusive of delivery notices issued or received. This action should simplify both bookkeeping procedures for FCMs and clearing members and those procedures which the Commission utilizes in its market surveillance program.

EFFECTIVE DATE: May 15, 1981.

FOR FURTHER INFORMATION CONTACT: Lamont L. Reese, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, Telephone (202) 254–3310.

SUPPLEMENTARY INFORMATION: On August 27, 1980, the Commission published for public comment[1] the following proposed amendments to its reporting requirements:

1. Amendments to Part 17 of the Commission's regulations to require FCMs and foreign brokers to report the number of EFPs and the number of delivery notices issued and stopped for individual accounts which are reported to the Commission; and

2. Amendments to Parts 15–18 and 21 of the Commission's regulations which would require contract markets, large traders, FCMs and foreign brokers to report open interest and open positions exclusive of futures contracts against which delivery notices have been issued or stopped.

In addition to these specific proposals, the Commission also sought public comment on issues concerning the practice of allowing traders to hold contracts representing long and short positions in the same future of the same commodity, whether such positions should be included in published open figures and the extent to which such practices have caused problems.[2]

FCM and Foreign Broker Reporting of EFP and Delivery Information

The Commission routinely obtains EFP and delivery information from individual traders on the series '03 report. However, as the Commission previously noted, the information concerning deliveries reported by traders who are not located in a city in which the Commission maintains an office, is generally not received in sufficient time to permit the Commission to adjust its surveillance to a fluid and fast changing market situation.[3] In addition, under Commission Rule 18.07,[4] traders located outside of the United States are not required to routinely file series '03 reports for any commodity regulated under the Act but not specifically set forth in Section 2(a) of the Commodity Exchange Act prior to the enactment of the Commodity Futures Trading Commission Act of 1974.

Thus, because '03 reports are neither timely nor complete, it has been necessary for Commission staff to contact FCMs on a routine basis in order to determine whether certain accounts have issued or stopped delivery notices or exchanged futures for physicals. Since it is at best difficult and time consuming to attempt to gain an accurate picture of the liquidation of a maturing future in this manner, the Commission proposed to make the filing of EFP and delivery information a routine requirement for FCMs and foreign brokers. In addition, the Commission noted that this requirement would be necessary if in the future it determined to eliminate the routine filing of series '03 reports by large traders.[5]

No FCMs commented on this proposed rule. Other commentators stated that they perceived no advantage to the adoption of such a requirement, since the Commission currently receives daily information on EFPs and deliveries by clearing member FCMs from each contract market. These commentators suggested that the Commission obtain

---

[1] 45 FR 57141.

[2] In the August 27, 1980, Federal Register release, the Commission also published a proposal which would have required exchanges to collect and process large trader information similar to that which the Commission obtains from FCMs and foreign brokers. The Commission is continuing its consideration of that part of its proposal.

[3] Under Rule 18.03, 17 CFR § 18.03 (1980), if a reporting trader is located in a city in which the Commission maintains an office, reports must be filed with such office on the business day following the day covered by the report. If the reporting trader is located elsewhere, reports are transmitted by mail, postmarked not later than midnight of the day covered by the report. Depending upon the speed of the postal service, this information is received by the Commission from a substantial number of traders three or four days after the trading day for which the report is filed. See 45 FR 57143 (August 27, 1980).

[4] 17 CFR § 18.07 (1980).

[5] See 45 FR 57143–44 (August 27, 1980).

information as necessary on individual traders by directly contacting FCMs.

The Commission disagrees with these comments. Those methods recommended by commentators for obtaining EFP and delivery information correspond generally to the manner in which the Commission presently obtains information. As noted above, this method is lacking in several respects. Moreover, since adoption of this rule amendment may in the future allow the Commission to reduce the reporting burden on the trading public by eliminating the routine filing of series '03 reports, the Commission has determined to adopt its amendments as proposed.

Positions Against Which Delivery Notices Have Been Issued or Stopped

Practices of contract markets, FCMs and traders in determining open interest vary according to whether a position against which delivery notices which have been issued by the clearing organization of a contract market or stopped by traders are open or closed for reporting purposes. Varying practices in this regard are due to the fact that contract markets, FCMs and foreign brokers which were regulated by the Commission's predecessor agency, the Commodity Exchange Authority (CEA), prior to the enactment of the Commodity Futures Trading Act of 1974[6] were instructed to consider futures positions open until delivery occurred. Contract markets which came under regulation after enactment of the Commodity Futures Trading Commission Act of 1974, however, generally report and publish open interest figures net of delivery notices issued. Several exchanges had requested that the Commission reconsider CEA's views on this issue.

The Commission has carefully considered this matter and determined that the present disparity in reporting practices has resulted in unwarranted costs for FCMs. For example, several FCMs have commented that the existing reporting requirements have forced them to keep two sets of books—one for clearing organization procedures, another for Commission reporting purposes. Lack of consistency among clearing organizations has further complicated the task of bookkeeping for those FCMs which are members of different exchanges. Further, certain reporting traders who commented expressed the view that it was burdensome to report positions against which delivery notices have been issued or stopped, particularly since, in certain commodities, as many as 75 days may transpire between the time a notice is issued and delivery occurs.[7]

The Commission has determined it desirable that open interest and open position information be determined in the same manner. This approach would eliminate the Commission's current practice of manually adjusting data before it is published or used for market surveillance purposes. Further, the Commission has noted its need for timely data.[8] In this respect, if persons who are required to report do not reduce positions until delivery day, the reporting of important surveillance information is delayed.

In order to ameliorate the above problems, the Commission proposed amendments to its reporting requirements which would standardize the manner in which open interest and open positions are determined with respect to delivery notices issued and stopped. In particular it proposed that for reporting purposes, open interest and open positions be reduced when a delivery notice is issued by the clearinghouse of a contract market or stopped by a trader.[9]

Although no commentators opposed the proposals to standardize the manner in which open interest and open positions are determined, several commentators noted that standardization should not be an end in itself. One commentator suggested that requirements and circumstances peculiar to various markets may dictate the adoption of divergent procedures. Other commentators, however, noted the benefits of such standardized procedures with respect to the bookkeeping procedures for FCMs and clearing members. The Commission has determined that considerable benefits may accrue from standardization of the manner in which open interest is determined not only by end users of the data, such as the Commission, but also by those who initially provide the data to the exchanges, namely their members. Accordingly, the Commission is adopting its amendments to the reporting requirements as proposed.

Traders Long and Short the Same Future of a Commodity

The Commission has also requested comment on the practice of traders holding long and short open futures positions in the same future of a commodity. The Commission noted that this practice has resulted in overstatements of published open interest figures and questioned whether this practice served any purpose. The Commission requested comment concerning any problems which may have resulted from this practice.[10]

No comments were received that would indicate problems were posed by current practices in this area. In addition, commentators offered several examples of potential benefits which could result from this practice. Accordingly, the Commission has determined it will take no further action concerning this question until such time as problems are identified that would warrant reconsideration of the issue.

The Commission has determined that the provisions of the Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164 *et seq.*, do not apply to this rulemaking proceeding. See Section 4 of the Regulatory Flexibility Act, 94 Stat. 1170.

In consideration of the foregoing and pursuant to its authority under Section 4g, 4i, 5(d), and 8a(5) of the Commodity Exchange Act, 7 U.S.C., §§ 6g, 6i, 7(d) and 12a(5) (1978), the Commission hereby amends Parts 15, 16, 17, 18 and 21, of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 15—REPORTS—GENERAL PROVISIONS

1. Section 15.00 is amended by revising paragraph (b) as follows:

§ 15.00 Definition of terms used in Parts 15 to 21 of this chapter.

* * * * *

(b) "Reportable position" means:

(1) Any open contract position in any one future of any commodity on any one contract market, excluding positions against which notices of delivery have been stopped by a trader or issued by the clearing organization of a contract market, which at the close of the market on any business day, equals or exceeds the quantity specified below for reporting purposes for the particular commodity:

(i) For the purposes of reports required by Part 17 and § 18.04, the quantity specified in § 15.03(a).

(ii) For the purposes of reports required by § 18.00, the quantities specified in § 15.03(c).

(2) For the purposes of reports required by Part 19 any open contract position in any one future or all futures combined, either gross long or gross short, of any commodity on any one contract market, excluding positions against which notices of delivery have been stopped by a trader or issued by the clearing organization of a contract

market which, at the close of the market on the last business day of the week, equals or exceeds the quantity fixed in § 15.03(b) for reporting purposes for the particular commodity.

* * * * *

PART 16—REPORTS BY CONTRACT MARKETS

2. Section 16.00 is amended by revising paragraphs (a) and (e) as follows:

§ 16.00 Information to be furnished by contract markets.

* * * * *

(a) The total of all long open contracts and the total of all short open contracts carried at the end of the day covered by the report, excluding the number of contracts against which delivery notices have been stopped or against which delivery notices have been issued by the clearing organization of the contract market.

* * * * *

(e) The quantity of the commodity for which delivery notices have been issued by the clearing organization of the contract market and the quantity for which notices have been stopped during the day covered by the report.

3. Section 16.02 is amended by revising paragraphs (c) and (d) as follows:

§ 16.02 Publication of volume of trading and open contracts.

* * * * *

(c) The total gross open contracts excluding contracts against which delivery notices have been stopped.

(d) Open contracts against which delivery notices have been stopped on the day for which publication is made.

* * * * *

PART 17—REPORTS BY FUTURES COMMISSION MERCHANTS AND FOREIGN BROKERS

4. Section 17.00 is amended by revising paragraph (a) in its entirety as follows:

§ 17.00 Information to be furnished by futures commission merchants and foreign brokers.

(a) Special Accounts—Reportable Positions and Delivery Notices. (1) Each futures commission merchant and each foreign broker, except a foreign broker who carries all accounts on a fully disclosed basis with a registered futures commission merchant, shall submit a report to the Commission for each business day with respect to all Special Accounts, including house accounts, carried by futures commission merchant or foreign broker. Such report shall be made on the appropriate series '01 form and shall show each reportable position, separately for each contract market and for each future, in such account as of the close of the market on the day covered by the report. In addition, for each Special Account, for the day covered by the report, a futures commission merchant or foreign broker shall show, separately for each contract market and for each future in the commodity for which a report is filed, the quantity of exchanges of futures for physicals and the number of delivery notices issued for the account by the clearing organization of a contract market and the number stopped by the account.

(2) A report covering the first day upon which a Special Account shows a reportable position in a particular future shall also show for the preceding business day:

(i) The position in such future account;

(ii) Exchanges of futures for physicals for the account;

(iii) Delivery notices for such future issued for the account by the clearing organization of the contract market on which delivery will occur; and

(iv) Delivery notices for such future stopped by the account.

(3) A report showing the information specified in paragraphs (a)(2)(i)–(iv) of this section shall also be filed covering the first day when any account theretofore in Special Account status is no longer in such status.

* * * * *

PART 18—REPORTS BY TRADERS

5. Section 18.00 is amended by revising the introductory text, and paragraphs (a) and (c) as follows:

§ 18.00 Information to be furnished by traders.

Every trader who holds or controls a reportable position shall submit reports to the Commission. A report shall be filed for the first day on which such trader acquires a reportable position, for each day thereafter on which he has transactions in any future of each commodity on any contract market and for the first day on which he no longer holds or controls a reportable position. In addition, a report shall be filed for the day on which delivery notices are issued by the clearing organization of a contract market against short futures positions of the trader in the commodity in which the trader is reportable and for the day on which the trader stops delivery notices against long futures positions in such commodity. Each such report shall be prepared on the appropriate series '03 form, on a separate sheet for each commodity, and shall show for the day covered by the report the following information, separately for each future and for each contract market:

(a) *Open contracts.* The quantity of all open contracts, regardless of size (except those contracts against which delivery notices have been stopped or against which delivery notices have been issued by the clearing organization of the contract market upon which delivery will occur), in each future of such commodity on all contract markets, broken down to show the quantity classified as hedging (as defined in § 1.3(z)) and the quantity classified as speculative (including spreading or straddling.

* * * * *

(c) Delivery notices issued and stopped. The quantity of the commodity against which notices of delivery have been issued by the clearing organization of the contract market on which delivery will occur and the quantity against which notices have been stopped by the trader.

* * * * *

6. Section 18.00 is further amended by removing paragraph)h)(2)(v), and by redesignating paragraph (h)(2)(vi) and paragraph (h)(2)(vii) as paragraphs (h)(2)(v) and (h)(2)(vi) respectively.

* * * * *

PART 21—SPECIAL CALLS FOR INFORMATION FROM FUTURES COMMISSION MERCHANTS, FOREIGN BROKERS AND MEMBERS OF CONTRACT MARKETS

7. Section 21.02 is amended by revising paragraph (b) as follows:

§ 21.02 Special calls for information on open contracts in accounts carried by futures commission merchants, members of contract markets and foreign brokers.

* * * * *

(b) The open contracts held or controlled by such traders in each future excluding contracts against which delivery notices have been stopped or against which delivery notices have been issued by the clearing organization of the contract market upon which delivery will occur.

* * * * *

Issued by the Commission on March 19, 1981.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 230 and 239

[Release No. 33-6301]

Adoption of Notice-of-Sales Forms for Transactions Pursuant to Section 4(6) and Rule 242

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of amendments to notice-of-sales forms.

SUMMARY: The Commission is adopting in final form a notice-of-sales form to be used by issuers that sell their securities in reliance upon new Section 4(6) of the Securities Act of 1933. Section 4(6) provides an exemption from registration under the Securities Act of 1933 for offers and sales of securities by any issuer solely to one or more "accredited investors" if the aggregate offering price does not exceed the amount allowed under Section 3(b) of that Act. The exemption requires the issuer to file a notice of such sales with the Commission on such forms as the Commission shall prescribe. This form is adopted today in response to the legislative amendments included in the Small Business Investment Incentive Act of 1980. The Commission, in addition, is adopting technical conforming amendments to Form 242 to reflect similar amendments to Form 4(6), and a technical conforming amendment to the instructions in Rule 242 regarding the use of Form 242.

EFFECTIVE DATE: April 24, 1981.

ADDRESS: Copies of revised Form 4(6) and Form 242 will be available from each of the Commission's Regional Offices and the headquarters office, 500 North Capitol Street, Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Suzanne Brannan, (202) 272-2644, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced that it is adopting in final form Form 4(6) [17 CFR 239.246], a notice-of-sales form to be used by issuers that sell their securities in reliance upon Section 4(6)[1] of the Securities Act of 1933 (the "Securities Act") [15 U.S.C. 77a et seq.]. Section 4(6) was included in the Securities Act pursuant to the recently enacted Small Business Investment Incentive Act of 1980 (the "1980 Act") [Pub. L. No. 96-477 (October 21, 1980)]. It provides an exemption from the registration provisions of the Securities Act for transactions involving offers and sales of securities by an issuer solely to one or more "accredited investors"[2] if the aggregate price does not exceed the amount allowed under Section 3(b) of the Securities Act.[3] No advertising or public solicitation is permitted in connection with such transactions, and the issuer is required to file a notice of such sales with the Commission on such forms as the Commission shall prescribe.

In order to permit issuers immediately to utilize Section 4(6), the Commission adopted Form 4(6), effective November 14, 1980, on an interim basis, and sought public comment with respect to the form and content of a final notice.[4]

Discussion

The primary purpose of the Form 4(6) notice requirement is to elicit information which the Commission expects will be necessary in addressing the effectiveness of the exemption as a capital-raising device for small business in a manner that is consistent with the public interest and the protection of investors.[5] Form 4(6) is designed to enable an issuer to respond to most questions by simply checking boxes or by filling in blanks. In response to its request for comment on interim Form 4(6) the Commission received one comment letter. Based partly on this commentary and primarily on its further review of Form 4(6), the Commission has determined to make the following technical amendments to the Form which are designed to result in a simpler, more understandable form for the user: (1) former Part C, Brief Narrative Information About the Issuer, has been combined with Part A, Basic Identification of Issuer; (2) the ranges provided for answering statistical information about the issuer in Part B have been revised; (3) former item B.6. regarding the number of shares held by non-affiliated shareholders has been deleted and a new item calling for the percentage of shares outstanding held by non-affiliated persons and an instruction defining "non-affiliated person" included; (4) former item B.9. regarding part-time employees has been deleted, and item B.8 has been revised to call for the number of full-time equivalent employees, and a definition of the term "full-time equivalent employees" has been included; and (5) item C.4. in Form 4(6), and item C.5. in Form 242, will contain spaces to subtract expenses in connection with the issuance from the aggregate offering price to arrive at the figure for adjusted gross proceeds.

Amendments to Form 242

Rule 242 [17 CFR 230.242] promulgated under Section 3(b) of the Securities Act, provides an exemption from registration for sales of securities by domestic or Canadian corporate issuers to an unlimited number of accredited persons as defined in the rule, and to 35 non-accredited persons. Form 4(6) is substantially similar to Form 242, the notice-of-sales form required by issuers for securities issued pursuant to Rule 242, except certain information that would be inapplicable to Section 4(6) offering has been deleted. In view of the substantial similarity in purpose and content of Form 4(6) and 242, the Commission has determined that

---

[1] Section 4 of the Securities Act of 1933 ("Securities Act") provides, in pertinent part, that the provisions of Section 5 shall not apply to:

(6) transactions involving offers or sales by an issuer solely to one or more accredited investors, if the aggregate offering price of an issue of securities offered in reliance on this paragraph does not exceed the amount allowed under Section 3(b) of this title, if there is no advertising or public solicitation in connection with the transaction by the issuer or anyone acting on the issuer's behalf, and if the issuer files such notice with the Commission as the Commission shall prescribe.

[2] New Section 2(15) of the Securities Act provides:

(15) the term "accredited investor" shall mean—

(i) a bank as defined in section 3(a)(21) of the Act whether acting in its individual or fiduciary capacity; an insurance company as defined in section 2(13) of the Act; an investment company registered under the Investment Company Act of 1940 or a business development company as defined in section 2(a)(48) of that Act; a Small Business Investment Company licensed by the Small Business Administration; or an employee benefit plan, including an individual retirement account which is subject to the provisions of the Employee Retirement Income Securities Act of 1974, if the investment decision is made by a plan fiduciary, as defined in section 3(21) of such Act, which is either a bank, insurance company, or registered investment adviser; or

(ii) any person who, on the basis of such factors as financial sophistication, net worth, knowledge, and experience in financial matters, or amount of assets under management qualifies as an accredited investor under rules and regulations which the Commission shall prescribe.

[3] As amended by Section 301 of the 1980 Act, the ceiling amount of Section 3(b) is $5,000,000.

[4] *See* Securities Act Release No. 6256 (November 7, 1980) [45 FR 75182] ("Interim Form Release").

[5] In its report on S. 2960, which proposed Section 4(6) as finally adopted by the House, the Senate Committee on Banking, Housing and Urban Affairs stated that it "anticipates that the Commission will monitor the effectiveness of the exemption to evaluate whether it is consistent with the underlying objectives of the federal securities laws to protect the integrity of the securities markets and fosters investor confidence in the capital formation process." S. Rep. No. 958, 96th Cong., 2d Sess., at 45 [1980].

technical amendments similar to those being made to Form 4(6) should be made in Form 242.

Amendment to Rule 242

Paragraph (h) of Rule 242 provides instructions regarding the filing and updating of Form 242. In view of the reformatting of certain items in Form 242 as described above, the Commission is adopting a technical amendment to Rule 242(h)(3) to reflect the appropriate items of Form 242 as revised.

Procedural Matters

In view of the substantial similarity in purpose and content of Forms 242 and 4(6), and in view of the technical and clarifying nature of the amendments, the Commission believes it is appropriate to adopt Form 4(6) in final form and the amendments to Form 242 and Rule 242. Accordingly, the Commission pursuant to Section 553(b) of the Administrative Procedure Act [5 U.S.C. 553(b)] for good cause finds that prior notice and comment is impracticable, unnecessary, and contrary to the public interest.

Regulatory Flexibility Act Considerations

The Commission believes that the requirement for a regulatory flexibility analysis pursuant to the Regulatory Flexibility Act [5 U.S.C. 604(b)] is inapplicable because Form 4(6) was adopted prior to the effective date of that act, and because the amendments to Form 4(6), Form 242, and Rule 242 are considered technical and are not being published for notice and comment pursuant to the Administrative Procedure Act.

Text of Amendments

Part 239 of Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

1. By adding § 239.246, to read as follows:

§ 239.246 Form 4(6), notice-of-sales of securities pursuant to section 4(6) of the Securities Act of 1933.

(a) Five copies of a notice on this form shall be filed with the Commission:

(1) No later than 10 days after the first sale of securities in any issue is made in reliance on section 4(6) of the Securities Act of 1933.

(2) No later than 10 days after the completion date of the offering of such issue: *Provided, however,* that only one notice need be filed if the offering of the issue is completed within the 10-day period described in paragraph (a)(1) of this section and this form is filed not later than at the conclusion of that period but subsequent to the completion of the offering of the issue; and

(3) Every six months after the first sale of securities in the issue made in reliance on section 4(6) unless the final notice required by paragraph (a)(2) of this section has been filed.

(b) If more than one notice is required to be filed as to any issue of securities offered in reliance on section 4(6), notices other than the original notice need only report the issuer's name and the information in response to Part C and any material changes in Parts A and B from the facts previously reported.

(c) A notice on this form shall be deemed to be filed with the Commission:

(1) As of the date on which it is received at the Commission's principal office in Washington, D.C., or

(2) If the notice is delivered to the Commission after the date on which it is required to be filed, as of the date on which the notice is mailed by means of United States registered or certified mail to the Commission's Office of Small Business Policy, Division of Corporation Finance, at the Commission's principal office in Washington, D.C.

2. By revising § 239.242(b) as follows:

§ 239.242 Form 242, notice of sales of securities pursuant to § 230.242 of this chapter.

* * * * *

(b) If more than one notice is required to be filed pursuant to paragraph (h)(1) of the rule as to any issue of securities offered in reliance thereon, notices other than the original notice need only report the information in response to Part C and any material changes in Part A and B from the facts previously reported.

* * * * *

Part 230 of Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

3. By revising paragraph (h)(3) of § 230.242 to read as follows:

§ 230.242 Exemption of limited offers and sales by qualified issuers.

* * * * *

(h) * * *

(3) If more than one notice is required to be filed pursuant to paragraph (h)(1) of this rule as to any issue of securities offered in reliance thereon, notices other than the original notice need only report the information required by Part C and any material change in the facts from those set forth in Parts A and B of the original notice.

* * * * *

Effective Date

Adopted Form 4(6) and amended Form 242 are effective April 24, 1981.

Authority

The Commission hereby adopts Form 4(6) pursuant to Sections 4(6) and 19(a) of the Securities Act of 1933 [Sec. 19(a), 48 Stat. 85; Sec. 209, 48 Stat. 908; Sec. 308(a), (2), 90 Stat. 57; 15 U.S.C. 77s(a)] and amends Form 242 pursuant to Sections 3(b) and 19(a) of the Securities Act of 1933. [Secs. 3(b), 19(a), 48 Stat. 75, 85; Sec. 209, 48 Stat. 908; 59 Stat. 167; 84 Stat. 1480; Sec. 308(a) (1), (2), (3), 90 Stat. 56, 57; Sec. 18, 92 Stat. 275; sec. 2, 92 Stat. 962; 15 U.S.C. 77c(b), 77s(a)]

By the Commission.

George A. Fitzsimmons,
Secretary.

March 19, 1981.

17 CFR Part 250

[Release No. 35-21986; File No. S7-862]

Allocation of Consolidated Income Tax Liability by Registered Holding Companies and Their Subsidiaries

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting an amendment to Rule 45 under the Public Utility Holding Company Act of 1935 ("Act") pertaining to the methods by which registered holding companies and their subsidiaries may allocate consolidated income taxes. The amendment replaces subsection (b)(6) of Rule 45 adopted in 1955 with subsection (c), dealing with the same subject. Both are exceptions from the requirements of Rule 45(a). The amendment recognizes intervening changes in tax laws which have tended to restrict the use of the subsection (b)(6).

EFFECTIVE DATE: March 25, 1981. The amendment applies to all tax returns due after September 30, 1981, and all tax years ending on or after that date. It may be applied to the tax return for the preceding tax year, if such return has not been filed before its adoption.

FOR FURTHER INFORMATION CONTACT: Grant G. Guthrie, Associate Director (202) 523-5156, or James E. Lurie, Special Counsel (202) 523-5083, Division of Corporate Regulation, Securities and

Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The proposed amendment to Rule 45 was published for comment by release dated October 20, 1980 (HCAR No. 21767) (45 FR 73808, November 5, 1980). The history of Rule 45(b)(6) and its predecessors was sufficiently described therein. Changes in the kind and significance of available tax benefits and in methods of allocation recognized under the tax laws have made the 1955 rule inadequate. The registered systems have found it necessary to rely increasingly on a case-by-case series of applications for relief by order under Rule 45(a). Rule 45(c) reenacts the Commission's original purpose of regulating this whole subject by a general rule.

Comments on the proposed rule were received from seven registered holding company systems, two major accounting firms and one large nonutility system. All urged adoption of the rule. Several comments offered suggestions for clarification of the text, which are reflected in the final rule. None of the changes have substantive significance.

Rule 45(c) does not specify kinds of tax benefits. These change as tax laws and regulations are revised. An important function of the tax agreement, required by the rule, is to identify currently the material elements of allocation in terms of the applicable tax law. The rule specifies the amount to be allocated, that is, the difference between the consolidated return and separate return results, and establishes the principle of allocating to the individual members of the group the material effects of any particular features of the tax law applicable to them. The rule extends to all aspects of allocating consolidated return benefits. The Commission agrees with those comments which stressed the need for broad and comprehensive application.

The introductory paragraph of the rule has been revised to clarify two ambiguities. It was drawn, like its predecessor, with the Federal Internal Revenue Code in mind. Parts of some systems are also eligible to file consolidated returns under comparable state laws. The rule explicitly includes such returns also. If there are special needs with respect to state returns, suggestions for dealing with them by interpretation will be considered.

The requirement that tax agreements cover full tax years was not intended to exclude associate companies added or disposed of during a year. The text has been recast to eliminate any contrary implications and a sentence has been added to the definition of corporate taxable income to specify the treatment of partial years.

The definition of "consolidated tax" has been clarified. If the consolidated tax is negative, it would represent a refund. The "adjustments thereto thereafter determined" are adjustments to the tax shown on the return, i.e., the liability to the taxing authority. Such liability changes only by a revision of the tax, whether by an amendment of the return, a settlement or a final decision in any litigation. The procedure for dealing with such changes, and particularly with negotiated adjustments which may not involve an item-by-item modification of the return, is one of the subjects for which the tax agreement should provide.

The definition of "corporate taxable income" has been revised to make it unequivocal that the items eliminated in consolidation refer to the consolidation in the tax return under tax standards rather than to possibly inconsistent generally accepted accounting principles. The provisions for adjustment for other year carryover rights have been transferred from the definition of separate return tax to the definition of corporate taxable income, from which the separate return tax is calculated. This assures that these adjustments will be reflected in either allocation method.

The definitions of "separate return tax" and "corporate tax credit" have been rewritten to eliminate the terms "hypothetical" and "inconsistent" which might be misunderstood. The rule states the hypothesis of nonconsolidation to which these terms referred.

The first sentence of subsection (3) has been amended to correct an unintended omission by adding "(2)(ii)." The elimination of intercompany transactions would affect the allocation under the (2)(ii) method in essentially the same way as it affects a (2)(i) method allocation. In the first sentence of subsection (4), "subsidiary companies" has been changed to "associate companies." As stated in the release on the proposed rule, the holding company will not normally have a positive corporate taxable income, since intercompany dividends, its principal resource, are excluded.

Several comments also noted a failure to deal with the possibility that the tax saving in a year, including consolidated carrybacks, might not exhaust the deductions accrued in that year, so that only a partial cash reimbursement could be made. Subsection (5) has been enlarged to deal with that contingency. For reasons already stated, the rule does not prescribe the priorities to be accorded to various kinds of benefits. Such specifics depend on the tax laws then effective and should be dealt with in the tax agreement.

The final sentence of draft subparagraph (5), dealing with accounting for corporate tax credits, has been deleted.[1] The purpose of the deleted sentence was to identify the applicable principles, a purpose more appropriate for comment than in the text of the rule.

No provision was made in the proposal for amending the tax agreement. This was not an oversight. The proposal stressed the necessity of a current, reasonable and unequivocal annual determination of each member company's tax. The filing of a return on an agreed basis commits each of the associate companies to the procedures adopted, and their planning and reporting during the tax year may be affected by the terms of the agreement.

Unexpected events, including changes in the tax laws, may require modification of the agreement during its operation, as may some kinds of adjustments by the taxing authority after the return is filed. But amendments with retroactive effect cannot be treated as routine filings.[2] The effect of the rule, as proposed, would have been to require a declaration under Rule 45(a) for amendments. The adopted rule permits amendment, subject to Commission approval if the Commission directs within 60 days of the filing that the amendment be deemed a declaration under Rule 45(a). It thus eliminates formal procedures under Rule 23 if the amendment is of a character which does not need further examination.

All of the registered systems use a calendar year, except for one which uses a fiscal year ending September 30. Tax returns are filed the following year. The rule does not change the principles of present regulation. It will be effective for all tax years, including the current year, ending after its adoption. Registered systems may elect to apply it to returns for 1980, filed after its adoption, or to rely on Rule 45(b)(6) and applicable orders.

---

[1] The deleted sentence read: "Such payments for tax benefits contributed to the consolidated return shall be accounted for in the same manner as tax refunds, provided that any such payment received by a subsidiary company which is not a public utility company shall be applied to reduce the costs incurred by such company for purposes of determining the costs of goods or services supplied by such company to associate companies under section 13(b) of the Act in the manner prescribed by the Commission by rule or order under that section."

[2] *Standard Gas & Electric Company*, 37 SEC 532, 542-550 (1957).

None of the outstanding orders under Rule 45(a) on this subject are inconsistent with Rule 45(c). To the extent they are more detailed, they incorporate matter which will be dealt with by the tax agreement under the new rule. The initial tax agreement will recognize carryover and other rights, if any, which have accrued under past regulation. If an amendment of existing orders is considered necessary for the orderly implementation of Rule 45(c), it should be applied for. The rule will not affect any prior or future orders under section 13 of the Act, relating to the accounting for tax benefits of service companies.

Statutory Basis and Text of the Rules

The Securities and Exchange Commission hereby amends Title 17, Chapter II of the Code of Federal Regulations, pursuant to its authority under the Public Utility Holding Company Act of 1935 [15 U.S.C. 79(a) *et seq.* and particularly sections 12(b), 12(f) and 20(a) thereof [15 U.S.C. § 79/(b), 79/(f) and 79t(a)]] by removing paragraph (b)(6) of § 250.45 and adding a new paragraph (c) thereto to read as set forth below. This action is effective immediately pursuant to the Administrative Procedure Act [5 U.S.C. § 553(d)(1)].

PART 250—GENERAL RULES AND REGULATIONS, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

§ 250.45 Loans, extensions of credit, donations and capital contributions to associate companies.

* * * * *

(b) * * *

(6) [Removed]

(c) A declaration under paragraph (a) of this section shall not be required for the filing of a consolidated tax return by the eligible associate companies in a registered holding company system, or the execution or performance of the agreement referred to herein, if such consolidated tax return is filed pursuant to a tax agreement, in writing, relating to either federal or state taxes, for a term of one or more tax years among the associate companies included in the consolidated return, and the agreement provides for allocation among such associate companies of the liabilities and benefits arising from such consolidated tax return for each tax year in a manner not inconsistent with the following conditions:

(1) Definitions:

"Consolidated tax" is the aggregate tax liability for a tax year, being the tax shown on the consolidated return and any adjustments thereto thereafter determined. The consolidated tax will be the refund if the consolidated return shows a negative tax.

"Corporate tax credit" is a negative separate return tax of an associate company for a tax year, equal to the amount by which the consolidated tax is reduced by including a net corporate taxable loss or other net tax benefit of such associate company in the consolidated tax return.

"Corporate taxable income" is the income or loss of an associate company for a tax year, computed as though such company had filed a separate return on the same basis as used in the consolidated return, except that dividend income from associate companies shall be disregarded, and other intercompany transactions eliminated in the consolidated return shall be given appropriate effect. It shall be further adjusted to allow for applicable rights accrued to the associate company under paragraphs (c)(4) and (5) of this section or under prior rules or orders, on the basis of other tax years, but carryovers or carrybacks shall not be taken into account if the associate company has been paid a corporate tax credit therefor. If an associate company is a member of the registered system's consolidated tax group for only part of a tax year, that period will be deemed to be its tax year for all purposes under paragraph (c) of this section.

"Separate return tax" is the tax on the corporate taxable income of an associate company computed as though such company were not a member of a consolidated group.

(2) The consolidated tax shall be apportioned among the several members of the group in proportion to (i) the corporate taxable income of each such member, or (ii) the separate return tax of each such member, but the tax apportioned to any subsidiary shall not exceed the separate return tax of such subsidiary.

(3) The tax agreement shall provide for appropriate and equitable adjustment of the allocation specified under paragraph (c)(2)(i) or (2)(ii) of this section if the sum of the corporate taxable incomes or separate return taxes of all members of the group in any taxable year differs from the consolidated taxable income or tax because of intercompany transactions excluded from the consolidated return. It shall provide for appropriate and equitable adjustment of the allocation specified under paragraph (c)(2)(ii) to the extent that the consolidated tax and separate return tax for any year include material items taxed at different rates or involving other special benefits or limitations. Such adjustments will be directed to allocating to the individual members of the group the material effects of any particular features of the tax law applicable to them.

(4) The tax agreement may exclude from the allocation under paragraph (c)(2)(i) of this section associate companies not having a positive corporate taxable income for the year being allocated, or under paragraph (c)(2)(ii) of this section associate companies not having a positive separate return tax for the year being allocated. An agreement under this paragraph shall make appropriate and equitable provision for preserving to each subsidiary company so excluded the equivalent of any rights which such company would have had, under the applicable tax law, had it filed a separate return, to use in other years any loss or credit availed of by the group through the consolidated return. With respect to carryover rights, such provisions will normally consist of recognition of the carryover in future allocations by reducing the consolidated tax allocation in the subsequent year of the subsidiary company entitled to the benefit, and by charging the excess to the companies which had benefited by the prior deduction or credit. In the case of a carryback, the excluded subsidiary company should normally be paid the amount of refund to which it would have been entitled had it filed a separate return.

(5) The agreement may, instead of excluding members as provided in paragraph (c)(4), include all members of the group in the tax allocation, recognizing negative corporate taxable income or a negative corporate tax, according to the allocation method chosen. An agreement under this paragraph shall provide that those associate companies with a positive allocation will pay the amount allocated and those subsidiary companies with a negative allocation will receive current payment of their corporate tax credits. The agreement shall provide a method for apportioning such payments, and for carrying over uncompensated benefits, if the consolidated loss is too large to be used in full. Such method may assign priorities to specified kinds of benefits.

(6) The tax agreement for each taxable year shall be filed as an exhibit to the system's annual report on Form U5S (§ 259.5s of this chapter) for the previous taxable year. The initial filing after the effective date of this amendment shall be made as an amendment to the last Form U5S filed. If an existing tax agreement is merely renewed or amended, prior filings may

be incorporated by reference. Amendments to a tax agreement shall be filed as an amendment to the Form U5S. Any amendment which would alter the allocation to any associate company for any period preceding its adoption shall be conditioned on approval by the Commission if the Commission directs, within 60 days after its filing, that it be deemed to be a declaration under Rule 45(a).

By the Commission.

George A. Fitzsimmons,

Secretary.

17 CFR Part 251

[Release No. 35-21957]

Interpretative Release Concerning Investment Bankers and Banks in Rule 70 Under the Public Utility Holding Company Act of 1935

AGENCY: Securities and Exchange Commission.

ACTION: Interpretation of rule.

SUMMARY: The Securities and Exchange Commission ("Commission") today issued this interpretative release concerning Rule 70 under the Public Utility Holding Company Act of 1935 ("Act"). Rule 70 implements the Commission's authority to define, by rule, exemptions under Section 17(c) of the Act, which, without the exemptions, prohibits officers and directors of banks, investment bankers and trust companies from serving as officers or directors of a registered holding company or its subsidiaries. A recent decision by the Federal Reserve Board permitting commercial banks to underwrite commercial paper and recent legislation which has expanded the kinds of services financial institutions may provide have raised questions about the definitions of an "investment banker" and a "bank" and the related exemptions under Rule 70. The release states that directors and officers may proceed on the basis that the exemptions previously available under Rule 70 continue in effect, pending review of the rule in light of intervening changes in the banking laws or in their interpretation.

DATE: March 18, 1981.

FOR FURTHER INFORMATION CONTACT: Aaron Levy, Director, Division of Corporate Regulation, (202) 523-5691, Grant G. Guthrie, Associate Director, (202) 523-5156, or James E. Lurie, Special Counsel, (202) 523-5603, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: Section 17(c) of the Act does not define the words "investment banker" or "bank." The first is defined in Rule 70(c)(4) and the second is defined negatively in Rule 70(c)(3).

There are virtually no exemptions for interlocking affiliations of directors and officers with respect to an investment banker. These affiliations are prohibited by section 17(c), and the two limited exemptions in Rule 70 are not significant today. There are several exemptions in Rule 70 for directors and officers in the case of banks (Rules 70(a)(3) and 70(a)(4)).

The critical distinction between an "investment banker" and a "bank" is provided in Rule 70(c)(4), which states, in relevant part:

> "investment banker" means a person engaged in business as an underwriter or a dealer [as these terms are defined in the Investment Company Act of 1940] but does not include: [i] a bank, trust company, banking association, or banking firm which is prohibited by statute or by rule or regulation thereunder from underwriting or participating in the marketing of securities of a public utility or holding company * * *.

An investment banker is broadly defined as a person "engaged in business as an underwriter or dealer," as these terms are defined in the Investment Company Act of 1940, with respect to any security of any issuer. A limited exception from this definition is provided for a bank. A bank is not an investment banker if by law it is prohibited "from underwriting or participating in the marketing" of any securities of a public utility [1] or a holding company.[2]

On September 26, 1980, the Board of Governors of the Federal Reserve System ("Board") issued a ruling denying petitions to prohibit Bankers Trust Company from selling commercial paper of corporate issuers. It concluded that commercial paper was not a security under the Glass-Steagall Act,[3] the statute with respect to issuing, underwriting, selling and dealing in securities did not apply to commercial paper.[4] An industry association and a commercial paper dealer have challenged the Board's decision in both appellate and district courts.[5] The industry association has also brought a private action against Bankers Trust Company to enjoin the latter's commercial paper activities.[6]

If as a result of the Board's ruling a bank were to lose its special exception of exclusion in Rule 70(c)(4), it would not necessarily be an investment banker. In that event the bank would be an "investment banker," as defined in Rule 70(c)(4), only if it was actually engaged in the sale of any securities as underwriter or dealer, and commercial paper is a security under section 2(a)(16) of the Act.[7] If a bank were engaged, as underwriter or dealer, in selling or marketing of any security, including commercial paper, of a public utility company or a holding company, it would be an investment banker and the special exception for a bank would not apply to it. The immediate question is what is the status of a bank that, although permitted by law so to engage, in fact does not.

No definitive answer is required at this time. The Commission here announces that, pending disposition of the appeals from the Board's ruling and until such time as the Commission amends the rule, if any amendment should be necessary, a bank shall not be considered an investment banker, as provided in Rule 70(c)(4), if in fact the bank does not engage in the sale or marketing of securities of a public utility company or a holding company. This application of the rule is consistent with the intent and effect of the exclusion for banks that Rule 70(c)(4) provides and as such is appropriate for the limited and temporary purpose it is meant to serve. A bank director or officer, who serves or proposes to serve a registered holding

---

[1] Section 2(a)(5) of the Act defines a public-utility company as an electric utility company or a gas utility company. Section 2(a)(3) of the Act defines an electric utility company as one "which owns or operates facilities used for the generation, transmission, or distribution of electric energy for sale * * *." Section 2(a)(4) of the Act defines a gas utility company as one "which owns or operates facilities used for the distribution at retail * * * of natural of manufactured gas for heat, light or power."

[2] Section 2(a)(7)(A) of the Act defines a holding company as one "which directly or indirectly owns, controls, or holds with power to vote, 10 per centum or more of the outstanding voting securities of a public-utility company * * *."

[3] 48 Stat. 162 (1933) (codified in scattered sections of 12 U.S.C.).

[4] Section 16 and section 21 of the Glass-Steagall Act, 12 U.S.C. § 24, seventh power, and § 378(a)(1), contain the prohibitions on such activities by national banks and state member banks of the Federal Reserve System, respectively.

Becker, Inc.* v. *Board of Governors of the Federal Reserve System, et al.*, Civ. No. 80-2256 (D.C. Cir., filed Oct. 14, 1980); *Securities Industry Ass'n* v. *Board of Governors of the Federal Reserve System, et al.*, Civ. No. 80-2720 (D.D.C., filed Oct. 24, 1980); *A.G. Becker, Inc.* v. *Board of Governors of the Federal Reserve System, et al.*, Civ. No. 80-2014 (D.C.C., filed Oct. 14, 1980).

[6] *Securities Industry Ass'n* v. *Bankers Trust Co.*, Civ. No. 80-6123 (S.D.N.Y., filed Oct. 27, 1980).

[7] It is also a security under section 2(1) of the Securities Act of 1933.

company or its subsidiaries in such positions pursuant to exemptions provide by Rule 70, may rely upon the exemption in Rule 70(c)(4) in light of today's announcement.

The prohibition of section 17(c) extents to a director, officer or other representative of any "bank, trust company, * * * banking association or firm * * *" except in cases the Commission exempts by rule. Rule 70(c)(3) states that these terms do not include a bank or a trust company—

(i) which does not accept deposits, or if accepting deposits, not less than 85 percent of whose total deposits at the end of the preceding calendar year consisted of time and savings deposits as defined by 12 CFR Part 329, or (ii) not more than 10 percent of whose total loans and discounts at the end of the preceding calendar year consisted of commercial loans and discounts.

The definition in Rule 70(c)(3) excludes primarily savings banks, savings and loan associations and trust companies not engaged in the general banking business. As first adopted and as later amended,[8] this definition reflected then existing laws which made sharp distinctions between commercial banks and other financial institutions regarding time and demand deposits and types of loans. These distinctions are not altogether as clear today, as a result of the Depository Institutions Deregulation and Monetary Control Act of 1980.[9] That statute, among other things, authorizes (1) banks, savings banks, mutual savings banks, savings and loan associations and credit unions to pay interest on demand deposits, or the equivalent thereto, (2) savings and loan associations to invest up to 20% of their capital in commercial paper and other corporate debt securities, and (3) mutual savings banks to invest up to 5% of their capital in corporate and business loans.

These legislative and possibly other changes may require restatement or perhaps modification of Rule 70(c)(3). Until that is done, the status of financial institutions under Rule 70(c)(3) will continue in effect, if in terms of time and savings deposits and commercial loans and discounts these institutions were qualified for the exclusion from section 17(c) pursuant to Rule 70(c)(3) as of January 1, 1979.

Accordingly, 17 CFR Part 251 is amended by adding this release thereto.

BILLING CODE 8010-01-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 72

[T.D. ATF-8]

Increase of Appraiser's Fees

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Final rule (Treasury decision).

SUMMARY: This final rule increases the rate of compensation that is paid to appraisers of property seized as subject to forfeiture. This regulation affects appraisers of such property. This change will help ATF to obtain qualified appraisers of property seized as subject to forfeiture.

EFFECTIVE DATES: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: E. J. Ference, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue, NW, Washington, DC 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

Section 72.51 of 27 CFR currently sets the rate of compensation that is paid to an appraiser of property seized as subject to forfeiture under Title 26 U.S.C. at $3.00 per hour or a portion thereof. Because this rate is inadequate, this regulation changes the rate of compensation that is paid from $3.00 per hour to "a reasonable fee not to exceed $15.00 per hour or a portion thereof."

Drafting Information

The principal author of this document is E. J. Ference, Research and Regulations Branch, Bureau of Alcohol Tobacco and Firearms. However, other personnel of the Bureau and of the Treasury Department have participated in the preparation of this document, both in matters of substance and style.

Authority and Issuance

Immediate action is needed to alleviate the undue burden on ATF of finding qualified appraisers willing to accept the present rate of compensation now authorized by regulations.

Because this regulation is nonsubstantive, liberalizing and essentially procedural, it is found unnecessary to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

This regulation is issued under the authority contained in 26 U.S.C. 7805 (68A Stat. 917, as amended).

PART 72—DISPOSITION OF SEIZED PERSONAL PROPERTY

Accordingly, Title 27 Code of Federal Regulations is amended by revising § 72.51 to read as follows:

§ 72.51 Rate of compensation.

Each appraiser selected under § 72.22(a)(2) shall receive compensation at a reasonable fee not to exceed $15.00 per hour or a portion thereof for the performance of his or her duties in appraising property seized as subject to forfeiture under Title 26 U.S.C.

(Act of August 16, 1954, ch. 736, 68A Stat. 870, as amended (26 U.S.C. 7325))

Signed: February 24, 1981.

G. R. Dickerson,

Director.

Approved: March 12, 1981.

John P. Simpson,

Acting Assistant Secretary (Enforcement and Operations).

BILLING CODE 4810-31-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 936

Comments Submitted on Oklahoma's Permanent Surface Mining Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Discussion of comments.

SUMMARY: This notice summarizes significant issues raised in comments submitted to OSM and the Secretary of the Interior on Oklahoma's permanent program submission and explains the Secretary's resolution of those issues. These comments were considered by the Secretary in his decision to approve conditionally the Oklahoma program submission. That decision was

published January 19, 1981, at 46 FR 4902–4911.

FOR FURTHER INFORMATION CONTACT: Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, South Building, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Telephone (202) 343–4225.

SUPPLEMENTARY INFORMATION: On January 19, 1981, the Secretary of the Interior published his decision to approve conditionally the Oklahoma permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). An explanation of that decision is found in the Federal Register at 46 FR 4902–4911 (the decision notice). That notice contains information necessary for a full understanding of this notice. A draft copy of the decision notice was released to officials of Oklahoma and to the public on January 14, 1981, as soon as it was completed and shortly before it was delivered to the Office of the Federal Register for publication.

As explained in it, the Secretary considered all comments submitted in making a determination on Oklahoma's program. However, when the notice was released January 14, 1981, the resolution of the issues in the comments was in the final stages of proof-reading, typing, and minor editorial revision, and the Secretary was unable to include it in the notice.

As he did with the decision announcement notice, the Secretary has also sent this notice as soon as it was completed to officials of the Oklahoma Department of Mines.

Accordingly, a summary of significant issues raised by comments received by the Secretary and a discussion of the Secretary's resolution of those issues follows. Some of the discussions refer to findings in the January 19, 1981, notice.

Disposition of Comments

1. At the public hearing on December 23, 1980, comments (written and oral) were made on the propriety of numerous OSM regulations that Oklahoma has chosen to adopt without substantive modification. Whatever their merits, these comments are not directed to the issue now before the Secretary. The issue is whether the resubmitted Oklahoma program is consistent with the requirements of SMCRA and with 30 CFR Chapter VII as modified by various court decisions. The commenters could have directed their suggestions to the Secretary during the comment period when the permanent program rules were being promulgated. Now that the OSM rules are final, it is not appropriate to question them in the context of determining whether Oklahoma's rules are consistent with OSM rules. Similarly, the commenters could have directed their suggestions to the Oklahoma DOM during its rulemaking comment periods to urge DOM to propose to the Secretary alternatives to OSM's regulations. Regardless of whether DOM received such comments, it chose to promulgate those rules identical to the OSM rules. Therefore, it is not appropriate for the Secretary to find fault with the questioned DOM rules in the context of the decision now before him.

This is not to say that those who questioned DOM rules that are equivalent to OSM rules are without redress if their comments have merit. Under 30 CFR 700.12 and the Federal Administrative Procedures Act (5 U.S.C. 553(e)), any person can petition the Secretary to change his regulations. Pursuant to the Oklahoma Administrative Procedures Act (75 O.S. 1979 Supp. Section 305), the DOM has promulgated regulation Section 700.12 to allow a similar petition process. A permanent regulatory program, once approved by the Secretary, is not unchangeable. It can be amended in response to changes in the Secretary's regulations initiated by petitioners under 30 CFR 700.12, or if the State proposes alternatives to OSM's rules that are in accordance with SMCRA and consistent with 30 CFR Chapter VII, but necessary because of local requirements or local agricultural or environmental conditions. See 30 CFR 731.13. Other circumstances allowing or requiring program modifications and the procedures for amendments are detailed at 30 CFR 732.17.

2. Several of the comments received at the December 23, 1980, hearing reveal misconceptions about the permanent regulatory program, the Oklahoma program, or particular regulations. Although the Secretary has no obligation to respond to comments on matters not germane to whether the Oklahoma program is consistent with Federal law, he believes that the misconceptions should be clarified.

(a) One commenter stated his assumption that the Oklahoma program included a precise duplicate of all of OSM's regulations because the DOM had no choice but to copy them. Although it is true that Oklahoma must have laws and regulations consistent with the Federal law, OSM encouraged states to propose alternatives appropriate for local conditions that were consistent with SMCRA (see 30 CFR 731.13) and helped states identify areas of regulation that are inapplicable. By letter dated May 15, 1980 (Admin. Record No. OK–78), OSM informed Oklahoma that major sections of its proposed regulations were not necessary because they duplicated Federal law not applicable in Oklahoma. In the initial decision of October 10, 1980, the Secretary found that other major provisions were not necessary in Oklahoma law because they were not relevant to the coal industry in Oklahoma (see 45 FR 67365).

The resubmitted Oklahoma program regulations do closely follow the OSM regulations that are applicable to Oklahoma, but duplication is not required. Other state programs have varied widely from OSM regulations or provisions of SMCRA and numerous "state window" proposals have been approved under 30 CFR 731.13 where supported by appropriate data and reasoning. Oklahoma elected to submit but one "state window" proposal under 30 CFR 731.13, which had to be disapproved as explained at 45 FR 67365 (Oct. 10, 1980).

(b) Several commenters misunderstood the permit application requirements of 30 CFR 779.13, requiring hydrology data. One misconception is that applicants must wait for the Oklahoma DOM to provide data for operators to use to show whether the planned operation will cause damage to the hydrologic balance outside the proposed permit area. Under Section 507(b)(11) of SMCRA and 30 CFR 779.13, the applicant must acquire data sufficient to make a determination of the probable hydrologic impact of his operation and sufficient for the state to determine the probable cumulative impact of all anticipated mining in the area. Although the data must reflect "seasonal flow conditions" (Section 507(b)(11) SMCRA and "seasonal variations in water quantity and quality" (30 CFR 779.16), this information can be obtained from a variety of sources, ranging from field studies by the applicant to published data. The state is required to provide to the applicant whatever useful data it has, as are Federal agencies (30 CFR 779.13(b)), but there is no requirement for operators to forego preparation of permit applications until the Oklahoma DOM acquires a data bank or modeling system of its own. It is necessary that the DOM have sufficient data from the applicant and that it make a determination consistent with 30 CFR 786.19(c) before a permit can be issued. The Oklahoma regulation reflects these

requirements in §§ 779.13–779.16 and 786.19(c).

(c) A similar misconception is that the Federal regulations impose on Oklahoma the obligation to require permit applicants to do (1) a detailed archaeological study or historical survey of the proposed permit area and (2) a detailed fish and wildlife resources study. It is true that 30 CFR 779.20 did require the fish and wildlife study, but that regulation was enjoined by the U.S. District Court for the District of Columbia (*In Re: Permanent Surface Mining Litigation,* ——F. Supp. ——, Feb. 26, 1980) and is not in effect. The Secretary's regulations have never required an archaeological or cultural study, but do require, at 30 CFR 779.12(b), that cultural, historical, or archaeological resources known from existing sources of data to be located on the proposed permit area, be identified in the application.

(d) One operator misconstrued the requirement that land be returned to its approximate original contour (Section 515(b)(3) of SMCRA) to mean that the precise pre-mining contour and drainage patterns must be restored even though the swell factor for broken overburden may make this impossible. The Secretary has defined "approximate original contour" at 30 CFR 701.5 to make clear that the term means what it implies—approximate, not exact, original contours. As required by SMRCA, specific exceptions may be granted for permanent impoundments, mountaintop removal and certain steep slope operations, and excess spoil may be disposed in designed fills (30 CFR 816.71–816.74).

(e) One commenter indicated that OSM, through the Oklahoma program, is presently requiring particular design criteria for sediment ponds. Several suggestions were made as to appropriate design criteria. It was also suggested that because EPA is considering revisions of the effluent limitations under the Clean Water Act, OSM should not require Oklahoma to enforce existing OSM effluent limitations. The Secretary, however, is not requiring the states to enforce the design criteria for sediment ponds prescribed by 30 CFR 816.46 (b), (c), and (d), concerning storage volume, detention time and dewatering because these rules were suspended on December 31, 1979 (*see* 44 FR 77452). The sediment removal rule, 30 CFR 816.46(h) is also suspended (44 FR 77453). The regulations of 30 CFR 816.46 that are not suspended continue to apply to state programs.

Similarly, 30 CFR 816.42(a), concerning effluent limitations, is no longer applicable to the reclamation phase of an operation because of its remand by the U.S. District Court for the District of Columbia on May 16, 1980 (*In Re: Permanent Surface Mining Regulation Litigation,* ——F. Supp. —— (D.D.C., 1980)), and the Secretary has suspended 30 CFR 816.42(b), concerning discharge exceptions, for the parameter of total suspended solids (*see* 44 FR 77452, December 31, 1979). The remainder of 30 CFR 816.42, including the effluent limitations of 30 CFR 816.42(a), remains applicable to land disturbed by mining until initiation of the revegetation phase.

It should be noted that EPA and OSM are considering rulemaking that might result in changes to the effluent limitations, pond design criteria, or both. EPA has published proposed rule changes on January 13, 1981, 46 FR 3136–3159. At this time, however, OSM effluent limitations, which are identical to the EPA limitations for coal mine point sources (40 CFR Part 434) are in effect and are reflected in the Oklahoma program regulations, Sections 816.42 and 817.42. The Secretary cannot suspend enforcement of the EPA–OSM effluent limitations on the premise that future rulemaking might result in some modification of the limitations.

Under the conditionally approved Oklahoma program, operators must construct sediment ponds for areas disturbed by active mining, but are free to design the ponds as they think necessary to meet the effluent limitations of Section 816.42 or 817.42. Because the ponds are point sources, operators must also obtain an NPDES permit from EPA or the State agency, if any, to which EPA has delegated its authority under the Clean Water Act. Operators are entitled to all the exemptions allowed by EPA under 40 CFR Part 434, as amended January 12, 1979 (44 FR 2586–2592).

(f) An operator asserted that the Oklahoma industry will be regulated under conflicting OSM and State standards regarding water quality criteria. The operator felt that "the OSM standards and criteria dictate that the effluent shall meet at (sic) a flow regime dictated by the 7-day, 2-year low flow conditions" is incorrect. The DOM has adopted effluent limitations based on OSM's effluent limitations in 30 CFR 816.42, which are identical to the effluent limits EPA has prescribed for coal mine point sources at 40 CFR Part 434. These effluent limitations are independent of the Oklahoma Water Resources Board's (WRB) ambient stream quality requirements (see *Oklahoma's Water Quality Standards, 1979 (Standards)* included in the resubmitted Oklahoma program.) Section 7 of the *Standards* states that the various numerical water quality standards expressed in the rules apply to perennial streams only when the flow "equals or exceeds the 7-day, 2-year low flow value" and to intermittent streams only when the flow "is at or above 1.0 cfs." The WRB standards are measurements of instream quality that a discharger cannot cause to be violated. The DOM standards are effluent quality limitations that apply to only four parameters: suspended solids, manganese, iron, and pH. Of these, WRB standards exist only for pH and suspended solids. The DOM/OSM standard for the pH of effluent waters is 6.0–9.0, which is less stringent than the WRB instream standard of 6.5–8.5 (Section 7.13). It is highly improbable that a discharge of water between pH 6.0–6.5 or 8.5–9.0 would cause the instream standard to be violated. The Secretary believes that there is no conflict between the DOM and WRB pH regulations, but to the extent there may be, the WRB regulation is more stringent and therefore not inconsistent with Section 505(b) of SMCRA.

(g) An operator stated that mulching should not be required on all regraded areas and that the phrase, "all regraded and top-soiled areas," in DOM regulation 816.114 is ambiguous and confusing. 44 FR 15235, Item 6, explains the intent of 30 CFR 816.114, from which the DOM rule was taken. The Secretary does not expect the DOM to require mulching of regrading spoil areas prior to topsoil replacement except where it will serve a useful purpose in erosion prevention.

(h) One operator asserted that DOM and OSM were advising farmers that they do not own their land for five years after a mine is reclaimed and that farmers must stay off the land. That is not necessarily the case. Surface owners have full rights to comment on proposed reclamation plans and on what the postmining land use will be (*see* DOM Regulations Parts 770–788). It is true that SMCRA Section 515(b)(20) requires operators to be responsible for the success of approved revegetation plans for a minimum of five years and Section 510(d) requires complete restoration of prime farmland soils. The obligations on operators require that they seek cooperation from surface owners so that landowners' activities will not interfere with the reclamation process. If a reclamation plan accommodates the wishes of the landowner to the extent allowed by law and the operator carries out the plan, the mutual interests of the

landowner and the operator will abet successful completion of the responsibility period. However, if the landowner interferes with the operator's reclamation obligations, the operator will have to take appropriate action to protect his ability to fulfill his reclamation responsibilities.

3. A third kind of comment received at the December 23, 1980, hearing requested the Secretary to interpret or clarify his own regulations where Oklahoma has adopted an OSM regulation without modification. This rulemaking is not the appropriate forum for interpretation of existing regulations. The commenters are directed to the preamble of the Secretary's permanent regulatory program regulations of March 13, 1979 (44 FR 14902, *et. seq.*, (book 2 of 3)), and to the preamble to the proposed permanent regulatory program of September 18, 1978 (43 FR 41662 *et seq.* (book 2 of 2)), for the Secretary's explanation of the rules and responses to comments received during the rulemaking process.

4. One commenter disagreed with the definition of "intermittent stream" in the Oklahoma regulations, alleging it is inconsistent with that used by the (U.S. Army) Corps of Engineers (COE) and the Oklahoma Water Resources Board (WRB). No evidence of inconsistency was presented, nor evidence that the differences, if any, cause the Oklahoma program to be unenforceable. The Secretary has examined the WRB regulations that were included in the Oklahoma program resubmission and finds no inconsistency with the DOM definition of "intermittent stream." In the course of the permanent program rulemaking, the Secretary solicited comments from the Corps of Engineers and the public on the definition of "intermittent stream." No fault was found with the definition on the basis of any conflict with Corps regulations (*see* 44 FR 14932, March 13, 1979). The Secretary finds that the DOM definition is consistent with the OSM definition and is not a deficiency in the Oklahoma program.

5. The same commenter suggested that "The biological criteria for stream classification purposes should be dropped." The Secretary assumes that this comment refers to Sections 816.57 and 817.57 of the DOM rules which are taken verbatim from 30 CFR 816.57 and 817.57, respectively, as these are the only rules that fit the comment. The commenter asserted that a determination of a biological community is time consuming, expensive and unnecessary, but he presented no evidence in support of these assertions and suggested no alternatives. Because the DOM rule is consistent with the OSM rules, no change is required. *See* 44 FR 15176, March 13, 1979, for a discussion of 30 CFR 816.57.

6. One commenter asserted that Section 816.65(f)(2) of the Oklahoma regulations, which prohibits blasting within 300 feet of an oil or gas line, is overly restrictive. 30 CFR 816.65(f) was remanded by the U.S. District Court for the District of Columbia (*In re: Permanent Surface Mining Regulation Litigation*, Civil Action 79–1144, Mem. Opinion, May 16, 1980, p. 28) because of an earlier decision by the Circuit Court for the District of Columbia (*In re: Surface Mining Regulation Litigation*, No. 79–2190, May 2, 1980, p. 21–23) and is not a part of the approved Oklahoma program. Section 522(e)(5) of SMCRA, however, prohibits surface mining operations within three hundred feet of dwellings and other structures. Because Section 522(e)(5) of SMCRA includes no provision prohibiting blasting near oil and has pipelines, there is no Federal provision applicable to those structures in effect.

7. One commenter maintained that the permit review timeframe and procedures in the Oklahoma program were insufficient for "extensive environmental studies" and that the discretion reserved to the DOM was a potential source of discrimination against smaller operations. No specific timeframe, procedures or instances of illegal discrimination were criticized. The Secretary has reviewed the Oklahoma program procedures for review of permit applications and finds that they are consistent with the procedures of SMCRA and the Secretary's regulations. It should be noted that an applicant's obligation to supply information to the regulatory authority under SMCRA envisions collection and analysis of the data prior to submitting an application. For those operators planning to continue an existing operation more than eight months after the Oklahoma permanent program is approved, a permanent program permit application is required two months from the program approval date by Section 502(d) of SMCRA and Section 4(B) of OCRA. These operators should have been collecting information for their first permanent program permit application during 1980 so that a complete application could be filed within two months of program approval. The two-month requirement, however, does not preclude amendments to an application timely filed.

8. One commenter questioned the Oklahoma program procedure for making a "negative determination" on prime farmlands, suggesting that the landowner and other "knowledgeable people" should be made a "party." The Secretary notes that DOM regulation 779.27(b)–(d) is identical to 30 CFR 779.27(b)–(d), the "negative determination" rule. There is nothing in the DOM rule or OSM's rule prohibiting the use of information from landowners, past or present. The burden is on the applicant, however, to demonstrate the existence of one of the factors of Section 779.27(b) when the soil appears from the investigation required by Section 779.27(a) to be prime farmland. Although SMCRA or 30 CFR Chapter VII do not require that a landowner or any other person be made a "party" to a proceeding for a permit application, there is opportunity for participation in the application process.

9. One commenter recommended that the moist bulk density criteria be dropped for monitoring soil compaction when prime farmland is mined. As a result of litigation, *In Re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144), OSM suspended the moist bulk density criteria (*see* 44 FR 77455, December 31, 1979). Pursuant to Oklahoma's request, the Secretary affirmatively disapproved Section 785.17(b)(3) and 823.14(c) of Oklahoma's regulations concerning excessive soil compaction. Therefore, the rule to which the commenter referred is not a part of the Oklahoma program.

10. A commenter asked that OSM not approve the Oklahoma program requirement of certification of sediment ponds by professional engineers. The request cannot be honored because Section 515(b)(10)(B)(ii) of SMCRA requires "siltation structures" to be "certified by a qualified registered engineer to be constructed as designed and as approved in the reclamation plan." The Oklahoma program meets this requirement (*see* 45 O.S. 1979 Supp. Section 751).

11. One comenter asserted that the Oklahoma program permitting requirements exceeded the requirements of SMCRA in some unspecified way and suggested that the permitting requirements of the initial regulatory program were all that should be required. First, the initial regulatory program contains no Federal requirements for permit application contents nor the procedure for review of applications. Congress has, however, specified minimum requirements for permit systems under permanent regulatory programs in SMCRA, Sections 506–514. Those requirements

have been implemented through the Secretary's regulations at 30 CFR Chapter VII, Subchapter G. The Secretary has found that the Oklahoma program provisions are consistent with the Federal permitting requirements with the exception of the small operators assistance provisions of Section 507(c) of SMCRA and 30 CFR Part 795 (*see* Finding 4(n)).

12. One commenter suggested that the Oklahoma program should not be approved until a Memorandum of Understanding (MOU) between OSM and the U.S. Environmental Protection Agency is proposed for public comments. The Secretary lacks authority to delay approval of the Oklahoma program for the reasons suggested by the commenter.

13. One commenter suggested delaying approval of the Oklahoma program because the U.S. Environmental Protection Agency's New Source Performance Standards (NSPS) require an environmental assessment for mines that produce certain quantities of coal in order to obtain an NPDES permit. The Secretary lacks authority to delay approval for such a reason and the Administrator of EPA has concurred in his conditional approval. At the same time, EPA's requirement would remain in effect regardless of the Secretary's decision on the Oklahoma program.

14. One commenter questioned the appropriateness of requiring field trials before Oklahoma can approve the use of introduced species of grasses such as bermuda and fescue on reclaimed areas, as required by Section 816.112 and 817.112 of Oklahoma's regulations. In the preamble to the permanent federal regulations (44 FR 15233, March 13, 1979), OSM said, " * * * the requirement of appropriate field trials should be interpreted broadly to include successful experience with species in the mined area or a similar area * * *." Therefore, the Secretary believes that the regulations would allow the Oklahoma DOM to approve the use of bermuda or fescue without a site-specific field trial for the proposed permit area provided that the operator and the State are mindful of the geographic adaptation of each species and the use of the species is "desirable and necessary to achieve the approved postmining land use plan" as required by Section 515(b)(19) of SMCRA.

15. One commenter agreed with the concerns about the Oklahoma program expressed by the Secretary in the initial decision of October 10, 1980, and agreed that they must be resolved before the State may assume primary jurisdiction under Pub. L. 95-87. Fifteen items or areas of concern were listed, but no specific allegations or suggestions were made. As detailed in the Findings, the Secretary has found that the Oklahoma program is consistent with SMCRA and 30 CFR Chapter VII with the minor exceptions noted.

16. An operator indicated that the DOM definition of "aquifer" in Section 701.5 is inconsistent with the definition of that term by the Oklahoma Water Resources Board (WRB) and urged that its use imposes application of permit data requirements to operators that are inappropriate to the eastern Oklahoma coal field. The Secretary has examined the "Rules, Regulations and Modes of Procedure," 1979 revision, and Oklahoma's "Water Quality Standards, 1979," both published by the WRB, and finds no definition of "aquifer." The Secretary also finds no inconsistency between those rules, those of the DOM and 30 CFR Chapter VII.

17. One commenter suggested that instead of providing hydrologic information to small operators through the small operators assistance program for the determination of probable hydrologic consequences required in a permit by Section 780.12(c) and Section 784.14(c) of Oklahoma's regulations, that those requirements should be waived for those operators producing under 100,000 tons of coal per year. Section 507(b)(11) of SMCRA requires that the permit application contain a statement of the probable hydrologic consequences of the proposed mining operation, and Section 507(b)(15) of SMCRA requires a statement of the results of test borings or core samples from all applicants. The Secretary has no authority to waive the requirements.

18. Two operators objected to approval of the Oklahoma program because the Small Operator Assistance Program (SOAP) has been declared in violation of the Oklahoma Constitution by the Oklahoma Attorney General and because it discriminated against small operators. They further suggested that a state program that fails to include a SOAP as required by Section 507(c) of SMCRA must ultimately be disapproved. They are correct. The Oklahoma legislature enacted Section 19 of OCRA (45 O.S. 1979 Supp. Section 745.16) to authorize DOM to comply with Section 507(c), but the Oklahoma Attorney General ruled, in Opinion No. 79-213A (May 27, 1980) (affirmed September 2 and October 31, 1980) that enforcement of the legislature's scheme violates Article X, Section 15 of the Oklahoma Constitution. Bound by the Attorney General's opinion, the DOM withdrew proposed regulations that would have been consistent with 30 CFR part 795. However, the DOM believes that the legislature may be able to amend OCRA in a way that would eliminate the problem or that the Oklahoma Supreme Court might disagree with the Attorney General's opinions, and has committed itself to seeking renewed authority to run a SOAP. Meanwhile, DOM has entered into a cooperative agreement with OSM to administer a SOAP under special arrangements not involving expenditure of State funds (Admin. Record OK-231). The Secretary has accepted this arrangement on a temporary basis only, making it a condition of the approval of the program that DOM obtain authority to implement a SOAP on its own by November 1, 1981. In the interim, the agreement between OSM and DOM will guarantee that small operators in Oklahoma receive the assistance to which they are entitled under Section 507(c) of SMCRA.

19. Pursuant to Section 7 of the Endangered Species Act, the U.S. Fish and Wildlife Service issued a biological opinion that the approval of the Oklahoma program is not likely to jeopardize the continued existence of threatened and endangered species or adversely modify their critical habitat.

20. The U.S. Environmental Protection Agency (EPA) recommended that Oklahoma be required to amend Sections 816.89 and 817.89 of the State regulations, dealing with the disposal of non-coal wastes, to include a reference to the Resource Conservation and Recovery Act (RCRA). Subsection (b) of these sections of Oklahoma's regulations, like the Federal regulations at 30 CFR 816.89(b) and 817.89(b), requires the operation at the disposal site to be conducted "in accordance with all local, state, and federal requirements," which would include the requirements of RCRA.

21. The EPA commented that Section 776.17 of Oklahoma's regulations relating to the public availability of information required to obtain approval for coal exploration contained acceptable confidentiality provisions as long as emissions data are not classified as confidential. Emissions data are not required in an application for approval of exploration and the Secretary has found the State regulations to be consistent with 30 CFR 776.17.

22. The EPA recommended that Oklahoma be required to amend Section 780.15(b)(3) of the State regulations dealing with an air pollution control plan by requiring the applicant to submit a copy of all necessary Federal, State, and local air quality permits. The State rule requires the applicant to submit a

copy of "an air quality permit." The Secretary agrees that there is some ambiguity in this State provision. However, the Federal rule at 30 CFR 780.15(b), dealing with air pollution control plan requirements, does not require an applicant to submit a copy of any air quality permit, so the Secretary lacks the authority to require the recommended change.

23. The EPA recommended that Oklahoma be required to add two control measures to the air resources protection provisions of Section 816.95 of the State regulations. The Federal rules dealing with air quality control (30 CFR 816.95 and 817.95) were remanded by the U.S. District Court for the District of Columbia (*In Re: Permanent Surface Mining Regulations Litigation*, Civil Action No. 79-1144, Mem. Opinion, May 16, 1980, p. 26). Pursuant to the court's order to affirmatively disapprove remanded regulations, and at the State's request, the Secretary affirmatively disapproved Section 816.95 of Oklahoma's regulations. The Secretary cannot require the recommended change.

24. One commenter urged OSM to review the State program bonding requirements because he understood that the level of bonding in Oklahoma would be increased from $1,500 per acre to $3,000 per acre or greater when the permanent program goes into effect. The Oklahoma program does not contain any specific level of bonding per acre. However, Oklahoma is bound by the requirement of Section 509(a) of SMCRA that "the amount of bond shall be sufficient to assure the completion of the reclamation plan if the work had to be performed by the regulatory authority in the event of forfeiture and in no case shall the bond for the entire area under one permit be less than $10,000." The level of bonding required will be set on a site-specific basis.

Dated: February 11, 1981.

Andrew V. Bailey,

Acting Director.

[FR Doc. 81-8021 Filed 3-24-81; 8:45 am]

BILLING CODE 4310-05-M

---

30 CFR Part 944

Comments Submitted on Utah's Permanent Surface Mining Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Discussion of comments.

SUMMARY: This notice summarizes significant issues raised in comments submitted to OSM and the Secretary of the Interior on Utah's permanent program resubmission and explains the Secretary's resolution of those issues. These comments were all considered by the Secretary in his decision conditionally to approve the Utah program submission. That decision was published January 21, 1981 at 46 FR 5899–5915.

FOR FURTHER INFORMATION CONTACT: Mr. Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining, 1951 Constitution Avenue NW., Washington, D.C. 20240, (202) 343-4225.

SUPPLEMENTARY INFORMATION: On January 21, 1981, the Secretary of the Interior published his decision to approve conditionally the Utah State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). That decision is found in 46 FR 5899–5915 and contains information necessary for a full understanding of this notice. A draft copy of it was released to State officials and to the public on January 15, 1981.

As explained in the notice, the Secretary considered all comments submitted to him in making his decision on Utah's program; however, when the manuscript was released on January 15, 1981, that section for the resolution of issues raised in the comments was in the final stages of proofreading, typing, and minor editorial revision. The Secretary, consequently, was unable to include it in the decision announcement notice.

Accordingly, a summary of significant issues raised by commenters on the revised submission is published herewith. Their comments were either delivered to the Secretary and OSM or made at the public hearing or in public meetings. The discussions below often refers to the January 21, 1981, notice which should be read with this one for full understanding of the decision.

Disposition of Public and Federal Agency Comments

Comments have been accepted and considered on Utah's initial program submission of March 3, 1980 (Administrative Record No. UT-1), and the State's revised submission of December 23, 1980 (Administrative Record No. UT-174). The Secretary's resolution of comments received on the initial submission is found in the initial decision notice published October 24, 1980, 45 FR 70461–70510. The Secretary's responses to the comments on the revised submission follow immediately after the summary of each issue raised by a commenter.

1. The Environmental Policy Institute (EPI) stated that although Utah amended UMC 761.11(b) to require that the restriction on areas where mining is prohibited apply to "underground mining operations," the State's definition does not include the "surface effects of underground mining." It was suggested that either the definition of underground mining be amended to include "surface effects," or that "surface effects" language be added to UMC 761.11(b).

The Secretary disagrees with the commenter. Utah amended UMC 761.11(b) to prohibit, in the circumstances set forth in that section, "underground coal mining activities," not "underground mining operations," as suggested by EPI (see Administrative Record No. UT-174, Coal Mining and Reclamation Regulations, Proposed Amendments for Adoption on December 18, 1980).

The State's definition of "underground coal mining activities" in UMC 700.5 means a combination of "surface operations" and "underground operations" incident to an underground coal mine. "Surface operations" is defined by the State as "with respect to underground coal mining activities, the activities conducted on the surface of the earth incident to an underground coal mine * * *." "Underground operations" means those operations conducted below the surface of the earth in connection with an underground coal mine. Thus, if the conditions, which are the same in the Federal rule as in Utah's rule, are met, underground mining is prohibited in Utah as broadly as under the Federal rule. The conditions specified in 30 CFR 761.11(b)(1) which prescribe that there are no significant recreational, timber, economic or other values which may be incompatible with the surface operations and impacts incident to an underground coal mine are identical to those of UMC 761.11(b)(1).

Accordingly, the Secretary finds that Utah's provision provides the protection of the surface from the effects of underground coal mining consistent with that of 30 CFR Chapter VII.

2. Three commenters expressed concern that Utah did not address the Secretary's initial finding 4(d)(iv) that the alluvial valley floor (AVF) waiver language of UMC/SMC 785.19(c)(3) provides less protection of AVF's than that provided by the Federal regulation. They further contended that in Utah's July 24, 1980, resubmission there was no indication whether the proposed new language was adopted or was even a formal part of the resubmission. They stated that the proposed language still provides the Division discretion to

waive the AVF requirements of 785.19(d) and (e).

The Secretary disagrees. Utah's response to the Secretary's initial disapproval of UMC/SMC 785.19(c)(3) is found in the State's December 23, 1980, resubmission, "Coal Mining and Reclamation Regulations—Proposed Amendments for Adoption on December 18, 1980." These amendments were adopted by the State on December 18, 1980. In that action, Utah deleted UMC/SMC 785.19(c)(3) and amended UMC/SMC 785.19(d)(1). The Secretary finds that Utah's amendment clarifies the permit application contents required by that section and as such is consistent with and as stringent as the 30 CFR 785.19(d)(1) (see Finding 4(d)(iv)).

Several other commenters expressed concern that the revised text of UMC/SMC 785.19(c), which limited the Division's discretion to waive AVF requirements, only refers to "underground operations." Since the text has been adopted for both UMC 785.19 and SMC 785.19, it would be appropriate for only UMC.

The Secretary agrees with the commenters. The omission of reference to "surface operations" was a typographical error.

The State of Utah has agreed to insert "or surface operations" after "underground operations." (See Administrative Record No. UT–189).

3. EPI stated that Utah omitted in UMC/SMC 786.19(h) the requirement that a permit applicant submit proof that all applicable reclamation fees required under the AML program be paid prior to obtaining a permit.

The Secretary notes that on December 18, 1980, Utah adopted an amendment to UMC/SMC 786.19(h) to require that all reclamation fees required by Subchapter R of CFR Chapter VII be paid before a permit is issued (see Finding 4(d)(v), 46 FR 5906, January 21, 1981). He therefore finds that the adoption of this change makes Utah's provisions consistent with the provisions of 30 CFR 786.19(h).

4. EPI expressed the concern that Utah restricts initiating rulemaking to an "interested person" as opposed to the "any person" criterion of 30 CFR 700.12(a). The former term, according to EPI, sets a more restrictive standard for public participation than does the Federal provision. The Secretary requested in Finding 4(1)(v) of 45 FR 70495, October 24, 1980, that either the State present information which demonstrates that standing under the State provision is as broad as that under the Federal provision or make an appropriate rule change.

In Utah's December 23, 1980, resubmission, Rule B–1 of the Board's Rules of Practice and Procedure (amended on August 20, 1980) defines "interested person" as *"any* person with an interest which is or may be adversely affected to bring an action before the Board (emphasis added)." A review of Utah's State laws shows that under UCA 40–6–3.3 "any person or the attorney general on behalf of the state may apply for a hearing before the Board," and UCA 63–46–6 further provides that "an interested person may petition an agency requesting the promulgation, amendment or repeal of a rule." It follows that if any person may petition the Board for a hearing (UCA 40–6–3.3), any person may petition at that hearing for a rule change. In a telephone conversation between representatives of OSM and the Utah Attorney General, the State confirmed that this interpretation is correct (Administrative Record No. UT–183). The Secretary finds UMC/SMC 700.12 consistent with the intent of 30 CFR 700.12 to provide for public participation in rulemaking under the State program, based upon the representation that any person may petition the Division of Oil, Gas, and Mining for a rule change.

5. EPI noted that while Utah has submitted a staffing and budget proposal for its AML program, it has not addressed in its December 23, 1980, resubmission, staffing for inspection, enforcement and permitting.

The Secretary notes that on December 15, 1980, the State in a discussion with OSM (Administrative Record No. UT–187) indicated that it has requested funding from its legislature for three full-time equivalents (FTE's) for inspection and enforcement and one FTE for permit review and administration (see also the December 23, 1980, resubmission budget request Form 300). The State fully expects to have this additional staff within six months of the Secretary's final decision, which falls within the initial eight month permit review requirement mandated by Section 506 of SMCRA (see Finding 4(t), 46 FR 5910, January 21, 1981). Therefore, the Secretary believes that Utah will have adequate staffing properly to carry out inspection and enforcement activities and permitting functions as required by the Act on non-Federal and non-Indian lands.

6. Three commenters expressed concern that Utah's resubmission for SMC 816.46(o) and UMC 817.46(o) does not satisfy the deficiency noted by the Secretary in his decision of October 24, 1980 (45 FR 70487). Specifically, the commenters pointed out that the State offers an exception to the requirement of 30 CFR 816/817.46(o) that prohibits the use of coal processing waste in the construction of sedimentation ponds. The Utah regulations do allow the use of non-acid and non-toxic coal processing waste when certain measures prescribed by the regulations are taken by the operator. The commenters further contended that while the State's provision might be approved as a "state window," Utah has not proposed the alternative with the required documentation prescribed by 30 CFR 731.13. The commenters noted that the State rule lacks criteria for determining when coal processing waste would be suitable. Finally, the commenters stated that the last provision of UMC 817.46(o) and SMC 816.46(o) does not "make sense" as it is constructed because the State refers to "waste" being "designed and constructed" and not "dams and embankments" as set forth in the referenced regulations, UMC 817.91–93 and SMC 816.91–93. The commenters argued that these deficiencies make the rule unapprovable by the Secretary.

As discussed in Finding 4(c)(xii), 46 FR 5903, the Secretary believes that Utah's modification of the provisions in 30 CFR 816/817.46(o) are consistent with and as stringent as the standards of the Federal rule and provide the environmental protection mandated by Section 515(b)(22)(c) of SMCRA. Further, the Secretary finds that Utah's stated need to be able to use coal processing waste in the construction of sediment pond dams and embankments in the steep narrow canyons, characteristic of Utah's mining terrain, satisfies the requirement for approval of the alternative pursuant to 30 CFR 731.13. (See Utah State Program amended text and classifications—Rules and Regulations (Adopted Amendments) pp. 33–34, and Utah State Program—State Window Submission, December 23, 1980, Utah Program Resubmission).

The Secretary finds that Utah's incorporation of 30 CFR 816/817.91–93 for the use of coal processing waste in dams and embankments makes the Utah provision consistent with and as stringent as the standards of the Federal rules for determining the suitability of such waste for such use. Under the Federal rules, waste may not be used in dams constructed according to sediment pond embankment design criteria, but may be used in embankments which meet the criteria for waste dams, even if the purpose of the impoundment behind the dam is for sediment control.

Finally, while the Secretary agrees with the commenters that the construction of the last sentence in SMC 816.46(o) and UMC 817.46(o) may be awkward, the intent and practical

application of the provision to require that sedimentation pond dams and embankments that are constructed with non-acid and non-toxic forming coal processing waste meet the standards prescribed in UMC 817.91–93 and SMC 816.91–93 are met. Accordingly, the Secretary disagrees with the commenters' request that the resubmitted rule be disapproved (see Finding 4(c)(xii), 46 FR 5903, January 21, 1981).

7. Three commenters stated that Utah's resubmission response to the deficiency identified by the Secretary in UMC 817.52(a)(1) and SMC 816.52(a)(1) regarding requirements for conducting surface and groundwater monitoring is unacceptable. The commenters pointed out that Utah did not make any changes in its December 23, 1980, resubmission, but, rather, suspended those rules pursuant to the court order in *In Re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144, Slip op. pp. 16–17). The commenters noted that the court's order addressed 30 CFR 817.52(a)(1), but not 30 CFR 816.52(a)(1). The commenters also contended that Utah's rules remain deficient as noted in the Secretary's decision on October 24, 1980 (45 FR 70487), and must be disapproved.

Utah submitted to OSM on July 24, 1980, as part of its proposed program submission, proposed regulatory amendments for SMC 816.52(a)(1) and UMC 817.52(a)(1). Those amendments were subsequently adopted on August 20, 1980. With those changes, SMC 816.52(a)(1) is identical to 30 CFR 816.52(a)(1) and UMC 817.52(a)(1) reflects 30 CFR 817.52(a)(1) with the suspended provision deleted. The amended provisions were not considered in the Secretary's initial decision partially approving/partially disapproving the Utah program (45 FR 47461–74510, October 24, 1980) because the adoption of the amendments did not occur before June 16, 1980 (See "General Background on State Program Approval Process," 45 FR 70462). In order to maintain consistency with the district court order in *In Re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144), Utah on November 19, 1980, "suspended pursuant to Judge Flannery's order" all regulatory provisions which it had enacted since August 15, 1980. Utah noted this in its December 23, 1980, resubmission, but inadvertently failed to resubmit the revised regulatory language described above. The Secretary believes this deletion to be inadvertent and feels that SMC 816.52(a)(1) as in effect is consistent with the Federal rule because the authorization to suspend rules based on Judge Flannery's ruling does not authorize any suspension in 816.52(a)(1), which Judge Flannery did not remand. Accordingly, the Secretary finds that the deficiencies have been corrected and therefore approves UMC 817.52(a)(1) and SMC 816.52(a)(1) (see Finding 4(c)(xiv)).

8. Three commenters argued that Utah's amendment to SMC 816.57(a) and UMC 817.57(a) contained in its December 23, 1980, resubmission is deficient in that it does not address the deficiency noted by the Secretary in his October 24, 1980, decision (see Finding 4(c)(xvi), 45 FR 70488) and introduces a new deficiency. Specifically the commenters contended that the State limits the application of the buffer zone prescribed by 30 CFR 816/817.57(a) and fails to apply the buffer zone to streams which are neither perennial nor intermittent, but where a biological community is determined to exist.

The Secretary disagrees with the commenters. As discussed in Finding 4(c)(xvi), 45 FR 5903, January 21, 1981, Utah adopted verbatim the requirement of 30 CFR 816/817.57(c) in UMC 817.57(c) and SMC 816.57(c). These provisions prescribe that a biological community in a stream be determined by the existence in the stream at any time of an assemblage of two or more species of arthropods or molluscan animals which meet certain criteria (30 CFR 816.57 and 817.57). Utah sets forth in SCM 816.57(a) and UMC 817.57(a) that "no land within 100 feet of a perennial or an intermittent stream and which contains a biological community * * * [may] be disturbed by surface (underground) coal mining activities." As explained in Finding 4(c)(xvi), the Secretary understands that a biological community could be found in both perennial and intermittent streams. This finding is consistent with the Federal preamble's discussion of the need for buffer zones (44 FR 15177, March 13, 1979). The regulation, by use of the term "biological community," seeks to protect biologically significant streams from direct disturbance except in accordance with Section 816.44. The more constant intermittent streams will usually have a biological community, but as streams become increasingly intermittent due to their climatic, geologic and geographic location, the less likely it will be that they have a biotic community that fits within the definition in 30 CFR 816/817.57(c). Further, perennial streams will almost always have a significant biota unless it has been eliminated by pollution. The Secretary knows of no perennial stream in Utah which does not have significant biota. Finally, while ephemeral streams may be significant sources of water and sediment to larger streams, the Act contemplates mining and associated activities to disturb directly minor stream channels when it allows for sedimentation ponds which have to be built in some sort of water drainage channel. Surface mining is impossible without destruction of a number of ephemeral streams, as defined in 30 CFR 701.5. The Secretary believes that in Utah's regulations all streams, perennial, intermittent, and ephemeral are afforded protection equal to that required by the Federal regulations based upon hydrologic considerations, regardless of the existence or nonexistence of a biological community.

Specifically, the provisions of SMC 816.43 and .44 are consistent with 30 CFR 816/817.43 and .44 in insuring the preservation of perennial, intermittent and ephemeral streams. All perennial streams and all intermittent streams with significant biota will be protected by the 100 foot buffer zone. Further, in Utah, ephemeral streams characteristic of the areas in which underground mining takes place do not contain biological communities which are important to fish because they derive from the direct result of snowfall which varies from year to year. Accordingly, the Secretary finds that Utah's provision provides the same level of protection as the Federal regulation.

9. Three commenters stated that Utah's response to the Secretary's finding that subsection (1) of 30 CFR 817.65 did not appear in the State rule, UMC 817.65, does not remedy the deficiency and as such may not be approved.

In its December 23, 1980, resubmission, Utah presented as adopted regulations, UMC 817.65 (i), (j) and (j)(1). These provisions are identical to 30 CFR 817.65 (i), (j) and (j)(1).

In further reviewing the Utah regulations, the Secretary has determined that UMC 817.65(l)(1) is included in the program resubmission (See Administrative Record No. UT–1). Therefore, the Secretary is approving UMC 817.65.

10. Three commenters contended that because Utah did not submit its provisions in UMC 817.72(b) and SMC 816.72(b), which differ from the requirements of 30 CFR 817/816.72(b), as a state window, they cannot be approved. 30 CFR 816/817.72(b) require that a subdrainage system always be constructed for valley fills. UMC 817.72(b) and SMC 816.72(b) allow an exemption when the operator satisfies certain conditions prescribed in the

regulation. The commenters also pointed out that Utah has not amended UMC 817.72(c) and SMC 816.72(c) to be consistent with 30 CFR 817/816.72(c). The Federal regulation only allows the regulatory authority the discretion to require the construction of lifts in valley fills less than four feet while the State allows lifts greater than four feet. The commenters argued that because the State did not file a state window to support its provision, the State rule must be disapproved as being inconsistent with and less stringent than the Federal rule.

The Secretary agrees with the commenters that Utah must revise UMC 817.72 (b) and (c) and SMC 816.72 (b) and (c) so that its regulations for insuring stability in valley fills are consistent with the standards prescribed by 30 CFR 816/817.72(c).

The Secretary has conditioned his approval of the Utah program on the revision of this section (see Findings 4(c)(xx)(5), 46 FR 5905).

11. Three commenters stated that Utah has not cured the deficiency in SMC 816.103 and UMC 817.103 identified by the Secretary in his decision on October 24, 1980 (45 FR 70488). In the decision, the Secretary pointed out that the State's regulations did not specify a minimum burial depth of four feet, if not treated, for prescribed materials and as such was inconsistent with 30 CFR 816/817.103(a)(1). The Secretary also noted that the Federal provision has been remanded by the court to allow treatment of such materials in *In Re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–114).

Utah submitted to OSM on July 24, 1980, as part of its proposed program submission, proposed regulatory amendments for SMC 816.103(a)(1) and UMC 817.103(a)(1) which incorporated the Federal requirement that certain materials be "* * * covered with a minimum of four feet of the best non-toxic and non-combustible material * * *." The Board adopted this amendment on August 20, 1980. The amended provision was not considered in the Secretary's initial decision on October 24, 1980 (45 FR 70481–70510), partially approving and partially disapproving the Utah program because the adoption did not occur before June 16, 1980 (see "General Background on State Program Approval Process," 45 FR 70482).

In that decision the Secretary also set forth standards for applying the court order referenced above (45 FR 70482). Under those standards, the Secretary need not affirmatively disapprove state provisions similar to those Federal provisions suspended or remanded by the district court where the state had adoted such provisions in rulemaking which occurred after the date of the Round II District Court decision.

Although Utah did adopt modifications to UMC 817.103(a)(1) and SMC 816.103(a)(1) after the August 15, 1980, decision, the State did not want the Secretary to consider as part of its program any provisions which the court had indicated the Secretary could not require of a State. Accordingly, it "suspended pursuant to Judge Flannery's order" the provisions relating to cover and treatment of toxic materials on November 19, 1980. The latter action is identified in the State's resubmission on December 23, 1980. Utah elected to take this action in order to remain in accord with the court order and the revision and repromulgation of those provisions by OSM.

Based on these facts, the Secretary finds that SMC 816.103(a)(1) and UMC 817.103(a)(1), as promugated, are consistent with the requirement of 30 CFR 817/816.103(a)(1) for requiring a minimum burial depth, if not treated, and the provisions are in accord with the remanded order of the court. This finding is based on the Secretary's understanding that Utah's "suspension pursuant to Judge Flannery's order," only suspends or remands those provisions insofar as mandated by the court and as such does not affect the requirement to comply with those standards of the provision not addressed by the court. The court remanded the Federal rule because it did not include the alternative of treatment. In the case of this rule, the Utah "suspension" does not affect the applicability of the rule adopted August 20, 1980.

12. Three commenters argued that Utah's use of the phrase "to the extent technologically and economically feasible" in UMC 817.124(a) as a modifier to the requirement of the permittee to comply with the subsidence control plan approved pursuant to UMC 784.20, makes the Utah provision inconsistent with and less stringent than the 30 CFR 817.124(a).

The Secretary does not consider the phrase "to the extent technologically and economically feasible" to condition an operator's obligation to comply with the subsidence control plan. Rather, the Secretary agrees with the explanation of the use of the phrase submitted as part of the State's December 23, 1980, resubmission (Utah State Program Amended Text and Clarifications—Rules and Regulations (Adopted Amendments) page 55). In that discussion, Utah states that an operator must adopt the most technologically and economically feasible measures to control subsidence as mandated by Sections 102, 501(b) and 516(b)(1) of SMCRA. Further, the Secretary does not believe that an operator could argue legal non-compliance with an approved subsidence control plan on the basis that it was not feasible. Compliance with the plan is a standing condition of the permit. Arguments of "infeasibility" have no merit or standing. Accordingly, the Secretary finds UMC 817.124(a) consistent with and as stringent as 30 CFR 817.124(a).

13. It was noted by three commenters that while Utah added the word "noncancellable" to describe the type of prepaid insurance policy required in the protection of surface owners from the potential adverse effects of subsidence, the State did not delete the word "renewable." The commenters argued that under a "renewable" policy, the guaranteed coverage would necessarily expire at the end of the renewal term, thereby creating a situation where the coverage might expire as a result of nonpayment, notwithstanding that the policy is "noncancellable" during the term of the policy.

The Secretary agrees with the commenters that UMC 817.124(b) is inconsistent with and less stringent than 30 CFR 817.124(b) and has conditioned his approval of the Utah program on Utah's amending its provision to be consistent with the Federal regulation (see Finding (4)(c)(xxix), 46 FR 5905–5906).

14. It was pointed out by three commenters that while Utah has adopted in UMC 817.126(a) the buffer zone requirement of 30 CFR 817.126(a), the State also modified the determination the Division must make in order to waive the buffer zone. The commenters argued that by using the phrase "material damage which would result in the environmental degradation or safety hazards to streams, water bodies and associated structures" Utah has limited the use of a buffer zone. The commenters stated that the Federal rule requires the Division to determine that mining will not cause any "material damage" to listed surface structures. Further, the commenters argued, reductions in stream flow would not be considered a "material damage" under the Utah provision, when in fact loss of water owned by third persons would constitute "material damage" under the Federal rule. The commenters felt the Utah rule must be disapproved.

The Secretary believes that Utah's provision does not limit or restrict the determination of adverse effects due to material damage from subsidence. Utah

adopted, in UMC/SMC 700.5, a definition for "materially damage the quantity or quality of water" which is identical to that prescribed in 30 CFR 701.5. In that this definition recognizes changes in the quantity and quality of water supply as a material damage and there is no evidence to support that such changes would not result in "environmental degradation," the Secretary feels that UMC 817.126(a) is consistent with and as stringent as 30 CFR 817.126(a).

15. Three commenters stated that Utah did not respond to the Secretary's findings on October 24, 1980 (45 FR 70487), that the Utah definition of aquifer in UMC/SMC 700.5 was inconsistent with the definition of aquifer in 30 CFR 701.5.

The Secretary disagrees with the commenters. Utah adopted an amendment to its definition of aquifer on December 16, 1980, making the Utah definition identical to the Federal definition (See Administration Record No. UT–174) The amendment is contained in Utah's December 23, 1980, resubmission (Permanent Program Submission Under the Surface Mining Control and Reclamation Act of 1977—Proposed Amendments for Adoption).

16. Three commenters expressed concern with the provision of UMC/SMC 788.12(a)(1) which requires a permit revision if there is an increase in the size of the surface or subsurface area disturbed in an amount of 5% or greater than the originally approved area. Specifically, the commenters felt that this provision could allow a taking of property without due process of law. Further, they argued that Utah's rule is inconsistent with Section 511(a)(3) of SMCRA which requires that a revision of the permit boundary be treated as a permit revision. The commenters also contended that Utah's deletion of UMC/SMC 788.12(a)(1)(iv) only tends to limit those changes which are to be considered "significant departures" and as such require a permit revision.

A "disturbed area" is defined by UMC/SMC 700.5 and 30 CFR 701.5 to mean an area where vegetation, top soil or over burden is removed or upon which top soil, spoil, coal processing waste, underground development waste or noncoal waste is placed by surface coal mining operations. "Disturbed area" is contained within a "permit area," which is defined as the area of land and water within the boundaries of the permit approved by the regulatory authority. A permit area includes at a minimum all areas which are or will be affected by the surface coal mining and reclamation operations during the term of the permit. As all mines in Utah currently permitted are underground mines, the disturbed areas are not large in acreage. Hence an increase of less than 5% will not constitute a major change in the operations. Further, Utah adopted in UMC/SMC 788.12(d) a provision identical to 30 CFR 788.12(d). This section prescribes that "any extensions to the area covered by the permit, except for incidental boundary revisions, shall be made by an application for a new permit and shall not be approved under * * *" 788.12. The Secretary feels that Utah, by adopting the provision, has clearly given notice to the public as to the changes that will be considered significant.

The Secretary understands Utah's provision to address only "disturbed areas" and not "permitted areas." Accordingly, the Secretary does not find that significant changes will be obtained under the Utah provision. While the operator can change by up to 5% the disturbed area within the permit area, any change in the permit area is subject to approval by the regulatory authority, and any extensions other than incidental ones require a new permit. The Secretary considers Utah's provision to be consistent with the intent of 30 CFR 788.12(a)(1) to allow the regulatory authority discretion in providing parameters to determine what changes will constitute significant departures as used in the program.

The Secretary further finds that Utah's provision UMC/SMC 788.12(a)(1) defines what changes in the method of conducting operations, i.e., from room and pillar mining to longwall mining, would be considered a significant change from the approved permit and as such would require a permit revision. The Secretary finds Utah's deletion of UMC/SMC 788.12(d) consistent with the requirement of 30 CFR Chapter VII to limit variance from the Federal regulations to those cases where a standard has been established and the decisions are not made on a site-by-site basis.

17. Three commenters disagreed with the Secretary's preliminary analysis of the Utah State Window for Steep Slope Mining (see 45 FR 47485). The commenters argue that the Secretary must require the elimination of highwalls in all cases. The commenters contended that while Section 515(c) of SMCRA allows an exemption to the approximate original contour requirement of Section 515(b)(3) of SMCRA for mountain top removal operations and Section 515(b)(3) provides for an exemption for their overburden, no other exemptions are allowed by SMCRA. Further, the commenters stressed that Congress did not intend for general variances or exemptions from the performance standards in SMCRA. Finally, the commenters stated that Utah has presented no justification "for not implementing 30 CFR 826.12 in addition to subsection (b)." The commenters feel that "the remaining requirements of the section should apply to whatever backfilling is performed on the site."

The Secretary disagrees with the commenters. As he explained in detail in his initial decision on the October 24, 1980 (45 FR 70485–6), the requirement of Section 515(b)(3) to return an area to its natural approximate original contour is the determining provision of the Section and the elimination of highwalls is a means of accomplishing that mandate. Further, the Secretary believes that his approval of Utah's proposed state window implements Section 101(f) of SMCRA and 30 CFR 731.13 which mandate that consideration be given to environmental or agricultural conditions or local requirements unique to a particular state. At the same time, the Secretary has conditioned his approval of the Utah program on the State's revision of its program to include requirements consistent with and as stringent as those of 30 CFR 826.12 for the prevention of dumping certain materials on the downslope of steep slope areas (see Finding 4(c)(xxxi), 46 FR 5906).

20. Three commenters stated that Utah must revise Section 40–10–18 UCA of the Utah SCMRA before its program can be approved by the Secretary. The commenters contended that Utah's proviso in the section, "standard methods of mining," cannot be construed to be equivalent to the proviso of Section 516(b)(i) of "standard methods of room and pillar mining." Further, the commenters felt that an Attorney General's opinion is not sufficient for the Secretary to base his decision of equivalency.

The Secretary disagrees with the commenters. As discussed in Finding 1(a)(v) (46 FR 5900), the Secretary considers Utah's clarification that "standard methods of mining" applies to

"room and pillar" or "long wall" mining or a combination of those methods meets the requirements of consistency and stringency set forth by the Federal program. Section 516(b)(1) of SMCRA makes it clear that the subsidence controls in the Federal Act are not to prohibit room and pillar mining or longwall mining which is a technology which requires planned subsidence in a predictable and controlled manner. Further, the Secretary believes this interpretation to be fully consistent with legislative history of SMCRA (See H.R. Rep No. 218, 95th Congress, 1st Session 128 (1977); 1977 U.S. Code, Congressional and Administrative News 658). The Secretary considers the Attorney General's opinion part of the State program. As such, any failure by the State to abide by the opinion would be considered a violation of the program, just as a violation of its statute or regulations would be. Accordingly, the Secretary finds that Utah's statutory provision provides protection of the environment and the public equal to that guaranteed by SMCRA.

Dated: February 10, 1981.

Andrew V. Bailey,

Acting Director.

[FR Doc. 81-9030 Filed 3-24-81; 8:45 am]

BILLING CODE 4310-05-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA-6016]

Communities With Minimal Flood Hazard Areas for the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator, after consultation with local officials of the communities listed below, has determined, based upon analysis of existing conditions in the communities, that these communities' Special Flood Hazard Areas are small in size, with minimal flooding problems. Because existing conditions indicate that the area is unlikely to be developed in the foreseeable future, there is no immediate need to use the existing detailed study methodology to determine the base flood elevations for the Special Flood Hazard Areas.

Therefore, the Administrator is converting the communities listed below to the Regular Program of the National Flood Insurance Program (NFIP) without determining base flood elevations.

EFFECTIVE DATE: Date listed in fourth column of *List of* Communities with Minimal Flood Hazard Areas.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 755–5585, Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: In these communities, the full limits of flood insurance coverage are available at actuarial, non-subsidized rates. The rates will vary according to the zone designation of the particular area of the community.

Flood insurance for contents, as well as structures, is available. The maximum coverage available under the Regular Program is significantly greater than that available under the Emergency Program.

Flood insurance coverage for property located in the communities listed can be purchased from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program. The effective date of conversion to the Regular Program will not appear in the Code of Federal Regulations except for the page number of this entry in the Federal Register.

The entry reads as follows:

§65.7 List of Communities with Minimal Flood Hazard Areas.

State	County	Community name	Date of conversion to regular program
Ohio	Stark	Village of East Sparta	May 1, 1981.
North Dakota	Burke	City of Portal	May 26, 1981.
Washington	Whitman	Town of St. John	May 26, 1981.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Federal Insurance Administrator)

Issued: March 13, 1981.

Richard W. Krimm,

Acting Administrator, Federal Insurance Administration.

[FR Doc. 81-8882 Filed 3-24-81; 8:45 am]

BILLING CODE 6718-03-M

---

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. R. Gregg Chappell, National Flood Insurance Program, (202) 755–5585 or

Toll Free Line (800) 424–8872 (In Alaska and Hawaii Call Toll Free (800) 424–9080), Room 5150, 451 Seventh Street, S.W., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevations for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 60.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Final Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
California	Santa Rosa (City), Sonoma County (FI-8501)	Spring Creek	Doyle Park Drive (50 feet upstream from centerline)	*175
			Franquette Avenue (200 feet upstream from centerline)	*201
			Mayette Avenue (60 feet upstream from centerline)	*214
	Maps available for inspection at City Hall, Santa Rosa, California.			
Georgia	Waycross (City), Ware County (FI-8363)	Waycross Drainage Canal	3rd Corporate Limits at centerline	*88
			Morningside Drive—100 feet upstream of centerline	*90
			City Boulevard—20 feet upstream of centerline	*94
			Plant Avenue—30 feet upstream of centerline	*96

BILLING CODE 6718-03-M

FEDERAL MARITIME COMMISSION

46 CFR Part 536

[General Order 13, Revised, Amendment No. 8]

Publishing and Filing Tariffs by Common Carriers in the Foreign Commerce of the United States

AGENCY: Federal Maritime Commission.

ACTION: Interim rule.

SUMMARY: Foreign commerce rail/water tariffs must continue to publish a single factor through rate, but need not continue to break out the division, rate or charge for the port-to-port portion of a through service required by § 536.8(b). This action temporarily waives an existing regulatory requirement and is taken to accommodate ICC tariff filing exemptions for TOFC/COFC traffic and to reduce the tariff filing burdens of ocean carriers.

EFFECTIVE DATE: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Acting Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573 (202) 523–5725.

SUPPLEMENTARY INFORMATION: The Interstate Commerce Commission's recent decision in *Ex Parte 230 (Sub-No. 5)*, 46 FR 14346 (1981), has prompted the Federal Maritime Commission to temporarily waive a portion of its tariff regulations governing through rail/ocean transportation in foreign commerce. This interim action has been taken without prior notice and comment due to the fact that the ICC's decision was not released until February 19, 1981 with an effective date of March 23, 1981. The shortness of the time period involved makes it impractical to publish a final rule before the new ICC regulations take effect. Moreover, the public interest clearly requires that the Commission take prompt action to assuage the uncertainty *Ex Parte 230* has created in the multi-million dollar ocean transportation industry. The procedure to be implemented will insure that meaningful public tariffs continue to be on file and that ocean carriers adhere to the through rates published in those tariffs.

Effective March 23, 1981, transportation provided by railroads under trailer on flatcar (TOFC), container on flatcar (COFC), and certain other services connected with through intermodal traffic services will be exempt from ICC tariff filing requirements. This exemption apparently applies to all ex-ocean traffic in which United States railroads participate.

Since 1972, intermodal rail/ocean rates and routes have been accepted by the Commission and the ICC only in the form of a concurrently filed joint through tariff. This form was carefully devised to meet the requirements of both regulatory agencies and contained provisions describing the inland and ocean transportation, particularly the portion or division of the through rate received by each participating carrier, and is set forth in section 536.8(b) of the Commission's Rules (46 CFR 536.8(b)).

The ICC's amendments to 49 CFR Part 1300 will preclude a calculation of a through intermodal rate by combining its component land and ocean divisions. Because knowledge of the *through rate* is essential to the proper performance of the Commission's anti-rebating and anti-discrimination responsibilities under the Shipping Act, 1916 (46 U.S.C. 801, *et seq.*), it is necessary that ocean carriers *alone* be required to publish this through rate in their intermodal tariffs. Although the Commission does not regulate all

aspects of the through intermodal transportation being performed, the authority conferred by section 18(b) of the Shipping Act (46 U.S.C. 817(b)) fully supports the continued filing of the through rate collected from the shipper for such services. This arrangement does not subject land transportation itself to Shipping Act regulation, and as long as no jurisidiction is exercised over inland carriers, there is no legal or other obstacle to the Commission's continuation of its policy of requiring publication and adherence to through intermodal rates. *See United States v. Federal Maritime Commission (Gulf-U.K. Agreement)*, 636 F. 2d 792 (D.C. Cir. 1980), vacated pending rehearing.

The *Ex Parte 230* decision primarily affects compliance with the section 536.8 requirement that FMC intermodal tariffs include the ocean carrier's port-to-port division as well as a through rate. Heretofore, ocean carriers have met this requirement by stating the through rate on a weight or measure basis for each commodity carried in the through service, and also stating the rail division on a per container basis. The ocean portion of the through rate can only be calculated with reference to the *rail division* and then only with certain additional information, *e.g.*, the quantity of cargo moving in the container in question.

The Commission has been advised by several ocean carriers that the forthcoming ICC exemption of ex-ocean TOFC/COFC traffic is causing railroads to cancel existing concurrences with FMC regulated ocean carriers. If present ICC TOFC/COFC tariffs are cancelled, then present FMC intermodal tariffs will also have to be cancelled unless they are amended to provide significantly greater (and frequently changing) details concerning the ocean carriers' divisions or the Commission permits amendments which delete the ocean division altogether.

The former option is not a viable alternative at this time, both because railroads may not permit their TOFC/COFC charges to be published in FMC tariffs once this information is exempt from ICC requirements and because ocean carriers have claimed that an exact statement of the ocean division is impossible for all practical purposes given railroad ratemaking practices.[1]

Even if exact ocean divisions could be published in conjunction with the through rate, it would indirectly reveal the deregulated TOFC/COFC charges, thereby countermanding *Ex Parte 230* to a significant extent. Under these circumstances, the Commission believes it is neither appropriate nor feasible to continue requiring the publication of the ocean carrier's port-to-port division as provided by § 536.8(b).

Knowledge of the ocean carriers' division is of little practical use to the Commission, intermodal shippers or other interested parties.[2] Conduct actionable under the Shipping Act is triggered by the economic effects of the through rate, not the port-to-port division alone. Focusing solely upon the through rate will permit the Commission to lessen regulatory burdens on intermodal traffic by eliminating the present requirement for separately breaking out the ocean carrier's port-to-port division. Unless a through rate approach is taken, the revisions to 46 CFR Part 1300 will force the Commission to significantly increase the amount of detail with which the port-to-port rates and practices are described in intermodal tariffs—a requirement ocean carriers may be unable to meet. Other solutions to this problem may exist, but at this time the Commission believes the approach most consistent with both agencies' concern for stimulating transportation efficiencies is to rely solely upon the through rates for tariff filing purposes. The Commission has never interpreted Shipping Act section 18(b)(1) as mandating the ritualistic recitation of an exactly stated "port-to-port rate" in addition to the through rate in all instances of through transportation.[3] Rather, the plain purpose and language of the statute are adequately accommodated by the type and quantity of tariff matter which will provide meaningful information regarding the *ocean transportation* "between the United States * * * and a foreign country" subject to FMC jurisdiction under section 1 of the Shipping Act, 1916 (46 U.S.C. 801). The through route alone should meet this need in the case of rail/ocean intermodal transportation.

Temporary waiver of § 536.8's port-to-port division requirement will not impede the Commission's enforcement responsibilities nor alter formal complaint procedures in any way. Its purpose is simply to ensure there is no disruption of foreign commerce while the Commission attempts to develop final rules which will assure effective Shipping Act enforcement without placing undue regulatory burdens on intermodal cargoes.

Accordingly, that portion of section 536.8 which requires the publication of the ocean carrier's port-to-port divisions *for through rail ocean transportation only* will be waived until further notice. All other aspects of section 536.8 remain in effect. This waiver affects both existing tariffs and tariffs to implement new rail/ocean services and will remain in effect pending completion of a forthcoming Commission rulemaking proposal to permanently revise its tariff regulations governing through intermodal transportation.

This amendment to § 536.8 will take effect March 25, 1981. However, the rule has been written to apply only to transportation actually affected by the implementation of the ICC's new regulations.[4] Short notice publication is justified under 5 U.S.C. 553(d) because the interim rule will relax present tariff filing obligations and alleviate the regulatory and commercial conflicts which could arise in the absence of a clear indication of what tariff matter will continue to be accepted for filing at the FMC—and thereby become *prima facie* lawful—once the TOFC/COFC deregulation scheduled for March 23, 1981 takes effect.

The Commission certifies that this interim rule will not, if promulgated and adopted, have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164, September 19, 1980 (5 U.S.C. 601 *et seq.)*.

Therefore, it is ordered, That, pursuant to section 553 of the Administrative Procedure Act (5 U.S.C. 553(d)) and sections 18(b) and 43 of the Shipping Act, 1916 (46 U.S.C. 817(b) and 841a), Part 536 of 46 CFR of the Commission's Rules is temporarily amended by the addition of a new paragraph (c) to § 536.8 which reads as follows:

§ 536.8 Tariffs containing through rates and through routes.

* * * * *

[1] *See e.g., Report and Order in Docket No. 72-19*, 42 FR 59285 (1977). The ICC's *Ex Parte 230* decision is intended to encourage even greater flexibility and variation in railroad pricing.

[2] Indeed, the principal reason for the port-to-port breakout approach reflected in section 536.8 has been to avoid jurisdictional conflicts with the ICC prohibited under section 33 of the Shipping Act, 1916 (46 U.S.C. 832). The ICC's exemption of TOFC/COFC traffic now appears to have eliminated this problem.

[3] For example, the Commission has not required any breakout of the port-to-port division in an intermodal service where the inland transportation takes place in a foreign country.

[4] Petitions to review *Ex Parte 230 Sub-No. 5* are pending before the United States Court of Appeals for the Fifth Circuit and will be considered on an expedited basis. *American Trucking Associations, Inc., et al. v. Interstate Commerce Commission and United States of America* (Docket Nos. 81-4046 and 81-4080).

(c) Commencing upon publication of this rule in the Federal Register and until further notice of the Commission, tariffs containing rates for through rail/ocean transportation involving railroad movements within the United States must continue to be filed in full compliance with this section, except that such tariffs may omit the division, rate, or charge to be collected by the water carrier subject to the Act for the port-to-port portion of the through service, and existing tariffs may be amended to delete this information; *Provided, however,* that the port-to-port portion may be deleted only if the railroad transportation involved in the through route has actually been exempted from tariff filing responsibilities under the Interstate Commerce Act.

By the Commission March 23, 1981.*

Joseph C. Polking,
Acting Secretary.

Dissenting Opinion

Acting Chairman Kanuk, dissenting in part. While I agree with the majority that the Commission should address the impact of the Interstate Commerce Commission's (ICC's) final rule in Ex Parte No. 230 (Sub. No. 6), *Improvement of TOFC/COFC Regulation,* on ocean carriers' tariff filing requirements, I cannot agree that the Interim Rule should be implemented without providing for public notice and comment.

The Administrative Procedure Act (APA), 5 U.S.C. 553 (b) and (c), requires notice and an opportunity for comment on rules of a substantive nature. The Interim Rule is of a substantive nature. Provision is made for exceptions to this general rule when the agency finds that providing for notice and comment is "* * * impractical, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b)(B). The majority relies on the ICC's date of March 23, 1981, for putting its rule into effect, as the basis for concluding that notice and comment would be impractical. In addition, the majority states that the public interest requires prompt action by the Commission, in order to address the uncertainty created by the ICC's rule.

There are several problems with this approach. In the first place, the exceptions to the APA's notice and comment requirement have been narrowly construed by the courts, and it has been found that the "* * * mere existence of deadlines for agency action, whether set by statute or court order, does not in itself constitute good cause for a § 553(b)(B) exception." *U.S. Steel Corp.* v. *U.S. Environmental Protection,* 595 F. 2d 207, 213 (5th Cir. 1979); *State of N.J.* v. *U.S. Environmental Protection,* 626 F. 2d 1038, 1045 (D.C. Cir. 1980).

In this case, the Commission is faced with neither a statutory nor a court deadline. What it is faced with is the fact that the ICC's rule exempting rail TOFC/COFC movements from ICC regulation will become effective March 23, 1981. This fact, standing alone, certainly does not create a basis for implementation of the Interim Rule, particularly since the effect of the ICC's rule on intermodal movements is not clearly foreseeable. The Commission goes on to state that it has been advised by several ocean carriers that the forthcoming ICC exemption of ex-ocean TOFC/COFC traffic is causing railroads to cancel existing concurrences with FMC regulated ocean carriers. This general statement is the sole factual basis given by the majority for implementing the Interim Rule. The majority provides no details as to which ocean carriers, which rail carriers, or precisely what action the rail carriers might take. This last factor is particularly important. If, for example, the rail carriers intend to cancel their participation with ocean carriers in joint through intermodal tariffs based on a fear of antitrust exposure, the Interim Rule will not prevent this occurrence. If, on the other hand, rail carriers will, as a result of the ICC's final rule, simply request that their division be deleted from the involved intermodal tariffs, the proposal in the Interim Rule could constitute a means of dealing with the situation. By not supplying more factual information, the Commission fails to provide an adequate basis for implementing the Rule. I find this deficiency particularly disturbing, since the Rule makes a substantive change in the Commission's tariff filing rules, and reverses the position previously adhered to by the Commission that "* * * the separate statement of the charge applicable to the port-to-port transportation is necessary to comply with the mandate of section 18(b) [of the Shipping Act, 1916]." Filing of Tariffs By Common Carriers By Water In The Foreign Commerce of the United States and By Conferences of Such Carriers; Filing of Through Rates and Through Routes, Final Rule, 35 FR 6394, 6396 (April 21, 1970).

I would like to point out that I am as concerned as the majority is that intermodal rail/ocean TOFC/COFC movements continue without interruption. However, the Commission has no sound basis upon which it can conclude that, absent the Interim Rule, these movements will be interrupted. Therefore, I believe that the Commission is acting precipitously in implementing the Interim Rule. The better course of action, in my opinion, would have been for the Commission to have issued a circular letter reminding ocean carriers of their tariff filing obligations under the Commission's rules, and at the same time, to have issued a Notice of Proposed Rulemaking to be conducted on an expedited basis. This course would have permitted the Commission to formulate an appropriate response to the ICC's rule, based on comments from all parties involved.

BILLING CODE 6720-01-M

*Acting Chairman Leslie L. Kanuk submitted a separate dissenting opinion which follows. Commissioner Peter N. Teige did not participate.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[Gen. Docket No. 80-468; FCC 81-68]

Amendment of the Aforementioned Part of the Commission's Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Report and Order amends the Commission's rules as follows: 1) the effective date of any full Commission action shall be the date of public notice of such action, unless the Commission affirmatively designates a different effective date; 2) all Commission actions become final, for purposes of seeking agency reconsideration or judical review, on the date of public notice of such actions; 3) the date of public notice shall commence at 3 p.m. Eastern Time on a given day. The purposes of these rule amendments, taken in the same order as the amendments outlined above, are as follows: 1) to clear up confusion as to when a full Commission action becomes effective, 2) to clear up confusion as to when any Commission action becomes final, and 3) to pinpoint the time of day when Commission decisions become final in order to make courthouse races a fair competition for all parties.

EFFECTIVE DATE: April 27, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Terence Mahony, Office of General Counsel, (202) 254-6530.

SUPPLEMENTARY INFORMATION:

Memorandum Opinion and Order

Adopted: February 25, 1981.
Released: March 10, 1981.

In the Matter of Addition of new Section 1.103 to the Commission's Rules of Practice and Procedures; Amendments to Section 1.4(b) of those Rules, [General Docket No. 80-468].

1. The primary purpose of this Order is to add new Section 1.103 to the Commission's rules. Subsection (a) of this rule will generally provide that, unless otherwise specified by law, Commission rules, or Commission discretionary action, the effective date of any Commission action will be the date of public notice as defined in Section 1.4(b) of our rules, 47 CFR § 1.4(b). Subsection (b) of the new rule will establish a standard of finality, namely, that Commission actions shall be final, for purposes of seeking

reconsideration of judicial review, on the date of public notice of such actions. The other purpose of this Order is to amend Section 1.4(b) and specify the precise starting time for the date of public notice.

2. At a public meeting dated September 10, 1980, the Commission deferred final adoption of this Order until the public was given an opportunity to comment on the proposed rules. Since these rules relate solely to practice and procedure, it should be noted that the Commission was not required to give prior notice and the opportunity for comment. See Section 553(b) of the Administrative Procedure Act, 5 U.S.C. § 553(b). Nonetheless, the Commission decided that the potential impact of these proposals on longstanding Commission practices warranted prior public comment. By separate order released September 15, 1980, the Commission specified a period of 30 days during which the public was invited to file comments.

3. During this period, the Commission received four sets of written comments. These comments were filed by Dow, Lohnes, and Albertson (DLA), Baraff, Koerner, and Olender (BKO), American Telephone and Telegraph Company (AT&T), and RCA Global Communications, Inc. (RCAG). The comments of DLA and BKO were directed mainly toward our statement that the proposed rule (establishing a relationship between the effective date and date of public notice for Commission actions) would adopt an approach which is substantially the same as the scheme already in effect for staff actions. DLA and BKO both noted that there are often long intervening delays between the time the staff adopts an action and the time that action becomes effective. Both commented that such delays could force interested parties to postpone execution of their private agreements, resulting in possible detriment. Apart from this matter, BKO also noted that copies of Public Notices are not always available on their release date from the Office of Public Affairs.

4. The comments of AT&T and RCAG focused on our proposal to establish the date of public notice as the standard of finality for Commission decisions. AT&T stated that adoption of this rule might deprive interested parties of their statutory right to seek immediate judicial review of an effective Commission decision. The comments of RCAG shared this view. RCAG also recommended that the "race to the courthouse" should begin when the full text of a decision is released by the Commission and not when that decision is later published in the Federal Register (when such publication is required). RCAG also believes that a Commission decision becomes final, for purposes of seeking judicial review, when that decision is adopted at a public meeting, provided that all parties are immediately bound by the decision.

5. The Federal Communications Bar Association (FCBA) also submitted comments in which it urged the Commission not to adopt the proposed rules. FCBA contends that, consistent with fundamental principles of due process, an action of the Commission should be final and reviewable when that action becomes effective for purposes of reliance or obligations.

Discussion: Effective Dates of Commission Decisions

6. The effective date of any Commission action may be defined as that date on which parties may begin to exercise private rights created by such action or, alternatively, the date on which parties must begin to comply with obligations imposed by such action. The date of public notice of any Commission action, which is further discussed *infra*, is that date from which any specified period for filing pleadings or other documents begins to run. Clearly these two dates have separate significance.

7. As stated above, Section 1.4(b) of the Commission's rules defines the date of public notice for different kinds of Commission actions. In general, our rules do not clearly identify the effective dates for these different kinds of actions.[1] Despite the absence of specific guidance in the rules, a practice has developed by which parties often act in reliance upon a final action by the Commission after its adoption but prior to the date of public notice. In such proceedings, the Commission has affirmatively designated an earlier effective date or the parties have reasonably assumed its existence. In other proceedings, the Commission has imposed obligations on parties which have taken effect on the date of adoption of such action, even though the date of public notice might not occur until later. Notwithstanding these informal practices, the absence of specific guidance in the rules has sometimes created uncertainty as to when a Commission action becomes effective.

8. The Commission has broad discretion to designate the effective dates of its actions. *See generally* 47 U.S.C. 154 (i) and (j). In order to remove any uncertainty, we will add § 1.103(a) to our rules. Subsection (a) will first establish that the effective date of any Commission action shall be the date of public notice of such action, unless the Commission affirmatively designates a different effective date. Thus, unlike the current practice, no party hereafter will be allowed to act in reliance upon a Commission action prior to the date of public notice, unless the Commission designates otherwise. Subsection (a) will further provide that the Commission, on its own motion or on motion by any party, may designate an effective date for its actions that is either earlier or later than the date of public notice.[2] Any party preferring to have an immediate effective date is urged to file a timely motion so that the Commission may consider that motion along with the other substantive matters in the same proceeding. Finally, subsection (a) will provide that the designation of a different effective date will have no bearing on specified periods during which pleadings and other documents must be filed for the purpose of seeking further agency or judicial action. Those periods will commence on the date of public notice, as defined in amended § 1.4(b) of the rules.

9. Because new § 1.103(a) creates a relationship between the effective date and the public notice date of Commission actions, we wish to restate the meaning and importance of a public notice. Public notice means legal notice, namely, the notice to the public that is required by the Administrative Procedure Act. The primary purpose of public notice is to formally advise all interested parties and the public of the fact that the Commission or the staff has taken action with respect to some matter. The date on which a public notice is issued has legal importance, since specified periods for filing pleadings and other documents begin to run from this date. As provided for in our amendments to Section 1.4(b), the date of public notice shall commence at 3 P.M. Eastern Time on the day after any of the following dates:

[1] There are Commission rules that provide effective date guidance for certain kinds of actions. Section 1.102 of the rules, 47 CFR 1.102, sets forth effective date guidance for staff actions taken pursuant to delegated authority. See also, § 1.427, 47 CFR 1.427, for guidance regarding the effective date for Commission rules.

[2] When an earlier effective date is designated, the Commission will ordinarily issue an order notifying the parties and the public of its action. However, the timing of the release of this order will not affect the designated effective date. In other words, if the Commission delays in issuing its order designating an earlier effective date, such delay will not cause the effective date to be changed.

(1) For documents in notice and comment rule-making proceedings, the date of publication in the Federal Register.

(2) For other documents released by the Commission (whether or not published in the Federal Register), the release date. A document is "released" by making the full text available to the press and the public in the Commission's Information Office. The release date appears on the face of the document. [Note omitted.]

(3) If the full text of an action document is not to be released by the Commission but a descriptive document entitled "Public Notice" is released, the date on which the descriptive "Public Notice" is released. [Note omitted.]

(4) If a document is neither published in the Federal Register nor released, and if a descriptive document entitled "Public Notice" is not released, the date on which the document is sent (*i.e.*, mailed, telegraphed, etc.) to persons affected by the action.

As explained below, we are specifying a particular time for the commencement of public notice in order to make any "race to the courthouse" a fair competition for all parties.

10. It must be emphasized that a Commission news release will never constitute legal public notice of any Commission action. Some confusion may persist because a news release is often referred to informally as a "Public Notice." In fact, the two items are distinctly different. A descriptive document entitled "Public Notice" constitutes legal public notice of certain Commission actions as provided for in Section 1.4(b) (3) and (4) of the rules. On the other hand, a news release is an unofficial description of certain Commission actions or other activities. A news release and its release date have no legal significance whatsoever. *See, e.g., Microwave Communications Inc.* v. *FCC*, 515 F.2d 385, 391–392 (D.C. Cir. 1974). Furthermore, when "Public Notice" is the method used to give legal public notice of a Commission action, the Commission ordinarily will not issue a news release to describe that same action.

11. New Section 1.103(a) will not disturb the current practice for actions taken by the staff pursuant to delegated authority. Under existing Section 1.102(b)(1) of our rules, 47 C.F.R. § 1.102(b)(1), staff actions "shall, unless otherwise ordered by the designated authority, be effective upon release of the document containing the full text of such action, or in the event such a document is not released, upon release of a public notice announcing the action in question." Read literally, Section 1.102(b)(1) would appear to set forth the same scheme for staff actions that we are adopting for full Commission action—namely—that the effective date of any action is the date of public notice, unless otherwise specified. The comments of DLA and BKO, summarized above, in effect stated that such a reading of Section 1.102(b)(1) could produce long and harmful delays between the adoption of an action by the staff and the effective date of the action. In response to these concerns, we recognize that, under current practice, the staff generally takes the posture that its actions become effective immediately. Although the staff may not always explicitly state that its action is effective immediately, the clear import of its actions is to allow parties to act without awaiting delivery of a written decision. For example, the staff frequently advises interested parties by telephone that final action has been taken so that those parties can act immediately. Nothing in this order is intended to or should change the way in which the staff operates. The staff will have the same discretion it has exercised in the past to make its actions effective immediately. For the sake of clarification, however, a "Public Notice" and any other document reflecting staff action will in the future indicate whether the action was made effective immediately. Apart from effective dates for staff actions, we also wish to make clear that the "3 P.M." rule adopted in this proceeding will apply to staff actions. Thus, the date of public notice for staff actions will begin at 3 P.M. Eastern Time on the day following the release of either the full text of the action or a descriptive "Public Notice" announcing the action. *See* Section 1.4(b) as amended.

Discussion: Finality of Commission Decisions

12. Uncertainty also persists as to when a Commission decision becomes final for purposes of seeking agency reconsideration or judicial review. The occurrence of that date of finality is significant because pleadings and other documents filed prior to that date could be dismissed as being premature. Similarly, pleadings filed after the expiration of a specified period commencing from that date could be dismissed as not being timely-filed. Finally, that date can be significant in proceedings where interested parties race to file their appeals with different appellate courts.

13. Section 402(c) of the Communications Act, 47 U.S.C. 402(c), generally provides that a "notice of appeal" to the court shall be filed "within thirty days from the date upon which public notice is given of the decision or order complained of." This provision applies to Commission actions enumerated in Section 402(b) of the Act. For parties seeking agency reconsideration, Section 405 of the Communications Act, 47 U.S.C. 405, provides that "a petition for rehearing must be filed within thirty days from the date upon which public notice is given" of the Commission action. Section 1.4(b) of the Commission's rules, as amended and discussed *supra*, provides guidance for determining the date of public notice for each kind of Commission action. Thus, with respect to relief sought under Sections 402(c) or 405 of the Act, an interested party need only consult Section 1.4(b) to determine when a Commission action becomes final for purposes of seeking further relief.

14. However, with regard to seeking judicial review for Commission actions other than those enumerated in Section 402(b), and in accordance with Section 402(a) of the Act, federal law elsewhere provides that "any party aggrieved by the final order may, within 60 days after its entry, file a petition to review the order * * *" 28 U.S.C. 2344. Since Section 2344 refers to the "entry" of a final order rather than "the date upon which public notice is given", confusion has persisted over whether § 1.4(b) of the rules should be applicable to the question of finality here.

15. For example, the United States Court of Appeals for the Second Circuit decided a case which involved the issue of when "entry" of a final order of the Commission occurred. *ITT World Communications, Inc.* v. *FCC*, 621 F.2d 1201 (2d Cir. 1980). That issue arose out of a Commission decision adopted at a public meeting on December 12, 1979. On that same day, an interested party filed a petition for review with the Second Circuit. Then on January 3, 1980, the Commission released a full text of its decision. On that same day, two other interested parties filed petitions for review within minutes of each other, one with the Second Circuit and the other with the United States Court of Appeals for the District of Columbia Circuit. All three petitions were filed pursuant to 28 U.S.C. 2344. Before the court could decide which party had won the race to the courthouse, it first had to decide when the race began, that is, when "entry" of the final order took place. The court concluded that the Commission's decision became final for purposes of seeking judicial review on December 12th, the date of the public meeting. Apparently, the court gave little or no weight to Section 1.4(b) of the Commission's rules. More importantly,

the court majority stated that the Commission has the authority to adopt clearcut rules for determining the finality of its decisions. As the court stated:

> If federal administrative agencies would promulgate straightforward regulations explaining how and when their reviewable orders are to issue, protracted procedural disputes born of the desire to win the race to the courthouse would largely be consigned to an early grave. *ITT World Communications, Inc.* v. *FCC, supra*, 621 F.2d at 1210, quoting *International Union of Electrical, Radio and Machine Workers* v. *NLRB*, 610 F.2d 966, 984 (D.C. Cir. 1979).

16. We are responding to this judicial invitation by adopting subsection (b) to new Section 1.103. The primary purpose of this new rule is to make clear that the statutory terms "entry" of a final order and "the date upon which public notice is given" have the same meaning and, therefore, that newly-amended § 1.4(b) of our rules will determine that date of finality. In particular, § 1.103(b) provides that *any* Commission action becomes final, for purposes of seeking agency reconsideration or judicial review, on the date of public notice as defined in § 1.4(b) of our rules.

17. As explained above, the amended § 1.4(b) specifies that public notice officially begins at 3 P.M. on a particular day. We have adopted this amendment in part to help avoid some of the problems encountered in *ITT World Communications, Inc.* v. *FCC supra*. In that case, there was considerable confusion as to when documents became officially available and when parties could file papers seeking relief from the courts. Notice of these facts can be especially important since different parties sometimes seek review of the same Commission action in different courts. By specifying a particular time as the beginning of public notice, we hope to make those races to the courthouse fair for all parties.[3] In sum, combining the amendments to § 1.4(b) with new § 1.103(b), it should be clear that, with respect to any Commission action, the date of finality shall be the date of public notice, the date of public notice shall begin at 3 P.M. Eastern Time, and pleadings and other documents seeking further relief may normally be filed commencing from 3 P.M. on that date.[4]

18. We have given careful consideration to the position of AT&T and RCAG that adoption of this rule of finality would foreclose a statutory right to seek immediate judicial review. As discussed above, Section 402(c) of the Communications Act and Section 2344 of Title 28, U.S. Code, contain such key words as "the date upon which public notice is given" and "entry" of a final order as guidance to determine the finality of a Commission decision. As the courts have stated, the Commission has the authority to interpret this language and specify the date of finality for its decisions. Moreover, we find nothing in the language of these sections, either express or implied, which suggests that a statutory objective would be violated or a statutory right foreclosed by a standard of finality such as the one we are adopting in this proceeding. If a decision adopted at a public meeting is made effective immediately, an aggrieved party always has the alternative of seeking immediate judicial relief in the form of a stay (or, if a party prefers, a stay from the Commission). *See* 28 U.S.C. 1651; 47 CFR 1.106(n). Finally, we wish to comment on RCAG's recommendation that, for certain decisions, the "race to the courthouse" should begin when the full text of the decision is released by the Commission and not when that decision is later published in the **Federal Register** (when such publication is presumably required). We note that under § 1.4(b) of our rules, as amended in this proceeding, **Federal Register** publication governs the date of public notice only with regard to documents in notice and comment rulemaking proceedings. Since an interested party generally cannot seek judicial review of a notice of proposed rulemaking, we assume that RCAG is directing its recommendation primarily toward those orders which adopt, delete, or amend a Commission rule. We do not wish to change § 1.4(b)(1) of our rules, especially since the Administrative Procedure Act requires **Federal Register** publication of "substantive rules of general applicability" and "each amendment, revision, or repeal" of such rules. See 5 U.S.C. 552(a)(1) (D) and (E).[5] Apart from this statutory requirement, we see no reason why interested parties cannot await formal publication before seeking judicial review. Again, if a party feels that delay will result in harm, that party can petition for an immediate stay from a court or the Commission.

19. In its comments, FCBA argues that a) no important public interest goal will be served by making parties wait for release of the Commission's decision before seeking judicial review, b) creating a distinction between "effectiveness" and "reviewability" will disserve the due process rights of parties, c) the proposal to designate earlier effective dates will lead to additional pleadings, probable delay, and bifurcated review, d) the proposal to fix the date of public notice on the day following the occurrence of certain events will cause confusion and delay, and may conflict with certain other rules, and e) the use of the terms "Public Notice" and "date of public notice", which have different meanings, will cause confusion. In the alternative, FCBA proposes that any "race to the courthouse" rules adopted herein exclude Section 402(b) actions, that the finality of Section 402(a) actions be determined on a case-by-case basis, and that newly-adopted rules be deemed final upon their release and not upon publication in the **Federal Register**.

20. We have carefully considered the arguments of the FCBA. Contrary to FCBA's view, we believe important interests will be served by making parties await the release of the Commission's decision before seeking judicial relief. Oftentimes, an Order adopted at a Commission meeting becomes subject to editorial changes after its adoption but prior to its release. In extreme cases, the Commission might adopt an Order at a meeting, send back the Order to the staff for editorial changes prior to release, only to have the Order so substantially changed that Commission consideration becomes necessary again. In one actual case, the Commission adopted an Order (in December, 1978) concluding that the language in a particular tariff was so ambiguous that the tariff could be given no effect. When the text of that Order was returned to the staff for editorial

---

[3] When the Commission designates an earlier effective date, parties may begin to act in reliance upon a Commission decision from that earlier effective date. However, the period for seeking agency reconsideration or judicial review will not commence until the subsequent date of public notice.

[4] The first sentence of § 1.4(b) generally provides that, for any action taken by the full Commission or its staff, the first day to be counted for computing pleading periods "is the day after the day on which public notice of that action is given." Since our new rules provide that the date of public notice begins at 3 P.M. Eastern Time on a given day, the first day to be counted for any pleading period shall be the next calendar day after that date of public notice. For example, assume that, on Monday, the Commission releases copies of a recently adopted memorandum opinion and order in accordance with § 1.4(b)(2). The date of public notice for that action will begin on Tuesday at 3 P.M. Eastern Time. The first day to be counted for any pleading period will be Wednesday.

[5] Although **Federal Register** publication is the controlling date for documents in notice and comment rulemaking proceedings, the Commission will try to release copies of these documents to the public on the same day that **Federal Register** publication occurs. However, in the event that copies are not made available on that same day, it is emphasized that the **Federal Register** publication date still controls for purposes of determining the date of public notice.

changes prior to release, it soon became apparent that the matter was wrongly decided. The Order was never released. Instead, the staff redrafted the Order, recommended a different conclusion, and returned it to the Commission for fresh consideration. The Commission adopted the new conclusion (July, 1979) and the Order was released soon thereafter. *See The Associated Press*, 72 FCC2d 760 (1979). Were we to adopt the PCBA proposal, the parties in that case could have filed their appeals after adoption of the first Order, only to discover later that the final Order ultimately released contained a different result than the one originally reached. Such a possibility would not serve the interests of the courts, the Commission, or the affected parties. Rather we believe our finality date rules are consistent with the realities of Commission decisionmaking, may encourage the parties to acquaint themselves with the Commission's written decisions before filing appeals, and may reduce the strain on judicial resources. We also fail to perceive how the due process rights of parties will be harmed in any way by postponing the right to appeal until the date of finality. As we have stated, any aggrieved party may seek a stay from the Commission or the courts after the adoption of a decision but before its full release. And further, if an appeal on the merits is filed and the court reverses the Commission's decision, any private actions taken by any parties pursuant to an effective date designation would have to be undone.

21. The FCBA also contends that our rule permitting designation of earlier effective dates will lead to more pleadings, probable delay, and bifurcated review. First, FCBA's prediction of more pleadings is greatly exaggerated. We believe that the insertion of one or two additional sentences (requesting a special effective date) in the primary pleadings will be sufficient. Such a request would not warrant a separate pleading. Nor do we believe that this rule will cause undue delay in our processes. Normally, determination of an order's effective date should not involve complex issues that would consume much time. We also do not foresee how our proposed rule here could lead to bifurcated judicial review since these new rules make clear that our decisions do not become final until the occurrence of certain events. See § 1.4(b) and new § 1.103(b). Thus, since the courts have recognized an agency's discretion to specify its own finality dates, an appeal (other than a petition for injunctive relief) filed prior to the finality date would be dismissed.

22. We also disagree with FCBA's contention that our proposal to fix the date of public notice on the day following the occurrence of certain events will produce confusion. On the contrary, we expect that the rules, once understood, will eliminate the current problems caused by the uneven release of Commission documents. However, we agree with FCBA that adoption of our proposed rules will require conforming amendments to other rules.* We have also tried to eliminate in this Order any confusion arising from the similar terms "Public Notice", which is a document, and "date of public notice", which is a day of the week.

23. Finally, FCBA urges the Commission to determine the finality of Section 402(a) actions on a case-by-case basis, rather than via the 3. P.M. rule, and further urges that, if this rule is adopted, it should exclude Section 402(b) actions since all such actions are appealable to only one court. As discussed above, we reject the case-by-case approach in favor of clearcut rules of finality because we believe this is the best way to eliminate disputes and also promote fair courthouse races. Although we recognize that courthouse races will not arise under Section 402(b) actions, we would rather, for the sake of clear uniformity, apply the finality rule to all appealable actions and we do not believe that parties to a Section 402(b) action will be inconvenienced or harmed in any way by complying with this rule.

Application of these Rules to Hypothetical Situations

24. The following hypothetical situations are presented to assist in understanding the meaning and impact of new § 1.103 and amended § 1.4(b):

Example 1: At a public meeting, the Commission considers an application to transfer control of a broadcast license. The Commission grants the transfer application, but directs the staff to make editorial changes in the draft Memorandum Opinion and Order. None of the parties to the proceeding moves the Commission to designate a special effective date, and the Commission takes no such action on its own. On the day following the public meeting, a news release announcing the Commission's action is issued. Two weeks later, an Order containing the full text of the Commission's decision is released to the public. As provided for in amended Section 1.4(B)(2) of the rules, the date of public notice shall commence at 3 P.M. Eastern Time on the day following the release date. Furthermore, as provided for in new Section 1.103(a), the public notice date of this action is also its effective date, since the Commission did not affirmatively designate a different effective date. Finally, the news release issued the day after the Commission's public meeting has no bearing on the determination of either the effective date or the date of public notice.

Example 2: At a public meeting, the Commission considers an application to transfer control of a broadcast license. The Commission grants the transfer application, but directs the staff to make editorial changes in the draft Memorandum Opinion and Order. Meanwhile, the transferee has already asked the Commission to designate an immediate effective date (if the Commission approves the transfer) on the ground that its private contract with the transferor might expire before the Order is released. At that meeting, the Commission designates an immediate effective date in accordance with new Section 1.103(a) and issues a separate order containing notice of this action. Thus, the parties are free to execute their private contract immediately. However, pursuant to Section 1.4(b)(2), the date of public notice will not begin until 3 P.M. Eastern Time on the day after the Order containing the full text of the Commission's decision is released.

Example 3: At a public meeting, the Commission considers an application to transfer control of a broadcast license. Even though no petitions to deny or other objections were filed, the application is presented for full Commission consideration because the proposed transaction raises important public interest questions. After resolving these questions in favor of the applicants, the Commission orders a grant of the application. Since the application is uncontested, the Commission does not plan to issue a Memorandum Opinion and Order or any other full text of its decision. Neither the parties to the application nor the Commission move for designation of a special effective date. Five days after the public meeting, a descriptive "Public Notice" announcing the action is released to the public. The date of public notice begins at 3 P.M. Eastern Time on the day after the release date, in accordance with Section 1.4(b) (3). Furthermore, pursuant to new Section 1.103(a), the public notice date of this action is also its effective date, since the Commission did not affirmatively specify a different effective date.

Example 4: At a public meeting, the Commission adopt a decision concluding that certain services offered by a common carrier do not violate the Communications Act. The Commission also grants a motion to designate an immediate effective date and issues a separate order containing notice of this action. Another party who had filed an opposition pleading intends to appeal the Commission's decision. The Memorandum Opinion and Order containing the full text of the Commission's decision is released two weeks after the public meeting. As provided for in Section 1.4(b)(2), the date of public notice begins on the day after that release date. This Commission decision is appealable under Section 402(a) of the Communications Act, and therefore carries the potential for a courthouse race. That race to seek judicial review in different courts may begin at 3 P.M. Eastern Time on the date of public notice, in

*We will make conforming changes to the following rules: § 1.104 (b) and (d); § 1.106(f); § 1.108; § 1.115(d); § 1.429(d).

accordance with new Section 1.103(b) and amended Section 1.4(b) of the rules. The first day to be counted in computing the 60-day filing period (see 28 U.S.C. § 2344) would be the day after the date of public notice. *See* Note 4, *supra*.

Conclusion

25. Authority for adoption of the rule amendments contained herein is set forth in Section 4 (i) and (j), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154 (i) and (j) and 303(r).

Accordingly, it is ordered that, effective April 27, 1981, § 1.103 of the Commission's rules, 47 CFR 1.103, is added, § 1.4(b), 47 CFR 1.4(b), is amended, and the rules listed in Note 6 of this Order are amended, as set forth in the attached Appendices.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 1—PRACTICE AND PROCEDURE

Appendix I

1. In § 1.4, the last sentence of paragraph (b) is revised, the notes following paragraphs (b)(2) and (b)(3) are removed, and paragraphs (b)(1), (b)(2), (b)(3) and (b)(4) are revised to read as follows.

§ 1.4 Computation of time

* * * * *

(b) * * *

The date of public notice commences at 3 P.M. Eastern Time on the day after any of the following dates:

(1) For documents in notice and comment rule-making proceedings, the date of publication in the **Federal Register**.

(2) For other documents released by the Commission (whether or not published in the **Federal Register**), the release date. A document is "released" by making the full text available to the press and the public in the Commission's Information Office. The release date appears on the face of the document.

(3) If the full text of an action document is not to be released by the Commission but a descriptive document entitled "Public Notice" describing the action is released, the date on which the descriptive "Public Notice" is released.

(4) If a document is neither published in the **Federal Register** nor released and if a descriptive document entitled "Public Notice" is not released, the date on which the document is sent (*i.e.*, mailed, telegraphed, etc.) to persons affected by the action.

* * * * *

2. A new, § 1.103 is added to read as follows:

§ 1.103 Effective dates of Commission actions; finality of Commission actions.

(a) Unless otherwise specified by law or Commission rule (e.g. Sections 1.102 and 1.427), the effective date of any Commission action shall be the date of public notice of such action as that latter date is defined in § 1.4(b) of these rules: *Provided*, That the Commission may, on its own motion or on motion by any party, designate an effective date that is either earlier or later in time than the date of public notice of such action. The designation of an earlier or later effective date shall have no effect on any pleading periods.

(b) Notwithstanding any determinations made under subsection (a) of this section, Commission action shall be deemed final, for purposes of seeking reconsideration at the Commission or judicial review, on the date of public notice as defined in § 1.4(b) of these rules.

Appendix II

Remove headnote which appears immediately above § 1.101 of the Commission's rules and add the following:

Reconsideration and Review of Actions taken by the Commission and Pursuant to Delegated Authority; Effective Dates and Finality Dates of Actions.

Appendix III

Conforming Amendments

§ 1.104 [Amended]

1. In the first sentence of § 1.104(b), remove the words: "the date of release of the document containing the full text of such action, or in case such document is not released, after release of a public notice announcing the action in question."

Add the following: "the date of public notice of such action, as that date is defined in § 1.4(b) of these rules."

2. In the first sentence of § 1.104(d), remove the words: "the date of release of the document containing the full text of the final action on his petition, or in case the document is not released, after release of a public notice announcing the final action on his petition."

Add the following: "the date of public notice of such action, as that date is defined in § 1.4(b) of these rules."

§ 1.106 [Amended]

3. In the first sentence of § 1.106(f), remove the words: "the date of release of the document containing the full text of the action taken or, in case such document is not released, after release of a public notice announcing the action in question."

Add the following: "the date of public notice of the final Commission action, as that date is defined in § 1.4(b) of these rules."

§ 1.108 [Amended]

4. In § 1.108, remove all after the words: "within 30 days."

Add the following: "from the date of public notice of such action, as that date is defined in § 1.4(b) of these rules".

§ 1.115 [Amended]

5. In the first sentence of § 1.115(d), remove the words: "the date of release of the document containing the full text of such action, or in case such a document is not released, after release of a public notice announcing the action in question".

Add the following: "the date of public notice of such action, as that date is defined in § 1.4(b) of these rules."

§ 1.429 [Amended]

6. In the first sentence of § 1.429(d), remove the words: "after publication in the **Federal Register** of the document containing a full text of the action taken or, if the document is not published, within 30 days after the full text of the document is released."

Add the following: "from the date of public notice of such action, as that date is defined in 1.4(b) of these rules."

47 CFR Part 73

[BC Docket No. 79-219; RM-3600, RM-3273]

Radio Broadcast Services; Deregulation of Radio; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: Action taken herein corrects several minor errors contained in the Commission's Report and Order in the matter of deregulation of radio, published in 46 FR 13866, February 24, 1981.

DATE: March 17, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Roger D. Holberg, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Released: March 17, 1981.

By the Commission:

1. On February 24, 1981 (46 FR 13866), the Commission released a *Report and Order* in the above-captioned proceeding. A few errors contained in

that *Report and Order* have come to light which warrant correction.[1]

2. Paragraph 111 of the body of the *Report and Order* should be corrected as follows:

111. The policies enunciated herein, along with the relevant rule changes set forth in Appendix A, will become effective [April 3, 1981], unless a stay of the effectiveness is requested and granted. After the effective date of these policies, applications for new stations, as well as applications for the assignment, transfer, renewal and/or modification of existing stations, will be modified as set forth in Appendix J, and all such applicants will be required to file only the information requested therein.

3. Additionally, a portion of paragraph 11 of Appendix A of the *Report and Order* is incorrect. In that paragraph, the part referring to § 73.3526(a) of the Commission's Rules should be corrected as follows:

(a) *Records to be maintained.* Every applicant for a construction permit for a new station in the commercial broadcast services shall maintain for public inspection a file containing the material described in (1) of this paragraph. [Every permittee or licensee of an AM, FM or TV station in the commercial broadcast services shall maintain for public inspection a file containing the material described in (1), (2), (3), (4), (5), (6), and (7) of this paragraph. In addition, every permittee or licensee of a TV station shall maintain for public inspection a file containing the material described in (8), (9), (11), (12), and (13) of this paragraph;] every permittee or licensee of an AM or FM station shall maintain for public inspection a file containing material described in (14) of this paragraph. The material to be contained in the file is as follows:

* * * * *

3. Footnote 93 of the body of the document should be corrected to read:

"This will also apply to the [buyer's] portion of assignment and transfer applications.

4. Finally, in paragraph 9 of Appendix A, the notation "(a)" should be added at the very beginning of the portion of the text of § 73.1840, *Retention of Logs*, set forth therein and five asterisks (*) should be added at the end of that portion to indicate that no changes to § 73.1840(b) of the Commission's Rules are being made.

47 CFR Part 73

[BC Docket No. 80-204; RM-3421]

Radio Broadcast Services; FM Broadcast Station in Auburn, Maine; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: The Report and Order in this proceeding inadvertently made reference to the assignment of FM Channel 260 to Auburn, Maine as a Class C channel. The Erratum serves to correct the designation of the assignment as Class B.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Released: March 17, 1981.

By the Chief, Policy and Rules Division:

The *Report and Order* in this proceeding, released February 25, 1981, (46 FR 15149) assigned Channel 260 in place of Channel 261A at Auburn, Maine. Inadvertently reference was made to the channel as a Class C assignment. The community of Auburn is located in the zone designated as Class B and petitioner had requested a Class B channel. Thus, the assignment of Channel 260 at Auburn should have been designated as a Class B channel. The ordering clause amending the FM Table of Assignments, paragraph 8, however, was listed correctly.

Federal Communications Commission.

Henry L. Baumann,

Chief, Policy and Rules Division, Broadcast Bureau.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Extension of time for filing exceptions to proposed rule.

SUMMARY: This action extends the time for filing exceptions to a recommended decision concerning proposed amendments to 29 milk orders. Central Milk Producers Cooperative requested the additional time.

DATE: Exceptions now are due on or before April 13, 1981.

ADDRESS: Exceptions (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7311.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued July 10, 1980; published July 15, 1980 (45 FR 47432).

Supplemental Notice of Hearing: Issued July 21, 1980; published July 25, 1980 (45 FR 49584).

Recommended Decision: Issued February 11, 1981; published February 18, 1981 (46 FR 12709).

Extension of time: Issued March 9, 1981; published March 12, 1981, (46 FR 16270).

Notice is hereby given that the time for filing exceptions to the above listed recommended decision is hereby further extended to April 13, 1981.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Signed at Washington, D.C., on: March 19, 1981.

William T. Manley,

Deputy Administrator, Marketing Program Operations

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

Burden of Proof in Enforcement Proceedings

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Withdrawal of proposed rulemaking.

SUMMARY: The Nuclear Regulatory Commission is withdrawing a notice of proposed rulemaking that would have provided that the proponent of an order in Commission enforcement proceedings has the burden of proof, including the burden of going forward with the evidence and the ultimate burden of persuasion.

EFFECTIVE DATE: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: Bruce A. Berson, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: (301) 492-7676.

SUPPLEMENTARY INFORMATION: On July 21, 1977, the Nuclear Regulatory Commission (Commission) published in the Federal Register (42 FR 37406) a proposed amendment to its regulations, 10 CFR Part 2—"Rules of Practice for Domestic Licensing Proceedings," regarding the burden of proof in Commission adjudications. Under the proposed amendment to 10 CFR 2.732 the proponent of an order to amend, suspend, or revoke a license or to impose a civil penalty in an enforcement proceeding against a licensee would have both the burden of going forward with evidence (producing enough evidence to make a case) and the ultimate burden of persuasion (the need to establish the validity of a contention, or overcome opposing evidence), unless otherwise ordered by the presiding officer in a given case.[1]

Thirteen letters of comment were received on the proposed rule. Ten commenters favored the proposed rule change without reservation, one commenter generally favored the proposed rule, one commenter objected to shifting the ultimate burden of persuasion from the licensee to the proponent of an order and one commenter addressed a matter beyond the scope of the proposed rule.

[1] The proposed rule would have had the effect of reversing the decision of the Commission's Atomic Safety and Licensing Appeal Board in *Consumers Power Company* (Midland Plant, Unit Nos. 1 and 2), ALAB-283, 2 NRC 11 (1975), ALAB-315, 3 NRC 101 (1976). That decision held that the holder of a construction permit has the ultimate burden of persuasion in a Commission enforcement proceeding seeking revocation, suspension or modification of the permit.

After careful consideration of the proposed rule change and the letters of comment, the Commission has decided that the holding of the Appeal Board in the *Consumers Power Company* case should not be modified by Commission rule. Section 7(c) of the Administrative Procedure Act (APA), 5 U.S.C. 556(d), and relevant judicial interpretations of the APA require that, except as otherwise provided by statute, the proponent of an order has the burden of going forward with evidence. See *Environmental Defense Fund v. EPA*, 548 F.2d 998 (D.C. Cir. 1977). However, the proposed rule would have gone beyond the requirements of the APA and generally required the proponent of an order in enforcement proceedings (usually the NRC staff) to also carry the ultimate burden of persuasion. Having determined that the proposed rule change to 10 CFR § 2.732 is unwarranted, the Commission hereby withdraws the July 21, 1977 notice of proposed rulemaking on the burden of proof in enforcement proceedings and terminates this proceeding.

Dated at Washington, D.C. this 16th day of March 1981.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 230

[Release No. 33-6290; File No. S7-675]

Proposed Availability of Rule 242 to Certain Mining Companies; Definition of "Qualified Issuer"

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission is proposing for comment amendments to Rule 242, a small issue exemptive rule under Section 3(b) of the Securities Act of 1933, which would allow certain issuers engaged in the mining business to utilize that Rule in the offer and sale of their securities. The amendments would change the definition of "qualified issuer" by deleting the exclusion presently appearing in Rule 242(a)(5)(iii) and the Note thereto.

DATE: Comments must be received no later than May 15, 1981.

ADDRESS: All communications on this matter should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Comments should refer to File No. S7-675 and will be available for public inspection and copying in the Commission's Public Reference Room, 1100 L Street, NW, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Daniel Abdun-Nabi, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202) 272-2644.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is publishing for comment amendments to Rule 242 [17 CFR 230.242] which would expand its availability to issuers which engage or intend to engage in significant mining operations.

Rule 242, promulgated under Section 3(b) of the Securities Act, provides an exemption from registration for sales of securities by domestic or Canadian corporate issuers to an unlimited number of accredited persons as defined in the rule, and to 35 non-accredited persons.[1] The availability of Rule 242 is limited to any "qualified issuer" which is defined as any domestic or Canadian corporation which: (a) is not an investment company; (b) does not engage or intend to engage in significant oil and gas operations; (c) does not engage or intend to engage in significant mining operations; and (d) is not a subsidiary or an issuer which would not be qualified to use the exemption. These restrictions on the availability of the Rule were included for two primary reasons. First, Rule 242 is in the nature of an experiment and represents a significant departure from traditional disclosure concepts. Second, the informational requirements of Rule 242 with respect to non-accredited purchasers, i.e., to provide the same kind of information specified in Part I of Form S-18 to the extent material, do not contemplate offerings of limited partnership interests or offerings by issuers engaged in significant oil and gas or mining operations. Form S-18 would not provide guidance as to the specialized disclosure which would be required to be made in connection with any such offering of securities.

In adopting Rule 242 the Commission further stated that if, as part of its ongoing review of Form S-18, revisions are made to the Form in order to expand its availability similar changes may be made in the Rule 242 definition of "qualified issuer." In a companion release the Commission today announced amendments to Form S-18 which expand its availability to certain mining companies and provide a new Item 7A which establishes disclosure standards for such issuers.[2] In light of this action, the Commission is proposing to amend the Rule 242 definition of "qualified issuer" by deleting subparagraph (a)(5)(iii). The proposal, if adopted, would permit certain mining companies to rely on that rule in the offer and sale of their securities.

Summary of Initial Regulatory Flexibility Analysis

The Commission has prepared an initial regulatory flexibility analysis in accordance with 5 U.S.C. 603 regarding the amendments to Rule 242 proposed herein.

The analysis notes that Rule 242 was adopted to provide small business with an alternative exemption from registration which overcomes certain problems encountered in utilizing other available exemptive rules. Since Rule 242 has been in the nature of an experiment, it has been available to a limited class of "qualified issuers," as defined in the Rule. The objective of the proposed amendments to Rule 242 is to expand this class to include certain mining companies. In light of the comparable amendments to Form S-18, to which the disclosure requirements of Rule 242 are tied, as well as the absence of any substantial or unique administrative or enforcement problems with the Rule, the Commission believes it is appropriate to consider this expansion. A copy of the initial regulatory flexibility analysis may be obtained by contacting Daniel Abdun-Nabi, Office of Small Business Policy, Division of Corporation Finance, U.S. Securities Exchange Commission, 500 North Capitol Street, NW., Washington, D.C. 20549, (202) 272-2644.

Text of Proposed Amendments

It is proposed to amend Part 230 of 17 CFR Chapter II by removing paragraph (a)(5)(iii) of § 230.242 and by revising paragraph (a)(5)(iv) and redesignating it as new paragraph (a)(5)(iii) and by redesignating paragraph (a)(5)(v) as paragraph (a)(5)(iv) as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

§ 230.242 Exemption of limited offers and sales by qualified issuers.

BILLING CODE 8010-01-M

POSTAL SERVICE

39 CFR Part 111

Establishment of Optional Endorsement Line in the Address Block or Label

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposal would add additional sections to chapters 4, 6 and 7 of the Domestic Mail Manual. The purpose of the additions is to allow mailers to prepare mailings of second-class, third-class (bulk rate), and bound printed matter using a specified optional endorsement line above the address block or on the address label instead of using the specified color coded pressure sensitive package labels. Pieces in packages of mail sorted to carrier routes may bear the optional endorsement line in the address block or on the label.

DATE: Comments must be received on or before April 24, 1981.

ADDRESS: Written comments should be sent to: Director, Office of Mail Classification, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260. Copies of all written comments will be available for public inspection and photocopying between 9:00 a.m. and 4:00 p.m., Monday through Friday in Room 1610, U.S. Postal Service Headquarters, 475 L'Enfant Plaza West, SW, Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT: Harry M. McCulloch, (202) 245-4097.

SUPPLEMENTARY INFORMATION: This proposal has been developed as a result of requests made by mailers. The expected benefits to be derived will be a reduction of mailers' costs by eliminating the need for pressure sensitive labels.

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revisions of the Domestic Mail Manual, which is incorporated by reference in the **Federal Register**. See 39 CFR 111.1.

Part 467—Presort Requirements (See Exhibit 467)

1. In 467.1 add the following sentence at the end of .14: "For alternative procedure, see 468."; and add new part 468 as follows:

Part 468—Optional Endorsement Line in Address Block or Label

468.1 General

Mailers may prepare mailings without applying pressure sensitive package labels to the top copies of packages by using a specified optional endorsement line above the address block on each piece or on the address label on each piece.

468.2 Format Specifications

.21 First Line

The appropriate makeup information must be the first line to appear at the top of the address block or label.

.22 Clean Address Required

If the address block or address label contains any information other than: the name of the recipient; street, street number, apartment or suite number, building name, post office box, or other established address; and City, State, and ZIP Code, a blank line at least ¼ inch in height must be left between the address block and optional endorsement line.

.23 Size of Letters Used in Optional Endorsement Line

The information in the optional endorsement line must appear in capital letters whose size and line spacing is not less than the size and line spacing of the largest letters or characters used in the address block or in any portion of the address list, and must be the same type-font as those letters.

.24 Alignment of Right Margin (Right Justified)

The optional endorsement line must be placed so that no characters in any portion of the address block or on the address label are to the right of the last character in the optional endorsement line.

.25 Alignment of Left Margin (Left Justified)

The optional endorsement line must be filled with asterisks from the left margin of the label or address block (as defined by the position of the first character printed in the address block or on the address label) to the first character in the optional endorsement line.

Example

```
**********DIRECT  37401
BOB JONES
PO BOX 365
CHATTANOOGA, TN  37401
```

.26 Zip Code

With the exception of Carrier Route packages, State Distribution Center (SDC) packages, State packages and Mixed States packages, each optional endorsement line must include the applicable ZIP Code information.

.27 Prescribed Letters or Characters

Only capital letters of the alphabet, Arabic numerals, or asterisks may be used in the optional endorsement line.

.28 Valid Address

Each piece in the mailing must bear a valid address including a correct ZIP Code. Pieces bearing the optional endorsement line and an invalid address will be handled in accordance with the provisions of 159.

468.3 Examples of Optional Endorsement Lines and Formats

.31 Optional Endorsement Line Examples

a. FIRM PACKAGES
**********FIRM DIRECT 12345

b. CARRIER ROUTE
**********CAR-RT-SORT LS20

c. 5-DIGIT PACKAGES
**********DIRECT 12345

d. OPTIONAL CITY PACKAGES
**********BABYLON, NY 12345

e. 3-DIGIT PACKAGES
**********HOUSTON, TX 771

Note.—A unique 3-digit ZIP Code is defined as any 3-digit ZIP Code prefix which is assigned exclusively to a single large city with the last two digits of the ZIP Code identifying a delivery area within the city.

f. SCF PACKAGES
**********SCF, TX 750

g. OPTIONAL SDC PACKAGES
**********ALL FOR SDC

h. STATE PACKAGES
**********ALL FOR STATE

i. MIXED STATES PACKAGES
**********MIXED STATES

j. BMC PACKAGES (Parcel post only, see Chapter 7)
**********BMC Chicago, IL 608

.32 Optional Endorsement Line Format and Address Examples

a. This format may be used when nothing other than the addressee's name and address are printed on the label or the face of the piece in the address block.

```
                    PIRN DIRECT 20045
JQD COMPANY, INCORPORATED
529 14th STREET, NW, SUITE 1399
WASHINGTON, DC                20045
```

b. This format must be used when information in addition to the name and address of the intended recipient are printed on the address label or the face of the piece in the address block:

```
                    PIRN DIRECT 20045

XLQ987NOV  81AJ1NHTIRNAS37123456
     JQD COMPANY, INCORPORATED
     528 14th STREET, NW, SUITE 1399
     WASHINGTON, DC           20045
```

.33 Prohibited Formats

The following are examples of formats containing information or structures *which are not allowed:*

a.

```
817  00 000 00 0004157  GARCIA
     ***************DIRECT 20013

     J. GARCIA
     POBOX 289
     WASHINGTON, DC        20013
```

Reason: Keyline printed above optional endorsement line. Optional endorsement line not aligned properly on left side (not left justified).

b.

```
MR   01 BIL *********  DIRECT  20013

          J. GARCIA
          POBOX 289
          WASHINGTON, D C       20013
```

Reason: Keyline on same line as optional endorsement line.

c.

```
1     ******K***** DIRECT 20013
9
8     26*  439*
1     J. GARCIA                    *8
      WASHINGTON, D C       8
      20013
```

Reason: Stray characters in endorsement line. Endorsement line not aligned properly in address block (neither right nor left justified).

Part 867—Preparation of Bulk Rate Mailings (See Exhibit 867)

2. In 867.12 add the following sentence at the end of .123: "For alternative procedure, see 868."; and add new part 868 reading as follows:

Part 868—Optional Endorsement Lines in Address Block or Label

Mailers who prefer using a specified optional endorsement line in place of pressure sensitive package labels must follow the procedures in 468.

Part 787—Preparation of Bound Printed Matter

3. In 787.4 add the following sentence at the end of .42b: "For alternative procedure, see 788."; and add new part 788 reading as follows:

Part 788—Optional Endorsement Line in Address Block or Label

Mailers who prefer using a specified optional endorsement line in place of pressure sensitive package labels must follow the procedures in 468.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

(39 U.S.C. 401, 403)

W. Allen Sanders,

Associate General Counsel, General Law and Administration.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[AD-FRL-1787-4]

National Emission Standards for Hazardous Air Pollutants; Benzene Fugitive Emissions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Amended notice of public hearing and extension of public comment period.

SUMMARY: The public hearing has been postponed 70 days and the end of the public comment period extended 70 days for the proposed national emission standard for benzene fugitive emissions in response to a request from the American Petroleum Institute.

DATES: Written comments to be included in the record on the proposed standard must be postmarked no later than August 14, 1981. Notice of intent to present oral testimony at the public hearing must be postmarked no later than July 7, 1981. The public hearing will be held on July 14, 1981. Written comments responding to, supplementing, or rebutting written or oral comments received at the public hearing must be postmarked no later than August 14, 1981.

ADDRESSES: Comments on the proposed standard should be submitted (in duplicate if possible) to: Central Docket Section (A-130), Attention: Docket Number A-79-27, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

The public hearing will be held at the EPA Administration Building Auditorium, Research Triangle Park, North Carolina, beginning at 9:00 a.m.

Persons wishing to present oral testimony should notify Ms. Naomi Durkee, Emission Standards and Engineering Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-5571.

FOR FURTHER INFORMATION CONTACT:

Susan Wyatt, (919) 541-5580.

SUPPLEMENTARY INFORMATION: On January 5, 1981, EPA proposed in the **Federal Register** (46 FR 1165) a national emission standard for benzene fugitive emissions. In that notice, EPA announced the date ending the public comment period and the date and location of the public hearing to receive public comment on the proposed standards. This notice amends the date of the public hearing and extends the end of the public comment period.

Dated: March 19, 1981.

44 CFR Part 67

[Docket No. FEMA-5875]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Correction

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Deerfield, Cumberland County, New Jersey, previously published at 45 FR 52428 on August 7, 1980.

EFFECTIVE DATE: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Federal Emergency Management Agency, Federal Insurance Administration, National Flood Insurance Program, (202) 755-5585, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Deerfield, Cumberland County, New Jersey, previously published at 45 FR 52428 on August 7, 1980, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

Due to a clerical error, the elevations for the locations listed as Upstream Corporate Limits and Downstream Corporate Limits under Maurice River were typed in reverse order. They appear correctly on the Flood Insurance Study (profile) and as follows.

Source of flooding	Location	Elevation in feet (NGVD)
Maurice River	Downstream Corporate Limits	*38
	Upstream Corporate Limits	*39

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: March 13, 1981.

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Harmony, Warren County, New Jersey, previously published at 45 FR 52428 on August 7, 1980.

EFFECTIVE DATE: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Federal Emergency Management Agency, Federal Insurance Administration, National Flood Insurance Program, (202) 755-5585, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Harmony, Warren County, New Jersey, previously published at 45 FR 52428 on August 7, 1980, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

In order that the locations listed within the Township of Harmony be more easily identified with the corresponding Flood Insurance Study and Rate Map, the descriptions should be amended to read as follows. The elevations cited correspond to those on the community's profiles and maps.

Source of flooding	Location	Elevation in feet (NGVD)
Delaware River	Conrail Bridge, approximately 22,800' upstream of Corporate Limits.	*213
Lopatcong Creek	Downstream Corporate Limits	*344
	County Route 519 (Upstream)	*370
	Approximately 1,000' downstream of Harmony Brass Castle Road.	*474
	Approximately 350' downstream of Harmony Brass Castle Road.	*487
	Harmony Brass Castle Road	*497
Buckhorn Creek	Approximately 1,750' downstream of Roseburg Station Road.	*296
Tributary No. 1 to Buckhorn Creek.	Approximately 550' upstream of County Route 519.	*341
	Approximately 625' upstream of Country Route 519.	*351
	Approximately 735' upstream of County Route 519.	*362
	Approximately 840' upstream of County Route 519.	*372
	Approximately 955' upstream of County Route 519.	*381
	Approximately 1,040' upstream of County Route 519.	*391
	Approximately 1,140' upstream of County Route 519.	*404
	Approximately 1,220' upstream of County Route 519.	*416
	Approximately 1,340' upstream of County Route 519.	*433
	Approximately 1,435' upstream of County Route 519.	*444
	Approximately 1,565' upstream of County Route 519.	*454

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: March 16, 1981.

Richard W. Krimm,

Acting Administrator, Federal Insurance Administration.

44 CFR Part 67

[Docket No. FEMA-6043]

National Flood Insurance Program; Proposed Flood Elevation Determinations; correction

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Delaware, Hunterdon County, New Jersey, previously published at 45 FR 42701 on June 25, 1980.

EFFECTIVE DATE: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Federal Emergency Management Agency, Federal Insurance Administration, National Flood Insurance Program, (202) 755-5585, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Delaware, Hunterdon County, New Jersey, previously published at 45 FR 42701 on June 25, 1980, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4 (a).

In order for the following locations to be correctly identified with the corresponding Flood Insurance Study (profile) and Flood Insurance Rate Map for the Delaware River, Brookville Creek, and Wickecheoke Creek in the Township of Delaware, New Jersey, the descriptions should be amended to read as follows:

Source of flooding	Location	Elevation in feet (NGVD)
Delaware River	Upstream Corporate Limits	*98
Brookville Creek	New Jersey Route 29A 190' upstream from confluence with Delaware River.	*78
Wickecheoke Creek.	3,600 feet downstream of Rosemont Ringoes Road	*172
	Approximately 1,600' downstream of Rosemont Ringoes Road.	*186

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: March 16, 1981.

Richard W. Krimm,

Acting Administrator, Federal Insurance Administration.

Alta Bates Hospital, et al.; Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Public Law 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register**.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket Number 81–00052. Applicant: Alta Bates Hospital, 3001 Colby Street at Ashby, Berkeley, California 94705. Article: Cobalt Teletherapy Patient Couch. Manufacturer: Atomic Energy of Canada, Ltd., Canada. Intended use of article: The article is intended to be used for the treatment of cancer. Application received by Commissioner of Customs: November 6, 1980.

Docket Number 81–00053. Applicant: University of California, Berkeley, Physics Department, c/o Purchasing Department, 2405 Bowditch Street, San Francisco, CA 94720. Article: 2 (Two) Each Ion source for Rare Gas Mass Spectrometry. Manufacturer: Swiss Federal Institute of Technology, Switzerland. Intended use of article: The article is part of an apparatus intended to be used to examine the rare gas isotopes in terrestrial and extraterrestrial rocks. Specific research will include dating studies, studies of primitive gases in the earth meteorites, and cosmic ray effects upon meteorites. Application received by Commissioner of Customs: November 12, 1980.

Docket Number 81–00054. Applicant: University of Illinois, Urbana, Illinois 61801. Article: Excimer-Multigas Laser, Model EMG 102. Manufacturer: Lambda-Physik GmbH and Co., West Germany. Intended use of article: The article is intended to be used for the following experiments:

(1) Multi-photon ionization of the rare gas atoms and krypton in particular,

(2) Excitation of several metal-halide molecular lasers by the photodissociation of a polyatomic molecule, and

(3) Study of the spectroscopic and kinetic properties of rare gas excimer molecules.

The article will also be used by graduate students for their thesis research. Application recieved by Commissioner of Customs: November 12, 1980.

Docket Number 81–00055. Applicant: Children's Hospital Medical Center, Department of Pathology, Elland & Bethesda Avenue, Cincinnati, Ohio 45229. Article: Electron Microscope, Model EM 109. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of human tissues obtained by needle or surgical biopsy procedures, rapidly fixed in glutaraldehyde or osmium tetroxide, embedded in epoxy resin, sectioned at .1 micra with an ultramicrotome, mounted on copper grids and treated with various heavy metal stains. The diseases to be investigated include disorders of skeletal muscle, liver, kidney skin and other tissues. Ultrastructural characteristics of tissues obtained from patients with particular diseases will be correlated with disease manifestation signs, symptoms and course and with observatons made on the same tissues examined with light and fluorescence microscopical techniques. Application received by Commissioner of Customs: November 12, 1980.

Docket Number 81–00056. Applicant: Rice University, Department of Chemistry, P.O. Box 1892, Houston, Texas 77001. Article: Eximer Laser, EMG 101. Manufacturer: Lambda-Physik GmbH, West Germany. Intended use of article: The article is intended to be used to investigate the ability of organic peroxides (R-O-O-R) and azoalkanes (R-N-N-R) to serve as energy transfer acceptors and electron donors and acceptors. It is also planned to determine the chemical structure of the products formed under direct and photosensitized irradiation. The objective of this research is to unravel the conflicting reports in literature on photosensitized decompositon of organic peroxides. Application received by Commissioner of Customs: November 12, 1980.

Docket Number 81–00057. Applicant: Solar Energy Research Institute, 1617 Cole Blvd., Golden, CO 80401. Article: X-Ray Fluorescence Spectrometer. Manufacturer: Rigaku, Japan. Intended use of article: The article is intended to be used for studies of thin films and bulk crystals and materials of organic and inorganic compounds used in photovoltaic devices. Experiments to be conducted are precursor qualitative and quantitative elemental composition analysis of solar cell materials and devices. The objectives pursued in the course of the investigations will be the determination of elemental composition of solar cell materials and devices. This determination will provide information useful for determining appropriate subsequent analysis and techniques which will ultimately provide insight into improvements in the solar cell devices. Application received by Commissioner of Customs: November 12, 1980.

Docket Number 81–00058. Applicant: Arizona State University, Department of Chemistry, Tempe, Arizona 85281. Article: Mass Spectrometer, MAT 312. Manufacturer: Varian MAT, West Germany. Intended use of article: The article is intended to be used for the study of structure elicidation of potential antitumor agents isolated from natural products. Sensitivity of the article will be employed in EI mode to separate and identify mixture components from low resolution data

(mass chromatograms). In addition, the article will be used for educational purposes in various chemistry courses. Application received by Commissioner of Customs: November 17, 1980.

Docket Number 81–00059. Applicant: University of Colorado, Health Sciences Center, 4200 East Ninth Avenue, Denver, Colorado 80262. Article: MM 165F Mass Spectrometer with DS 2050 Data System. Manufacturer: VG Micromass, Ltd., United Kingdon. Intended use of Article: The article is intended to be used to: (1) Investigate the origin of unusual compounds such as acidic gut bacteria metabolites found is samples from failure-to-thrive patients, (2) Exploit capabilities to obtain metabolic profiles on steroids and sugars by looking at unusual failure-to-thrive cases and patients with known problems who are on steroid therapy or who have known sugar imbalances, (3) Study prostaglandins, arachidonic acid metabolites and catechalamine-related compounds by negative ion chemical ionization studies, and (4) Perform collaborative research in prostaglandin quantitative analysis as well as the L-dopa and alpha-methyl dopa metabolism. The article will also be used to train postdoctoral fellows and graduate students in application of different modes of ionization and mass spectrometry to problems in biomedical research. Application received by Commissioner of Customs: November 18, 1980.

Docket Number 81–00060. Applicant: University of Alabama in Birmingham, University Station, Birmingham, AL 35294. Article: Electron Microscope, Model JEM–100CX. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of soft tissues (bladder intestine, gall bladder, kidney) from amphibian, kidney and heart muscle from rats, and prepared crystals and aggregates of naturally occurring and synthetic polypeptides and protein-lipid complexes. The primary objective of these studies is a more refined correlation of structure and function in transporting epithelia. This involves better understanding of membrane structure and epithelial architecture. Application received by commissioner of Customs: November 18, 1980.

Docket Number 81–00061. Applicant: National Institutes of Health, 9000 Rockville Pike, Bldg. 36, Rm. 4B17, Bethesda, MD 20205. Article: LKB 2128–010 Ultrotome IV Ultramictrotome. Manufacturer: LKB Produkter, Sweden. Intended use of article: The article is intended to be used for studies of myelinated tracts or nerves obtained surgically which may be chemically fixed and embedded or frozen before sectioning. The features characteristic of various types of myelin breakdown will be identified and described in research reports that will be published. Additional objectives include the localization of myelin constituents visualized electron microscopically in thin sections after using specific immunicytochemical staining procedures. Sections of high quality that vary in thickness must be obtained after use of many embedding media to fulfill the objectives. Application received by Commissioner of Customs: November 18 1980.

Docket Number 81–00062. Applicant: Veterans Administration Medical Center, 3350 La Jolla Village Drive, San Diego, California 92161. Article: Artifical Kidney Membrane Package. Manufacturer: Daicel Chemical Industries, Ltd., Japan. Intended use of article: The article is intended to be used for studies of Hemofresh ultrafilters used in conjunction with the artificial kidney fluid cycling equipment and experiments on patients where the performance of these new membranes will be evaluated from the standpoint of hydraulic permeability and solute clearance profile. The object of these investigations is to determine whether this new and uniquely designed membrane package performs in a manner superior to other experimental membranes now being evaluated in the treatment of patients with kidney failure who require artificial kidney treatment. Application received by Commissioner of Customs: November 18, 1980.

Docket Number 81–00063. Applicant: William S Middleton Memorial Veterans Hospital, 2500 Overlook Terrace, Madison, WI 53705. Article: Electron Microscope, Hitachi, Model H–300. Manufacturer: Nissie Sangyo America, Japan. Intended use of article: The article is intended to be used for ultrastructural studies of liver biopsies and culture in the evaluation of carcinogenic potential and mechanism of environmental compounds. The article will also be used for educational purposes in the courses: Pathology 730—Systemic Pathology and Toxicology 675—Environmental Toxicology and Pathology. Application receved by Commissioner of Customs: November 18, 1980.

Docket Number 81–00064. Applicant: University of Arizona, Bioscience West Bldg., Room 308, Tucson, Arizona 85721. Article: Top entry Configuration for JEM–100CX Electron Microscope. Manufacturer: JEOL, Japan. Intended use of article: The article is an accessory to an existing electron microscope which will be used for recording structural data of biological macromolecules. Application received by Commissioner of Customs: November 18, 1980.

Docket Number 81–00065. Applicant: University of California, San Diego, 3175 Miramar Road, La Jolla, California 92903. Article: Electrophoresis Apparatus, Type VAP5 with Accessories. Manufacturer: Beader & Hobein GmbH, West Germany. Intended use of article: The article is intended to be used to prepare pure samples of lysosomes from cultured human cells. Of particular interest is the study of lysosomes from the human diseases mucolipidosis-type II and cystinosis, in which there are lysosomal abnormalities which can be studied more carefully by having the availability of pure lysosomes. Application received by Commissioner of Customs: November 18, 1980.

Docket Number 81–00066. Applicant: University of Texas Health Science Center, 7703 Floyd Curl Drive, San Antonio, Texas 78284. Article: Hemodialysis membrane. Manufacturer: Asahi Medical Company Ltd., Japan. Intended use of article: The article is intended to be used for the study of plasma separation which is the method of separating from whole blood specific protein-containing components. Investigations will be conducted to define the kinetics of the membrane system in relation to specific proteins and evaluate the system as a feasible alternative to conventional, centrifugal-type plasmapheresis system. Application received by Commissioner of Customs: November 19, 1980.

Docket Number 81–00067. Applicant: University of Alabama in Birmingham, University Station, Birmingham, Alabama 35294. Article: Electron Microscope, Model JEM 100CX with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to study the structural aspects of cellular nuclei, membranes, formed pigment granules and the extracellular matrix. The phenomena to be studied include: changes in nuclear and chromatin structure, morphogenesis of melanosomal granules, adherence of cells to extracellular matrices, and deposition of extracellular matrix fibers. Application received by Commissioner of Customs: November 19, 1980.

Docket Number 81–00068. Applicant: Fairleigh Dickinson University School of Dentistry, 110 Fuller Place, Hackensack, N.J. 17601. Article: KAG 72–KT Konig/Hofer Program Controlled Automatic Feeder and Accessories. Manufacturer:

Andreas Hofer, Switzerland. Intended use of article: The article is intended to be used in scientific research to evaluate the importance of various foods and nutritional status in dental caries (tooth decay) to determine the relationship between nutrient and dietary intake patterns to oral disease. The article permits the feeding of as many as 17 meals or snacks each day to a series of 72 laboratory rats in a predetermined sequence and frequency. Application received by Commissioner of Customs: November 21, 1980.

Docket Number 81–00069. Applicant: Fairleigh Dickinson University, School of Dentistry, 110 Fuller Place, Hackensack, N.J. 07601. Article: Chromium-steel Feeding Channels. Manufacturer: Andreas Hofer, Switzerland. Intended use of article: The article is intended to be used to modify the Konig/Hofer Program Controlled Automatic Feeder for long-term studies of the tooth decay potential of various foods. Application received by Commissioner of Customs: November 21, 1980.

Docket Number 81–00070. Applicant: Fairleigh Dickinson University, School of Dentistry, 1101 Fuller Place, Hackensack, N.J. 07601. Article: Drinking Vessel. Manufacturer: Andreas Hofer, Switzerland. Intended use of article: The article is intended to be used to expand the capability of the Konig/Hofer feeding system to study the tooth decay potential of liquid foods. These tubes are specially modified for use in the feeding system and allow for the programmed feeding of items, such as fruit juices, milk, and soft drinks to study the ability of these drinks to cause or prevent tooth decay. Application received by Commissioner of Customs: November 21, 1980.

Docket Number 81–00071. Applicant: Clemson University, Clemson, SC 29631. Article: Nuclear Magnetic Resonance Spectrometer, Model F–90Q and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used by faculty members, post-doctoral fellows and graduate students in analytical, inorganic, organic and physical chemistry and biochemistry. Studies to be conducted will include: Investigation of Specific Binding Sites of Fatty Acyl-CoA on Enzymes and Study of Molecular Internal Motions. Application received by Commissioner of Customs: November 28, 1980.

Docket Number: 81–00072. Applicant: Northwestern University, 633 Clark Street, Evanston, IL 60201. Article: Laboratory Computer Interface Cards, 4 (502–32C) 1 and (502–19D). Manufacturer: Cambridge Electronic Design, Ltd., United Kingdom. Intended use of article: The article is intended to be used with a CED laboratory interface which is being used to investigate the response properties of single ganglion cells in the cat retina. Retinal ganglion cells encode visual information in the eye and transmit this information to the brain. In the experiments to be conducted the electrical activity of a single ganglion cell is recorded with a microelectrode. This data is transmitted through the laboratory computer where it is analyzed. Much of the experiment work will be done by graduate students as part of their dissertation work and by postdoctoral fellows. Application received by Commissioner of Customs: November 28, 1980.

Docket Number 81–00073. Applicant: California Institue of Technology, 1201 East California Blvd., Pasadena, California 91125. Article: Model 200/98 Superconducting Magnet and Cryostat. Manufacturer: Oxford Instrument, United Kingdom. Intended use of article: The article is intended to be used as part of a nuclear magnetic resonance spectrometer for the study of materials in solid and liquid crystalline phases. The classes of materials to be investigated include synthetic and biological polymers, fossil fuels, crystalline proteins and other crystalline materials, catalysts and surfaces and species absorbed on surfaces. Experiments to be conducted include determination of wideline and high-resolution nuclear magnetic resonance spectra of solid and liquid crystalline materials at a magnetic field strength of 4.7 Tesla, measurement of nuclear spin-spin and spin-lattice relaxation rates and monitoring the progress of chemical reactions by acquiring NMR spectra of reaction mixtures. In addition experimental work will be carried out to extend the scope and range of application of techniques in the field of nuclear magnetic resonance in solids. Application received by Commissioner of Customs: December 9, 1980.

Docket Number 81–00074. Applicant: Research Foundation of S.U.N.Y. at Stony Brook, State University of New York, Stony Brook, New York 11794. Article: Superconducting Analyzer with Channeltron, Model 424. Manufacturer: The Kearns Group, United Kingdom. Intended use of article: The article is intended to be used for studies of semiconductors and insulators. The phenomena to be studied are the reactions of specific surfaces with gases and vapors, chemsorption corrosion, uptake, epitaxy, etc. The article will also be used for graduate training in scientific research. Application received by Commissioner of Customs: December 9, 1980.

Docket Number 81–00075. Applicant: U.S. Geological Survey, 5293 Ward Road, Water Quality Laboratory, Arvada, Colo. 80002. Article: Gas Chromatograph/Mass Spectrometer/Data System Model MM 707GDS. Manufacturer: VG–Organic Limited, United Kingdom. Intended use of Article: The article is intended to be used in a number of different research programs including:

1. Identification of the organic compounds leached by water from oil shale retort wastes,
2. Identification of organic compounds in surface and ground waters,
3. Identification of organic pollutants in natural waters,
4. Elucidation of the chemical structure of natural organic polyelectrolytes, and
5. Identification of halogenated organic compounds in treated water supplies. Application received by Commissioner of Customs: December 9, 1981.

Docket Number 81–00076. Applicant: Wayne State University, 5050 Cass Avenue, Detroit, Michigan, 48202. Article: Gammacell–40 Irradiator with Accessories. Manufacturer: Atomic Energy of Canada, Ltd., Canada. Intended use of article: The article is intended to be used for the irradiation of small animals and tissue culture in studies of the following:

1. Regulation of immunologic tolerance in T lymphocytes.
2. Plasmid mediated metabolic versatility in *pseudomonas* and origin of drug resistance factors in enterobacteriaceae.
3. Mixed lymphocyte cultures in transplant patients.
4. Lymphocyte interactions in schistosomiasis mansoni. Application received by Commissioner of Customs: December 9, 1980.

BILLING CODE 3510–25–M

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational,

Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket Number 80-00397. Applicant: Department of Defense, U.S. Navy, Mare Island Naval Shipyard, Code 134.2, Vallejo, CA 94592. Article: Electron Microscope, Model JEM 100CX and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: See Notice on page 2005 in the Federal Register of January 12, 1981. Article ordered: December 21, 1979.

Docket Number 80-00425. Applicant: Baylor College of Medicine, 1200 Moursund Avenue, Houston, TX 77030. Article: Electron Microscope, JEM 200CX. Manufacturer: Japan Electron Optical Labs., Ltd., Japan. Intended use of article: See Notice on page 74956 in the Federal Register of November 12, 1980. Article ordered: March 1, 1980.

Docket Number 80-00433. Applicant: University of Washington, Interdis Research Center, Ophthalmology RJ-10, Seattle, WA 98195. Article: Electron Microscope, Model JEM 100S and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: See Notice on page 76721 in the Federal Register of November 20, 1980. Article ordered: August 7, 1979.

Docket Number 80-00440. Applicant: State University of New York, University Hospital, Health Sciences Center, Stony Brook, NY 11794. Article: Electron Microscope, Model EM 10 CA and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: See Notice on page 76722 in the Federal Register of November 20, 1980. Article ordered: April 30, 1980.

Docket Number 80-00441. Applicant: Regents of the University of California, Department of Pathology, 501 HSW, San Francisco, CA 94143. Article: Electron Microscope, Model JEM 100S with Sheet Film Camera. Manufacturer: JEOL Ltd., Tokyo, Japan. Intended use of article: See Notice on page 76722 in the Federal Register of November 20, 1980. Article ordered: December 21, 1979.

Docket Number 80-00444. Applicant: Henry Ford Hospital, 2799 W. Grand Blvd., Detroit, MI 48202. Article: Electron Microscope, Model EM 109. Manufacturer: Carl Zeiss, West Germany. Intended use of article: See Notice on page 2006 in the Federal Register of January 12, 1981. Article ordered: August 22, 1979.

Docket Number 80-00449. Applicant: The Ohio State University Research Foundation, 1314 Kinnear Road, Columbus, Ohio 43212. Article: Electron Microscope, Model EM 10CA. Manufacturer: Carl Zeiss, West Germany. Intended use of article: See Notice on page 2006 in the Federal Register of January 12, 1981. Article ordered: July 25, 1980.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, was being manufactured in the United States at the time the articles were ordered.

Reasons: Each foreign article to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each article establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each article described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Decision: Applications denied. Applicants have failed to establish that instruments or apparatus of equivalent scientific value to the foreign articles for such purposes as the foreign articles are intended to be used, are not being manufactured in the United States.

Reasons: Section 301.8 of the Regulations provides in pertinent part:

> The applicant shall *on or before the 20th* day following the date of such notice, inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article for the same intended purposes to which the denied application relates. The applicant shall then resubmit the new application on or before the 90th day following the date of the notice of denial without prejudice to resubmission, unless an extension of time is granted by the Deputy Assistant Secretary in writing prior to the expiration of the 90-day period.
>
> * * * If the applicant fails, within the applicable time periods specified above, to either (a) inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article to which the denial without prejudice to resubmission relates, or (b) resubmit the new application, the prior denial without prejudice to resubmission shall have, the effect of a final decision by the Deputy Assistant Secretary on the application within the context of Subsection 301.11. (Emphasis added).

The meaning of the subsection is that should an applicant either fail to notify the Deputy Assistant Secretary of its intent to resubmit another application for the same article to which the denial without prejudice relates *within the 20-day* period, or fails to resubmit a new application within the 90-day period, the prior denial without prejudice to resubmission will have the effect of a final denial of the application.

None of the applicants to which this consolidated decision relates has satisfied the requirements set forth above, therefore, the prior denials without prejudice have the effect of a final decision denying their respective applications.

Section 301.8 further provides:

> * * * the Deputy Assistant Secretary shall transmit a summary of the prior denial without prejudice to resubmission, to the Federal Register for publication, to the Commissioner of Customs, and to the applicant.

BILLING CODE 3510-25-M

Spun Acrylic Yarn From Italy; Preliminary Results of Administrative Review of Antidumping Duty Order

AGENCY: U.S. Department of Commerce, International Trade Administration.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Duty Order.

SUMMARY: This notice is to advise the public that the Department of Commerce has conducted an administrative review of the antidumping duty order on spun acrylic yarn from Italy. The review covers six exporters of this merchandise to the United States and the period from December 20, 1979 through March 31, 1980. The review has disclosed no imports of spun acrylic yarn from Italy and there are no known unliquidated entries. As a result of the review, the Department has preliminarily decided to require cash deposits equal to the calculated margins on the last known shipments. Interested parties are invited to comment on this decision.

EFFECTIVE DATE: March 25, 1981.

FOR FURTHER INFORMATION CONTACT: Larry T. Hampel, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-3056).

SUPPLEMENTARY INFORMATION:

Procedural Background

On April 8, 1980, an antidumping duty order with respect to spun acrylic yarn from Italy was published in the **Federal Register** (45 FR 23384-5). The Department of Commerce ("the Department") published in the **Federal Register** of March 16, 1981 (46 FR 16921) a notice of intent to conduct administrative reviews of all outstanding antidumping findings or orders. As required under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has conducted an administrative review of the antidumping duty order on spun acrylic yarn from Italy. On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 became effective. Title I replaced the provisions of the Antidumping Act of 1921 ("the 1921 Act") with a new title VII to the Tariff Act. The substantive provisions of the 1921 Act apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by this review are shipments of spun acrylic plied yarn primarily for machine-knitting, and are currently classifiable under items 310.5015 and 310.5049 of the Tariff Schedules of the United States Annotated (TSUSA). The Department knows of six exporters of Italian spun acrylic yarn to the United States. The review covers the period from December 20, 1979, the date liquidation was suspended, through March 31, 1980.

This is the initial administrative review of this order, and there are no previous appraisement instructions ("master lists").

All the exporters stated that they did not export spun acrylic yarn during the period. The estimated deposit rate for these exporters is equal to the calculated margins on their last known shipments.

Preliminary Results of the Review

Our review shows no imports of spun acrylic yarn from Italy for the period from December 20, 1979 through March 31, 1980, and there are no known unliquidated entries. Interested parties may submit written comments on these

preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 15 days of the date of publication. The Department will publish the final results of the Administrative review including the results of its analysis of any such comments or hearing.

Further, as required by § 353.48(b) of the Commerce Regulations, a cash deposit based upon the fair value margin, 48.05 percent of the entered value, shall be required on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

John D. Greenwald,

Deputy Assistant Secretary for Import Administration.

March 17, 1981.

[FR Doc. 81-8979 Filed 3-24-81; 8:45 am]

BILLING CODE 3510-25-M

University of Washington; Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 80-00376. Applicant: University of Washington, Seattle, Washington 98195. Article: Scanning Microdensitometer-Microscope, M85-0010B. Manufacturer: Vickers, United Kindom. Intended use of article: See Notice on page 68983 in the Federal Register of October 17, 1980.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument of apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a scanning mode (where the light beam scans a fixed sample) and a sensitivity of 5×10^{-16} grams per milliliter to corticotrophin. The Department of Health and Human Services advises in its memorandum dated December 11, 1980 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Washington University, et al.; Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the Federal Register.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 81-00077. Applicant: Washington University, Lindell & Skinner, St. Louis, MO 63130. Article: Optically Contacted piezo-capicator etalon. Manufacturer: Queensgate Instruments, Ltd., United Kingdom. Intended use of article: The article is intended to be used as part of a specially constructed astronomical observing instrument, to be used in studies of the major planets stellar objects, interstellar gas clouds, comets, planetary nebulae, and stars. Application received by Commissioner of Customs: December 9, 1980.

Docket No. 81-00078. Applicant: State of Rhode Island Department of Mental Health, Retardation and Hospitals, P.O. Box 8269, Cranston, R.I. 02920. Article: Electron Microscope, Model EM 10 CA and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to study both autopsies and biopsy material of patients with neurological and psychiatric disorders for clinical and pathological investigations establishing diagnosis, follow up and results of treatments. This will establish the nature of the variety of chronic diseases affecting children and adults (elderly). With the article studies will be conducted to determine the ultrastructure of such pathological changes as neurofibrillary tangles searching for twisted or straight tubules—representing typical or atypical Alzheimer-type dementia. Further, the article will be used to determine the nature and type of viruses causing different kinds of encephalitides. In addition, the article is to be used when investigating many other diseases, e.g. viral and bacterial infections, metabolic disorders and certain renal diseases. Application received by Commissioner of Customs: December 12, 1980.

Docket No. 81-00079. Applicant: University of Chicago, Operator of Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Illinois 60439. Article: Colliding Beam-charge Exchange Module & Polarized Beam Inflector Module. Manufacturer: ANAC, Inc., Ltd., New Zealand. Intended use of article: The articles are components of polarized negative ion source being developed to produce beams of nuclear polarized hydrogen ions that will be injected into an accelerator, accelerated to high energy and delivered to experiments which will investigate the spin dependence of the nucleon-nucleon interaction at high energy. These investigations are typically carried out by directing the beams of polarized ions onto other materials (usually hydrogen, but not limited to hydrogen) and measuring the energy, directions and composition of the interaction components. Application received by Commissioner of Customs: December 12, 1980.

Docket No. 81-00080. Applicant: New England Deaconess Hospital, 194 Pilgrim

Road, Boston, MA 02215. Article: Dialetric & Induction Heating Equipment—LeVeen Thermotherapy. Manufacturer: Industrial Development Group, United Kingdom. Intended use of article: The article is intended to be used for the purposes of heating tumors (malignant) which are inoperable, and cannot be treated by any other methods. Application received by Commissioner of Customs: December 12, 1980.

Docket No. 81-00081. Applicant: Cornell University, Department of Chemistry, Baker Laboratory, Ithaca, N.Y. 14853. Article: Two Excimer Lasers, Model EMG 101 with FL 2002 Dye Laser Accessory. Manufacturer: Lambda-Physik GmbH and Co., West Germany. Intended Use of Article: The article is intended to be used as an energy source to pump a high power tunable dye laser system. The high peak and average power of this total system will be used to do unique multiphoton experiments to determine the electronic structure and photophysics of molecules of high chemical interest. The article will also be used by a variety of graduate students and postdoctoral fellows who will learn the fundamental techniques of laser application to chemical research. Application received by Commissioner of Customs: December 12, 1980.

Docket No. 81-00082. Applicant: U.S. Department of Interior, Bureau of Mines, 4900 LaSalle, Avondale, MD 20782. Article: Accessories for Model H-600-3 Electron Microscope. Manufacturer: Nissei Sangyo America, Ltd., Japan. Intended use of article: The articles are accessories for an existing electron microscope which will be used to study mineral particulates related to environmental problems, asbestos, corrosion products, floation minerals, and geothermal scales. Application received by Commissioner of Customs: December 12, 1980.

Docket No. 81-00083. Applicant: Pennsylvania College of Optometry, 1200 West Godfrey, Philadelphia, PA 19141. Article: Electron Microscope, Model EM 109 and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of Article: The article is intended to be used to study the ocular tissues as they are altered by either of diabetes mellitus, glaucoma, environmental radiation effects, and drug interactions. These ocular tissues are animal ocular tissues or human ocular tissues donated for the purpose of research and investigation on different disease processes. The article will also be used to train students (graduate) in detection of ultrastructural lesions occurring as a result of different diseases. Application received by Commissioner of customs: December 12, 1980.

Docket No. 81-00084. Applicant: University of Maryland School of Medicine, Department of Pathology, 660 W. Redwood Street, Baltimore, MD 21201. Article: Electron Microscope, Model EM 109 and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to study the structure of biological cells and tissues and macromolecular structures of biological origin in a system allowing TEM, SEM, STEM and analytical capabilities. The article will also be used in the course Path 712, Practical Electron Microscopy in which students will be introduced to modern microscopical principles and techniques in order that they may apply these methods to their research projects. Application received by Commissioner of Customs: December 12, 1980.

Docket NO. 81-00086. Applicant: University of Maine at Orono, Department of Zoology, Murray Hall, Orono, Maine 04469. Article: Flow Meter with four dials, Model #2536-B. Manufacturer: Rigosha and Co., Ltd., Japan. Intended use of article: The article is intended to be used to measure flow of water through a plankton net to permit estimation of juvenile eel abundance. Collections of juvenile eels will be made on consecutive ebb and flood tides using buoyed and anchored net arrays. The objective of the experiment is to determine the behavioral patterns exhibited by juvenile eels migrating upstream in a tidal estuary. Application received by Commissioner of Customs: January 5, 1981.

Docket No. 81-00087. Applicant: NASA/Goddard Space Flight Center, Greenbelt, Rd., Greenbelt, MD 20771. Article: Excimer Rare Gas Halide Laser, Model TE-861M with Accessories. Manufacturer: Lumonics Inc., Canada. Intended use of article: The article is intended to be used for the following:

(1) Studies conducted using small molecules in the gas phase, e.g., water, ammonia, propyne, and acetylene.

(2) Study of small radical molecules such as CN, NH_2, OH, C_2 using the phenomena of dye laser induced fluroscence or spectroscopy.

(3) Studies on small radical molecules, e.g. C_3, C_5, and NH_2.

Application received by Commissioner of Customs: January 5, 1981.

Docket No. 81-00088. Applicant: U.S. Department of Commerce—NOAA, National Marine Fisheries Service, Atlanta Environmental Group, RR 7A, Box 522A, Narragansett, RI 02882. Article: Undulating Oceanographic Recorder—Mark II. Manufacturer: Almondbury Development Co., Ltd., United Kingdom. Intended use of article: The article will be used in collection of plankton data and relevant environmental data to explain the significant decline of these organisms which serve as larval fish food and to ensure other key questions regarding the functional relationships between resources and environments. The foreign article will sample the plankton over an extended range of depth (instead of present single depth) and measure and record, in situ, a number of physical parameters even when timed at high speeds of vital importance in marine ecology as well as physical oceanography and meteorology. Application received by Commissioner of Customs: January 5, 1981.

Docket No. 81-00089. Applicant: University of Georgia, Sea Grant College Program, Ecology Building, Athens, Georgia 30602. Article: Four Radar Units. Manufacturer: Sperry Marine Systems, Japan. Intended use of article: The article is intended to be used for the establishment of training facilities for a commercial fisheries training program. Navigational courses will be conducted to provide commercial fishermen and students interested in commercial fishing careers with the opportunity to obtain training in the operation of radar, fishfinding types of sonar and loran C. Application received by Commissioner of Customs: December 30, 1980.

Docket No. 81-00090. Applicant: St. Agnes Medical Center, Skin Bank, 1900 South Broad Street, Philadelphia, PA 19145. Article: Evaporimeter #EPIC. Manufacturer: Servo-Med AB, Sweden. Intended use of article: The article is intended to be used to take quantitative measurements of water evaporation from skin surfaces which have been altered as the result of thermal injury and evaluate:

1. Patient status,

2. The fluid requirements of the patient,

3. Effectiveness of treatments designed to as closely as possible, imitate the physiologic functions of normal skin.

Application received by Commissioner of Customs: January 5, 1981.

Docket No. 81-00092. Applicant: Johns Hopkins University, Charles and 34th Street, Baltimore, Maryland 21218. Article: Electron Microscope, Model EM 109 and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be

used in conducting research of the following:

(1) Control of eukaryotic DNA replication and genetic recombination in *Xenopus laevis*.

(2) Work on the structure and function of contractile proteins involved in cell motility.

(3) Regulation of eukaryotic gene expression.

(4) Cellular and molecular mechanisms controlling DNA replication.

(5) The structure of the plasma membrane and how this structure permits this membrane to conduct its physiological function.

(6) Genetic characterization of imaginal disc development in *Drosophila* studied using lethal and temperature-sensitive mutants.

The article will be used to train graduate students and postdoctoral fellows in the use of an electron microscope in their research. Application received by Commissioner of Customs: January 5, 1981.

Docket No. 81-00093. Applicant: Cornell University, University of Chemistry, Baker Laboratory, Ithaca, New York 14853. Article: Ion Microanalyzer, Model IMS-3F. Manufacturer: Cameca Instruments, France. Intended use of article: The article is intended to be used for research involving the study of three dimensional chemical composition of a wide variety of materials. Efforts on the quantification of elemental concentration obtained in ion microscopy will be a continuation of ongoing research. Typical areas of study are:

(1) Semiconductors—materials including silicon and the III–V semiconductors such as gallium arsenide, indium phosphide, and compounds grown epitaxially on these materials as substrates.

(2) Metals—lateral and in-depth distributions of impurity elements will be studied in metals chosen for their structural and engineering importance.

(3) Biological materials—materials will be thin tissue sections from both animal and plant sources.

The article will also be used for educational purposes by graduate students doing Ph.D. thesis studies. Application received by Commissioner of Customs: January 5, 1981.

Docket No. 81-00094. Applicant: Franklin Research Center, 20th & Race Streets, Philadelphia, PA 19103. Article: Electron Microscope, Model JEM 100CX with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to study biological cells and tissues and particulate matter. Included among these will be respiratory tissue in the normal and diseased state. An important aspect of these studies will involve the structure of elastin and collagen in the lung. Also inflammatory such as neutrophils and macrophages and the identification of particulate materials ingested by these cells will be studied. Application received by Commissioner of Customs: January 6, 1981.

BILLING CODE 3510-25-M

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the Federal Register.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 81-00095. Applicant: Arizona State University, Tempe, AZ 85281. Article: Electron Microscope Goniometer Stage. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is an accessory to an existing electron microscope which will allow for better resolution of rare earth oxides, minerals, and single crystals of semiconductors. The objectives of the investigation for which the article will be used will be to obtain structural knowledge of samples observed and to improve techniques for obtaining data from images of crystalline and amorphous samples. The article will also be used in the course Physics 591, Diffraction Physics—Elements of Microscopy to teach students the current theories pertaining to the field of electron microscopy as well as the application of those theories. Application received by Commissioner of Customs: January 6, 1980.

Docket No. 81-00096. Applicant: Uniformed Services, University of the Health Sciences, School of Medicine, 4301 Jones Bridge Road, Bethesda, MD 20014. Article: Electron Microscope, Model JEM 100CX with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to support basic and clinical medical research projects requiring high resolution transmission electron microscopy and goniometry. The specific research applications include the following:

a. Interaction of parasites with host erythrocytes, leukocytes, phagocytes, and epithelial cells.

b. Localization and characterization of the components of malaria parasites and their altered host cells which are important in the immunologic protection against malaria.

c. Analysis of experimental malaria vaccines from blood stage antigen preparations.

d. Structural, cytochemical, and morphogenetic analysis of the knob alterations on the surface of erythrocytes infected with *Plasmodium falciparum*.

e. Parasite-induced cell, tissue, and organ histopathology.

f. Chemotherapy in parasite model systems.

g. Cellular interaction in the immune response *in vitro* and *in vivo*.

The principle objectives of the research programs in which the article will be used are a better understanding of the basic biological mechanisms involved in host-parasite interactions, particularly as they relate to immunological responses. The article will also be used for teaching graduate students, postdoctoral fellows, and staff, advanced techniques in electron microscopy. Application received by Commissioner of Customs: January 6, 1981.

Docket No. 81-00097. Applicant: Arizona State University, Tempe, AZ 85281. Article: Electron Milcroscope Specimen Holder, BLG No. 1. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is an accessory to an existing electron microscope which will allow for better resolution of rare earth oxides, minerals,

and single crystals of semiconductors. The objectives of the investigation for which the article will be used will be to obtain structural knowledge of samples observed and to improve techniques for obtaining data from images of crystalline and amorphous samples. The article will also be used in the course Physics 591, Diffraction Physics—Elements of Microscopy to teach students the current theories pertaining to the field of electron microscopy as well as the application of those therories. Application received by Commissioner of Customs: January 6, 1981.

Docket No. 81-00098. Applicant: University of Illinois Medical Center, Research Resources Center (933 Bldg.), P.O. Box 6998, Chicago, Illinois 60680. Article: Electron Microscope, Model JEM 100S with Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in a wide range of research projects including but not limited to:

Synaptogenesis in the Trigeminal Mesencephalic Nucleus
Separation of the Neurons and Glia by Density Gradient Centrifiguation
Role of Microfilaments in Synthesis and Secretion
Retinal Degenerations
Characterization of Muscle Specific Clones-Heteroduplex R-Looping
Nucleolus and Nuclear Differentiation in the Oral Epithelium of Zink Deficient Rats
The Ultrastructural of Normal Primate Lung and Lung in Shock
The Ultrastructural of Nuclear Histones in Melanocytes and Melanoma
Neonatal and Other Incremental Lines in Human Enamel
Liposomes on Lymphoblasts
Dermopathology of Hair
Normal and Pathological Skin Cells
Dentogenesis in Frog's Teeth
The Maturation of Rat Incisor Enamel
Fixation of Tissues by Metallizable Chloro-s-triozines
Localization of Salivary Gland Virus Particles in SGV-Sensitive Cell Lines
Search of Virus Particles from Spontaneously Transformed Normal Calvarium Derived Tissue Culture Cells to Transplantable Neoplasms in Mice
Odontoblastic Process in Sclerotic End Formation.

Application received by Commissioner of Customs: January 6, 1981.

Docket No. 81-00099. Applicant: Greater Washington Educational Telecommuncations Assoc., Inc., Box 2626, Washington, D.C. 20013. Article: Teletext System. Manufactures: Norpak, Canada. Intended use of article: The article will be used in a research project to identify public response to a variety of teletext materials provided by, among others, educational institutions, newspapers, the U.S. Food and Drug Administration, the Federal Trade Commission, The District of Columbia government, the U.S. Office of Education, and the General Services Administration. The basic experiment is the measurement of viewer response to the teletext materials, using the data recorder integral to the receiver decoders. Ancillary to the basic experiment is measurement of the technical performance of the system when a variety of data rates, library length, etc., is employed. The experiment will yield data on public acceptance of teletext materials, permitting a determination whether teletext should be integrated into the nation's system of public telecommunications, and if so, what technical parameters and content are optimum. Application received by Commissioner of Customs: January 19, 1981.

BILLING CODE 3510-25-M

DHEW/PHS/CDC/NIOSH; Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 3109 of the Department of Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 80-00287. Applicant: DHEW/PHS/CDC/NIOSH, Division of Physical Sciences & Engineering, Measurements Research Branch, 4676 Columbia Parkway, Cincinnati, OH 45226. Article: Gas Chromatograph/Mass Spectrometer, Model MM70/70. Manufacturer: VG Micromass Ltd., United Kingdom. Intended use of article: See Notice on page 41998 in the Federal Register of June 23, 1980.

Comments: No comments have been received with respect to this application.

Decision: Application denied.

Reasons: An instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Discussion: In its response to Question 8.C.(2) the applicant alleges that the foreign article is the only instrument or apparatus which can provide a high resolution capability. The National Bureau of Standards (NBS) advises in its memorandum dated September 18, 1980 that a high resolution instrument enhances the applicant's research goals and is pertinent to the intended purposes. The determination of scientific equivalency is based on a comparison of the guaranteed pertinent specifications of the foreign article and similar specifications of the most closely comparable domestic instrument. The foreign article has a guaranteed resolution of 25,000 (10% valley definition). The most closely comparable domestic instrument is the Model 12-90-G(DF) and accessories manufactured by Nuclide Corporation (Nuclide). This domestic instrument guarantees a resolution of 30,000 (10% valley definition) (PUBS 1452-A-0974). NBS advises that the Nuclide instrument matches or exceeds the guaranteed resolution of the foreign article. The Department concurs.

The applicant in reply to Question 9 states that it did not seek a request for quote (RFQ) from domestic manufacturers. The applicant explained that as a Federal agency it is required to purchase such equipment (mass spectrometers) from those available on the General Services Administration (GSA) schedule. Also the applicant consulted catalogues, technical journals, etc. in which such instruments are advertised and concluded that to its knowledge there are no domestic manufacturers of high resolution mass spectrometers on or off the GSA schedule. Therefore, it saw no need to request bids on equipment that is standard and available as a stock item.

The Department has historically treated mass spectrometers as produced-on-order instruments. Subsection 301.2(j) of the Department's regulations defines produced-on-order instruments as those which a manufacturer lists in a current catalogue and is able and willing to produce and have available without unreasonable delay to the applicant. Nuclide offers standard produced-on-order mass spectrometers. The fact that the applicant's purchase policy limits

purchases to instruments on the GSA schedule is not relevant to the Department's procedures and cannot be considered in our scientific equivalency evaluation. Further, the applicant indicates that other sources of supply were reviewed. The failure to contact Nuclide is difficult to understand since Nuclide has been manufacturing mass spectrometers of the type desired by the applicant over 20 years. Nuclide in the past (at least as early as 1969) has published literature guaranteeing a resolution of 30,000 for its Model 12-60-G(DF) and has quoted that resolution in response to RFQs.

Therefore based on the foregoing, NBS advice, specifications in our files, and our own review of the application, we find that the Model 12-60-G(DF) is of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

BILLING CODE 3510-25-M

Discrete Semiconductor Device Subcommittee of the Semiconductor Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on August 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on September 19, 1980 pursuant to the charter of the Committee.

The Discrete Semiconductor Device Subcommittee was formed to study transistor, diode, photoconductive, and thyristor semiconductor devices with the goal of making recommendations to the Department of Commerce relating to the appropriate parameters for controlling exports for reasons of national security.

TIME AND PLACE: April 14, 1981, at 9:30 a.m. The meeting will take place at the Main Commerce Building, Conference Room B, 14th Street and Constitution Avenue NW., Washington, D.C. The Subcommittee will meet only in Executive Session to discuss matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230. Telephone: 202-377-2583.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12065. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, telephone: 202-377-4217.

Dated: March 20, 1981.

Saul Padwo,

Director of Licensing, Office of Export Administration.

BILLING CODE 3510-25-M

Microcircuit Subcommittee of the Semiconductor Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on August 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on September 19, 1980 pursuant to the charter of the Committee.

The Microcircuit Subcommittee was formed to study microcircuit and acoustic wave devices with the goal of making recommendations to the Department of Commerce relating to the appropriate parameters for controlling exports for reasons of national security.

TIME AND PLACE: April 14, 1981, at 9:30 a.m. The meeting will take place at the Main Commerce Building, Room 5611, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

AGENDA: General Session

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Review of minutes of February 10, 1981 meeting.

(4) Subcommittee preparation for the next list review.

(5) Discussion of microprocessor peripheral circuits for educational purposes of the Subcommittee.

(6) Presentation on CMOS microprocessor capability. Executive Session

(7) Discussion of matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PUBLIC PARTICIPATION: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12065.

A copy of the Notice of Determination to closed meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, Telephone: 202-377-4217.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret A. Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: 202-377-2583.

Semiconductor Manufacturing Materials and Equipment Subcommittee of the Semiconductor Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered onAugust 29, 1980 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on September 19, 1980 pursuant to the charter of the Committee.

The Semiconductor Manufacturing Materials and Equipment Subcommittee was formed to study the technical and strategic value of semiconductor device production equipment and materials for the purpose of maintaining a continuous review of the export control technical parameters, and the formulation of recommendations to the Commerce Department for parameter updating as appropriate for reasons of national security.

TIME AND PLACE: April 14, 1981, at 9:30 a.m. The meeting will take place at the Main Commerce Building, Room 6802, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. The Subcommittee will meet only in executive session to discuss matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Office of the Director of Licensing, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230. Telephone: 202–377–2583.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 16, 1980, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12065. BILLING CODE 3510-25-M

Maritime Administration

[Docket No. S–687]

Manhattan Tankers Co., Inc., et al., Application

Notice is hereby given that Manhattan Tankers Company, Inc., Keystone Shipping Co., Keystone Tankship Corporation, and Fredericksburg Shipping Company have each filed an application with the Maritime Subsidy Board, pursuant to Title VI of the Merchant Marine Act, 1936, as amended (the Act), for an operating-differential subsidy contract, to expire December 31, 1981, unless extended, to operate the SS's *Manhattan, Perryville, Golden Gate,* and *Fredericksburg, respectively, in the carriage of bulk raw and processed agricultural commodities in the foreign commerce of the United States from ports in the U.S. to ports in*

the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Dry and liquid bulk cargoes may be carried from the U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk raw and processed agricultural commodities to the U.S.S.R., or other permissible ports of discharge.

Full details concerning the U.S.-U.S.S.R. export bulk and processed agricultural commodities subsidy program, including terms, conditions and restrictions upon both the subsidized operators and vessels, appear in Title 46 of the Code of Federal Regulations, Part 294.

For purposes of section 605(c) of the Act, it should be assumed that should the Board grant the requested approval, the vessels named above will engage in the described trade, on a full-time basis, during the indicated time period. Under such approval, each voyage must be approved for subsidy assistance prior to its commencement, and the Board will act on such request(s) as an administrative matter for which there is no requirement for further section 605(c) notice(s).

Any person having an interest in the granting of the applications and who would contest a finding by the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes previously specified is inadequate, must on or before 4/7/81 notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's Rules of Practice and Procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act, and, with as much specificity as possible, the facts that the intervenor would undertake to prove at such hearing.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to the subject applications, the purpose of such hearing will be to receive evidence relevant to (1) whether the applications herein described, with respect to the vessels to be operated in an essential service and served by citizens of the U.S., would be in addition to the existing service or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such actions as may be deemed appropriate.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

Marine Mammals; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Auckland City Council (P285).

b. Address: Auckland Zoological Park, Grey Lynn, Auckland 2, New Zealand.

2. Type of Permit: Public Display.

3. Name and Number of Animals: California sea lions *(Zalophus californianus)*, 4.

4. Type of Take: The Applicant will take 4 sea lions from captive bred stocks.

As a request for a permit to take living marine mammals to be maintained in areas outside the jurisdiction of the United States, this application has been submitted in accordance with National Marine Fisheries Service policy concerning such applications (40 FR 11619, March 12, 1975). In this regard, no application will be considered unless:

(a) It is submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, through the appropriate agency of the foreign government;

(b) It includes:

i. a certification from such appropriate government agency verifying the information set forth in the application;

ii. a certification from such government agency that the laws and regulations of the government involved permit enforcement of the terms of the conditions of the permit, and that the government will enforce such terms;

iii. a statement that the government concerned will afford comity to a National Marine Fisheries Service decision to amend, suspend or revoke a permit.

In accordance with the above cited policy, the certification and statements of New Zealand government have been found appropriate and sufficient to allow consideration of this permit application.

5. Location of Activity: Sea Life Park, Waimanalo, Hawaii.

6. Period of Activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register** the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, on or before April 24, 1981. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 18, 1981.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Marine Mammals; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a permit to import marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–222)

1. Applicant:

a. Name: Carnegie Museum of Natural History (P258A).

b. Address: Section of Man, 4400 Forbes Avenue, Pittsburgh, Pennsylvania 15213.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals:

Bearded seal (*Erignathus barbatus*), 6+; Ringed seal (*Phoca hispida*), 11+; Bowhead whale (*Balaena mysticetus*), 1+; Unspecified whalebone, 3+.

4. Type of Take:

Anthropological specimen materials from seals taken in subsistence hunts and beach cast whalebones including bowhead whales will be imported into a curated collection.

5. Location of Activity: Holman Island, Northwest Territories, Canada.

6. Period of Activity: 2 years.

Concurrent with the publication of this notice in the **Federal Register** the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before April 24, 1981. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statement and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: March 18, 1981.

BILLING CODE 6330-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Levels of Restraint Under a New Bilateral Wool and Man-Made Fiber Textile Agreement With the Socialist Republic of Romania, Effective April 1, 1981

March 19, 1981.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing levels of restraint for certain wool and man-made fiber textile products, produced or manufactured in Romania and exported during the twelve-month period beginning on April 1, 1981 and extending through March 31, 1982, pursuant to a new bilateral agreement.

SUMMARY: By an exchange of notes dated September 3, 1980, the Governments of the United States and the Socialist Republic of Romania have agreed on a new Bilateral Wool and Man-Made Fiber Textile Agreement beginning on April 1, 1981 and extending through March 31, 1985. The agreement establishes, among other things, specific levels of restraint for textile products in Categories 443 (men's and boys' wool suits) and 643/644pt. (woven suits of man-made fibers). The agreement also

provides consultation levels for certain categories, such as Categories 465 (wool floor coverings) and 635 (women's, girls' and infants' coats of man-made fibers), which are not subject to specific limits and for which the levels of restraint may be adjusted during the agreement year. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the new bilateral agreement, to prohibit, during the twelve-month period beginning on April 1, 1981 and extending through March 31, 1982, entry into the United States for consumption, or withdrawal from warehouse for consumption, of wool and man-made fiber textile products in Categories 443, 465, 635 and 643/644pt. in excess of the designated levels.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506) and December 24, 1980 (45 FR 85142)).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: April 1, 1981.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–5423).

Paul T. O'Day,

Chairman, Committee for the Implementation of Textile Agreements.

March 19, 1981.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the bilateral Wool and Man-Made Fiber Textile Agreement of September 30, 1980, between the Governments of the United States and the Socialist Republic of Romania; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on April 1, 1981 and for the twelve-month period extending through March 31, 1982, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in Categories 443, 465, 635, and 643/644 pt., produced or manufactured in Romania, in excess of the following levels of restraint:

Category	12-mo level of restraint [1]
443	7,557 doz.
465	1,560,000 ft².
635	41,182 doz.
643/644 pt.[1]	24,537 doz.

[1] In Category 643/644, only TSUSA numbers 380.0484, 380.5178, 380.8451, 380.8452, 382.0478, 382.4282, and 382.8187.

In carrying out this directive entries of textile products in the foregoing categories, except Category 465, produced or manufactured in Romania, which have been exported to the united States on and after January 1, 1980 and extending through March 31, 1981, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the fifteen-month period beginning on January 1, 1980 and extending through March 31, 1981. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter. Textile products in Category 465 that have been exported to the United States before April 1, 1981 shall not be subject to this directive.

The levels of restraint set forth above are subject to adjustment according to the provisions of the bilateral agreement of September 3, 1980, between the Governments of the United States and the Socialist Republic of Romania, which provide, in part, that: (1) specific levels of restraint may be increased for carryover and carryforward up to 11 percent of the applicable category limit; consultations may be held to adjust levels of restraint for categories not subject to specific limits; and (2) administrative arragnements or adjustments may be made to resolve problems arising under these provisions of the agreement. Any appropriate adjustments under the bilateral agreement referred to above, will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506) and December 24, 1980 (45 FR 85143).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Socialist Republic of Romania and with respect to imports of wool and man-made fiber textile products from Romania have been determined by the Committee for the implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Paul T. O'Day,

Chairman, Committee for the Implementaion of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

March 20, 1981.

The USAF Scientific Advisory Board Ad Hoc Committee on Non-Nuclear Armament will meet on April 9th and 10th, 1981 from 8:30 a.m. to 5:00 p.m. at Picatinny Arsenal, Dover, NJ.

The Committee will receive classified briefings and participate in classified discussions relating to the Air Force Non-Nuclear Armament Development, Production and use. The meetings concern matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly the meetings will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–4648.

[FR Doc. 81-9012 Filed 3-24-81; 8:45 am]
BILLING CODE 3910-01-M

Department of the Army

Relocation of United States Military Enlistment Processing Command Headquarters from Fort Sheridan to Great Lakes, Ill.

AGENCY: Department of Defense, Department of the Army

ACTION: Final notice on the relocation of United States Military Enlistment Processing Command Headquarters and its subordinate element from Fort Sheridan, IL, to Building 3400, Naval Training Center, Great Lakes, IL.

SUMMARY: The Department of Defense announced that the United States Military Enlistment Processing Command (US MEPCOM) Headquarters and the Command's Central Sector Headquarters will move from Fort Sheridan, IL, to Building 3400, Naval Training Center, Great Lakes, IL. The previous 21 November 1980 announcement of this minor base realignment was subjected to a 30 day public review period (Federal Register Vol. 46, No. 5, 8 January 1981). After reviewing the public comments received, Department of Defense is proceeding

with relocation as previously announced. The move will be completed in two phases over the next 2 years.

This operationally advantageous move collocates the US MEPCOM Headquarters with elements of the Selective Service System in Building 3400 at Great Lakes. An automated data processing facility to be operated by US MEPCOM is being planned for installation in the building, which will be shared with the Selective Service System. The initial phase of the move will involve the Automated Data Processing Elements of US MEPCOM with 17 military and 11 civilian personnel actions. This initial phase is expected to be completed by May 1981 with the final phase scheduled for completion in April 1982. Building 3400 will also be occupied by elements of other Department of Defense Agencies.

This action will result in the move of a total of 124 military and 89 civilian positions to Great Lakes, which is about seven miles north of Fort Sheridan. The one-time cost of this action will be approximately $1 million, including relocation costs and the cost of renovation of portions of Building 3400 for US MEPCOM. However, projected annual savings are expected to be cost beneficial in that base operating support costs at Great Lakes will be lower.

US MEPCOM is one of the organizations included in the Army's study of the closure of Fort Sheridan announced on 26 April 1978. Also, the use of Building 3400 is one of the alternatives considered in that study. As a result of today's decision, the Fort Sheridan study will require some revision.

FOR FURTHER INFORMATION CONTACT: Perry J. Fliakas, Deputy Assistant Secretary of Defense (Installations and Housing), Washington, D.C. 20310 (202–695–7804).

Dated: March 20, 1981.

Paul W. Johnson,

Deputy for Installation and Housing ASA(IL&FM).

BILLING CODE 3710–08–M

Medical Research and Development Advisory Panel, Pharmacology Subcommittee; Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Subcommittee Meeting:

Name of Committee: United States Army Medical Research and Development Advisory Panel Subcommittee on Pharmacology.

Date of Meeting: April 22, 1981.

Time and Place: 0830 hrs, Room 3082, Walter Reed Army Institute of Research, Washington, DC.

Proposed Agenda: This meeting will be open to the public on 22 April from 0830 to 0945 hours to discuss the scientific research program of the Pharmacology Branch, Walter Reed Army Institute of Research. Attendance by the public at open sessions will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 0945–1200 hrs and from 1300–1600 hrs on 22 April 1981 for the review, discussion and evaluation of individual programs and projects conducted by the U.S. Army Medical Research and Development Command, including consideration of personnel qualifications and performance, the competence of individual investigators, medical files of individual research subjects, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Howard Noyes, Associate Director for Research Management, Walter Reed Army Institute of Research, Bldg. 40, Room 1111, Walter Reed Army Medical Center, Washington, DC 20012 (202/576–3061) will furnish summary minutes, roster of Subcommittee members and substantive program information.

For the Commander:

Harry G. Dangerfield,

Colonel, MC, Deputy Commander.

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

Community Education Advisory Council; Meeting Cancellation

AGENCY: Department of Education, Community Education Advisory Council.

ACTION: Notice of meeting cancellation.

SUMMARY: This notice is intended to notify the general public of the cancellation of the Community Education Advisory Council meeting scheduled for March 17 and 18, 1981 in Washington, D.C. Notice of the meeting was published in the **Federal Register**, Vol. 46, No. 39 on Friday, February 27, 1981 as required under Section 10(a)(2) of the Federal Advisory Committee Act.

SUPPLEMENTARY INFORMATION: The Community Education Advisory Council is authorized under Pub. L. 95–561. The Council is established to advise on policy matters relating to the interest of community schools.

Regulations governing advisory councils state that meetings cannot be conducted without a quorum. Therefore, it was necessary to cancel the March 17 and 18, 1981 Council meeting. The meeting will be rescheduled possibly in April and a subsequent announcement of the meeting will be published in this document.

Signed at Washington, D.C. on March 19, 1981.

Ron Castaldi,

Director, Community Education Program.

[FR Doc. 81–8873 Filed 3–24–81; 8:45 am]

BILLING CODE 4000–01–M

National Advisory Council on Adult Education; Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Executive Committee of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATES: April 14, 1981, 1:30 p.m. to 5:30 p.m., Executive Committee meeting; April 15, 1981, 2:30 p.m. to 5:30 p.m. and April 16, 1981, 10:00 a.m. to 12:30 p.m., public hearings on the reauthorization of the Adult Education Act.

ADDRESSES: Biltmore Plaza, Kennedy Plaza, Providence, Rhode Island, on April 14–15; Providence Opportunities Industrialization Center, One Hilton Street, Providence, Rhode Island, on April 16.

FOR FURTHER INFORMATION CONTACT: Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th St., N.W., Washington, D.C. 20004 (202/376–8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The Council is established to:

Advise the Secretary in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs

under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee is open to the public. The proposed agenda includes:

Block Grants.
Rescissions.
FY-82 Appropriations.
Council Operational Budget.
Council Meeting Schedule.
Committee Activities.
Presentation to Commission on Adult Basic Education National Conference on Issues, Appropriations, Reauthorization, and Federal Policy for the Adult Education Act.

Records are kept of all Council proceedings, and are available for public inspection at the office of the National Advisory Council on Adult Education, 425 13th St., N.W., Suite 323, Washington, D.C. 20004.

Signed at Washington, D.C., on March 18, 1981.

Gary A. Eyre,

Executive Director, National Advisory Council on Adult Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Continued Operation of the Los Alamos National Scientific Laboratory at Los Alamos, New Mexico; Record of Decision

Decision

The Department of Energy (DOE) has evaluated the environmental impact of past and expected future activities at the Los Alamos National Scientific Laboratory (LANSL) site and alternative actions. Based on this analysis and national defense program needs, DOE has decided to continue operating the facility at a moderate growth rate while actively modifying procedures and facilities to eliminate or reduce environmental impacts resulting from the nuclear weapons research and development and other nonweapons programs.

Project Description

LANSL has operated at the Los Alamos, New Mexico, laboratory site for thirty-eight years. The environmental impact statement (EIS) for this site, DOE/EIS-0018, assesses actual and potential impacts on the surrounding environment from past operations with coverage of some further growth and evolution of research programs in new areas. The primary mission of LANSL has continued to be nuclear weapons research and development. However, other programs have been incorporated including development of peaceful uses of nuclear energy in such areas as fission reactors, space technology, controlled thermonuclear reactions, and medical and biological applications. Recently, there has been increasing diversification into nonnuclear research areas; notably, geothermal, solar, and the use of superconductor technology for energy storage and transmission. Adverse impacts from postulated accidents associated with these activities have been considered. Minute quantities of various effluents, including radioactive ones, are released to the environment during normal operations. However, a continuing, comprehensive monitoring program is carried out to assist in the control of all effluents, and improved systems of release control are installed as they are developed. The measurements made in the monitoring program are available to the public at all times and are assembled in the annual monitoring report for the LANSL site. The operation of LANSL is essential for the maintenance of the national defense program. It also contributes significantly to increased national self-sufficiency of energy resources. Systems developed to reduce environmental impact of these operations are available for use throughout the Nation.

Description of Alternatives

The following alternatives were considered by DOE in reaching its decision:

(1) No change from present facilities and operations. (No action alternative.)

(2) Cessation or relocation of programs to other sites to transfer environmental costs to other locations.

(3) Modification of future trends to include a major increase in growth which would induce impacts of new construction, land use, resource consumption, and increase waste disposal requirements.

(4) Limitation of adverse impacts during moderate growth by replacing or modifying facilities and procedures in order to reduce environmental impact as better technologies become available.

(5) Institutional change of limiting some adverse impacts by increasing water conservation, releasing additional lands for housing, and limiting public access to onsite roads.

Basis for Decision

Recent international events have underscored the needs for the maintenance of the Nation's defense program and the need to decrease the Nation's dependency on imported energy by promoting self-sufficiency by utilizing our own energy resources. The continued operation of LANSL by DOE is directed toward achieving these needs.

Requirements for nuclear weapons research, development, and production are mandated by Congress and the President as part of the overall national defense policy. DOE is responsible for carrying out this mandate. The principal activities at LANSL support DOE's effort in carrying out its responsibilities in the nuclear weapons program area, although increased emphasis is being placed on activities at LANSL for developing energy self-sufficiency.

Consideration of each of the above alternatives is as follows:

(1) *No Action.* If the no-action alternative were to be chosen, there would be no change in the present facilities and operations with the consequence of no change in continuing environmental impacts. This also means there would be no further construction or decommissioning of facilities, no change in rate of use of resources, no change in employment, and no change in the general nature of work performed. Because of the nature of work performed, i.e., applied and basic scientific research, this alternative is not tenable for more than a very short period. As phases of research are completed, the type of work would change which would frequently result in changes in the use of facilities and resources. The overall size of the laboratory employment could be held constant, and no new buildings would be constructed. This would permit research work to continue by modifying existing facilities to accommodate program changes. This course of action would lead to a limitation on the types of research and productivity as facilities become totally obsolete.

This no-action alternative would incur a continuation of environmental impacts at the present level. There would be no improvement by mitigation of impacts, and there would be some impacts that could become cumulatively larger, e.g., the amount of land committed to waste disposal. In addition, LANSL would become ineffective in assisting DOE in meeting its responsibilities for implementing new research and development activities mandated by Congress and the President.

(2) *Cessation or Relocation of Programs.* Cessation of planned nuclear weapons research programs or complete or partial relocation would result in reductions in environmental impacts. The discontinuation or relocation of these research programs would make other uses of the site possible, though not necessarily feasible. Complete cessation of all research programs, with no provision for meeting defense program needs elsewhere, would be contrary to Presidential directives and is therefore unacceptable.

Research on various energy technologies also has a high national priority. Thus, complete cessation of all programs at LANSL would result in some loss of research and development in these areas of national need.

Complete relocation of all research programs would eliminate many environmental impacts at the LANSL site without substantial loss of the benefits of research. However, such relocation is costly. Small parts of current operations could be moved to other DOE laboratories without expansion of their facilities. Most research is closely tied to major LANSL facilities that would have to be moved to, or reproduced at, other sites to permit continuation. Many of the special facilities would be both difficult to decontaminate and costly to relocate or rebuild. Certain structures could not be moved, yet have long remaining economic lifetimes. Complete decontamination and decommissioning of the entire LANSL facility could run into the hundreds of millions of dollars. Some radioactive waste disposal areas may be too costly to decontaminate sufficiently to allow unrestricted use.

Removal of the laboratory would delete at least $515 million annually in personal incomes and other laboratory-related expenditures from the New Mexico economy. The benefits derived from termination or relocation of research programs from LANSL would be partly dependent on the new uses of the existing facilities and site.

The termination or relocation of selected programs or facilities could reduce or eliminate some environmental impacts of the current operations without complete loss of benefits.

Radioactive airborne effluents and liquid wastes are treated to meet appropriate guidelines Total quantities released have been substantially reduced in recent years due to improvement of treatment systems. The net result of relocation would be eliminating the release of about 40 μCi of plutonium in airborne effluents and about 8 mCi of plutonium in liquid effluents.

The removal of LANSL activities to other locations would merely transfer many environmental impacts to other areas. Although reconstruction might lead to some reduced impacts at the new site in comparison with present operations, the equivalent expenditure on improvements to the existing site and facilities would be more productive.

(3) *Modification of Future Trends.* A major increase in growth of LANSL would include new construction and additional land use. There is ample developable space for a moderate growth without causing major impacts on total proportion of land used or greatly disturbing wild life habitat. Land areas have been identified that are suitable for development that would permit considerable expansion of facilities. Any expansion would likely increase consumption of water and energy resources in close proportion to the number of employees. Waste disposal requirements would also increase, but effluents might not necessarily increase because of better control and treatment. New construction and increases in employment would add greater economic input to the region. Since housing in the Los Alamos area is in short supply, accelerated growth would place even more pressure on the existing market and could push prices even higher. Water and energy use, as well as solid and liquid waste disposal for the community, would increase in proportion to total population.

(4) *Limitation of Adverse Impacts.* The preferred action is to continue operation of LANSL with moderate growth in employment. This increase is predicated on the likely expansion or addition of certain research programs. This growth would be accompanied by addition of facilities and/or modification of procedures and facilities and would eliminate or reduce the resultant impacts of operations.

A moderate growth rate could result from a change in programmatic emphasis, combination of programs, acceleration of programs, or a combination of all three. Major deviations would most likely result from substantive changes in national policy made at the congressional or executive levels of Federal Government. For example, a major new federally supported program to develop new energy technologies at a faster pace could lead to rapid expansion of at least some LANSL research activities. A consolidation of weapons research programs at LANSL could lead to a significant expansion of many research activities. Conversely, consolidation of weapons work at another laboratory could lead to a reduction at LANSL.

The modification of laboratory procedures or facilities with the objective of further reduction or elimination of environmental impact from present or future research operations can be accomplished productively and economically. New facilities will continue to be designed with due consideration to environmental impact. Basic mechanisms operate at LANSL with the goal of identifying and dealing with problems before they incur significant impacts. Systematic reviews of proposed projects, facilities, or procedures are conducted to identify any potential problems and to suggest alternatives or appropriate mitigating measures to be employed.

The ongoing environmental surveillance program is designed to document actual performance and detect trends that could indicate the development of undesirable conditions so that corrective measures can be initiated before significant impacts occur.

Several basic approaches to reduce environmental impact include replacement of facilities to permit continued operations with improved environmental controls, application of new or different technologies to existing operations, alteration of procedures, conservation, and long-range coordinated site planning.

(5) *Institutional Alternatives.* Some types of environmental impacts could be affected by institutional actions and, in many cases, would provide administratively simple ways of minimizing the impacts.

Potential exposure of members of the general public to radiation near some facilities could be reduced by restricting public access to the roads running across the site. This would require additional manned entrance gates at the laboratory boundaries. There would be a substantial effect on transportation patterns, resulting in inconvenience for many people.

An implementation of mass transit for laboratory employees in the local residential areas, coupled with parking controls or other incentives to encourage carpooling, could reduce gasoline consumption and the associated release of atmospheric pollutants.

Discussion of Environmentally Preferred Alternative

Alternative 4, the continued operation of LANSL with the limitation of adverse impacts by modification of procedures and facilities and by replacing or improving existing facilities to reduce

environmental impact, is the preferred course of action. Effluent improvement technologies continue to be developed, and installation of improved effluent mitigating measures, as they become available, should further reduce pollutant discharges to even lower levels than are detected at the present time.

Operation of the laboratory at a moderate growth rate to accommodate national needs with the continued improvement of environmental impact mitigating measures, coupled with institutional alternatives, is considered the environmentally preferred alternative. Although the institutional alternatives are not being implemented at this time, the Department will continue to pursue these alternatives as viable means for reducing adverse environmental impacts.

Considerations in Implementing the Decision

There must be a continuing review of proposed new projects for environmental aspects before they go forward, and projects will be balanced against programmatic needs of national security and national energy requirements. The present monitoring and sampling programs will be continued and further developed, as needed, to keep pace with new LANSL programs. All practicable means to minimize environmental harm will continue to be adopted. This includes upgrading of environmental release mitigating measures, such as the present active programs to improve waste management practices.

The LANSL site contains many archeological sites, and the present practice of archeological surveys prior to new construction will be continued with careful documentation.

The present active conservation program to reduce natural resource consumption will be continued and action taken to provide for minimizing energy and materials wherever such actions are reasonable.

The public is aware of programs at LANSL, and local effort will continue to be made to keep the public informed of research programs and any possible environmental impacts, as well as steps taken to minimize such impacts.

R. L. Morgan

Acting Assistant Secretary for Defense Programs.

March 9, 1981.

[FR Doc. 81-8959 Filed 3-24-81 8:45 am]

BILLING CODE 6450-01-M

Proposed Subsequent Arrangements

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the Government of Japan Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangements to be carried out under the above mentioned agreements involve approval for shipment of enriched uranium/aluminum alloy fuels from the locations below to the DOE Savannah River facility for reprocessing and storage of recovered uranium.

Reactor and location	Kilograms of contained uranium
JMTR, Japan	55
Nereide, France	2

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that these subsequent arrangements will not be inimical to the common defense and security. These arrangements for returning U.S. origin highly enriched uranium (HEU) to the U.S. are consistent with U.S. non-proliferation policy in that they serve to reduce the amount of HEU abroad.

These subsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: March 19, 1981.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

[FR Doc. 81-8960 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-01-M

Bonneville Power Administration

Intent To Develop Policy Guidelines and Methodology To Compute Billing Credits; Request for Public Comments

AGENCY: Bonneville Power Administration (Bonneville or BPA), Department of Energy.

ACTION: Notice of Intent to Develop Policy Guidelines and Methodology to Compute Billing Credits; Request for Public Comments.

SUMMARY: Pursuant to Section 6 of Pub. L. 96-501, the Bonneville Power Administration intends to develop policy guidelines and a methodology to compute billing credits. At this time, Bonneville is seeking suggestions, advice, and recommendations from interested persons which can be used to assist in the development of the initial proposal.

Bonneville expects to publish a Notice of Proposed Policy Guidelines and Methodology to Compute Billing Credits in the summer of 1981 following the prospective establishment of the Pacific Northwest Electric Power and Conservation Planning Council. That Notice will also include a schedule for public information and comment forums. Bonneville will explain its billing credit proposal and answer questions at the information forums. The comment forums will give interested persons an opportunity to present both oral and written comments on the proposal.

DATES: Effective Date: March 25, 1981. Suggestions and recommendations concerning the development of Bonneville's initial proposed billing credit policy guidelines will be accepted through June 30, 1981. In addition, BPA will endeavor to meet with all interested persons who may have questions concerning the billing credit requirement under Pub. L. 96-501. To request such a meeting, interested persons should contact the BPA Area or District Manager in their locality or the office of the Public Involvement Coordinator.

FOR FURTHER INFORMATION CONTACT:

Ms. Donna Lou Geiger, Public Involvement Coordinator, P.O. Box 12999, Portland, Oregon 97212, 503-234-3361, ext. 4261. Toll-free numbers for Oregon callers, 800-452-8429; for callers from Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California, 800-547-6048.

Mr. John H. Jones, Area Manager, Suite 288, 1500 NE. Irving Street, Portland, Oregon 97208, 503-234-3361, ext. 4551.

Mr. Ladd Sutton, District Manager, Room 206, 211 East Seventh Avenue, Eugene, Oregon 97401, 503-345-0311.

Mr. Ronald H. Wilkerson, Area Manager, Room 561, West 920 Riverside Avenue, Spokane, Washington 99201, 509-456-2518.

Mr. Gordon H. Brandenburger, District Manager, P.O. Box 758, Kalispell, Montana 59901, 406-755-6202.

Mr. Ronald K. Rodewald, District Manager, Suite 117, 23 South Wenatchee, Wenatchee, Washington 98801, 509-662-4377, ext. 379.

Mr. Randall W. Hardy, Area Manager, Room 250, 415 First Avenue North, Seattle, Washington 98109, 206–442–4130.
Mr. Roy Nishi, Area Manager, West 101 Poplar, Walla Walla, Washington 99362, 509–525–5500, ext. 701.
Mr. Robert N. Laffel, District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208–523–2706.

SUPPLEMENTARY INFORMATION: Section 6(h) of Pub. L. 96–501, the Pacific Northwest Electric Power Planning and Conservation Act (Act), directs Bonneville, upon request, to grant billing credits to customers for (1) independent conservation activities undertaken or continued by a customer or political subdivision served by such customer after the effective date of the Act (i.e., December 5, 1980), or (2) resources constructed, completed, or acquired by a customer, an entity acting on behalf of such customer, or political subdivision served by such customer after the effective date of the Act, that reduce the obligation of the Administrator to acquire resources under the Act. Retail rate structures which are voluntarily implemented by Bonneville customers and induce conservation or installation of consumer-owned renewable resources also qualify for billing credits upon the same showing as that required for other conservation activities or renewable resources.

The energy and capacity on which a credit to a customer is based shall be the amount by which a conservation activity or resource actually changes the customer's net requirement for supply of electric power or reserves from Bonneville. In addition, the credit for a conservation activity shall be set to credit the customer for the actual savings resulting from the activity, and the credit for a resource other than conservation shall be set to credit the customer for the net costs actually incurred by the customer or its representative in acquiring, constructing or operating the resource. In both instances, the rate impact to Bonneville's other customers shall not exceed the rate impact they would otherwise have experienced had Bonneville been obligated to acquire resources in an amount equal to that actually saved by the conservation activity or produced by the resource for which the credit is granted.

Prior to granting any billing credits, Bonneville must (1) publish notice in the **Federal Register**, and include the methodology the Administrator proposes to use in determining the amount of any credit; (2) include the cost of the credit in the annual or supplementary budget submittal to the Congress made pursuant to the Federal Columbia River Transmission System Act (16 U.S.C. § 838(j)); (3) require (with some exceptions) that resources in excess of a customer's reasonable load growth must have been offered to others for ownership, participation, or other sponsorship pursuant to subsection 6(m) of the Act; (4) require that the operators of any generating resource for which a billing credit is to be granted agree to operate the resource in a manner compatible with the planning and operation of the region's power system; and, (5) in the case of billing credits for major resources, provide for oversight provisions in the contracts therefor in accordance with subsection 6(i) of the Act, and comply with the procedures of subsection 6(c) of the Act.

Bonneville has formed an internal task force to develop billing credit policy guidelines and devise a methodology for calculating credits. Preliminary work has been performed for some aspects of this undertaking, including (1) initial development of fiscal year 1982 and outyear (through fiscal year 1986) contingency estimates of billing credit program obligations for rate design, budgetary, and financial planning purposes; and (2) tentative identification of technical and policy issues. Bonneville recognizes that compliance with the procedural requirements of section 6 applicable to billing credits and other resource options under the Act will be time consuming, and that, furthermore, it will not be able to determine what its obligations will be under the Act prior to execution of the new power sales contracts now being negotiated with its customers. Nonetheless, Bonneville has concluded that it is desirable to initiate development of the billing credit policy guidelines and methodology as soon as possible in order to satisfy the mandate to insure swift and timely implementation of the Act, and to promote the resolution of outstanding issues affecting resource planning, development, and acquisition in the Pacific Northwest. Therefore, Bonneville has elected to follow its Revised Procedure for Public Participation in Marketing Policy Formulation, and invites early public comment and review on the issues which it has so far identified and expects to consider in formulating proposed billing credit policy guidelines and methodology. In addition, Bonneville seeks from interested persons advice and recommendations on additional issues of which they may be aware. The issues Bonneville has identified include, but are not necessarily limited to, the following:

1. *Standards for applications*, including (a) appropriate information and timing of its submittal for planning, evaluation purposes, and compliance with NEPA and other applicable law and regulations; and (b) degree of notice to Bonneville, its customers, the Council, and other interested persons;

2. *Criteria to be used to establish eligibility for billing credits*, including how to establish consistency with the priorities of 4(e)(1), the considerations of 4(e)(2), and other applicable criteria and standards set forth in the Act;

3. *Frequency and duration of billing credits;* including the schedule and procedures for administering credits once approved;

4. *Determination and verification of amount of actual savings from eligible conservation activities;*

5. *Determination and verification of the amount of conservation or installation of consumer-owned renewable resources induced by retail rate structures;*

6. *Derivation of net costs*, including treatment of support costs, actually incurred by a customer or its representative for an eligible resource;

7. *Derivation of net costs*, of consumer-owned renewable resources induced by eligible retail rate structures;

8. *Program oversight*, including public review of Bonneville program development and implementation;

9. *Nature, content, and timing of prototype contractual provisions* for billing credits;

10. *Criteria to be used to classify credits to capacity and energy and reserves;*

11. *Services to be provided by Bonneville* for eligible activities or resources, including (a) specific types of services, (b) service priorities, in order, and (c) in event of system constraints, policy principles to guide the allocation of services;

12. *Criteria and procedures to govern integration and assure compatibility with regional power system operating and planning requirements;*

13. *Determination of Bonneville's marginal (avoided) cost* under the Act, i.e., whether shortrun or longrun incremental costs should be used for billing credit purposes;

14. *Method of making the rate impact test*, including the number of years to be considered as the test period;

15. *Definition of "multipurpose projects uniquely suitable for development"* by a customer;

16. *Coordination of billing credits* with other Regional Act programs and

activities to provide for the equitable distribution of benefits throughout the region. FOR FURTHER INFORMATION CONTACT: The Public Involvement Coordinator, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212, 503-234-3361, extension 4261. Toll-free numbers for Oregon callers, 800-452-8429; for callers from Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California, 800-547-6048.

Dated: March 13, 1981.

BILLING CODE 6450-01-M

Public Utility Regulatory Policies Act; Order

AGENCY: Department of Energy, Bonneville Power Administration.

ACTION: Order rejecting standards for utility practices.

SUMMARY: By Federal Register notice of May 19, 1980 (45 FR 32752), Bonneville Power Administration (BPA) announced that it would hold hearings on June 18, 1980, and accept comments through July 18, 1980, regarding whether BPA should adopt certain utility standards required to be considered pursuant to Section 113 of the Public Utility Regulatory Policies Act (PURPA). Based on the hearings and written comments, the Bonneville Administrator on December 9, 1980, entered an order that the PURPA Section 113 standards pertaining to utility practices should not be adopted for Bonneville. The standards rejected pertained to master metering, automatic adjustment clauses, information to consumers, procedures for termination of electric service, and advertising, as defined by Section 113 of PURPA. Hearings were held on these standards. The Hearing Officer prepared a report, which was adopted by the Bonneville Administrator in promulgating the order. The full text of the Hearing Officer's Report and of the Administrator's Order follow:

Summary of Record, Report, and Recommendations of Hearing Officer Regarding PURPA Section 113 Standards

Introduction

Pursuant to a notice of hearing published on May 19, 1980, in the Federal Register (X-1),* hearings were held on June 18, 1980, at 9 a.m. and 7 p.m. in the Bonneville Power Administration (BPA) auditorium in Portland with respect to the utility practices standards proposed by Section 113 of the Public Utility Regulatory Policies Act (PURPA requires nonregulated electric utilities, after public notice and hearing, to consider each of five specified utility practice standards (Section 113(b)). BPA, as a Federal agency which sells electric energy and which is not regulated by a state regulatory authority, is a nonregulated electric utility which must make the PURPA considerations (Section 3). In addition to consideration of the specific standards, PBA to adopt each of the standards in order to carry out the purposes of PURPA (Section 113(a)). The determination must be in writing, based upon findings included in the determination, and based upon the evidence presented at the hearing (Section 113(c)). The determination must then be available to the public (Section 113(c)).

Pursuant to your memorandum of June 4, 1980, designating me as Hearing Officer for these PURPA hearings (X1), this report summarizes the record presented and makes recommendations as to your determinations concerning the Section 113 PURPA standards. The full record accompanies this report.

The purposes of PURPA and the purposes to be accomplished or accommodated in the application of the standards are specified by the statute to be:

"(1) Conservation of energy supplied by electric utilities;

"(2) The optimization of the efficiency of use of facilities and resources by electric utilities; and

"(3) Equitable rates to electric consumers."

PURPA institutes a dozen standards which are to be considered at hearings. You have adopted already the six standards dealing with ratemaking standards, with small modifications, by your Determination Order of November 19, 1979. The five other standards deal with utility practices; it is these which were covered by these hearings and will be covered by this report and recommendation. The statute describes these standards in the following language in Section 113(b):

"The following Federal standards are hereby established:

"(1) Master Metering. To the extent determined appropriate under section 115(d), master metering of electric service in the case of new buildings shall be prohibited or restricted to the extent necessary to carry out the purposes of this title.

"(2) Automatic Adjustment Clauses. No electric utility may increase any rate pursuant to an automatic adjustment clause unless such clause meets the requirements of section 115(e).

"(3) Information to Consumer. Each electric utility shall transmit to each of its electric consumers information regarding rate schedules in accordance with the requirements of section 115(f).

"(4) Procedures for Termination of Electric Service. No electric utility may terminate electric service to any electric consumer except pursuant to procedures described in section 115(g).

"(5) Advertising. No electric utility may recover from any person other than the shareholders (or other owners) of such utility any direct or indirect expenditure by such utility for promotional or political advertising as defined in section 115(h)."

Section 115 further explains these standards as follows:

"(d) Master Metering. Separate metering shall be determined appropriate for any new building for purposes of section 113(b)(1) if—

"(1) there is more than one unit in such building,

"(2) the occupant of each such unit has control over a portion of the electric energy used in such unit, and

"(3) with respect to such portion of electric energy used in such unit, the long-run benefits to the electric consumers in such building exceed the cost of purchasing and installing separate meters in such building.

"(e) Automatic Adjustment Clause. (1) An automatic adjustment clause of an electric utility meets the requirements of this subsection if—

"(A) such clause is determined, not less often than every 4 years, by the State regulatory authority (with respect to an electric utility for which it has ratemaking authority) or by the electric utility (in the case of a nonregulated electric utility), after an evidentiary hearing, to provide incentives for efficient use of resources (including incentives for economical purchase and use of fuel and electric energy) by such electric utility, and

"(B) such clause is reviewed not less often than every 2 years in the manner described in paragraph (2), by the State regulatory authority having ratemaking authority with respect to such utility (or by the electric utility in the case of a nonregulated electric utility), to insure the maximum economies in those operations and purchases which affect the rates to which such clause applies.

"(2) In making a review under subparagraph (B) of paragraph (1) with respect to an electric utility, the reviewing authority shall examine and, if appropriate, cause to be audited the practices of such electric utility relating

---

*"X" numbers refer to exhibit numbers.

to costs subject to an automatic adjustment clause, and shall require such reports as may be necessary to carry out such review (including a disclosure of any ownership or corporate relationship between such electric utility and the seller to such utility of fuel, electric energy, or other items).

"(3) As used in this subsection and section 113(b), the term 'automatic adjustment clause' means a provision of a rate schedule which provides for increases or decreases (or both) without prior hearing, in rates reflecting increases or decreases (or both) in costs incurred by an electric utility. Such term does not include an interim rate which takes effect subject to a later determination of the appropriate amount of the rate.

"(f) Information to Consumers. (1) For purposes of the standard for information to consumers established by section 113(b)(3), each electric utility shall transmit to each of its electric consumers a clear and concise explanation of the existing rate schedule and any rate schedule applied for (or proposed by a nonregulated electric utility) applicable to such consumer. Such statement shall be transmitted to each such consumer—

"(A) not later than 60 days after the date of commencement of service to such consumer or 90 days after the standard established by section 113(b)(3) is adopted with respect to such electric utility, whichever last occurs, and

"(B) not later than 30 days (60 days in the case of an electric utility which uses a bimonthly billing system) after such utility's application for any change in a rate schedule applicable to such consumer (or proposal of such a change in the case of a nonregulated utility).

"(2) For purposes of the standard for information to consumers established by section 113(b)(3), each electric utility shall transmit to each of its electric consumers not less frequently than once each year—

"(A) a clear and concise summary of the existing rate schedules applicable to each of the major classes of its electric consumers for which there is a separate rate, and

"(B) an identification of any classes whose rates are not summarized.

"Such summary may be transmitted together with such consumer's billing or in such other manner as the State regulatory authority or nonregulated electric utility deems appropriate.

"(3) For purposes of the standard for information to consumers established by section 113(b)(3), each electric utility, on request of an electric consumer of such utility, shall transmit to such consumer a clear and concise statement of the actual consumption (or degree-day adjusted consumption) of electric energy by such consumer for each billing period during the prior year (unless such consumption data is not reasonably ascertainable by the utility).

"(g) Procedures for Termination of Electric Service. The procedures for termination of service referred to in section 113(b)(4) are procedures prescribed by the State regulatory authority (with respect to electric utilities for which it has ratemaking authority) or by the nonregulated electric utility which provide that—

"(1) no electric service to an electric consumer may be terminated unless reasonable prior notice (including notice of rights and remedies) is given to such consumer and such consumer has a reasonable opportunity to dispute the reasons for such termination, and

"(2) during any period when termination of service to an electric consumer would be especially dangerous to health, as determined by the State regulatory authority (with respect to an electric utility for which it has ratemaking authority) or nonregulated electric utility, and such consumer establishes that—

"(A) he is unable to pay for such service in accordance with the requirements of the utility's billing, or

"(B) he is able to pay for such service but only in installments.

"Such service may not be terminated.

"Such procedures shall take into account the need to include reasonable provisions for elderly and handicapped consumers.

"(h) Advertising. (1) For purposes of this section and section 113(b)(5)—

"(A) The term 'advertising' means the commercial use, by an electric utility, of any media, including newspaper, printed matter, radio and television, in order to transmit a message to a substantial number of members of the public or to such utility's electric consumers.

"(B) The 'political advertising' means any advertising for the purpose of influencing public opinion with respect to legislative, administrative, or electoral matters, or with respect to any controversial issue of public importance.

"(C) The term 'promotional advertising' means any advertising for the purpose of encouraging any person to select or use the service or additional service of an electric utility or the selection or installation of any appliance or equipment designed to use such utility's service.

"(2) For purposes of this subsection and section 113(b)(5), the terms 'political advertising' and 'promotional advertising' do not include—

"(A) advertising which informs electric consumers how they can conserve energy or can reduce peak demand for electric energy,

"(B) advertising required by law or regulation, including advertising required under Part 1 of Title II of the National Energy Conservation Policy Act,

"(C) advertising regarding service interruptions, safety measures, or emergency conditions,

"(D) advertising concerning employment opportunities with such utility,

"(E) advertising which promotes the use of energy efficient appliances, equipment or services, or

"(F) any explanation or justification of existing or proposed rate schedules, or notifications of hearings thereon."

Although the statute mandates consideration by certain procedures of each of these standards and mandates some determination as to each standard, the statute also makes it clear that your determination may be either to implement or not to implement each standard. (Section 113(a) and 113(c).) You also are free, as to any standard, to implement it in part and not to implement it for other parts. Further, after you have made a determination as to any standard, you may change your policy with respect to that standard any time thereafter, on any grounds and with or without hearings.

The record of this hearing is very short, consisting of the six-page presentation by the Bonneville staff and six other short documents. The entire record is attached. The only real evidence offered on any standard was that of the staff; hence, this report is essentially a summary of the staff position. And the proposed order, which is also attached, adopts the staff proposals, which are to reject all of the PURPA utility practice standards, because none is applicable to Bonneville. Letters from two customers (X5 and X6) do not disagree with such a position.

Summary of Evidence: The Bonneville staff position appears in Exhibits 3 and 4.

Master metering is the sale and metering to an order of a large building, such as an apartment house or an office skyscraper, for use by the occupants, who pay for their electricity in their rent. The PURPA proposed standard suggests that each occupant be metered separately as a separate customer, for alleged conservation purposes. Since Bonneville has no such large building

customers, this standard does not apply to Bonneville.

Automatic adjustment clauses are rate schedule provisions allowing rates to increase or decrease, without action by a regualtory body, as fuel costs increase or decrease. Since Bonneville has no such clause, the PURPA proposed standard for automatic adjustment clauses is not relevant to Bonneville.

The PURPA proposed standard on information to consumers is directed at retail utilities and the information which they make available to households and businesses. Bonneville's practices relative to its wholesale customers, who are knowledgeable about electric power subjects than the average householder or businessman, are analogus to what PURPA suggests from an informational point of view. Bonneville, indeed, goes beyond what PURPA suggests in dissemination of information to the public and to the ultimate ratepayer. Hence, there is no need nor usefulness in Bonneville adopting the PURPA standards for information to consumers.

The proposed PURPA standard on procedures for termination of electric service is intended to protect the ill, aged, and temporarily poor from abuses of the utility's right to terminate service for nonpayment. Since Bonneville's customers are businesses and utilities, the standard on termination of services is not applicable to Bonneville. Furthermore, the subject of termination of service is included in the negotiated contracts which Bonneville has with its customers.

The proposed PURPA standard on advertising is aimed principally at privately owned utilities and suggests that they should recover the costs of promotional and political advertising from their stockholders rather than their ratepayers. This standard is not applicable to Bonneville because Bonneville engages in neither promotional nor political advertising.

Conclusion. The original objective of this entire procedure was to make the determinations statutorily required by PURPA. This objective has been maintained throughout and can be accomplished properly by your following through with a written determination as to each standard. There has never been any objection as to the sufficiency of any of the procedures legally and properly to attain that primary objective.

PURPA requires that EPA make determinations as to the appliciation of the standards only to its not-for-resale customers, that is, only for direct-service industries and Federal agencies. PURPA does not apply to EPA sales for resale (Section 102(b)).

The evidence supports only the rejection of all of the PURPA utility practice standards. I find that none of these standards, if applied to Bonneville, would contribute materially to conservation of energy, nor to optimization of efficiency of use of facilities or resources by Bonneville, nor to equitable rates for electric consumers. Thus, the adoption of these standards would not tend materially to accomplish the purposes of PURPA.

I, therefore, recommend that none of the utility practices standards of PURPA be adopted.

Attached for your consideration is a draft of a proposed determination order by which Bonneville would decline to adopt all of the PURPA standards on utility practices.

Respectfully submitted this 8th day of December 1980.

Determination Order by Bonneville Power Administration on Public Utility Regulatory Policies Act Utility Practices Standards.

Whereas the Congress of the United States enacted the Public Utility Regulatory Policies Act of 1978 (PURPA), which pertains to Bonneville Power Administration (Bonneville) as an electric utility which sells electric energy;

And whereas Section 113 of PURPA required Bonneville to hold a hearing about certain standards as to utility practices and to make a determination concerning the applicability to Bonneville of those standards;

And whereas, upon due notice, Bonneville on June 18, 1980, held hearings in due form before Robert L. Jones, the duly designated Hearing Officer, and heard testimony and took evidence concerning the utility practices standards;

And whereas the Hearing Officer has filed with the Administrator of Bonneville a Summary of Record, Report, and Recommendations of Hearing Officer Regarding PURPA Section 113 Standards and has filed also the complete record of the hearings and evidence;

And whereas Bonneville has considered the record and evidence of said hearings and has considered the Summary of Record, Report, and Recommendations of the Hearing Officer;

And whereas Bonneville has considered each and all of the standards of Section 113 of PURPA and the appropriate applicability thereof the Bonneville as disclosed by the evidence of the hearings,

And whereas Bonneville hereby adopts the findings and recommendations of the Summary of Record, Report, and Recommendations of Hearing Officer regarding PURPA Section 113 Standards,

Now, therefore, Bonneville hereby orders that, until further consideration and determination, for the reasons set forth in the Hearing Officer's Report and Recommendation, the utility practices standards are hereby not adopted for Bonneville, to wit:

(1) Master metering. Master metering of electric service in the case of new buildings shall not be prohibited or restricted.

(2) Automatic adjustment clauses. Bonneville may effectuate rates pursuant to any automatic adjustment clause which it shall adopt.

(3) Information to consumers. Bonneville shall not be required to transmit to each of its electric consumers information regarding rate schedules in accordance with the requirements of Section 115(f) of PURPA.

(4) Procedures for termination of electric service. Bonneville may terminate electric service to any electric consumer in accordance with its contracts and the law.

(5) Advertising. Bonneville may recover from persons other that its owners any direct or indirect expenditure by it for promotional or polictical advertising as defined in Section 115(h) of PURPA.

It is further ordered that no attorney fees nor witness fees shall be paid to any party or participant under Section 122 of PURPA.

Dated this 9th day of December 1980.

Sterling Munro,

Administrator, Bonneville Power Administration.

Furnishing information: Bonneville will furnish information of PURPA standards in accordance with the Freedom of Information Act.

For further information contact: Further information, including copies of the exhibits mentioned in the Summary of Record, are available from Ms. Donna Lou Geiger, Public Involvement Coordinator, P.O. Box 12999, Portland, Oregon 97212, 503–234–3361, extension 4161. Toll-free numbers for Oregon callers 800–452–8429; for callers from Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California 800–547–6048.

Dated: March 17, 1981.

Earl Gjelde,

Acting Administrator.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Proposed Modification of Duration of an Order Granting a Temporary Public Interest Exemption for Use of Natural Gas by an Existing Powerplant Under the Powerplant and Industrial Fuel Use Act of 1978

AGENCY: Economic regulatory Administration Department of Energy.

ACTION: Notice of Proposed Modification Extending Duration of an Order Granting a Special Temporary Public Interest Exemption.

SUMMARY: The Economic Regulatory Administration (EPA) of the Department of Energy (DOE) proposes to extend the duration of the Order issued to the Petitioner listed below for a period of time sufficient ot allow construction of natural gas pipeline interconnection, necessary payback period, plus an additional 18 months.

Petitioner/generating station	Identification No.	Original expiration date
Mississippi Power & Light Company (Gerald Andrus).	1	Dec. 7, 1981.

A copy of the proposed modification has been sent by certified mail to the petitioner.

The above listed petitioner was issued an Order granting a temporary public interest exemption pursuant to section 311(e) of the Powerplant and Industrial Fuel Use Act of 1978, 42 USC § 8301 *et seq.* (FUA or the Act), 10 CFR § 501.68 and 10 CFR Part 508. The powerplant listed above is either prohibited by section 301(a)(2) of FUA from using natural gas as a primary energy source or is prohibited from using natural gas as a primary energy source in excess of the average base year proportion allowed in section 301(a)(3) of the Act. The Order granting the temporary exemption allows the powerplant to burn natural gas, notwithstanding the prohibitions of section 301(a) (2) and (3) of FUA, to displace consumption of high sulfur residual fuel oil.

SUPPLEMENTARY INFORMATION: On April 9, 1979, ERA issued a final rule implementing section 311(e) of FUA. This final rule, 10 CFR Part 508 (44 FR 21230, April 9, 1979) sets forth the policy ERA has adopted in implementing section 311(e) of FUA, and the eligibility standards which petitioners for the temporary exemption must meet.

ERA issued an order granting a temporary public interest exemption to Gerald Andrus #1 on March 17, 1981 (46 FR 18336, March 24, 1981). The temporary exemption permits the existing electric powerplant to use natural gas as a primary energy source in excess of the amount which is permitted by section 301(a) (2) and (3) of FUA. The use of natural gas permitted under the temporary exemption was to displace the burning of high sulfur residual fuel oil in the existing powerplant.

ERA has been informed that the above listed petitioner is unable to utilize natural gas pursuant to the granted temporary exemption because there is no natural gas interconnection to this powerplant. Before a petitioner can commit to the construction of the interconnection it must have assurance that it will be able to utilize the natural gas for a period of sufficient length to recover the capital expense of installing the pipeline and accrue some economic benefit for its customers. Therefore, ERA proposes to extend the duration of the Order, for a period of time covering construction of a natural gas pipeline inter-connection, a payback period, plus an additional 18 months. If ERA issues a modified order extending the duration of the temporary exemption, the expiration date of such extension will be listed in the modified Order.

Without this extension, the issued Order will have no practical effect in promoting ERA's policy set forth in 10 CFR Part 508 (Exemption for Use of Natural Gas by Existing Powerplants Under the Powerplant and Industrial Fuel Use Act of 1978, April 9, 1979, 44 FR 21230, hereafter referred to as the Special Rule). In the Special Rule, ERA determined that to the extent that the near term choice for certain existing powerplants is limited to petroleum or natural gas, generally, the use of natural gas is preferred. The increased use of natural gas helps to reduce the Nation's short-term oil consumption and the demand for imported oil. This decreased consumption of imported oil helps the Nation's balance of payments and domestic inflation rate.

There are presently surplus quantities of natural gas available for short term contracts to displace fuel oil. The general natural gas supply and demand picture also looks more encouraging for the near future than it has in the recent past. ERA believes this additional displacement of fuel oil will have minimal impact on refineries serving the regions wherein this powerplant is located.

The duration of the exemption may be extended upon request of the petitioner for an additional period at the discretion of ERA. However, the temporary public interest exemption, including all extensions and the period during which the petitioner is allowed to burn natural gas while the petition is pending may not exceed the lesser of the maximum 5-year period authorized by the Act, or extend beyond June 30, 1985.

In addition, the modification would not relieve the exiting powerplant from compliance with any pertinent rules or regulations concerning the acquisition or the distribution of natural gas that are administered by the Federal Energy Regulatory Commission or any pertinent State regulatory agency or from public utility obligation to pertinent categories of customers.

COMMENTS: ERA is publishing this notice of proposed modification, to invite interested persons to submit written comments. In addition, any interested person may request that a public hearing be convened in regard to this proposed modification.

DATES: Written comments relating to the proposed modification are due on or before May 8, 1981. A request for a public hearing may be made by any interested person within this same 45 day period.

ADDRESSES: Requests for a public hearing and/or 10 copies of written comments shall be submitted to: Department of Energy, Case Control Unit, Box 4629, Room 3214, 2000 M Street, N.W., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

BILLING CODE 6450-01-M

[ERA Docket No. 81-22-LNG]

Gas Service, Inc., and Manchester Gas Company; Liquefied Natural Gas Import; Joint Application To Amend Authorization

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of application to amend liquefied natural gas import authorization to permit purchase price increase.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of the receipt on March 13, 1981, of a joint application of Gas Service, Inc. (GSI) and Manchester Gas Company (Manchester) to amend their natural gas import authorizations, in order to permit the purchase of liquefied natural gas (LNG) from Canada at a price of U.S. $6.4057 per MMBtu f.o.b. Montreal. Currently, these companies are authorized to purchase LNG from Canada at a price of U.S. $5.9357 per MMBtu f.o.b. Montreal.

The application is filed with ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–54. Protests or petitions to intervene are invited.

DATES: Protests or petitions to intervene are to be filed no later than 4:30 p.m., on March 30, 1981.

FOR FURTHER INFORMATION CONTACT:

Marie E. Lanciotti (Division of Natural Gas), Economic Regulatory Administration, 2000 M Street, N.W., Room 7108, RG–55, Washington, D.C. 20461, (202) 653–3220.

Patricia J. Neel (Office of the General Counsel, Natural Gas and Mineral Leasing), 1000 Independence Ave., S.W., Forestal Bldg., Room 5E–074, Washington, D.C. 20585, (202) 252–2900.

SUPPLEMENTARY INFORMATION: GSI and Manchester are local natural gas distribution companies operating within the State of New Hampshire. During each contract year, GSI and Manchester are authorized to import into the United States from Canada up to 30,879 MMBtu and 41,172 MMBtu of LNG per year, respectively, from Gaz Metropolitan, Inc. (Gaz Metro). There are no take-or-pay or other similar purchase obligations associated with these imports.

In DOE/ERA Opinion and Order No. 28, issued on January 5, 1981, in ERA Docket No. 80–18–LNG, ERA authorized the importation of LNG from Canada by GSI and Manchester at a price of U.S. $5.9357 per MMBtu f.o.b. Montreal. This price consisted of the uniform border price for natural gas exported from Canada to the United States of U.S. $4.47 per MMBtu, plus a cost of service charge for LNG processing of U.S. $1.4357 per MMBtu.

On January 15, 1981, the Government of Canada announced a border price of U.S. $4.94 for natural gas exported to the United States, effective April 1, 1981. GSI and Manchester state that solely because of this increase, the delivered price of LNG on or after April 1, 1981, will increase to U.S. $6.4057 per MMBtu f.o.b. Montreal.

GSI and Manchester note that in DOE/ERA Opinion and Order No. 28, ERA found that this LNG supply will provide a peaking supply which is needed to avoid potential shortages on their systems. GSI and Manchester assert that the need for this imported LNG still exists and, therefore, it is not inconsistent with the public interest to approve this application.

Because the application was filed only 21 days prior to the effective date of the Canadian border price increase, April 1, 1981, we are limiting the intervention period to five days in order to provide sufficient time for ERA to consider this application. In the future, we expect GSI and Manchester to file such applications in a more timely fashion so that a longer period for intervention can be permitted.

Other Information

The ERA invites protests or petitions for intervention in the proceeding. Such protests or petitions are to be filed with the Economic Regulatory Administration, Division of Natural Gas Docket Room, Room 7108, RG–55, 2000 M Street, N.W., Washington, D.C. 20461, in accordance with the requirements of the applicable rules of practice and procedure (18 CFR 1.8 and 1.10). Protests or petitions for intervention will be accepted for consideration if filed no later than 4:30 p.m., on March 30, 1981.

Any person wishing to become a party to the proceedings or to participate as a party in any hearing therein must file a petition to intervene. Protests filed with ERA will be considered in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings.

A hearing will not be held unless a motion for a hearing is made by any party and is granted by ERA, or if the ERA on its own motion believes that a hearing is required. A party filing a motion for hearing must demonstrate how a hearing will advance the proceedings. If a hearing is ordered, due notice will be given to the parties.

A copy of the applications noticed herein is available for public inspection and copying in the Division of Natural Gas Docket Room, Room 7108, 2000 M Street, N.W., Washington, D.C. 20461, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C. on March 19, 1981.

Barton R. House,

Acting Administrator, Economic Regulatory Administration.

[FR Doc. 81-8993 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-01-M

Natomas North America, Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of filing a Petition for the Implementation of Special Refund Procedures for refunds received pursuant to a Consent Order.

DATE: Petition submitted to the Office of Hearings and Appeals: March 16, 1981.

FOR FURTHER INFORMATION CONTACT:

Crude Producers Branch, Attn: John Marks, Office of Enforcement, Room 5002, 2000 M Street, N.W., Washington, D.C. 20461, Telephone Number (202) 653–3517.

SUPPLEMENTARY INFORMATION: On August 8, 1980, the Office of Enforcement of the ERA published notification in the **Federal Register** that it executed a Consent Order with Natomas North America, Inc. (Natomas) of Houston, Texas on July 29, 1980, 45 Fed. Reg. 52885 (1980). Interested persons were invited to submit comments concerning the terms, conditions, or procedural aspects of the Consent Order. In addition, persons who believe they have a claim to all or a portion of the refund of overcharges paid by Natomas pursuant to the Consent Order were requested to submit notice of their claim to the ERA.

Although interested persons were invited to submit comments regarding the Consent Order to the DOE, no comments were received. The Consent Order, therefore, was not modified.

Pursuant to the Consent Order, Natomas refunded the sum of $53,000 by certified check made payable to the United States Department of Energy. This sum has been placed into a suitable account pending determination of its proper distribution.

The following person submitted a claim to the ERA:

Tesoro Petroleum Corporation

Action taken: The ERA is unable readily to identify the persons entitled to receive the $53,000 or to ascertain the amounts of refunds that such persons are entitled to receive. Therefore, the ERA has petitioned the Office of Hearings and Appeals (OHA) on March 16, 1981 to implement Special Refund Procedures pursuant to 10 CFR Part 205, Subpart V, 10 CFR 205.280 *et seq.* to determine the identity of persons entitled to the refunds and the amounts owing to each of them. Persons who believe they are entitled to all or a portion of the refunds should comply with the procedures of 10 CFR Part 205, Subpart V.

Issued in Washington, D.C. on the 18th day of March 1981.

Robert D. Gerring,

Director, Program Operations Division.

[FR Doc. 81-9084 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CP81-218-000]

Columbia Gulf Transmission Co.; Application

March 19, 1981.

Take notice that on March 2, 1981, Columbia Gulf Transmission Company (Applicant), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP81-218-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a 2,700 horsepower Cooper Bessemer GMV-12 compressor unit and appurtenant facilities in Block 251, Eugene Island area, offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes herein to construct and operate a 2,700 horsepower Cooper Bessemer GMV-12 reciprocating engine compressor unit and appurtenant facilities which would be located on an existing platform owned and operated by Exxon Company, U.S.A. (Exxon) in Block 251, Eugene Island area, offshore Louisiana. It is stated that Exxon is the operator-producer of approximately 35,700,000 Mcf of low-pressure natural gas to be compressed by the proposed facilities or alternatively lost to the interstate market. It is stated that installation of compression facilities would make the gas available for transportation for the account of Columbia Transmission Corporation, Applicant's affiliate.

Applicant states that the proposed facilities would be installed, operated and maintained by Applicant or others.

Applicant estimates the total cost of the proposed facilities to be $4,103,600 which would be financed by funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9083 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ST79-41]

Delhi Gas Pipeline Corp.; Extension of Transportation Service

March 19, 1981.

Take notice that on February 23, 1981, Delhi Gas Pipeline Corporation (Applicant), Fidelity Union Tower Building, Dallas, Texas 75201, filed in Docket No. ST79-41 a report pursuant to Section 284.126(c) of the Regulations under the Natural Gas Policy Act of 1978 that it intends to continue the transportation of natural gas for United Gas Pipe Line Company (United) for an additional two-year term, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it entered into a July 16, 1979, transportation arrangement with United which provides for Applicant to receive natural gas at the points of delivery provided in gas purchase agreements between United and certain producers and to transport and redeliver such natural gas to United at specified redelivery points.

Applicant asserts that it commenced the transportation of gas for United on July 16, 1979, and now proposes to extend such transportation for a two-year period commencing July 16, 1981. It is stated that the total and daily volumes of natural gas to be transported during the two-year period are currently estimated at 16,100,000 Mcf and 22,000 Mcf, respectively, and that the estimate may change as additional gas reserves are developed and acquired by United and as existing reserves are depleted.

Applicant states that it would charge United rates of 31.0 cents, 30.0 cents and 20.0 cents per million Btu for the transportation service depending upon the location of the gas reserves and the point of delivery.

Any person desiring to be heard or to make any protest with reference to said report should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants

parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

[FR Doc. 81-8944 Filed 3-24-81; 8:45 am]
BILLING CODE 6450-85-M

Michigan Wisconsin Pipe Line Co.; Application

[Docket No. CP81-206-000]

March 19, 1981.

Take notice that on February 24, 1981, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP 81-206-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline compression and measurement facilities and the transportation of natural gas for Columbia Gas Transmission Corporation (Columbia), Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and Texas Gas Transmission Corporation (Texas Gas), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that High Island Offshore System (HIOS) makes deliveries of natural gas from the northerly terminus of its pipeline facilities to the pipeline systems of U-T Offshore System and Applicant in West Cameron Block area Block 167, offshore Louisiana (Block 167).

Applicant further states that HIOS has proposed to increase the firm capacity of its system from 968,000 Mcf of gas per day to approximately 2,610,500 Mcf of gas per day.

Applicant consequently proposes to increase the capacity of its offshore pipeline system to accommodate over 1,000,000 Mcf of gas per day of HIOS' redeliveries by constructing and operating the new facilities enumerated below:

(1) 39.0 miles of 30-inch O.D. pipeline loop between Block 167 and Applicant's Grand Chenier station in Cameron Parish, Louisiana;

(2) 16,000 horsepower of additional compression at Grand Chenier;

(3) Additional metering facilities at Grand Chenier necessary to measure the aggregate redeliveries from HIOS;

(4) A new interconnection with Tennessee at Grand Chenier enabling redeliveries to Tennessee at such location; and

(5) A new interconnection with Columbia Gas Transmission Company located north of Lowry, Louisiana, enabling redeliveries at least in part to be made for the account of Columbia.

Applicant states that the compression and the majority of the proposed measurement facilities would be installed at an existing measurement station site.

Applicant estimates the total cost of the proposed facilities to be $60,409,760 which would be financed initially with treasury and other internally generated funds together with short-term loans from banks.

Applicant also proposes to assist Columbia, Tennessee and Texas Gas in effectuating receipt of their gas supplies underlying the High Island area of offshore Texas. It is submitted that the firm quantity to be transported and the monthly rates per Mcf would be as follows:

Company	Contract demand (1,000 Mcf)	Monthly demand rate
Columbia	110,000	$3.81
Tennessee	230,000	3.17
Texas Gas	102,260	3.06

Applicant states that it has made transportation arrangements with Columbia, Tennessee and Texas Gas which provide that each of the above shipper's redelivery volumes be reduced by 0.8 percent to compensate Applicant for its compressor fuel usage attributable to the aforementioned Grand Chenier compression.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10) All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 81-8945 Filed 3-24-81; 8:45 am]
BILLING CODE 6450-85-M

[Docket No. CP81-204-000]

Mid Louisiana Gas Co.; Application

March 19, 1981.

Take notice that on February 23, 1981, Mid Louisiana Gas Co. (Applicant), 300 Poydras Street, New Orleans, Louisiana 70130, filed in Docket No. CP81-204-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of the facilities necessary to provide the direct sale of natural gas to Copolymer Rubber & Chemical Corporation (Copolymer) on an interruptible basis, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has agreed to sell Copolymer up to 15,000 Mcf of natural gas per day beginning May 1, 1981, on a fully interruptable basis for use in Copolymer's Baton Rouge, Louisiana, plant. Under such agreement, Applicant states it would deliver the natural gas from its mainline transmission system to Copolymer at Copolymer's plant facilities.

Applicant further states that Copolymer would pay a base price of 300.00¢ per Mcf for the subject volumes. Applicant proposes to render the above-described service subject to *pro rata* interruption as provided in a pending settlement agreement in Docket No. TC80-93.

Applicant asserts that in order to provide the proposed service to Copolymer it would be required to

construct and operate a metering station and appurtenant piping facilities. It is estimated that the cost of such construction would be $10,500.00 which would be financed from internally generated funds.

Applicant states that it would not apply to the Commission or join in any application to reclassify the subject volumes as essential agricultural or essential industrial process or feedstocks under Sections 401 or 402 of the Natural Gas Policy Act of 1978. Applicant therefore requests that the certificate issued herein be conditioned with the provision that the subject volumes would not be reclassified as essential agricultural or essential industrial processes or feedstocks under Sections 401 and 402 of the Natural Gas Policy Act of 1978.

Applicant further requests that all rate matters pertinent to the proposed service not be resolved in the subject docket but that they be reserved and disposed of in accordance with the final order in Applicant's general rate case filing pending in Docket No. RP80–113.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-8048 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

Mississippi River Transmission Corp.; Application

[Docket No. CP81-214-000]

March 19, 1981.

Take notice that on February 27, 1981, Mississippi River Transmission Corporation (Applicant), P.O. Box 14521, St. Louis, Missouri 63178, filed in Docket No. CP81–214–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of one new injection/withdrawal well and appurtenant facilities in Lincoln Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes herein to construct and operate one new injection/withdrawal well and appurtenant facilities in the east central section of Applicant's existing East Unionville storage field in Lincoln Parish, Louisiana. Applicant further proposes to construct and operate minor appurtenant facilities to connect the proposed new well to the field gathering system. It is asserted the new well would enable Applicant to monitor the southeastern movement of the storage gas that has been occurring in that field.

Applicant further contends that the construction of the well in the east central section of that field where no well currently exists would increase the operating efficiency and deliverability of gas from that field. Applicant avers, however, that the proposed facilities would neither increase the capacity of its overall system nor the total storage capacity in the East Unionville storage field.

Applicant estimates that the total cost of the proposed facilities to be $975,000 which would be financed by short-term loans and/or available funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary

[FR Doc. 81-8047 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-210-000]

Texas Gas Transmission Corp.; Application

March 19, 1981.

Take notice that on February 24, 1981, Texas Gas Transmission Corporation (Applicant), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP81–210–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessary authorizing the construction and operation of natural gas facilities in Cameron and Jefferson Davis Parishes, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has entered into contracts with several producers for the purchase of natural gas from fields located in the Tuscaloosa Trend Area of Louisiana which Applicant estimates cover proved and probable gas reserves approximately 590,000,000 Mcf.

Moreover, Applicant states that it is currently negotiating for the acquisition of other interests in these fields and intends to negotiate for the purchase of any additional reserves developed in the area.

It is stated that in order to effectuate the return of the gas purchased in the fields Applicant has entered into separate long-term transportation and exchange agreements with Louisiana Interstate Gas Corporation (LIG) and Louisiana Resources Company (LRC) dated January 29, 1981, and February 18, 1981, respectively.

Applicant asserts that under the agreement between Applicant and LIG, LIG would receive volumes of natural gas into its system for the account of Applicant as Applicant acquires reserves in the Tuscaloosa Trend Area. It is stated that points of delivery would be central points in the fields from which LIG would transport the gas purchased by Applicant through that part of its system known as the Tuscaloosa Pipeline System and redeliver up to 125,000 Mcf per day for the account of LRC at a point near Plaquemine, Iberville Parish, Louisiana. It is further stated that any volume in excess of 125,000 Mcf per day would be redelivered by LIG to Applicant at an existing interconnection on Applicant's system located in Lafayette Parish, Louisiana. Applicant states that at the present time, LIG is tranporting approximately 60,000,000 Mcf of natural gas a day being purchased by Applicant from the fields on a short-term, self-executing basis as an interim measure during the initial production buildup period.

It is stated that LIG has advised Applicant that because of the manner in which LIG operates its system LIG is not able to sustain the delivery of volumes as would ultimately be required by Applicant at the Lafayette Parish point on either a short-term or a long-term basis.

Applicant states that, under the long-term agreement between Applicant and LRC, LRC would receive volumes of natural gas up to 125,000 Mcf per day delivered by LIG for the account of Applicant at Plaquemine and would redeliver by exchange on a firm basis an equivalent volume of up to 125,000 Mcf per day to Applicant at an existing point of interconnection between the facilities of Applicant and LRC in Cameron Parish, Louisiana. It is stated that since LRC's principal markets are in the general area of the Plaquemine delivery points and its principal gas supply in the Cameron Parish area accessible to Applicant's system, there are mutual advantages to both Applicant and LRC by this arrangement and consequently no rate or charge by either party for the service. However, Applicant would pay LIG 20.0 cents per Mcf for its service.

In order to permit Applicant to receive the volumes of natural gas presently being purchased and to be purchased in the fields as well as volumes to be purchased in the fields in the area into its system on a firm long-term basis, Applicant proposes to construct and operate certain natural gas facilities. Applicant specifically proposes to construct 32.23 miles of 20-inch O.D. loop pipeline from Grand Chenier, Cameron Parish, Louisiana, to Roanoke Junction, Jefferson Davis Parish, Louisiana. Additionally, Applicant proposes to install approximately 1,950 feet of 20-inch O.D. tie-over line between LRC's 16- and 20-inch lines and Applicant's Roanoke-Grand Chenier System, Cameron Parish, Louisiana, and to enlarge an existing metering station at such point. Applicant estimates the cost of the proposed facilities to be $14,546,580 which would be financed from funds on hand.

Any person desiring to be heard or to make any protest with referance to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in detemining the appropriate action to be taken but will not serve to make the protestants parties to the a proceeding. Any person wishing to become a party to proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-8998 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

Transcontinental Gas Pipe Line Corp. and United Gas Pipe Line Co.; Notice of Application

[Docket No. CP81-217-000]

March 19, 1981.

Take notice that on February 27, 1981, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, and United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP81-217-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline and appurtenant facilities in the offshore Texas area, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that they each have the right to purchase 50 percent of the natural gas reserves in the High Island area, South Addition, Block A-545 field (comprised of Blocks A-545, A-546, A-547 and A-548), offshore Texas.

In order to attach this new source of gas supply, Applicants propose to construct jointly as co-owners approximately 3.33 miles of 16-inch pipeline which would connect the existing production platform in Block A-548 with an underwater tap on the existing 30-inch pipeline of High Island Offshore System in Block A-546.

Applicants estimate that the cost of such facilities would be $5,870,000 financed initially by revolving credit arrangements, short-term loans or available funds. It is submitted that permanent financing would be undertaken as part of Applicants' respective overall long-term financing programs at later dates. It is further asserted that the cost would be shared equally by Applicants.

Applicants state that the proposed pipeline would have a maximum capability to transport volumes of up to 90,000 Mcf per day from Block A-545 field. It is further estimated that the reserves and deliverability of the field

would be 99,760,000 Mcf and 75,000 Mcf per day (1982), respectively.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

Transcontinental Gas Pipe Line Corp. and Columbia Gulf Transmission Co.; Application

[Docket No. CP81-209-000]

March 19, 1981.

Take notice that on February 24, 1981, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, and Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP81-209-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 3.5 miles of 12-inch pipeline in offshore Texas, all as more fully set forth in the application which is file with the Commission and open to the public inspection.

Applicants state that they have acquired the right to purchase natural gas reserves located in the High Island area, South Addition, Block A-508, offshore Texas. It is stated that in order to attach this new source of gas supply to their existing systems, Applicants propose herein to construct and own jointly Project HI A-508 consisting of approximately 3.5 miles of 12-inch pipeline and appurtenant facilities. It is stated that Project HI A-508 would connect Block A-508, High Island area, South Addition to an underwater tap on the 16-inch pipeline owned by Applicants and others in Block A-519, Galveston area, South Addition. It is stated that the proposed Project HI A-508 would have the maximum capacity to transport up to 20,000 Mcf of natural gas per day from Block A-508.

Applicants submit that Block A-508 would be operated by Michigan Wisconsin Pipe Line Company and that Transco owns the Block A-159 facilities. Applicants further state that respective gas ownership interests in these Blocks would be Transco—81.43 percent and Columbia Gulf—18.57 percent.

Applicants estimate the cost of the proposed facilities to be $4,450,000 which would be financed initially be revolving credit arrangements, short-term loans or available funds. Permanent financing would be undertaken at later dates as part of Applicants' respective overall long-term financing program, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9050 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

Trunkline Gas Co. et al.; Application

[Docket No. CP81-213-000]

March 19, 1981.

Take notice that on February 27, 1981, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, and Natural Gas Pipeline Company of America (Natural) 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP81-213-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities, offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants propose to construct and operate approximately 8.5 miles of 10-inch pipeline originating at a side tap on Stingray Pipeline Company's system in East Cameron 338, offshore Louisiana, and extending to the producer platform in East Cameron Block 359; and 1.0 mile of 8-inch pipeline and appurtenant facilities extending from a side tap on the aforementioned facilities in East Cameron block 347 to the producer platform in East Cameron Block 347.

Applicants estimate that the total cost of the facilities would be $6,379,000 which would be financed initially with funds on hand, borrowings under

Applicants' revolving credit arrangements or short-term financing.

Applicants assert that the proposed facilities would permit the attachment of volumes of gas being purchased by Applicants from East Cameron Blocks 359, 340 and 347.

Applicants further estimate that approximately 46,000,000 Mcf of gas reserves (dry) would be available from East Cameron Block 359 for delivery through the proposed facilities and that total deliverability from such area would be approximately 40,000 Mcf of gas per day. It is estimated that approximately 22,000,000 Mcf of gas reserves would be available from East Cameron Blocks 340/347 with deliverability from such area being approximately 20,000 Mcf per day.

Applicants state that the cost, owership and capacity entitlements of the proposed facilities would be based on the relative ownership interests of the Applicant's dedicated gas supplies. Under such allocation, it is submitted, Natural would own 100 percent of the 8-inch lateral and appurtenant facilities to East Cameron Block 347. It is also submitted that the cost, ownership and capacity entitlements of the 10-inch lateral from East Cameron Block 338 to the point of interconnection in East Cameron Block 347 would be allocated as follows: 53.84 percent to Trunkline, 12.83 percent to Tennessee and 33.33 percent to Natural. From East Cameron Block 347 to the producer platform in East Cameron Block 359, the cost, ownership and capacity entitlements of the proposed facilities would be allocated as follows: 80.75 percent to Trunkline and 19.25 percent to Tennessee, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 181, file with the Federal Energy Regulatory Commission, Washington, D.C. 20428, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP81-212-000]

March 19, 1981.

United Gas Pipe Line Co.; Application

Take notice that on February 26, 1981, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP81-212-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Shell Oil Company (Shell), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a gas transportation agreement dated October 28, 1980, Applicant proposes herein to transport natural gas dedicated to Shell by Shell Onshore Partnership (SOP) which is to be produced from the Robeline Field, Natchitoches Parish, Louisiana. Applicant states that it would transport the lesser quantity of either 50 percent of the gas attributable to SOP's interest in the gas well gas to be produced from the Houston Formation, Reservoir A or up to 10,000 Mcf of natural gas per day, less 2.3 percent for fuel use and losses. Applicant states that pursuant to the agreement it could accept or reject any excess gas that Shell might have periodically. It is asserted that the ten-year transportation agreement would expire on June 1, 1990.

Applicant states that it would receive the subject gas at a mutually agreeable point in Natchitoches Parish, Louisiana, and would deliver equivalent volumes to two of Applicant's regulating and measuring facilities, in St. Charles Parish, and in St. James Parish and Assumption Parish, Louisiana. It is stated that delivery would also be made at a proposed point on Applicant's existing pipeline system near South Pisgah Field and/or the McKay Field, Rankin County, Mississippi.

It is further stated that Shell would pay Applicant a rate of 28.12 cents per Mcf of natural gas delivered. It is asserted that the stated rate is in accordance with Applicant's current jurisdictional rate for its northern zone and that Applicant may file for rate changes which would become effective on the date such new rate filed with the Commission is approved or after suspension by the Commission and upon motion of Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20428, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for

Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-8652 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

Southern Natural Gas Co. et al.; Application

[Docket No. CP81-215-000]

March 19, 1981.

Take notice that on February 27, 1981, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois 60603, and Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP81-215-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities located offshore Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that they have acquired the right to purchase the natural gas reserves to be produced from certain reservoirs beneath Mustang Island Block 758, Mustang Island Blocks 741 and 755, Matagorda Island Block 700, Matagorda Island Block 713, and Mustang Island Blocks 757, 762, and 763, offshore Texas. It is stated that total proven reserves in the blocks are estimated to be 78,000,000 Mcf with an estimated 79,000,000 Mcf of potential reserves. Applicants further state that total initial daily deliverability from the proven reserves is estimated to be approximately 130,000 Mcf per day.

Applicants state that in order to transport onshore the acquired natural gas Applicants have agreed to join in the construction and operation of certain natural gas facilities. Specifically, Applicants propose to construct and operate approximately 16.7 miles of 24-inch pipeline and a receiving station consisting of measuring facilities and certain related and appurtenant facilities. It is asserted that the proposed 24-inch pipeline would extend from the producers' platform in Mustang Island Block 758 to a point of interconnection at a subsea tap in Matagorda Island Block 666 with a 24-inch pipeline jointly owned by Southern, Florida Gas Transmission Company and Northern. Applicants assert that the proposed receiving station would be installed on the producers' platform in Mustang Island Block 758. It is stated that Applicants would share the cost and ownership of the proposed facilities in the following percentages:

Applicant	Percentage
(a) Pipeline:	
Southern	18.0180
Transco	45.0450
Natural	12.6127
Northern	24.3243
(b) Receiving station:	
Southern	58.859
Natural	41.160

It is stated that these ownership percentages are based on each Applicant's proportional interest in the gas reserves to be transported by the proposed facilities and that the ownership percentage corresponding to any uncommitted reserves have been allocated proportionately to Applicants. Moreover, it is asserted that upon commitment of any presently uncommitted gas reserves ownership percentages may be redetermined retroactively.

Applicants estimate the cost of the proposed facilities to be $17,732,425 which would be financed through internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-8653 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. SA81-20-000]

Cleveland-Cliffs Iron Co.; Application for Adjustment Seeking Interim Relief and Permanent Exemption From Incremental Pricing Surcharges

March 19, 1981.

Take notice that on March 3, 1981, the Cleveland-Cliffs Iron Company (Cleveland-Cliffs) filed with the Federal Energy Regulatory Commission (Commission) an application for adjustment under sections 206(d) and 502(c) of the Natural Gas Policy Act of 1978 (NGPA) and sections 1.41 and 282.206(b) of the Commission's regulations. Cleveland-Cliffs requests interim relief and a permanent exemption from the incremental pricing surcharges imposed by section 201 of the NGPA and Part 282 of the Commission's regulations on Cleveland-Cliffs' non-exempt boiler fuel facilities in Tilden Township and Republic, Michigan.

Cleveland-Cliffs operates two iron ore beneficiation facilities in Northern Michigan; one at Tilden Township and one at Republic. These facilities are alleged to suffer a substantial natural competitive disadvantage compared to other iron ore processors due to the fact that the iron ore which they process, that is found at their sites, is of comparatively low quality, thus requiring substantial energy-intensive processing. The energy-intensive processing undertaken by Cleveland-Cliffs is not required for the higher quality ores processed by Cleveland-Cliffs' competitors.

Cleveland-Cliffs maintains that the imposition of incremental pricing surcharges exacerbates their already high processing costs. Inasmuch as their processing costs exceed those of nearly all other companies in the industry, coupled with the fact that the other companies not subject to significant incremental pricing surcharges,

Cleveland-Cliffs argues that it cannot easily pass its incremental pricing surcharges on to its customers. Cleveland-Cliffs purchases its gas from Northern Natural Gas Company, and the surcharges have averaged over $140,000 per month. The application asserts that continued absorption of these surcharges poses grave difficulty to Cleveland-Cliff's facilities.

Due to the unique nature of the Tilden and Republic facilities and the fact that they are in the position of being the only facilities in the industry to pay significant incremental pricing surcharges, Cleveland-Cliffs alleges that the facilities suffer a special hardship and unfair burden, and that failure to grant relief could cause the facilities to curtail or even terminate their operations, which would cause serious adverse consequences to the localities in which the facilities are located.

The application requests that interim relief be granted as it is in the public interest and is necessary to avoid irreparable injury. Cleveland-Cliffs asserts that interim relief would result in only a *de minimis* increase in rates to Northern Natural Gas Company's other users, while preventing special hardship to Cleveland-Cliffs as well as the localities of Tilden and Republic.

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 and § 282.206 of the Commission's regulations.

Any person desiring to partcipate in this proceeding shall file and petition to interverne in accordance with the provisions of 18 CFR §1.41(c). All petitions to intervene must be filed on or before April 9, 1981.

Kenneth F. Plumb,

Secretary

[FR Doc. 81-9099 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-226-000]

Eastern Shore Natural Gas Co.; Application

March 19, 1981.

Take notice that on March 6, 1981, Eastern Shore Natural Gas Company (Applicant), P.O. Box 615, Dover Delaware 19901, filed in Docket No. CP81-226-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 13.19 miles of 10-inch pipeline to extend southeasterly from Dover to Harrington, Delaware, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes herein to construct and operate approximately 13.19 miles of 10-inch pipeline to extend southeasterly from Dover to a point approximately three miles north of Harrington, Delaware. Applicant asserts that the proposed pipeline would be an extension of Applicant's existing 10-inch line which currently extends from Heckessin to Dover, Delaware.

Applicant states that absent the proposed loop it would be unable to maintain adequate pressure in order to deliver existing contract loads at the required minimum operational pressures during pressures from Applicant's supplier.

Applicant estimates the total cost to be $1,313,421.20 which would be financed by funds generated from operations.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal-Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. EC81-9-000]

Kentucky Utilities Co.; Filing

March 19, 1981.

The filing company submits the following:

Take notice that on March 9, 1981, Kentucky Utilities Company (KU) submitted for filing an application, pursuant to section 203 of the Federal Power Act, to acquire certain securities from the Old Dominion Power Company (Old Dominion).

KU states that the sale of securities by Old Dominion to KU will allow Old Dominion to finance certain construction plans.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before April 6, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9098 Filed 3-24-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-220-000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Notice of Application

March 19, 1981.

Take notice that on March 2, 1981, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP81-220-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain pipeline facilities in Sublette, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon and remove the facilities comprising the Sublette gasoline plant located in Sublette, Kansas, because it no longer serves the function for which it was originally installed and represents an inefficient and uneconomical asset. It is stated that the plant was placed in service for the purpose of removing natural gasoline and other liquid hydrocarbons from Applicant's gas stream prior to delivery into its main transmission system. However, it is stated, the gas volumes which flow through the lines which once delivered gas to the Sublette plant for processing no longer require that processing to assure transportability. Applicant states that the plant has been shutdown since March 22, 1978, and that there has been no adverse impact on the related pipeline operations. Applicant also asserts that it would be inefficient and uneconomical to continue the operation of the Sublette plant because it is an ambient temperature oil absorption plant in contrast to the more modern refrigerated oil absorption plants and requires a greater amount of operating fuel.

Finally, Applicant contends that to continue operation of the plant would necessitate continuance of a large operation and maintenance cost and additional capital improvements to maintain and provide a plant meeting operational standards and that since the plant is not needed for operational purposes the expenditures required would not be justifiable.

Applicant estimates the cost of removing the facilities would be $150,000 with no estimated salvage value of the facilities to be reclaimed.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE [illegible]

[Docket No. ER81-320-000]

Northern States Power Co.; Filing

March 19, 1981.

The filing Company submits the following:

Take notice that on March 9, 1981, Northern States Power Company (Northern States) tendered for filing Supplement No. 6 to the Twin Cities-Iowa St. Louis 345 kV Interconnection Coordinating Agreement on August 12, 1980 on behalf of the parties to the Agreement. The parties are: Interstate Power Company, Iowa Electric Light & Power Company, Iowa-Illinois Gas & Electric Company, Iowa Public Service Company, Iowa Southern Utilities Company, Northern States Power Company, and Union Electric Company. This filing was made in response to Order No. 84 issued by the Commission on May 7, 1980 in Docket No. RM79-29. The filing submitted by Northern States Power was docketed as ER80-636 by the Commission on August 19, 1980, and subsequently accepted for filing September 1, 1980.

Due to the complexity of the Commission's Order, the number of parties involved, and the time restraints imposed by the Order, the parties were unable to consummate a formal agreement as prescribed by the Commission's rules and regulations. In an effort to file a fully executed agreement, the parties continued discussions which have resulted in a formal agreement for Supplement No. 6. The parties have tendered a substitute filing dated November 7, 1980 under Docket No. ER80-636 providing for fixed adders for transactions involving transmission on third party resale of electric power. The parties request that the substitute filing be permitted to become effective September 2, 1980, subject to refund, and to be consolidated as part of the proceeding know as Allegheny Power Systems et al., Docket Nos. ER80-592 et al., now pending settlement discussions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 8, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection

BILLING CODE [illegible]

[Docket No. SA81-19-000]

Occidental Chemical Co.; Application Treated as a Request for Adjustment Under the NGPA

March 19, 1981.

Take notice that on February 27, 1981, Occidental Chemical Company, Florida Operations, Post Office Box 300, White Springs, Florida 32096 (Applicant) filed a letter with the Federal Energy Regulatory Commission protesting the requirement that it pay certain incremental pricing surcharges totaling $41,089.36 for the months of December, 1980, and January, 1981.

Applicant states that its surcharges relate to the months that it used natural gas to generate steam used in a manufacturing facility devoted entirely to the production of agricultural products. Applicant takes issue with the fact that it must pay surcharges because it filed an exemption affidavit after October 23, 1980, whereas those who filed by that date are exempt.

Applicant's letter shall be treated as an application for an adjustment under the Natural Gas Policy Act of 1978, 15 U.S.C. § 3301, *et seq.* pursuant to §§ 1.41 and 282.206(b) of the Commission's rules and regulations, effective with the date

that applicant fulfills the initial application requirements set forth in § 1.41(d), except § 1.41(d)(v), of the Commission's rules.

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 of the Commission's rules of Practice and Procedure, 18 CFR 1.41. Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance with the provisions of § 1.41(e). All petitions to intervene must be filed on or before April 9, 1981.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-85-M

[Docket No. CP79-84-002]

Panhandle Eastern Pipe Line Co.; Petition to Amend

March 19, 1981.

Take notice that on March 3, 1981, Panhandle Eastern Pipe Line Company (Petitioner), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP79-84-002 a petition to amend the order issued July 23, 1979, in the instant docket pursuant to Section 7(c) of the Natual Gas Act so as to authorize changes in the gas storage service agreement between Petitioner and ANR Storage Company (ANR) and to amend certain separate transportation agreements with Michigan Wisconsin Pipe Line Company (Mich Wis) and Michigan Consolidated Gas Company, Interstate Storage Division (ISD), and to implement gas storage and transporation service for an existing resale customer, Citizens Gas and Coke Utility (Citizens), all as more fully set forth in the petition to amend.

Petitioner states that pursuant to order issued July 23, 1979, it (1) receives up to 1,140,000 Mcf of long-term 50-day gas storage from ANR pursuant to a July 6, 1978, gas storage agreement between Petitioner and ANR; (2) performs storage and transportation service for certain existing resale customers pursuant to several gas storage and transportation agreements; (3) implements two separate transportation agreements with Mich Wis and ISD enabling volumes of gas to be transported to storage during the summer period of April 1 through October 31 and redelivered from storage to the participating customers of Petitioner during the winter period of November 1 through March 31.

Petitioner proposes to amend the various agreements in order to provide storage service needed by Citizens, an existing resale customer. It is stated that Petitioner has requested ANR to provide firm storage capacity of 1,960,000 Mcf in addition to the 1,140,000 Mcf previously authorized. Petitioner also states that the volumes of gas so designated by Citizens would be transported and delivered by Petitioner to Mich Wis, then to ISD, then back to Mich Wis, then to Great Lakes Gas Transmission Company (Great Lakes) pursuant to a transportation and exchange arrangement between Mich Wis and Great Lakes, and then to ANR for injection into ANR's underground storage fields.

Petitioner proposes to amend its gas storage arrangement with ANR and has entered into a December 5, 1980, amended gas storage agreement which would be effective April 1, 1981, and which provides that during the summer period ANR would provide firm storage capacity for Petitioner in ANR's underground storage facilities of up to 3,100,000 Mcf of gas, exclusive of compressor fuel, at a daily rate of up to 15,702 Mcf. Moreover, it is stated, under the amended agreement during the winter period ANR would redeliver the stored volumes to Petitioner and the redelivery rate would not be in excess of a maximum daily quantity equal to (a) 62,000 Mcf per day until 80 percent of the stored volumes have been withdrawn from storage; (b) thereafter, 49 600 Mcf per day until 90 percent of the stored volumes have been withdrawn from storage; and (c) thereafter, 37,200 Mcf per day.

Petitioner states that it would pay ANR a monthly charge of $153,243.33 (59.32 cents per Mcf) commencing April 1, 1981, for the term of the agreement.

Petitioner also proposes to amend the transportation agreement between itself and Mich Wis and on December 5, 1980, amended their July 6, 1978, transportation agreement for firm service to increase the daily and annual volumes to be transported by Mich Wis for Petitioner. It is asserted that the amended agreement provides for Mich Wis to receive from Petitioner up to 3,154,901 Mcf of gas, exclusive of compressor fuel, at a daily rate of up to 15,775 Mcf of gas during the summer period and for Mich Wis to receive up to 3,195,915 Mcf of gas from ISD at a daily rate of 15,980. Petitioner asserts that during the winter period Mich Wis would transport and redeliver the stored volumes to Petitioner and that such redeliveries would be accomplished by Mich Wis delivering up to 3,099,690 Mcf of gas, exclusive of compressor fuel, at a daily rate of up to 61,994 Mcf of gas to ISD for the account of Petitioner and such volumes of gas as are then redelivered by ISD to Mich Wis for transportation to Petitioner.

Petitioner maintains that it would pay Mich Wis a charge of $56,676 (21.94 cents per Mcf) per month for the transportation service.

Petitioner further proposes to amend its transportation agreement with ISD in accordance with a December 5, 1980, agreement to alter their July 6, 1978, transportation agreement for firm service to increase the daily and annual volumes of gas to be transported by ISD for Petitioner. It is stated that the amended agreement provides for annual summer period transportation of up to 3,100,000 Mcf of natural gas, exclusive of compressor fuel, at a daily rate of up to 15,500 Mcf.

It is asserted that ISD would transport and redeliver the stored volumes to Mich Wis for the account of Petitioner during the winter period of each year of the term of the contract and that the transportation rate would be the volume of gas redelivered by Mich Wis to ISD. Petitioner states that it would pay ISD for the transportation service a charge of $32,799 (12.647 cents per Mcf) per month for each month under the term of the agreement.

Furthermore, Petitioner states that on December 5, 1980, it and Citizens entered into a gas storage and transportation agreement whereby Petitioner would provide firm, long-term storage and transportation service for Citizens for a period of 14 years commencing April 1, 1981. It is stated that Petitioner would provide storage and transportation of up to 1,960,000 Mcf of natural gas per year for Citizens on a firm basis. Moreover, Petitioner asserts that the firm contract provides that during the summer period, April 1 to October 31, Citizens would direct that a portion of its monthly gas entitlement pursuant to an existing gas sales contract be transported by Petitioner for storage and that during the winter period, November 1 to March 31, specified portions of such stored volumes would be redelivered by Petitioner to Citizens for use in its service area.

It is stated that under the firm contract Citizens would be billed a monthly charge for each month of the term equal to 1/12th of the stored volume multiplied by 93.907 cents. Petitioner states that there would also be an additional administrative charge equal to 2.50 cents per Mcf of gas transported by Petitioner on behalf of Citizens for injection into storage and 2.50 cents per Mcf of gas withdrawn from storage and transported and redelivered by Petitioner to Citizens.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

Office of Hearings and Appeals

Objection to Proposed Remedial Orders Filed Week of February 2 Through February 6, 1981

During the week of February 2 through February 6, 1981, the notices of objection to proposed remedial orders listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial orders described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 on or before April 14, 1981. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearing and Appeals.

March 19, 1981.

Williams & Sons Enterprises, Inc., d.b.a. Campbell, Point Boat Dock, Shell Knob, Missouri, BRO-1383, motor gasoline

On February 6, 1981, Williams & Sons Enterprises, Inc. (Williams), Shell Knob, Missouri 65747 perfected the filing of a Notice of Objection to a Proposed Remedial Order which the DOE Central District Office of Enforcement issued to the firm on August 27, 1981. In the PRO, the Central District found that during the period from March 28, 1980 to July 18, 1980, Williams charged more than the maximum lawful selling price for motor gasoline in violation of 10 CFR 212.93.

According to the PRO, the Williams violation resulted in $3,282.54 of overcharges.

Cyr's Marina, Severna Park, MD, BRO-1381, motor gasoline

On February 2, 1981, Cyr's Marina, 366 North Drive, Severna Park, MD 21146 filed a Notice of Objection to a Proposed Remedial Order which the DOE National Office of Enforcement issued to the firm on December 31, 1980. In the Proposed Remedial Order, the National Office found that during the period from August 1, 1979 to August 27, 1980, Cyr's Marina committed pricing violations on its sales of motor gasoline in the State of Maryland.

According to the Proposed Remedial Order, the Cyr's Marina violation resulted in $1,575.05 of overcharges. This Notice of Objection has been transferred to the Northeast Regional Center of the Office of Hearings and Appeals for analysis.

BILLING CODE 6450-01-M

Cases Filed; Week of February 27 Through March 6, 1981.

During the week of February 27 through March 6, 1981, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearings and Appeals.

March 19, 1981.

List of Cases Received by the Office of Hearings and Appeals

[Week of Feb. 27 through Mar. 6, 1981]

Date	Name and location of applicant	Case No.	Type of submission
Mar. 2, 1981	Exxon Company, U.S.A. et al., Washington, D.C.	BED, BEH-0096 thru 0102	Motion for Discovery and Evidentiary Hearing. If granted: An Evidentiary Hearing would be convened and Discovery would be granted to Exxon Company, U.S.A., Cities Service Company, Conoco Inc., Marathon Oil Company, Sun Oil Company of Pennsylvania, Standard Oil Company (Ohio) and Texaco Corporation in connection with an Application for Exception (Case No. DEE-7748) filed by the 341 Tract Unit of the Citronelle Field.
Mar. 2, 1981	Marathon Oil Company, Findlay, OH	BRO-1491	Motion for Discovery. If granted: Discovery would be granted to Marathon Oil Company in connection with the Statement of Objections submitted in response to the Proposed Decision and Order (Case No. BEE-1491) issued to Asamera Oil (U.S.), Inc.
Mar. 2, 1981	Mobil Oil Corporation, Fairfax, Virginia	BED, BEH-0103	Motion for Discovery and Evidentiary Hearing. If granted: An evidentiary hearing would be convened and discovery would be granted to Mobil Oil Corporation in connection with an Application for Exception (Case No. DEE-7746) filed by the 341 Tract Unit of the Citronelle Field.
Mar. 2, 1981	Mobil Oil Corporation, Fairfax, Virginia	BES-0145	Request for Stay. If granted: Mobil Oil Corporation would receive a stay of the provisions of the December 31, 1980 Decision and Order (Case No. BEN-0078) pending a determination on 341 Tract Unit of the Citronelle Field's Application for Exception (Case No. DEE-7746).
Mar. 3, 1981	C. R. Mullis Oil & Heating Company, Inc., Charlotte, N.C.	BEE-1641	Exception from reporting requirements. If granted: C. R. Mullis Oil & Heating Company, Inc. would not be required to file Form EIA-9A ("No. 2 Distillate Price Monitoring Report").
Mar. 3, 1981	Hydrotherm, Inc., Northvale, N.J.	BES-0146	Request for Stay from the Energy Conservation Program for Consumer Appliances. If granted: Hydrotherm, Inc. would receive a stay of the provisions under 10 C.F.R., Part 430, the Energy Conservation Program for Consumer Appliances, pending a final determination by the Office of Conservation and Solar Energy on Hydrotherm's November 21, 1980 petition for waiver.
Mar. 3, 1981	Louisiana Land & Exploration; Texaco, Inc., Washington, D.C.	BRZ-0088, 0087	Motion to Dismiss. If granted: The Proposed Remedial Order issued to Texaco on May 1, 1979 (Case No. DRO-0188) would be dismissed or remanded.

List of Cases Received by the Office of Hearings and Appeals—Continued

(Week of Feb. 27 through Mar. 6, 1981)

Date	Name and location of applicant	Case No.	Type of submission
Mar. 3, 1981	Total Petroleum, Inc., Alamo, Michigan	BEX-0171	Supplemental Order. If granted: The October 1, 1980 Decision and Order (Case No. BES-1147) issued to Total Petroleum, Inc. would be rescinded.
Mar. 4, 1981	Atlantic Richfield Co., Washington, D.C.	BEX-0172	Supplemental Order. If granted: The February 27, 1981 Decision and Order issued to Atlantic Richfield Company (Case No. BED-0373) would be modified, and Ashland Oil, Inc. would be required to provide additional discovery in connection with the objections phase of Case No. BEE-0373.
Mar. 4, 1981	Larry Ellis, Idaho Falls, ID	BFA-0618	Appeal of an Information Request Denial. If granted: The Information Request Denial issued by the System Manager for Privacy Acts in the Idaho Operations Office would be rescinded, and Larry Ellis would receive information regarding records from the EG-G Idaho, Inc. files.
Mar. 4, 1981	Marathon Oil Company, Findlay, Ohio	BEA-0619	Appeal of an Entitlements Notice. If granted: The November 1980 Entitlements Notice would be modified with respect to Marathon Oil Company's entitlements purchase obligations.
Mar. 5, 1981	Hudson, Creyke, Koehler, Tacke, and Bixler, Washington, D.C.	BFA-0620	Appeal of an Information Request Denial. If granted: The February 26, 1981 Information Request Denial issued by the Idaho Operations Office would be rescinded, and Hudson, Creyke, Koehler, Tacke and Bixler would receive access to certain DOE information.
Mar. 5, 1981	The 341 Tract Unit of the Citronelle Field, Washington, D.C.	BEX-0173	Supplemental Order. If granted: The Office of Hearings and Appeals would implement the refund of tertiary incentive revenues previously received by the 341 Tract Unit of the Citronelle Field (Case No. BEN-0076).
Mar. 6, 1981	Office of Special Counsel/Gulf Oil Corp., Washington, D.C.	BRJ-0193	Motion for Protective Order. If granted: Office of Special Counsel would enter into a Protective Order with Gulf Oil Corporation regarding the exchange of proprietary information.
Mar. 6, 1981	Stephen M. Shaw, La Jolla, CA	BFA-0621	Appeal of an Information Request Denial. If granted: The December 22, 1980 Information Request Denial issued by the Division of FOI and Privacy Acts Activities would be rescinded, and Stephen M. Shaw would receive access to certain DOE information.
Mar. 6, 1981	Stephen M. Shaw, La Jolla, CA	BFA-0622	Appeal of an Information Request Denial. If granted: The January 26, 1981 Information Request Denial issued by the Division of FOI and Privacy Acts Activities would be rescinded, and Stephen M. Shaw would receive access to certain DOE information.

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-1787-3]

EPA Comments on Environmental Impact Statements and Other Actions Impacting the Environment; Availability of Report

AGENCY: Office of Federal Activities (A-104), U.S. Environmental Protection Agency.

PURPOSE: Pursuant to the requirements of section 102(2)(c) of the National Environmental Policy Act of 1969, and Section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment.

SUMMARY OF NOTICE: A report which identifies EPA's comments on EIS's and other actions impacting the environment which were released during February 1981 has been prepared and is available upon request. To obtain a copy of this report you should contact: Ms. Kathi L. Wilson, Office of Federal Activities (A-104), U.S. Environmental Protection Agency, Washington, D.C. 20460.

This report is also published in the monthly publication entitled, 102 monitor, which is available through subscription with the Government Printing Office, Superintendent of Documents, Washington, D.C. 20402.

CONTENTS OF REPORT: The report contains the type and title of the document reviewed by EPA, the agency responsible for preparing document, the EPA review control number, the classification of the nature of EPA's comments for draft EIS's and a summary of the EPA's comments given for final EIS's and other actions.

Dated: March 19, 1981.

William N. Hedeman, Jr.,

Director, Office of Federal Activities.

BILLING CODE 6560-37-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket No. FEMA-4-AL-1]

Alabama Radiological Emergency Response Plan for the J. M. Farley Nuclear Power Facility

ACTION: Certification of FEMA Findings and Determination.

In accordance with FEMA Rule 44 CFR Part 350 (proposed), on November 10, 1980, the State of Alabama submitted its plans relating to the Farley nuclear power facility to the Regional Director of FEMA Region IV for review and FEMA approval. The Regional Director has forwarded his evaluation dated January 24, 1981, to the Acting Associate Director for Plans and Preparedness in accordance with § 350.11 of the proposed Rule. Considered in his evaluation were the State plan, associated local plans, contiguous State and local plans involved in the 10- and 50-mile emergency planning zones (EPZs) for the Farley facility, a critique

of the exercise conducted on November 19–20, 1980, at the Farley facility in accordance with § 350.9 and a report of the public meeting held on November 18, 1980, to discuss the site-specific aspects of the State and local plans in accordance with § 350.10 of the proposed Rule.

Based on a review of the Region's evaluation by FEMA Headquarters, the Acting Associate Director finds and determines that, subject to the condition stated below, State plans and preparedness including the local plans and preparedness for the Farley facility are adequate to protect the health and safety of the public living in the vicinity of the Farley facility by providing reasonable assurance that appropriate protective measures can and will be taken off-site in the event of a radiological emergency and are capable of being implemented. The Acting Associate Director further finds and determines with respect to the joint criteria NUREG–0654/FEMA–REP–1, Revision 1, that by July 1, 1981, the public alerting and notification system must meet FEMA/Nuclear Regulatory Commission (NRC) criteria. These findings and determination have been communicated to the NRC and to the Governor of Alabama.

FEMA will continue to review the status of preparedness of the States and the local jurisdictions associated with the Farley facility in accordance with § 350.13 of the proposed Rule.

For further details with respect to this action, refer to Docket File FEMA–4–AL–1 maintained by the FEMA Regional Director at 1375 Peachtree Street, NE, Atlanta, Georgia 30309.

Dated: March 11, 1981, Washington, DC.

For the Federal Emergency Management Agency:

John W. McConnell,

Acting Associate Director for Plans and Preparedness.

BILLING CODE 6718-01-M

FEDERAL MARITIME COMMISSION

Common Carriers by Water in the United States/Northern Marianas Trade; Exemption From Domestic Trade Tariff, Filing and Financial Reporting Requirements; Filing of Petition

Notice is given that a petition has been filed by the Commonwealth of the Northern Mariana Islands seeking exemption under section 35 of the Shipping Act, 1916 of Federal Maritime Commission domestic trade tariff filing and financial reporting requirements.

Petitioner seeks issuance by the Commission of a rule reading as follows:

"The Provisions of Section 18(a) of the Shipping Act, 1916 and Section 2 of the Intercoastal Shipping Act, 1933, as amended, and Commission Regulations issued pursuant thereto (including but not limited to General Orders No. 5, 11, and 38, as amended) shall not apply to transportation by water between ports in the United States, its territories or possessions on the one hand and ports in the Commonwealth of the Northern Mariana Islands on the other hand of general cargo (including liquid in bulk) for a period commencing upon approval by the Federal Maritime Commission and ending December 31, 1981. This exemption is subject to the following conditions:

1. Each common carrier serving the above described trades shall adhere to the tariff filing and publication requirments of Section 18(b), Shipping Act, 1916 and Commission Regulations issued pursuant thereto (General Order 13, as amended).

2. Each common carrier serving the above described trades shall submit the balance sheet and profit and loss statement in the same form and at the same time as it is submitted to the Government of the Northern Mariana Islands or, if no such financial statements are required to be submitted to that Government, each such carrier shall submit to the Commission a balance sheet and profit and loss statement within 150 days of the close of the carriers fiscal year.

Interested persons may inspect and obtain a copy of the petition at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 11101, or may inspect the petition at the Field Offices located at New York, New York; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested persons may submit comments to the Secretary, Federal Maritime Commission, Washington, D.C. 20573 on or before April 27, 1981. An original and fifteen copies of such comments shall be submitted and a copy thereof served on petitioner.

Dated: March 20, 1981.

Joseph C. Polking,

Acting Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Lloyds Bank Ltd.; Bank Holding Companies; Proposed de Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and, except as noted, received by the appropriate Federal Reserve Bank not later than April 20, 1981.

A. *Federal Reserve Bank of New York* (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

Lloyds Bank Limited, London, England, Royal Bank of Scotland Group Limited and Royal Bank of Scotland, Edinburgh, Scotland (commercial financing; New York, California): to engage, through their indirect subsidiary, James Talcott Business Credit, Inc., a subsidiary of James Talcott Factors, Inc., New York, New York, in commercial financing activities, including making or acquiring commercial loans secured by a borrower's accounts receivable, inventory or other assets and servicing such loans for others. These activities would be conducted from offices in New York, New York and Los Angeles, California serving the entire United States.

B. *Federal Reserve Bank of Chicago* (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

Independence Bank Group, Inc., Waukesha, Wisconsin (mortgage banking activities; the State of Wisconsin): to engage through its *de novo* subsidiary, Independence Mortgage Company, Inc., in making, acquiring, selling and servicing mortgage loans, with primary emphasis on residential mortgages, including mortgages guaranteed by the Federal Housing Administration and the Veterans Administration. These activities would be conducted from offices of the subsidiary located in New Berlin, Wisconsin, serving the State of Wisconsin. Comments on this application must be received not later than April 17, 1981.

C. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, March 19, 1981.

Jefferson A. Walker,

Assistant Secretary of the Board.

[FR Doc. 81-8088 Filed 3-24-81; 8:45 am]

BILLING CODE 6210-01-M

South Texas Bancshares, Inc.; Formation of Bank Holding Company

South Texas Bancshares, Inc., Beeville, Texas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of The Commercial National Bank of Beeville, Beeville, Texas, and First State Bank of Mathis, Mathis, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than April 16, 1981. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, March 19, 1981.

Jefferson A. Walker,

Assistant Secretary of the Board.

BILLING CODE 4310-84-M

[CA 2550]

California; Order Providing for Opening of Public Land

March 13, 1981.

1. In an exchange of lands made under the provision of Section 8 of the Act of June 28, 1934, 48 Stat. 1269, 1272, as amended and supplemented, 43 U.S.C. 315g (1964), the following land has been reconveyed to the United States:

San Bernardino Meridian

Parcel I

The North 2158.10 feet, measured on the West line of that portion of the Northwest quarter of Sec. 19, T. 6 S., R. 6 E., SB Mer., in the County of Riverside, State of California, according to the Official Plat there of which lies Westerly of the West right of way line of State Highway 74, as described in the Deed to the County of Riverside recorded April 5, 1932, in Book 71, page 252 of Official Records.

Parcel II

T. 8 S., R. 7 E., SB Mer.,
Sec. 19, All.

Parcel III

The following described real property situated in the County of San Bernardino, State of California:

That portion of the Northeast ¼ of section 7, Township 9 North, Range 1 West, San Bernardino Meridian, according to the Offical plat thereof, described as follows:

Beginning at the Northwest corner of the Northeast ¼ of the Northeast ¼ of said Section 7; thence North 89° 33' 09" West along the North line of said Northeast ¼ of said Section 7, a distance of 658.400 feet to the Northwest corner of the Northeast ¼ of the Northwest ¼ of the Northeast ¼ of said Section 7; thence South 0° 35' 40" West along the West line of the Northeast ¼ of the Northwest ¼ of the Northeast ¼ of said Section 7, a distance of 550.553 feet; thence North 89° 55' 00" East, a distance of 722.963 feet to a point; thence North 33° 45' 38" East a distance of 175.212 feet to a point on a curve concave Northeasterly, from which the radius of said curve bears North 33° 45' 38" East a distance of 350 feet; thence along said curve Northerly through an angle of 55° 51' 43", a distance of 341.241 feet; thence North 0° 22' 39" West a distance of 110.000 feet, more or less, to the point of beginning.

2. The lands described in Parcel I and II shall at 10 a.m. on April 21, 1981 be open to operation of the public land laws generally, including the mining laws (30 U.S.C. Ch. 2), and the mineral leasing laws, subject to valid existing rights, the provision of existing withdrawals, and the requirement of applicable law. All valid applications received at or prior to 10 a.m. on April 21, 1981 shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m. on April 21, 1981, the lands described in Parcel III shall be open to operation of the public land laws generally, including the mining laws (30 U.S.C. Ch. 2). These lands have been and continue to be open to the mineral leasing laws. All valid applications received at or prior to 10 a.m. on April 21, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. Inquiries concerning the lands should be addressed to the Bureau of Land Management, Department of the Interior, Room E–2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

[NM 44159]

New Mexico; Notice of Application

March 17, 1981.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Llano, Inc. has applied for one 12-inch natural gas pipeline right-of-way across the following lands:

New Mexico Principal Meridian, New Mexico

T. 25 S., R. 32 E., NMPM,
- Sec. 17, W½SW¼, SE¼SW¼;
- Sec. 18, W½NE¼, SE¼NE¼, NE¼NW¼;
- Sec. 20, W½NE¼, SE¼NE¼, NE¼NW¼, NE¼SE¼;
- Sec. 21, W½SW¼, SE¼SW¼;
- Sec. 27, SW¼SW¼;
- Sec. 28, W½NE¼, E½NW¼, N½SE¼, SE¼SE¼;
- Sec. 34, SW¼NE¼, N½NW¼, SE¼NW¼, N½SE¼, SE¼SE¼;
- Sec. 35, SE¼SW¼.

T. 26 S., R. 32 E., NMPM,
- Sec. 11, NE¼NE¼;
- Sec. 12, W½NW¼, SE¼NW¼, NE¼SW¼, W½SE¼, SE¼SE¼;
- Sec. 13, NE¼NE¼.

T. 26 S., R. 33 E., NMPM,
- Sec. 18, Lots 1, 2, 3, SE¼NW¼, E½SW¼, SW¼SE¼;
- Sec. 19, N½NE¼, SE¼NE¼;
- Sec. 20, SW¼NW¼, N½SW¼, SE¼SW¼, SW¼SE¼;
- Sec. 28, SW¼NW¼, W½SW¼, SE¼SW¼;
- Sec. 29, N½NE¼, SE¼NE¼;
- Sec. 33, Lots 3, 4, NW¼NE¼, NE¼NW¼.

These pipelines will convey natural gas across 11.167 miles of public land in Lea County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

James H. O'Connor,

District Manager.

BILLING CODE 4310-84-M

[INT DES 81-14]

Outer Continental Shelf; Gulf of Mexico; Availability of Draft Environmental Statement and Holding of Public Hearing Regarding Proposed Oil and Gas Lease Sales No. 67 and 69

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement relating to a proposed oil and gas lease sale of 472 tracts of submerged lands on the Outer Continental Shelf of the Gulf of Mexico (OCS Sales No. 67 and 69).

Single copies of the draft environmental statement can be obtained from the Office of the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, Hale Boggs Federal Building, Suite 841, 500 Camp Street, New Orleans, Louisiana 70130, and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environmental statement will also be available for review in the following public libraries: Austin Public Library, 401 West Ninth Street, Austin, Texas; Houston Public Library, 500 McKinney Street, Houston, Texas; Rosenbrug Library, 2310 Sealy Street, Galveston, Texas; Dallas Public Library, 1954 Commerce Street, Dallas, Texas; Brazoria County Library, 410 Brazosport Boulevard, Freeport, Texas; La Ratama Library, 505 Mesquite Street, Corpus Christi, Texas; Texas Southmost College Library, 80 Fort Brown Street, Brownsville, Texas; New Orleans Public Library, 219 Loyola Avenue, New Orleans, Louisiana; Louisiana State Library, Baton Rouge, Louisiana; Lafayette Public Library, 301 West Congress Street, Lafayette, Louisiana; Calcasieu Parish Library, Downtown Branch, Lake Charles, Louisiana; Harrison County Library, 21st Avenue and Beach Street, Gulfport, Mississippi; Mobile Public Library, 701 Government Street, Mobile, Alabama; Montgomery Public Library, 445 South Lawrence Street, Montgomery, Alabama; St. Petersburg Public Library, 3745 Ninth Avenue North, St. Petersburg, Florida; West Florida Regional Library, 200 West Gregory Street, Pensacola, Florida; Northwest Regional Library System, 25 West Government Street, Panama City, Florida; Leon County Public Library, 127 North Monroe Street, Tallahassee, Florida; Lee County Free Library, 3355 Fowler Street, Fort Myers, Florida; Charlotte-Glades Regional Library System, 801 NW Aaron Street, Port Charlotte, Florida; and Tampa-Hillsborough County Public Library System, 800 North Ashley Street, Tampa, Florida.

In accordance with 43 CFR 3314.1, a public hearing on the draft environmental statement is scheduled for May 5, 1981, in the Bureau of Land Management Conference Room, Hale Boggs Federal Building, Suite 841, 500 Camp Street, New Orleans, Louisiana. The hearing will convene at 9:00 a.m. and will conclude at 5:00 p.m. or earlier, if all scheduled witnesses have testified.

The hearing will provide the Secretary of the Interior with information from government agencies, public and private groups, and others to help evaluate the potential effects of the proposed lease offerings. Comments are solicited concerning the effects of projected sale-related activities on marine, cultural, recreational and other resources of the Gulf of Mexico region.

Interested individuals, representatives of organizations, and public officials who wish to testify at the hearing are requested to contact the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, at the above address by 4:15 p.m., April 24, 1981. Written comments from those unable to attend the hearing also should be addressed to the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, at the above address. The Department will accept written testimony and comments on the draft environmental statement until May 11, 1981. This should allow ample time for those unable to testify at the hearings to make their views known and for the submission of supplemental materials by those who presented oral testimony. Time limitations make it necessary to limit the length of oral presentations to ten (10) minutes. An oral statement may be supplemented, however, by a more complete written statement which may be submitted to the hearing officer at the time of

presentation of the oral statement. Written statements presented in person at the hearing will be considered as part of the hearing record. To the extent that time is available after presentation of oral statements by those who have given advance notice, the hearing officer will give others present an opportunity to be heard.

After testimony and comments have been received and analyzed, a final environmental statement will be prepared.

George D. Lee,

Deputy Director, Bureau of Land Management.

Approved: March 20, 1981.

Cecil S. Hoffman,

Special Assistant to Assistant Secretary of the Interior.

[FR Doc. 81-8882 Filed 3-24-81; 8:45 am]

BILLING CODE 4310-84-M

Public Lands in San Bernardino County, Calif.; Notice of Realty Action—Sale CA 8601

The following described land has been identified as suitable for disposal by sale under the Federal Land Policy and Management Act of 1976 (90 Stat. 2743; 43 U.S.C. 1713), at no less than the fair market value shown:

Legal description: W½NE¼NE¼NE¼ Sec. 32, T. 2 N., R. 8 E., San Bernardino Meridian.
Acreage: 5.
Value: $4,500.

The above described land is being offered as a direct, noncompetitive sale to Leslie B. Lambert, Sr., owner of the improvements on the sale tract. The land was leased by Mr. Lambert under the Small Tract Act in the early 1950's. After constructing the improvements on the land, Mr. Lambert filed an application to purchase the land in 1956. In 1957 the land was appraised and offered to Mr. Lambert; however, through inadvertence, the purchase price was not paid and the case was closed. Therefore, in order to resolve this occupancy trespass, disposal by direct sale, rather than public auction, will protect the equity investment in the improvements on the land, and eliminate an undue hardship if he were compelled to remove or otherwise dispose of the improvements. The lands are not required for any Federal purpose. The sale is consistent with the Bureau's planning system, and the public interest would be served by offering this land for sale.

The land will not be offered for sale until 60 days after the date of issuance of this notice.

The terms and conditions applicable to the sale are:

1. All minerals in the land will be reserved to the United States in accordance with Section 209(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1719).

2. A right-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945.

Detailed information concerning the sale is available for review at the Bureau's Barstow Resource Area Office, 831 Barstow Road, Barstow, CA 92311.

On or before May 11, 1981, interested parties may submit comments to the Secretary of the Interior (LLM 320), Washington, D.C. 20240. Any adverse comments will be evaluated by the Secretary of the Interior who may vacate or modify this realty action and issue a final determination. In the absence of any action by the Secretary of the Interior, this realty action will become a final determination of the Department of the Interior.

Dated: March 17, 1981.

Joan B. Russell,

Chief, Lands Section, Branch of Lands and Minerals Operations.

Phoenix District, Kingman Resource Area, Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Kingman Resource Area (Phoenix District) Grazing Advisory Board will be held on April 22, 1981.

The meeting will begin at 9:00 a.m. in the conference room of the Bureau of Land Management Office, 2475 Beverly Avenue, Kingman, Arizona 86401.

The agenda for the meeting will include:

1. Election of Officers
2. Review of the Draft EIS for Hualapai-Aquarius
3. Review of the new grazing regulations
4. Status of range improvements for F.Y. 81.
5. Allotment Management Plan Implementation in the Cerbat/Black Planning Unit.
6. Arrangement for future meetings.

The meeting is open to the public. Anyone wishing to make oral or written statements to the Board is requested to do so through the office of the District Manager, 2929 West Clarendon Avenue, Phoenix, Arizona 85017 at least seven days prior to the meeting date.

Summary minutes of the Board meeting will be maintained in the District Office and be made available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Malcolm J. Schmitker,

Acting District Manager.

National Park Service

Chesapeake and Ohio Canal National Historical Park Commission; Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held Saturday, April 18, 1981, at 1:00 p.m. at the Allegany County Community College, Willowbrook Road, Cumberland, Maryland.

The Commission was established by Pub. L. 91–664 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Mr. Donald R. Frush, Chairman, Hagerstown, Maryland
Mrs. Bonnie Troxell, Cumberland, Maryland
Miss Nancy Long, Glen Echo, Maryland
Mrs. Constance Morella, Bethesda, Maryland
Mr. Kenneth S. Rollins, Brookmont, Maryland
Mrs. Constance Lieder, Baltimore, Maryland
Mr. Edwin F. Weesly, Jr., Brookmont, Maryland
Mr. John D. Millar, Cumberland, Maryland
Mr. James B. Coulter, Annapolis, Maryland
Mrs. Dorothy Grotos, Arlington, Virginia
Mrs. Minny Puhlmann, Dickerson, Maryland
Mrs. Margaret Dietz, Lovettsville, Virginia
Mr. William H. Ansel, Jr., Romney, West Virginia
Dr. James H. Gilford, Frederick, Maryland
Mr. Donald H. Shannon, Washington, D.C.
Mr. Silas F. Starry, Shepherdstown, West Virginia
Mr. Rockwood H. Foster, Washington, D.C.
Mr. R. Lee Downey, Williamsport, Maryland
Mr. John C. Frye, Gapland, Maryland

Matters to be discussed at this meeting include:

1. Status of Cumberland/North Branch Development Concept Plan.
2. Status of Williamsport Development Concept Plan.
3. Philosophy on Treatment and Construction of the Towpath.
4. Status of Towpath Bridge over Catoctin Creek.
5. Planning Procedures Proposal for C&O Canal.
6. Hancock Re-watering Proposal.
7. Policy Statement on Commercial Intrusions.
8. Bicycle Safety Policy.

The meeting will be open to the public. Any member of the public may file with the Commission, a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Richard L. Stanton, Superintendent, C&O Canal National Historical Park, P.O. Box 4, Sharpsburg, Maryland 21782, telephone 301–739–4200.

Minutes of the meeting will be available for public inspection four (4) weeks after the meeting at Park Headquarters, Sharpsburg, Maryland.

Dated: March 17, 1981.

Manus J. Fish, Jr.,
Regional Director, National Capital Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

MC 154725 (Sub-6-1TA), filed March 16, 1981. Applicant: THOMAS V. HASTINGS d.b.a. H & H ENTERPRISES, 306 Villa Vista, Sterling, CO 80751. Representative: (same as applicant). *Machinery, materials, equipment, supplies and facilities used in or incidental to or in connection with natural gas and petroleum; (a) discovery, development, production and preservation, (b) pipe line construction, operation, repairing, servicing, dismantling and maintenance, (c) storage facility construction, operation, repairing, servicing, dismantling and maintenance, and (d) refining, recycling, processing, repressuring and blending facility construction, operation, repairing, servicing, dismantling, and maintenance,* in all points in the states of: CO, NE, WY, ND, SD, MT, KS, UT, NM, AZ, OK, TX, for 270 days. Supporting shippers: Bethlehem Steel Corp. 215 So. 3rd Ave., Sterling, CO 80751; Allen & Schramm Inc. 1114 Delmar, Sterling, CO 80751

MC 154727 (Sub-6-1TA), filed March 16, 1981. Applicant: HUISH DISTRIBUTING CO., d.b.a. HUCCO TRUCKING, 3540 W. 1967 S., Salt Lake City, UT 84125. Representative: Irene Warr, 430 Judge Bldg., Salt Lake City, UT 84111. *Contract carrier,* irregular routes, *chemicals and related products,* between CA, on the one hand, and, on the other, Salt Lake County, UT, under a continuing contract(s) with Huish Chemical Co. for 270 days. Supporting shipper: Huish Chemical Co., 3540 W. 1967 S., Salt Lake City, UT 84125.

MC 154724 (Sub-6-1TA), filed March 16, 1981. Applicant: LARSEN TRANSPORT, INC., 860 W. 2600 S., Salt Lake City, UT 84119. Representative: Irene Warr, 430 Judge Bldg., Salt Lake City, UT 84111. *Contract carrier,* irregular routes: (1) *Clay, concrete, glass or stone products,* (2) *primary and fabricated metal products,* (3) *chemicals or allied products* (4) *petroleum or coal products* (5) *metallic and nonmetallic minerals* (6) *machinery and supplies and* (7) *waste or scrap materials,* between points in the U.S., for 270 days. Supporting shipper: Larsen Foundry Supply Corporation, 860 W. 2600 S., Salt Lake City, UT, 84119.

MC 147066 (Sub-6-1TA), filed March 16, 1981. Applicant: LUCKY THIRTEEN TRANSPORTATION CO., INC., 15200 Hesperian Blvd., San Leandro, CA 94578. Representative: Willian D. Taylor, 100 Pine St., Suite 2550, San Francisco, CA 94111. *Contract carrier;* irregular routes; *Paper and paper products, materials and supplies,* between points in the U.S. under a continuing contract or contracts with H. S. Crocker Co., Inc. of San Bruno, CA for 270 days. Supporting shipper: H. S. Crocker & Co., 1000 San Mateo Ave., San Bruno, CA 94066.

MC 149036 (Sub-6-3TA), filed March 16, 1981. Applicant: MAHAFFEY'S WAREHOUSE, INC., P.O. Box 317, Yellow Jacket, CO 81335. Representative: James F. Crosby, 7363 Pacific St., Suite 210B, Omaha, NE 68114. *Beer, and equipment, materials, and supplies used in the transportation, sale, and distribution of beer,* between Irvine and Van Nuys, CA, and Los Angeles, CA and points in its commercial zone, on the one hand, and, on the other, Grand Junction, CO and points in its commercial zone for 270 days. Supporting shipper: Hub Distributing Co., Inc., 131 No. Spruce, Grand Junction, CO 81501.

MC 147020 (Sub-6-2TA), filed March 16, 1981. Applicant: NORTHWESTERN TRADING CO., INC., Rt. No. 4, Box 116B, Milton-Freewater, OR 97862. Representative: M. C. Risser, Suite 501, 1410 S.W. Morrison St., Portland, OR 97205. *Wine and malt liquors, in packages,* from Los Angeles, Fresno, Stanislaus, Santa Clara and Napa counties, CA., to Walla Walla, Franklin and Whitman counties, WA and Umatilla county, OR for 270 days. Supporting shipper(s): Desert Sun Distributing, 110 W. Columbia, Pasco, WA 99301; Glafke Distributing Co., Inc., 826 N. 10th Ave., Walla Walla, WA 99362; Graybeal Distributing Co., 514 S. Main St., Pendleton, OR 97801.

MC 150037 (Sub-6-3TA), filed March 16, 1981. Applicant: R & R DISTRIBUTING, INC., 827 N. Main St., Las Vegas, NV 89101. Representative: William J. Monheim, P.O. Box 1756, Whittier, CA 90609. *Plastic articles and materials and equipment* utilized in the production of plastic articles, between the facilities of L.A. Plastics Co., Inc., in Los Angeles, CA, on the one hand, and, on the other, points in AZ, CO, NV, NM, NJ, OR, TX, UT and WA for 270 days. Supporting shipper: L.A. Plastics Co., Inc., 3024 Rosslyn St., Los Angeles, CA 90065.

MC 153013 (Sub-6–2TA), filed March 16, 1981. Applicant: RONNEY L. ROGERS, d.b.a. R. L. ROGERS TRUCKING, Rt. 1, B. 1724, Clatskanie, OR 97016. Representative: Lawrence V. Smart, Jr., 419 NW. 23rd Ave., Portland, OR 97210. *Bannanas,* from Port Hueneme and Long Beach, CA to Seattle, WA for 270 days. Supporting shipper: Cody Produce Supply, 4525 S Orchard, Tacoma, WA 98466.

MC 9251 (Sub-6–1TA), filed March 16, 1981. Applicant: S & M TRUCK LINE, INC., 210 S. Garfield St., Mt. Angel, OR 97362. Representative: John A. Anderson, Suite 1600, One Main Pl., 101 SW. Main St., Portland, OR 97204. *Canned foods,* in steamship cargo containers, from Salem, Stayton, Brooks and Dayton, OR to Seattle and Longview, WA, restricted to shipments having an immediately prior or subsequent movement by water, for 270 days. Supporting shipper: Stayton Canning Co., Coop., 930 W. Washington, St., Stayton, OR 97383. An underlying ETA seeks 120 days authority.

MC 126514 (Sub-6–26TA), filed March 16, 1981. Applicant: SCHAEFFER TRUCKING, INC., 5200 W Bethany Home Rd., Glendale, AZ 85301. Representative: Leonard R. Kofkin, 39 S La Salle St., Chicago, IL 60603. *General commodities,* between points in the US (except AK and HI). Restriction: Restricted to shipments moving on bills of lading of National Carrier Service, for 270 days. Supporting shipper: National Carrier Service, 200 Santa Cruz, Anaheim, CA 92805.

MC 154715 (Sub-6–1TA), filed March 13, 1981. Applicant: J. S. STRINDEN TRUCKING CO., 1374 W 27th St., San Pedro, CA 90731. Representative: James C. Strinden (same as applicant). *Contract Carrier,* Irregular routes: (1) *Potting soil, Othro Chemical Products, and Trophy's* from Sacramento and Los Angeles Counties, CA to points in the forty-eight states for 270 days. Supporting shipper: The Leisure Group, Inc., 1035 Watsoncenter Road, Carson, CA 90745.

MC 108461 (Sub-6–3TA), filed March 16, 1981. Applicant: SUNDANCE FREIGHT LINES, INC., d.b.a. SUNDANCE TRANSPORTATION, 3737 W. Buckeye Rd., Phoenix, AZ 85009. Representative: William S. Richards, P.O. B. 2465, Salt Lake City, UT 84110. *Contract Carrier,* Irregular routes: *Food and paper products,* between points in OR, WA, and CA on the one hand and Phoenix, AZ on the other, for the account of S.E. Rykoff Co. for 270 days. Supporting shipper: S. E. Rykoff Co., 3235 E. Jackson, Phoenix, AZ 85034.

MC 154726 (Sub-6–1TA), filed March 16, 1981. Applicant: WALTER M. KOFOD, d.b.a. THOR KOFOD TRUCKING, P.O. B. 757, Rio Vista, CA 94571. Representative: Daniel W. Baker, 100 Pine St., No. 2550, San Francisco, CA 94111. *Barite,* from points in NV.on and north of U.S. Hwy 6, to points in CA, under continuing contracts with John N. DeWitt and Baroid Corp., a Division of National Lead Corp. for 270 days. Supporting shipper: John N. DeWitt, 399 Airport Rd., Rio Vista, CA 94571; Baroid Corp., a division of National Lead Corp., P.O. Box 206, Bakersfield, CA 93307.

MC 154726 (Sub-6–2TA), filed March 16, 1981. Applicant: WALTER M. KOFOD, d.b.a. THOR KOFOD TRUCKING, P.O. B. 757, Rio Vista, CA 94571. Representative: Daniel W. Baker, 100 Pine St., No. 2550, San Francisco, CA 94111. *Contract Carrier;* Irregular routes: *Petroleum and petroleum products, in containers,* from points in Contra Costa, Solano, Sacramento and Alameda Counties, CA, to points in Carson City County, NV, under continuing contracts with Carson Valley Oil Co. for 270 days. Supporting shipper: Carson Valley Oil Co., 300 East Eigth St., Carson City, NV.

MC 123329 (Sub-6–11TA), filed March 13, 1981. Applicant: H. M. TRIMBLE & SONS LTD., P.O. B. 3500, Calgary, Alberta, T2P 2P9. Representative: D. S. Vincent (same as applicant). *Bagged Copper Sulphate* from ports of entry on the US/CN boundary line located at East Port ID. to Seattle and Spokane, WA. for 270 days. An underlying ETA seeks 120 days authority. Supporting shipper: Great Western Chemical, 808 S.W. 15th, Portland, OR 97205.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

[Volume No. 45]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: March 20, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR Part 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed. Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Alspaugh, and Shaffer.

Agatha L. Mergenovich,
Secretary.

MC 3581 (Sub-30)X, filed February 17, 1981, previously noticed in the **Federal Register** of March 2, 1981, republished as corrected this issue. Applicant: THE MOTOR CONVOY, INC., 2175 Parklake Drive, NE., Suite 107, Atlanta, GA 30345. Representative: Paul M. Daniell, P.O. Box 872, Atlanta, GA 30301. Applicant seeks to remove restrictions in its Sub-Nos. 11 and 21 certificates to (1) broaden the commodity descriptions from automobiles, trucks, chassis and tractors (except crawler type), in secondary movements, and tractor attachments, tractor parts, and tractor accessories, in mixed loads with tractors, in both certificates to "transportation equipment and machinery"; (2) remove the "originating at" restriction in Sub-No. 11; (3) remove the named facilities limitation in Sub-No. 21; and (4) expand its one-way authority to radial authority between Nashville, TN, and, points in KY, VA, and WV in Sub-No. 11, and between Norfolk, VA, and, points in AL, DE, FL, GA, KY, MD, MI, MS, NJ, NY, NC, OH, PA, SC, TN, VA, WV and DC, in Sub-No. 21. The purpose of this republication is to add "machinery" to the commodity description in part (1).

MC 18459 (Sub-15)X, filed March 16, 1981. Applicant: BRITTON MOTOR SERVICE, INC., 740 Westminster St., St. Paul, MN 55101. Representative: Robert D. Gisvold, 1600 TCF Tower, Minneapolis, MN 55402. Applicant seeks to remove restrictions in its Sub-Nos. 4 and 8 certificates to (1) broaden the commodity description in each to "metal products" from iron and steel articles, and also remove the restriction against

the transportation of commodities in bulk in Sub-No. 4, and (2) broaden the territorial descriptions by removing restrictions limiting service to transportation of traffic originating at or destined to the named origins and destinations, replace the specified plantsites and cities with county-wide authority, and change from one-way authority to radial authority: Sub-No. 4, between Putnam County, IL (plantsite in Putnam County, IL), and points in MN and WI; and Sub-No. 8, between Lake and Porter Counties, IN (East Chicago, Hammond, Gary, and Portage, IN), and Kankakee, Will and Cook Counties, IL (Indian Oaks, Joliet, Skokie, Evanston, Franklin Park, and Des Plaines, IL), and Chicago, IL (plantsites near Chicago, IL), and points in Douglas, Sarpy, and Dakota Counties, NE (Omaha and South Sioux City, NE), and points in IA and MN.

MC 25869 (Sub-181)X, filed March 11, 1981. Applicant: C.O.D.E., INC., 4600 Colorado Boulevard, Denver, CO 80216. Representative: Carol S. Raznick, 5241 S. Quebec Street, Englewood, CO 80111. Applicant seeks to remove restrictions in its sub-nos. 25, 33, 35, 41, 70, 148F certificates to (1) broaden its commodity descriptions to "such commodities as are dealt in or used by manufacturers or distributors of iron and steel articles" from scrap metal in Sub-No. 25; iron and steel articles in Sub-No. 33; pipe conduit and tubing (except Mercer and size and weight commodities) in Sub No. 35; iron and steel articles (except articles which because of size, shape or weight require special equipment or special handling) in Sub No. 41; iron and steel articles and materials, equipment and supplies used in the manufacture and processing of iron and steel articles in Sub No. 70; and iron and steel articles in Sub No. 148(f). (2) Remove the plantsite restrictions in Sub-Nos. 33, 41, 70, 148F; (3) broaden from city to county-wide authority: (a) Porter County, IN from Burns Harbor, IN in Sub-No. 33; (b) Whiteside County, IL from Sterling and Rock Falls, IL in Sub-No. 148F; (c) Madison County, NE from Norfolk, NE in sub-No. 25; (d) Livingston County, IL from Fairbury, IL in Sub-No. 35; (4) remove the in bulk restriction in Sub-No. 70; and (5) broaden the one-way authority to radial authority in all the above sub-nos. between the above counties and named mid-western states.

MC 29821 (Sub-9)X, filed March 11, 1981. Applicant: NEWBERG AUTO FREIGHT, INC., 408 W. First Street, Newberg, OR 97132. Representative: Lawrence V. Smart, Jr., 419 NW. 23rd Avenue, Portland, OR 97210. Applicant seeks to remove restrictions from its lead and Sub-Nos. 3, 5 and 7 certificates to: In the lead, (1) remove the usual exceptions other than Classes A and B explosives from its general commodities authority, (2) authorize service at all intermediate points between Portland and Newberg, OR and between St. Paul and Portland, OR; in Sub-No. 3, (1) broaden Springbrook to Yamhill County, OR, and Vancouver to Clark County, WA, (2) broaden the commodity description from canned goods to "food and related products", and cans to "metal products", and (3) expand its one-way authority to radial authority between Yamhill County, OR, and Clark County, WA; in Sub-No. 5, (1) broaden the commodity description from paper mill machinery parts to "machinery", (2) replace facilities limitation at Newberg with Yamhill County, OR; in Sub-No. 7, (1) broaden the commodity description from fresh meat to "food and related products", (2) replace facilities limitation at St. Paul with Marion County, OR, and (3) expand its one-way authority to radial authority between Marion County, OR, and, Seattle, WA.

MC 32882 (Sub-158)X, filed March 11, 1981. Applicant: MITCHELL BROS. TRUCK LINES, 3841 North Columbia Blvd., Portland, OR 97217. Representative: David J. Lister, P.O. Box 17039, Portland, OR 97217. Applicant seeks to remove restrictions in its Sub-No. 150F certificate, to broaden the commodity description in the authority from (1) (a) pumps, and (b) mining equipment and mining machinery, (2) equipment, materials and supplies used in the manufacture of commodities in (1) above to "machinery"; to eliminate the "commodities in bulk" restriction; to eliminate restriction except AK and HI; and to eliminate the facility restriction at Salt Lake County, UT, to authorize operations radially between Salt Lake County and points in the U.S.

MC 66100 (Sub-46)X, filed March 9, 1981. Applicant: D. P. BONHAM TRANSFER, INC., P.O. Drawer G, Bartlesville, OK 74003. Representative: Larry E. Gregg, 641 Harrison Street, P.O. Box 1979, Topeka, KS 66601. Applicant seeks to remove restrictions in its Sub-Nos. 20F, 21F, 23F, 24F, 29F, 30F, 35F, 36F, 37F, 39F, and 40F certificates, to (A) change the commodity description from (1) containers, roll off frames, waste equipment, and waste handling units, and parts and supplies for those commodities, and equipment and materials used in the manufacture and distribution of those commodities (except commodities in bulk) to "machinery" and "metal products" in Sub-No. 20F; (2) bentonite clay and lignite coal (except commodities in bulk) to "ores and minerals" and "clay, concrete, glass or stone products" in Sub-No. 21F; (3) lignite coal (except commodities in bulk) to "coal and coal products" in Sub-No. 21F; (4) building materials (except commodities in bulk) and materials and supplies used in the manufacture and distribution of building materials (except commodities in bulk), to "building materials" in Sub-No. 23F; (5) lumber, lumber products, wood products, and millwork, to "lumber and wood products" in Sub-No. 24F; (6) iron and steel articles and pipe, and materials, equipment and supplies used in the manufacture and distribution of iron and steel articles and pipe, in Sub-No. 29F, from fire prevention and sprinkler systems, and parts, equipment, materials, and supplies used in the installation of fire prevention and sprinkler systems in Sub-No. 35F, and from prefabricated buildings and building parts, and materials and supplies used in the manufacture of those items, in Sub-No. 40F, to "metal products"; (7) plastic pipe, vinyl plastic siding, and extruded plastic products, fittings and accessories, to "construction materials, equipment and supplies" in Sub-No. 30F; (8) tractors (except truck tractors), attachments, parts, and equipment designed for use with tractors, and materials, equipment and supplies (except commodities in bulk) used in the assembly and distribution of those items to "machinery", "transportation equipment", and "metal products" in Sub-No. 36F; (9) plastic pipe, plastic conduit, extruded plastic products, and fittings and accessories for such commodities to "rubber and plastic products" in Sub-No. 37F; and (10) plywood paneling, composition board, and building and construction materials, to "lumber and wood products" and "construction materials, equipment and supplies" in Sub-No. 39F; (B) remove the facilities limitations and expand specific points to city or county-wide authority as follows: In Sub-No. 20F from a facility in Bartlesville, OK to Washington County, OK; in Sub-No. 21F from a facility in Phillips County, MT, Big Horn and Crook Counties, WY; and Bowman County, ND to all points in those counties; in Sub-No. 23F from a facility at or near Marrero, LA, to Jefferson Parish, LA; in Sub-No. 29F from Conroe, TX, to Montgomery County, TX; in Sub-No. 30F from a facility at or near Pasadena, TX, to Montgomery County, TX; in Sub-No. 36F from a facility in Harrison County, MS, to all points in that county; in Sub-No. 37F from a facility at Garden City, KS, to Finney County, KS; in Sub-No. 39F from a facility at New Orleans, LA, to New Orleans, LA; and in Sub-No. 40F from

facilities at or near Chetopa, KS, and Waukesha, WI, to Labette County, KS, and Waukesha County, WI, respectively; (C) to expand its one-way authority to radial authority between the cities or counties named in (B) above, and, points in the US, in Sub-Nos. 20F, 21F, 23F, 24F, 29F, 30F, 37F, 39F, and 40F; and (D) remove the limitations against service to AK and HI on nation-wide grants of authority in its Sub-Nos. 23F, 29F and 37F.

MC 76036 (Sub-7)X, filed March 11, 1981. Applicant: CANADIAN FREIGHTWAYS EASTERN, LIMITED, 5425 Dixie Road, Mississauga, Ontario, Canada L4W 1E6. Representative: Peter C. Baird (same as applicant). Applicant seeks to remove restrictions in its Sub-No. 6 certificate to: (1) remove all commodity exceptions in its general commodities authority except "Classes A and B explosives," in the regular and irregular route portions of its authority; (2) remove interlining restrictions and delete originating at and/or destined to named points restrictions in its irregular route authority, and; (3) authorize service to all intermediate points along a described regular route between international boundary points at Port Huron, MI and Detroit, MI.

MC 84213 (Sub-44)X, filed March 11, 1981. Applicant: DORN'S TRANSPORTATION, INC., Railroad Avenue Extension (Colonie), Albany, New York 12205. Representative: Irving Klein, 371 Seventh Avenue, New York, New York 10001. Applicant seeks to remove restrictions in its Sub-No. 38F certificate to authorize service to all intermediate points between Philadelphia, PA, and Syracuse, NY; and between Trenton, NJ, and Binghamton, NY.

MC 99096 (Sub-4)X, filed March 13, 1981. Applicant: FILLMORE FREIGHT LINES, INC., 14502 Liverpool Rd., P.O. Box 2048, East Liverpool, OH 43920. Representative: A. Charles Tell, 100 E. Broad St., Columbus, OH 43215. Applicant seeks to remove restrictions in its Sub-No. 2 certificate to (1) remove all exceptions from its general commodities authority except Classes A and B explosives; (2) replace facilities (a) in Hancock County, with Hancock County, WV; (b) at or near Toronto, OH with Jefferson County, OH; and (c) in Beaver County with Beaver County, PA; (3) expand East Liverpool to Columbiana County, OH; (4) remove the "ex-water" restriction; (5) remove the "commodities in bulk, in dump vehicles" restriction; and (6) eliminate the "originating at or destined to" restriction.

MC 107445 (Sub-40)X, filed March 9, 1981. Applicant: UNDERWOOD MACHINERY TRANSPORT, INC., 940 W. Troy Ave., Indianapolis, IN 46225. Representative: Alki E. Scopelitis, 1301 Merchants Plaza, Indianapolis, IN 46204. Applicant seeks to remove restrictions in its lead and Sub-Nos. 3, 4, 7, 8, 9, 10, 11, 12, 14, 15, 16F, 17F, 18F, 19F, 21F, 22F, 25F, 26F, 27F, 28F, 29F, 30F, 31F, 32F, 33F, 34F, 35F, 36F, and 37F to (1) broaden the commodity descriptions from (a) general commodities, with exceptions to "general commodities (except classes A and B explosives)" in the lead; (b) iron and steel articles, and contractor's machinery, equipment, supplies and materials, environmental chambers and materials, equipment, and supplies used in the operation, maintenance and repair of environmental chambers, elevator and escalator parts, conveyors machinery, material handling equipment and pollution control devices to "metal products and machinery" in Sub-Nos. 3, 22, 28F, and 32F; (c) plastic pipe, plastic couplings, plastic fittings, plastic flanges, and adhesive cement to "rubber and plastic products" in Sub-No. 4; iron and steel articles, coated iron, fabricated steel, water tanks, aluminum articles, wire, cable and rods, and empty steel reels to "metal products" in Sub-Nos. 7, 8, 12, 16F, 18F, 21F, and 29F; material handling lifts, insulating machinery, cutting, creasing and material handling equipment, parts for machinery to "machinery" in Sub-Nos. 19F, 25F, 30F, 34F, and 36F; heat exchanges and equalizers for air, gas or liquid, machinery and equipment for heating, cooling, conditioning, humidifying, dehumidifying, and moving of air, gas, or liquid and parts, materials, equipment, and supplies used in the manufacture, distribution, installation, or operations to "electrical equipment, metal products and machinery" in Sub-No. 9; electrical and mechanical precipitators and parts thereof to "machinery, and those commodities, which because of size or weight require the use of special handling or equipment" in Sub-No. 10; roofing, siding, and material, equipment, and supplies used in the manufacture, distribution, and installation of roofing and siding to "building materials" in Sub-No. 11; machinery, iron and steel articles, prefabricated metal articles, nuclear fuel storage rocks and nuclear reactor handling equipment to "machinery, metal products, and nuclear reactor handling equipment" in Sub-No. 14; iron, steel, zinc, lead, and articles or products thereof, springs, and construction materials, supplies and equipment to "metal products, machinery, and building materials" in Sub-No. 15; electrical capacitors and equipment, circuit breakers and parts to "electrical equipment and machinery" in Sub-No. 26F; machinery, dynamometers, custom test equipment, and parts thereof to "machinery and electrical equipment" in Sub-No. 27F; compressors, mining machinery, and contractor's equipment and parts to "machinery, building materials, and metal products" in Sub-No. 31F; mobile cranes, fork lifts, tow trucks and parts and in driveaway service to "machinery, and transportation equipment" in Sub-No. 33F; photocuring reproduction systems, machinery and parts for machinery "instruments and photographic goods and machinery" in Sub-No. 35F; and conveyors and elevators, materials, equipment, and supplies and accessories used in the manufacture, distribution and installation to "machinery and building materials" in Sub-No. 37F; (2) remove the "except commodities in bulk" restriction in Sub-Nos. 3, 9, 11, 14, 15, 16F, 19F, and 25F; (3) eliminate the facilities limitations in Sub-Nos. 3, 4, 7, 8, 10, 12, 14, 15, 16F, 17F, 18F, 19F, 25F, 26F, 27F, 28F, 29F, 30F, 31F, 32F, 33F, 34F, 35F, 36F, and 37F; (4) change city-wide to county-wide authority from Indiana Oaks to Kankakee County, IL in Sub-No. 3; Union Township to Licking County, OH in Sub-No. 4; Lackawanna to Erie County, NY in Sub-No. 7; Kingsbury to LaPorte County, IN in Sub-No. 8; Warren to Trumbull County, OH in Sub-Nos. 10 and 12; Elkhart to Elkhart County, IN in Sub-Nos. 11 and 15; Blue Island to Cook County, IL, Joliet to Will County, IL, Cicero to Hamilton County, IN, Ft. Wayne to Allen County, IN, Kokomo to Howard County, IN and Centerville to Appanoose County, IA in Sub-No. 15; Shelbyville to Shelby County, IN in Sub-No. 17F; Rock Falls and Sterling to Whiteside County, IL in Sub-No. 18F; Murfreesboro to Rutherford County, TN in Sub-No. 19F; Greensbury to Decatur County, IN in Sub-No. 25F; Bloomington to Monroe County, IN in Sub-Nos. 26F and 32F; Mooreville to Morgan County, IN in Sub-No. 27F; Marion to Grant County, IN in Sub-No. 29F; Mitchell to Lawrence County, IN in Sub-No. 30F; Orange to Orange County, CA, Atlanta to Fulton County, GA, Mundelein to Lake County, IL, and Wayne to Passaic County, NJ in Sub-No. 31F; Tiffin to Seneca County, Oh in Sub-Nos. 22F and 33F; and Muncie to Delaware County, IN in Sub-Nos. 30F and 37F; Indianapolis to Marion County, IN in Sub-Nos. 14, 16F, 28F, 34F, 35F, and 36F; Grand Rapids to Kent County, MI, Lansing to Ingham County, MI, Columbus to Franklin County, OH, and Toledo to Lucas

County, OH in Sub-No. 15; (5) broaden the territorial descriptions from existing one-way authority to radial authority between numerous combinations of specific origins and US points throughout the US for example (a) Kankakee County, IL and points in IN, MI, OH, WI, KY, MO, and IA in Sub-No. 3; (b) Licking County, OH and points in NY, PA, WV, KY, IN, MI, IL, MO, IA, WI, MN, and NJ (with certain exceptions) in Sub-No. 4; (c) Erie County, NY and points in IL, IN, OH, MI, and WI in Sub-No. 7; (d) LaPorte County, IN and points in IN, IL, MI, OH, KY, MO and IA in Sub-No. 8; (e) Trumbull County, OH and points in the US in Sub-No. 10; (f) Elkhart County, IN and points in the US in Sub-No. 11; (g) Trumbull County, OH and points in IL, IA, KY, MO, TN and WI in Sub-No. 12; (h) Cook and Will Counties, IL, Hamilton, Elkhart, Allen, and Howard Counties, IN, Appanoose County, IA, Kent and Ingham Counties, MI, Jackson, MS, Franklin and Lucas Counties, OH and points in the US in Sub-No. 15; Marion County, IN and points in the US in Sub-No. 16F; Shelby County, IN and points in the US in Sub-No. 17F; Whiteside County, IL and points in IN, OH, MI, MO, KY, TN and WV in Sub-No. 18F; Rutherford County, TN and points in IN, OH, PA, KY, IL and WV in Sub-No. 19F; and various other combinations in Sub-Nos. 22F, 25F, 26F, 32F, 35F, and 37F; and (6) remove the restrictions (a) "originating at and destined to" in Sub-Nos. 3, 9, 10, 11, 12, 14, 15, 17F, 35F and 37F; (b) against service to "AL and HI" in Sub-Nos. 9 and 15; "HI" in Sub-Nos. 10, 16F, 22F, 25F, 26F, 27F, 28F, 29F, 30F, 31F, 32F, 33F, 34F, 35F, 36F, and 37F; and "HI and IN" in Sub-Nos. 11, 14, and 17F.

MC 106341 (Sub-204)X, filed March 10, 1981. Applicant: MOSS TRUCKING COMPANY, INC., P.O. Box 26125, Charlotte, NC 28213. Representative: Jack F. Counts, P.O. Box 26125, Charlotte, NC 28213. Applicant seeks to remove restrictions in its Sub-Nos. 78, 95F, and 139F certificates to (a) broaden the commodity description to "machinery, and attachments, accessories, and parts for machinery" from motor graders, and attachments, accessories, and parts for motor graders in part (1) of Sub-No. 78; (b) broaden the commodity description to "machinery and materials, equipment, and supplies used in the manufacturer and distribution of machinery" from experimental and show display motor grader and incidental paraphernalia in part (3) of Sub-No. 78; (c) broaden the commodity description to "machinery, transportation equipment, metal products, and commodities which because of size or weight require the use of special handling or equipment" from railway track construction and track maintenance machinery and equipment in part (A)(1) of Sub-No. 95F: (d) broaden the commodity description to "machinery, transportation equipment, metal products, commodities which because of size or weight require the use of special handling or equipment and materials, equipment and supplies used in the manufacture and distribution of the aforesaid commodities" from railway track construction and track maintenance machinery and equipment in part (B) of Sub-No. 95F; (e) broaden the commodity description to "metal products" from iron and steel articles in Sub-No. 139F; (f) remove the restriction "against the transportation of commodities in bulk" in Sub-No. 95F; and (g) expand its one-way authority to radial authority to radial authority between points in the US in and east of ND, SD, NE, CO, and MN, and Lexington County, SC, and ports of entry on the international bounday line between the US and CD located in NY, in part (2) of Sub No. 78; and, between points in Lexington and Richland Counties, SC, and those points in the US in and east of MN, IA, MO, AR, and LA, in Sub-No. 139F.

MC 111231 (Sub-349)X, filed March 9, 1981. Applicant: JONES TRUCK LINES, INC., 610 East Emma Avenue, Springdale, AR 72764. Representative: James H. Berry (same as applicant). Applicant seeks to remove restrictions in its Sub-Nos. 15, 30 and 35 certificates to broaden the commodity description in each by removing all restrictions in its general commodities authority "except classes A and B explosives," and (2) broaden the territories by removing limitations on service to specified or no intermediate points to authorize service at all intermediate points on its regular routes between points in KS, OK and TX, and remove limitations on service at Ponca City, OK, Winfield, KS, and U.S. junction Hwy 75 and OK Hwy 138 for joinder purposes only in Sub-Nos. 30 and 35, and at Wichita with service restricted against the transportation of traffic moving to or from points in the Kansas City, KS/MO commercial zone in Sub-No. 30.

MC 111299 (Sub-13)X, filed March 13, 1981. Applicant: KIRVAN TRUCK LINES, INC., Box 829, International Falls, MN 56649. Representative: Stanley C. Olsen, Jr., Suite 307, 5200 Willson Road, Edina, MN 55424. Applicant seeks to remove restrictions in its lead and Sub-Nos. 1, 8, and 12 certificates to (1) broaden the commodity description: in the lead and Sub-No. 1, to "food and related products" from malt beverages; Sub-No. 8 to "building materials" from wallboard, building board, insulation board, and supplies and accessories; and, Sub-No. 12 to "pulp, paper and related products" from paper and paper products, and materials, equipment and supplies (except commodities in bulk), and (2) broaden the territorial descriptions by replacing specified cities with county-wide authority, and changing from one-way service to radial service: lead certificate, between Milwaukee, WI, and points in Koochiching County, MN (International Falls, MN); Sub-No. 1, between Milwaukee, WI, and points in Saint Louis County, MN (Hibbing and Virginia, MN); Sub-No. 8, between Koochiching County, MN (International Falls, MN), and points in WI; Sub-No. 12, between Koochiching County, MN (International Falls, MN), and points in MN and WI.

MC 112963 (Sub-90)X, filed March 9, 1981. Applicant: ROY BROS., INC., 764 Boston Road, Pinehurst, MA 01866. Representative: William P. Sullivan, 818 Connecticut Ave., N.W., Washington, DC 20006. Applicant seeks to remove restrictions in its Sub-No. 82F certificate to broaden its commodity description from commodities, in bulk, in tank vehicles (except nonpetrochemical petroleum products, tar, liquefied natural gas, liquefied petroleum gas, cement, limestone, limestone products, marble, and marble products, to "commodities in bulk".

MC 114284 (Sub-102)X, filed March 9, 1981. Applicant: FOX-SMYTHE TRANSPORTATION, CO., 1700 S. Portland P.O. Box 82307, Oklahoma City, OK 73148. Representative: M. W. Thompson (same as applicant). Applicant seeks to remove restrictions in its lead and Sub.-Nos. 13, 14, 18, 19, 20, 21, 23, 24, 26, 29, 30, 31, 33, 36, 37, 39, 40, 41, 42, 43, 44, 45, 51, 52, 54, 55, 58, 59, 62, 63, 65, 66, 67, 72, 74, 76, 77F, 79F, 80F, 81F, 83F, 87F, 88F, 89F, 90F, 91F, 92F, 93F, 94F, 95F, and 97F certificates to (1) broaden the commodity description from (a) meats, dairy products, canned goods, pickles, peanuts, rice, canned fruits and vegetables, vinegar, grape juice, condensed milk, buttermilk, cream, sour cream, foodstuffs, chocolate and chocolate candies, to "food and related products" in lead and Sub.-Nos. 13, 14, 19, 20, 21, 23, 24, 26, 29, 30, 31, 33, 36, 37, 39, 40, 41, 42, 43, 44, 45, 51, 52, 54, 55, 58, 59, 62, 63, 65, 66, 67, 72, 74, 76, 77, 79, 80, 81, 83, 87, 88, 89, 90, 91, 92, 93, 94, 95 and 97, (b) petroleum products to "petroleum, natural gas and their

products" in Sub.-No. 18; (c) glassware, to "clay, concrete, glass, or stone products" in Sub-No. 33, (d) machinery, materials, supplies and equipment, incidental to, or used in the maintenance of facilities for the drilling of water wells to "machinery" in lead; (2) remove restrictions "to traffic originating at named origins and destined to named destinations", in Subs. 20, 21, 24, 26, 29, 30, 31, 36, 37, 39, 40, 41, 42, 44, 52, 54, 55, 58, 59, 62, 63, 65, 66, 67, 74, 76, 79F, 80F, 81F, 83F, 87F, 88F, 89F, 90F, 92F, 94F and 95F; (3) remove "except in bulk, in tank vehicle restrictions" and commodity restrictions such as "except hides" in Sub.-Nos. 18, 20, 21, 23, 24, 29, 30, 31, 33, 36, 37, 39, 42, 43, 44, 51, 52, 54, 55, 58, 59, 62, 63, 65, 66, 67, 72, 74, 76, 77, 79, 80, 81, 83, 87, 88, 89, 90, 91, 92, 93, 94, and 97; (4) broaden the territorial authority by substituting a city or county for origin or destination or specified plantsite or facility. MC-114284 El Paso, TX to El Paso County, TX, Las Vegas, NV to Clark County, NV, Crane, MO to Stone County, MO, Sherman, TX to Grayson County, TX, from Fayetteville, AR to Washington County, AR, from Corbin, TX, to Jones County, TX, from Abilene, TX, to Taylor County, TX, from Stevensville, TX, to Earth County, TX, from Coleman, TX, to Coleman County, TX, from Brownsville, TX, to Cameron County, TX, from Bentonville, AR, to Benton County, AR, from Bowie, TX, to Montague County, TX. MC 116519 (Sub-97)X, filed March 12, 1981. Applicant: FREDERICK TRANSPORT LIMITED, R.R. 6, Chatham, Ontario, Canada. Representative: Jeremy Kahn, 1511 K Street NW., Washington, DC 20005. Applicant seeks to remove restrictions in its Sub-No. 76F certificate to (1) broaden the commodity description from packaged chemicals, packaged chemical compounds, and packaged plastic materials to "chemicals and related products, and rubber and plastic products"; (2) remove the exceptions of service to AK and HI; and (3) delete the restriction limiting transportation to traffic moving in foreign commerce.

MC 116915 (Sub-144)X, filed March 5, 1981. Applicant: ECK MILLER TRANSPORTATION CORP., Route #1, Box 248, Rockport, IN 47635. Representative: Fred F. Bradley, P.O. Box 773, Frankfort, KY 40602. Applicant seeks to remove restrictions in its Sub-Nos. 5, 6, 7, 12, 28, 30, 33, 34, 37, 38, 39, 40, 41, 44, 48F, 51F, 53F, 58F, 59F, 60F, 63F, 65F, 66F, 67F, 68F, 69F, 70F, 71F, 74F, 79F, 81F, 83F, 86F, 87F, 89F, 90F, 95F, 99F, 104R, 106F, 108F, 107F, 108F, 109F, 114F, 118F, 124F, and 125F, certificates to: (1) broaden the commodity descriptions: from aluminum and aluminum products, iron and steel articles, scrap non-ferrous metals, aluminum ingots, zinc, pipe, copper articles, welded steel tubing cables, iron and steel forgings, structural and fabricated steel, and wire products to "metal products" in all of the authorities; (2) remove all restrictions against transportation of bulk commodities and/or commodities in dump vehicles in Sub-Nos. 30, 33, 37, 38, 39, 44, 48, 51, 63, 67, 68, 69, 70, 71, 74, 87, 99, 105, 106, 107, 109, 114, and 118; (3) replace one-way authority with radial in Sub-Nos. 5, 7, 12, 28, 33, 39, 40, 41, 48, 51, 53, 59, 65, 66, 67, 68, 71, 79, 81 and 90 between the counties below and points throughout the U.S.; (4) replace named facilities with city-wide or county-wide authority, as follows: Hancock County, KY in Sub 5; Hancock County (Hawesville), KY, in Sub 6; Hancock County, KY, in Sub 7; Hancock County (Lewisport), KY, in Sub 12; LaPorte County (Kingsbury), IN, in Sub 28; Brazoria County (Alvin), TX, in Sub 33; Loudon County (Lenoir City), TN, in Sub 34; Oswego County (Oswego), NY, Trumbull County (Warren), OH, and Marion County (Fairmont), WV, in Sub 37; Colbert County (Listerhill and Sheffield), AL, in Sub 38; Cook County (Blue Island), IL, and Chicago, IL, Hamilton County (Cicero), Elkhart County (Elkhart), Allen County (Fort Wayne) and Howard County (Kokomo), IN, Appanoose County (Centerville), IA, Kent County (Grand Rapids) and Ingham County (Lansing), MI, Hinds County (Jackson), MS, Columbus and Toledo, OH, in Sub 39; Tuscaloosa County (Holt), AL, in Sub 40; Giles County (Pulaski), TN, in Sub 41; Franklin County (Russellville), AL, in Sub 44; Rutherford County (Laverne), TN, in Sub 48; Montgomery County, TN, in Sub 51; Madison County, KY, in Sub 53; Hamblen County (Morristown), TN, in Sub 58; Georgetown County (Georgetown), SC, in Sub 59; Jefferson County (Bessemer), AL, and Chattanooga, TN, in Sub 60; Jefferson County (Steubenville, Mingo Junction, and Yorkville), Belmont County (Martins Ferry) and Mahoning County (Canfield), OH, Washington County (Allenport) and Westmoreland County (Monessen), PA, Marshall County (Benwood), Ohio County (Wheeling), Brooke County (Beech Bottom) and Ohio County (Follansbee), WV, in Sub 63; Allegheny and Beaver Counties, PA, in Sub 65; Etowah County (Gadsden), AL, in Sub 66; Frederick County (Buckeystown), MD; New Madrid County, MO, Columbia County (Magnolia), AR, and Rockwall County (Rockwall), TX; Jackson County (Scottsboro), AL, Lancaster County (Lancaster), PA, Columbia County (Magnolia), AR, and Rockwall County (Rockwall), TX; Hancock and Webster Counties, KY, Columbia County (Magnolia), AR, Lancaster County, PA and Rockwall County, TX; Columbia County (Magnolia), AR; Chalmette, LA, Humphreys County (New Johnsonville) and Madison County (Jackson), TN; Hancock County (Hawesville), KY, Columbia County (Magnolia), AR, and Rockwell County (Rockwell), TX, in Sub 67; Hancock County (Lewisport), KY, in Sub 68; Jackson County (Scottsboro), AL, in Sub 69; Madison County (Alton), IL, in Sub 70; Georgetown County (Andrews), SC, in Sub 71; Atlanta (East Point), GA, and Houston, TX, in Sub 74; Porter County (Burns Harbor), IN, in Sub 79; Huntington, WV, in Sub 81, Fulton County (Atlanta) and Bartow County (Cartersville), GA, in Sub 83; Blount County (Alcoa), TN, in Sub 86; Cullman

County (Cullman), AL, and Milwaukee, WI, in Sub 87; Franklin County (Union), MO, in Sub 89; Birmingham, AL, in Sub 90; Porter County (Portage), IN, in Sub 95; Hillsborough County (Tampa), FL, in Sub 99; Pope County (Russellville), AR, in Sub 104; Rockwall County (Rockwall), TX, in Sub 105; Calhoun County (Anniston), AL, in Sub 106; Montgomery County (Crawfordsville), IN, in Sub 107; Butler County, OH, in Sub 108; Hancock County (Lewisport), KY, in Sub 109; Bureau County (Depue), IL, and Carbon County (Palmerton), PA, in Sub 114; Berkeley County, SC, in Sub 118; Cleveland, OH, in Sub 124; (5) remove restrictions limiting transportation to traffic originating at or destined to named facilities in Sub-Nos. 28, 34, 38, 39, 40, 48, 51, 60, 63, 65, 66, 68, 69, 70, 74, 83, 89, and 99; and (6) remove the restriction against service to AL and HI in grants of authority to serve points in the U.S.

MC 117344 (Sub-293)X, filed March 9, 1981. Applicant: THE MAXWELL CO., 10300 Evendale Drive, Cincinnati, OH 45241. Representative: James R. Stiverson, 1396 West Fifth Avenue, Columbus, OH 43212. Applicant seeks to remove restrictions in its Sub-No. 35 Certificate to broaden its various specified commodity descriptions such as petroleum products, liquid core compound, coal tar and coal tar products, enamels, lacquers, paints, resins, varnishes, liquid glue, hydrochloric acid, sulfuric acid, silicate of soda, coal spray oil, rosin sizing, acids and chemicals, aluminum sulfate, liquid plastics, soap and synthetic latices, most of which are limited to movement in bulk, to "commodities in bulk" and in Paragraph (30) to broaden "Catalyst, in drums" to "commodities, in drums". It also seeks to remove the equipment restrictions "in tank trucks" and "in tank vehicles". In addition, it seeks to broaden specific point or plantsite facilities to county-wide authority as follows: in Paragraphs 2, 4, and 7 Maysville, KY to Mason County, KY. Leach, KY to Boyd County, KY and Covington, KY to Kenton County, KY; in Paragraphs 11, 15, 17, 18, 22, 28, and 30 Addyston, OH to Hamilton County, OH; in Paragraphs 3, 12, 19, 21, 24, 25, 27, 35, 37, 38 and 39 Cincinnati, OH to Dearborn County, IN, Boone, Campbell and Kenton Counties, KY and Butler, Clermont, Hamilton and Warren Counties, OH (all counties which include a portion of the commercial zone of the authorized point); in Paragraph 26 Xenia, OH to Greene County, OH; in Paragraph 31 Hamilton and Middletown, OH to Butler County, OH; in Paragraphs 14, 32, and 34 Dayton, OH to Clark, Greene, Miami, Montgomery and Preble Counties, OH (all counties which include a portion of the commercial zone of the authorized point); in Paragraphs 23 and 33 Columbus, OH to Delware, Fairfield, Franklin, Licking, Madison, Pickaway and Union Counties, OH (all counties which include a portion of the commercial zone of the authorized point) and in Paragraph 36 Milwaukee, WI to Milwaukee County, WI. It also seeks to remove the following restrictions: in Paragraph (26) restriction against service to Shideler, IN; and in Paragraph (33) restriction against service on resins to Kingsport and Elizabethton, TN.

MC 117765 (Sub-313)X, filed March 9, 1981. Applicant: HAHN TRUCK LINE, INC., 1100 S. MacArthur, Oklahoma City, OK 73147. Representative: C. L. Phillips, Room 248, Classen Terrace Bldg., 1411 N. Classen, Oklahoma City, OK 73147. Applicant seeks to Remove Restrictions in Sub-Nos. 45, 49, 59, 62, 73, 81, 82, 97, 114, 132, 133, 137, 142, 149, 161, 162, 188, 194, 202, 217, 226, 229, 249, 266, 284, 293, 295, 296 and 297 certificates by: (1) broadening the commodity descriptions from beverages, non-alcoholic; canned foods; beverages, carbonated and non-carbonated; preserved foodstuffs, non-frozen foodstuffs; nonfrozen preserved foodstuffs, to *"food and related products"*, in Sub-Nos. 45, 49, 59, 62, 73, 81, 82, 97, 114, 132, 133, 142, 149, 161, 162, 188, 194, 202, 217, 226, 229, 249, 266, 284, 293, 295, 296, 297 (2) replace specified plantsites and cities with county-wide authority in the following: Sub-45 and 59; Muskogee, OK, with Muskogee County, OK; Sub-49; Ottumwa, IA with Wapello County, IA; Sub-62; Clyman and Watertown, WI, with Dodge and Jefferson Counties, WI; Sub-73; Ottumwa, IA with Wapello County, IA; Sub-81; Denver, CO with Denver County, CO; Sub-82: Owatonna, MN with Steele County, MN; Galesville and New Richmond, WI with Trempealean and St. Croix County, WI; Sub-97; Muskogee, OK with Muskogee County, OK; Sub-114; Owatonna, MN with Steele County, MN; Sub-132 Stigler and Westville, OK with Haskell and Adair Counties, OK, Muskogee, OK, with Muskogee County, OK; Sub-133; Ottumwa, IA with Wapello County, IA sub-137; Durant, Franksville and Lodi, WI with Pepin, Racine and Columbia Counties, WI; Sub-142; Arlington, and the Plainview, MN with Sibley and Wabasha Counties, MN; Ortonville, MN, with Big Stone County, MN; Sub-149; Owatonna, MN with Steele County, MN; Manitowoc, WI with Manitowoc County, WI; Fall River, and Mondovi, WI to Columbia and Buffalo Counties, WI; Sub-161; Cedar Rapids and Wall Lake, IA to Linn and Sac Counties, IA; Sub-162; Lindale, TX to Smith County, TX; Sub-188; Lawrence, KS, with Douglas County, KS, Sub-194; Cedar Rapids and Wall Lake, IA with Linn and Sac Counties, IA; Sub-202; Cambria and Markesan, WI, with Columbia and Green Lake Counties, WI; Antigo, Clintonville and Theresa, WI, with Langlade, Waupaca and Dodge Counties, WI; Sub-217; Grimes, Reinbeck, Storm Lake, IA with Polk, Grundy and Buena Vista Counties, IA; Sub-226; Autin, MN, with Mower County, MN; Sub-229; Cecila and Ville Platte, LA, with St. Martin and Evangeline Parishes, LA; Muskogee, OK, to Muskogee County, OK; Augusta, and Shiocton, WI to Eau Claire and Outagamie Counties, WI; Sub-249; Ackley, IA, with Hardin County, IA; Sub-266; Greenville, MS, with Washington County, MS; Sub-284; Hazelwood, MO, with St. Louis County, MO; Plainview, MN, with Wabasha County, MN; Sub-293; from Cokato and Fairbault, MN to Wright and Rice Counties, MN; from Durand and Mondovi, WI to Pepin and Buffalo Counties, WI; Sub-295; from Olivia, MN to Renville County, MN; Sub-296; from Haskell, OK with Muskogee County, OK; Sub-297; from Van Buren, AR with Crawford County, AR. (3) remove restrictions limiting service to the transportation of traffic originating at and/or destined to named origins in Sub-Nos. 49, 62, 81, 82, 97, 132, 161, 162, 188, 194, 202, 217, 226, 229, 249; (4) authorize radial service in lieu of existing one-way authority between the above counties and named states; (5) remove the commodity exceptions in Sub-Nos. 45, 49, 59, 73, 82, 97, 114, 132, 133, 142, 149, 161, 162, 188, 194, 202, 217, 226, 229, 249, 266, 284, 293, 295, 296, 297.

MC 123375 (Sub-24)X, filed March 9, 1981. Applicant: KIRK TRUCKING SERVICE, INC., 3100 Braun Ave., Westmoreland Co., Murrysville, PA 15668. Representative: A. Charles Tell, 100 E. Broad St., Columbus, OH 43215. Applicant seeks to remove restrictions in its lead and Sub-Nos. 1, 11F, 14F, 16F, 18F, and 21F certificates to (A) broaden the commodity descriptions: from (1) boilers, boiler parts, economizers, water walls, headers, stokers, power house installation materials, steel and steel products, machinery, contractors' tools and equipment, office equipment, and architects' supplies to "commodities which by reason of size or weight require the use of special equipment, machinery, and metal articles"; and from contractors' equipment and

supplies, non-ferrous castings, bronze and bronze products, metal in bulk, machinery, lumber and lumber patterns, mill equipment and building and construction materials, supplies and equipment, to "building and construction materials, supplies and equipment; commodities which by reason of size or weight require the use of special equipment; metal articles, machinery, lumber and lumber products", in its lead; (2) from such commodities, as contractors' equipment, heavy and bulky articles, machinery and machine parts, and articles, requiring specialized handling and rigging, to "commodities which by reason of size or weight require the use of special equipment; contractors' equipment; machinery and machine parts"; from roofing and building materials, metals, and asphalt, [except liquids, in bulk, in tank vehicles), to "roofing and building materials and metal articles"; from general commodities, except Classes A and B explosives, and household goods as defined by the Commission, to "general commodities, except Classes A and B explosives"; and from contractors' equipment, machinery, and machine parts and articles requiring specialized handling or rigging because of size or weight, to "contractors' materials, equipment and supplies; machinery and machine parts; and commodities which by reasons of size or weight require the use of special equipment", in Sub-No. 1; (3) from iron and steel articles to: "metal products" in Sub-Nos. 14F, 16F, and 21F; and (4) remove the exceptions of gypsum in part (1)(b) in Sub-No. 11F and commodities in bulk in part (1)(a) and (b) in Sub-Nos. 11F and 16F; (B) broaden the territorial scope by (a) replacing one-way authority with radial as follows: between points in Middlesex County (Perth Amboy), NJ, and points in WV, in Sub-No. 16F; between points in Hancock County (Weirton), WV, and Jefferson County (Steubenville), OH, and points in DE, MD, NY, and PA, in Sub-No. 16F; and between points in Middlesex County (Perth Amboy), NJ, and points in OH, MI, IN, IL, NY, and KY, in Sub-No. 21F; and (b) replacing named facility limitations with county wide authority as follows: Hudson County (North Bergen), NJ, Orange, Rockland and Green Counties (Otisville, Haverstraw and Catskill), NY, in Sub-No. 1; Erie and Westchester Counties (Akron and Buchanon), NY; Caroline County (Milford), VA, Bucks County (Quakertown), PA, and New Castle County (Wilmington), DE, in Sub-No. 11; and Hancock County (Weirton), WV, and Jefferson County (Steubenville), OH, in Sub-Nos. 14F and 21F.

MC 123003 (Sub-94)X, filed March 2, 1981. Applicant: FOGLEMAN TRUCK LINE, INC., P.O. Box 1504, Crowley, LA 70526. Representative: Austin L. Hatchell, P.O. Box 2165, Austin, TX 78768. Applicant seeks to remove restrictions from its Sub-Nos. 37, 46, 49, 51, 55, 58, 61, 64, 66, 73, 76, 77, 79, 81, 82, and 83 permits to (1) broaden the commodity description from paper and paper products and materials equipment and supplies in Sub-Nos. 61F, 66F, 56F, 49, 52F, 81F, 46, 73F, 76F, 79F, and part of 77F from commodities used by, manufactured by or distributed by manufacturers or processors of paper and paper products in Sub-No. 84F, from pulpboard, in rolls in Sub-No. 37, from pulpboard in 63F, from groundwood and wrapping paper in part of 64F, from woodpulp in rolls in 51 and from paper and paper articles in part of 58F, and fiberboard cans and metal can ends and materials, supplies and equipment in Sub-No. 55F to "pulp, paper, and related products"; from plastics, plastic products and chemicals in part of 58F and polyethylene film in part of 77F to "rubber and plastic products and chemicals and related products," from newsprint in part of 64F to "printed matter;" and (2) broaden the territorial description in all subs to between points in the U.S. under continuing contract(s) with named shipper(s).

MC 136123 (Sub-21)X, filed March 12, 1981. Applicant: MEAT DISPATCH, INC., P.O. Box 1058, Palmetto, FL 33561. Representative: William L. Beasley (same address as above). Applicant seeks to remove restrictions in its Sub-No. 3 permit to broaden its territorial descriptions to between points in the U.S., under continuing contract(s) with a named shipper.

MC 138387 (Sub-4)X, filed March 12, 1981. Applicant: FOOSE TRANSPORT, INC., P.O. Box 566, Mahwah, NJ 07430. Representative: Morton E. Kiel, Suite 1632, Two World Trade Center, New York, NY 10048. Applicant seeks to remove restrictions in its lead and Sub-Nos. 1, 2, and 3 permits (1) by eliminating the restriction "except commodities in bulk" from the commodity descriptions and (2) by broadening the territorial descriptions to "between points in the U.S. under continuing contract(s) with named shippers.

MC 138436 (Sub-107)X, filed March 17, 1981. Applicant: D. M. BOWMAN, INC., Route No. 2, Box 43A1, Williamsport, MD 21795. Representative: Edward N. Button, 560 Northern Avenue, Hagerstown, MD 21740. Applicant seeks to remove restrictions in its Sub-No. 81F certificate to (A) broaden the commodity description from portable and fabricated iron and steel storage buildings and cabinets, to "metal products" in part (1) of the certificate; (B) expand the origin territory from Hagerstown, MD to points in Washington County, MD; and (3) remove the "except AK and HI" restriction.

MC 138844 (Sub-17)X, filed March 2, 1981. Applicant: TRANSGAS, INC., 95 East Merrimack Street, Lowell, MA 01853. Representative: John W. Bryant, 900 Guardian Building, Detroit, MI 48226. Applicant seeks to remove restrictions in ist Sub-Nos. 1, 14F and 16F to, its Sub-No. 1, broaden the commodity description from liquefied natural gas to "petroleum, natural gas, and their products"; and remove the HI exception from the existing non radial authority between points in the U.S. With the expansion of the commodity description Sub-Nos. 14F and 16F, which authorize liquid ethylene, will be subsumed in Sub-No. 1.

MC 139063 (Sub-14)X, filed February 9, 1981 previously noticed in the Federal Register of February 25, 1981, as No. MC–22254 (Sub-No. 84)X, republished as corrected this issue. Applicant: BUILDING SYSTEMS TRANSPORTATION, INC., P.O. Box 142, Washington Courthouse, OH 43160. Representative: Marshall Kragen, 1919 Pennsylvania Avenue NW., Suite 300, Washington, D.C. 20006. Applicant seeks to remove restrictions in Sub-No. MC–22254 (Sub-No. 4) purchased in MC–F–14514 (1) by broadening the commodity description from uncrated, assembled and unassembled prefabricated buildings and parts thereof to "rubber and plastic products, pulp, paper and paper products, lumber and wood products, metal products, and clay, concrete, glass or stone products"; (2) broaden the territory from points and places within 200 miles of Chicago, IL, to points and places within 200 miles of Cook County, IL. The purpose of this republication is to reflect the redocketing No. MC–22254 (Sub-No. 4) under purchaser's docket number, the granting of the expand commodity description, and the substitution of Cook County for Chicago, IL.

MC 139822 (Sub-7)X, filed March 12, 1981. Applicant: FOOD CARRIER, INC., P.O. Box 2287, Savannah, GA 31402. Representative: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Ave. & 13th St. NW., Washington, DC 20004. Applicant seeks to remove restrictions in its lead and Sub-Nos. 4F and 5F certificates, to (1) broaden the commodity descriptions to "food and related products" from

foodstuffs, in the lead and Sub-No. 5F and from malt beverages, in Sub-No. 4F, (2) remove the in bulk, in tank vehicle and in vehicles equipped with mechanical refrigeration restrictions, (3) broaden and the territorial authority to substitute counties for specified facilities: Chatham County, GA, in the lead; Dougherty County, GA (for Albany, GA), in Sub-No. 4F and Dade County, FL (for Miami, FL) in Sub-No. 5F, and (4) authorize radial authority in place of one-way authority in Sub-Nos. 4F and 5F.

MC 142059 (Sub-166)X, filed March 10, 1981. Applicant: CARDINAL TRANSPORT, INC., P.O. Box 911, Joliet, IL 60434. Representative: Jack Riley (same address as applicant). Applicant seeks to remove restrictions in its Sub-Nos. 16, 34F, 41F, 47F, 54F, 64F, 79F, 91F, 94F, 95F, 96F, 109F, 112F, 122F, 123F, 124F, 126F, 132F, 136F and 139F certificates to broaden its commodity descriptions to (1) "clay, concrete, glass, or stone products, chemicals and related products, rubber and plastic products and petroleum products" from (A) concrete curing compounds and paving joints and (B) materials, supplies and equipment used in the manufacture of articles in (A) in Sub. 34F; (2) "rubber and plastic products" from expanded plastic products in Sub. 41F, and from plastic pipe and accessories in Sub. 112F; (3) "farm products, ores and minerals and clay, concrete, glass and stone products" from plant media mix, vermiculite, vermiculite products and perlite in Sub. 47F; (4) "transportation equipment" from freight bodies in Sub. 54F; (5) "nonmetallic minerals and clay, concrete, glass or stone products" from sand and sand additives in Sub. 64F; (6) "machinery", from lehrs and parts in Sub. 79F, and from pollution control devices in Sub. 94F; (7) "building materials, chemicals and related products, clay, concrete, glass or stone products, coal and coal products, instruments and photographic goods, lumber and wood products, machinery, metals, ores and minerals, petroleum, natural gas and their products, pulp, paper and related products, rubber and plastic products and transportation equipment" from contractors equipment in Sub. 91F and contractors equipment, materials and supplies in Sub. 109F; (8) "metal products, machinery, rubber and plastic products, clay, concrete, glass or stone products" from pipe, fittings, valves, hydrants and accessories in Sub. 95F; (9) "machinery, metal products, and clay, concrete, glass or stone products" from ovens, furnaces, washers, conveyors and parts in Sub. 95F; (10) "chemicals and related products" from dry fertilizer in Sub. 122F, and from cleaning compounds in Sub. 136F; (11) "lumber or wood products", from pallets and materials, equipment and supplies used in the manufacture and distribution of pallets in Sub. 123F; (12) "metal products, machinery, and clay, concrete, glass or stone products from (A) steel storage tanks, pollution control equipment, duct work and parts thereof and (B) materials, equipment and supplies used in the manufacture and distribution of articles in (A) in Sub. 124F; (13) "metal products, furniture and fixtures, and clay, concrete, glass or stone products" from heating equipment, stoves, fireplaces and incinerators and parts thereof in Sub. 126F, and from fireplace accessories and materials, equipment and supplies used in the manufacture and distribution of fireplace accessories, in Sub. 132F and (14) "waste or scrap materials not identified by industry producing" from nonferrous metal scrap in Sub. 139F. Applicant seeks to replace specified plantsites and/or cities with countywide or citywide authority as follows: in Sub. 34F, Oregon, IL with Ogle County, IL; in Sub. 41F, Magnolia, AR, with Columbia County, AR, Pevely, MO, with Jefferson County, MO and Channahon, IL with Will County, IL; in Sub. 47F, DeKalb, IL with DeKalb County, IL; in Sub. 64F, Oregon, IL, with Ogle County, IL; in Sub. 79F, Uniontown, PA with Fayette County, PA; in Sub. 91F, Atlasburg, PA with Washington County, PA; in Sub. 94F, Joliet, IL, with Will County, IL; in Sub. 94F, Donora, PA with Washington County, PA; in Sub. 96F, Franklin, WI with Waukesha County, WI; in Sub. 109F, Ontario, CA with San Bernardino County, CA, Herculaneum, MO with Jefferson County, MO; in Sub. 126F, Athens, AL with Limestone County, AL, Huntsville, AL with Madison County, AL, and Americus, GA with Sumter County, GA; in Sub. 132F, Decatur, AL with Morgan County, AL; and, in Sub. 136F, New Eagle, PA with Washington County, PA. Applicant seeks to replace one-way authority with radial authority in Sub. Nos. 16, 41F, 47F, 54F, 64F, 79F, 91F, 94F, 95F, 96F, 112F, 122F, 123F, 124F, 126F, 132F, and 136F. Applicant also seeks to eliminate all restrictions against service "in bulk", to AK and HI, and delete all plantsite, exwater and "originating at and destined to" restrictions in Sub-Nos. 16, 34, 41, 47, 54, 64, 79, 91, 94, 95, 96, 109, 123, 124, 126, 132, 136, and 139.

MC 142452 (Sub-7)X, filed March 10, 1981. Applicant: RIMAR TRANSPORT, INC., 850 Curie Road, North Brunswick, NJ 08902. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street, N.W., Washington, DC 20001. Applicant seeks to remove restrictions in its lead and Sub 5F permits, to (1) broaden the commodity descriptions from expanded plastic foam insulating materials, to "chemicals and related products, rubber and plastic products, clay, concrete, glass or stone products, and metal products," and (2) broaden the territorial descriptions to between points in the U.S. under a continuing contract(s) with a named shipper.

MC 142566 (Sub-1)X, filed March 12, 1981. Applicant: JIMCO, INC., 1221 Faydur Court, P.O. Box 100941, Nashville, TN 37210. Representative: Jack L. Murphree (same as above). Applicant seeks to remove restrictions from its lead certificate to remove all exceptions except classes A and B explosives from its general commodities authority; and to remove a restriction limiting service to the transportation of traffic having a prior or subsequent movement by rail in its authority between named counties in AL, AR, GA, IL, IN, KY, MS, MO, VA, and TN.

MC 145054 (Sub-42)X, filed March 2, 1981. Applicant: COORS TRANSPORTATION COMPANY, 5101 York St., Denver, CO 80216. Representative: Leslie R. Kehl, 1660 Lincoln St., Suite 1600, Denver, CO 80264. Applicant seeks to remove restrictions in its lead and Sub-Nos. 3F, 6F, 10, 21F, 23F, 28F, 34F, 35F, 36F, 37F, 38F, and 40F certificates to (1) broaden the commodity descriptions to (A) "leather and leather products and rubber and plastic products" from (a) trunks and traveling bags, materials and supplies, in the lead certificate; (B) "food and related products" from (a) meat, meat products, meat by-products, and articles distributed by meat packinghouses and foodstuffs in mixed loads with the named commodities, in Sub-No. 23F, (b) canned fruits and juices, in Sub-No. 28F, (c) canned and preserved foodstuffs, in Sub-No. 34F, (d) salad dressings, sour cream and whipped cream, in Sub-No. 35F, and (e) juices, in Sub-No. 38F; and (c) "transportation equipment" from automobile tires, in Sub-No. 40F (2) remove the "in bulk" commodities exception, in the lead certificate and Sub-Nos. 3F, 6F and 23F; (3) eliminate the exceptions of (a) frozen foods, in Sub-No. 3F, (b) in tank vehicles, in Sub-No. 6F, and (c) hides, in Sub-No. 23F; (4) remove the restriction limiting service to the transportation of specified commodities (a) in bags, in Sub-No. 21F, and (b) in packages, in Sub-Nos. 36F and 37F; (5) remove the facilities limitations

at named points in the lead and Sub-Nos. 3F, 6F, 10, 23F and 34F; (7) broaden the territorial descriptions from named points to counties or cities and authorize radial authority in place of one-way service, as follows: between (a) Pima and Santa Cruz Counties, AZ (for Tucson and Nogales, AZ), and Denver, CO, in the lead certificate; (b) Kansas City, MO, and points in CO, in Sub-No. 3F; (c) Los Angeles County, CA (for Wilmington, CA), and points in CO, in Sub-No. 6F; (d) Dallas and Grayson Counties, TX (for Dallas and Denison, TX), and Denver, CO, in Sub-No. 10; (e) Kern County, CA (for Taft and McKittrick, CA), and points in CO and UT, in Sub-No. 21F; (f) Cass County, IL (for Beardstown, IL), and Scott and Dallas Counties, IA (for Davenport and Perry, IA), and points in CA and Denver, CO, in Sub-No. 23F; (g) Hidalgo County, TX (for Weslaco, TX), and points in CO, in Sub-No. 26F; (h) Doniphan County, KS (for Elwood, KS), and Buchanan County, MO (for St. Joseph, MO), and points in CO, in Sub-No. 34F; (i) Los Angeles County, CA (for City of Industry, CA), and points in CO, in Sub-No. 35F; (j) Los Angeles County, CA (for Wilmington, CA), and points in WY, in Sub-No. 36F; (k) St. Louis County, MO (for Maryland Heights, MO), and Los Angeles County, CA (for Vernon, CA), and points in CO, in Sub-No. 37F; (l) Orange County, CA (for Anaheim, CA), and Denver, CO, in Sub-No. 38F; and (m) Los Angeles County, CA and points in Denver, CO (for Denver County, CO) in Sub-No. 40F.

MC 145701 (Sub-17)X, filed March 4, 1981. Applicant: D.C. TRANSPORT, INC., 916 S. Riverside Avenue, St. Clair, MI 48079. Representative: James J. Sheehan, (same as applicant). Applicant seeks to remove restrictions in its lead and Sub-Nos. 1F, 2F, 5F, 6F, 8F, 9F, 11F, 12F, 13F, certificates to (1) broaden the commodity descriptions from (a) salt and salt products, to "chemicals and related products, food and related products, and ores and minerals", in lead and Sub-No. 2; (b) fabrics, textiles, and urethane foam, laminations to "textile mill products and rubber and plastic products" in Sub-No. 1; (c) paper and paper products to "pulp, paper and related products" in Sub-No. 5; (d) plastic articles, chemicals, swimming pool compounds, padding (except upholstery), foam fabrics (except commodities in bulk), to "clay, concrete, glass or stone products; leather or leather products; machinery; miscellaneous products of manufacturing; pulp, paper and related products; rubber and plastic products; textile mill products"; in Part (1) of Sub-No. 6; (e) padding, insulation, carpeting, fabrics, sound deadening materials, plastics, to "chemicals and related products; clay, concrete, glass or stone products; lumber and wood products; metal products; petroleum, natural gas and their products; plup, paper and related products; rubber and plastic products; textile mill products; in Part (1) of Sub-No. 9; (f) aggregates, alloys, chemicals, coal, gravel, limestone, minerals, ores, pumice, sand, slag products, sodium sulphate, talc and vermicultite to "chemicals and related products; clay, concrete, glass or stone products; coal and coal products, metal products; and ores and minerals" in Sub-No. 11; (g) fabrics, textiles, and urethane foam, materials, equipment, and supplies used in their manufacture of motor vehicle interiors, and motor vechicle interiors and components of motor vehicle interiors to "textile mill products, rubber and plastic products, waste or scrap materials not identified by industry producing, metal products" in Sub-No. 12; (h) pumice, aggregates, cement or aggregate blocks, slag, stone, sand, gravel, and cement, materials, equipment, and supplies used in the manufacture, storage, and distribution and fabrics, textiles, urethane foam, and laminations of to "clay, concrete, glass, or stone products, textile mill products, rubber and plastic products, ores and minerals" in Sub-No. 13; (2) remove plantside restrictions and/or expand cities to county-wide authority: Saint Clair County for Saint Clair, MI, and Summit County for Akron, OH, in lead; Mecklenburg, Guilford and Duplin Counties for Cornelius, Greensboro and Wallace, NC; Norfolk County for Stoughton, MA, and Saint Clair County for Port Huron, MI, in Sub-No. 1; Clark County for Jeffersonville, IN, in Sub-No. 8; Saint Clair for Port Huron, MI, in Sub-No. 12; Rutherford County for Lyndhurst, NJ; Norfolk County for Stoughton, MA, and Genesee County for Flint, MI, in Sub-No. 13; (3) remove the exceptions of service to AK and HI in Sub-Nos. 2, 5, 6, 9, 12; (4) remove restrictions limiting service (a) to the transportation of traffic originating at and/or destined to named points in Sub-No. 8; (b) to the transportation of traffic originating at named facilities at Marine City, MI and destined to Marion, IN, St. Louis, MO; Belvidere, IL, and points in OH in Sub-No. 9F; and (c) against the transportation of traffic originating at Baltimore, MD, and points in its commercial zone, points in NM, and those points in TX on and west of U.S. Hwy 83; (5) delete restrictions prohibiting the transportation of commodities in bulk, in tank in lead and Sub-Nos. 2, 5, 6, 8; and (6) authorize radial service in lieu of existing one-way authority between the counties named above and points throughout the U.S. in lead and Sub-Nos. 1, 11, and 12.

MC 146443 (Sub-1)X, filed March 13, 1981. Applicant: SCARLET & GRAY CORP., P.O. Box 424, Dayton, OH 45409. Representative: A. Charles Tell, Suite 1800, 100 E. Broad St., Columbus, Oh 43215. Applicant seeks to remove restrictions from its lead permit to broaden the commodity description from iron and steel articles to "metal products"; and to expand its territorial description to between points in the U.S. under continuing contracts(s) with named shippers.

MC 147077 (Sub-8)X, filed March 12, 1981. Applicant: Q. T. TUGGLE, d.b.a. CALIFORNIA WESTERN, 3325 Linden Ave., Long Beach, CA 90807. Representative: Milton W. Flack, Suite 900, 8383 Wilshire Blvd., Beverly Hills, CA 90211. Applicant seeks to remove restrictions in its Sub-Nos. 2F, 3F, 4F and 6F permits to (1) broaden the commodity description: Sub-Nos. 2F and 4F to "machinery and equipment" from graphic arts machinery, equipment and materials; Sub-No. 3F to "such commodities as are dealt in by manufacturers and distributors of solar energy systems" from solar hot water heaters, collectors, storage systems, and mounting frames for solar heaters and collectors; Sub-No. 6F to "metal products" from steel pipe, and fittings when transported in mixed loads with steel pipe, and (2) broaden the territorial description in all four permits to authorize service between points in the U.S., under continuing contract(s) with named shippers.

MC 147380 (Sub-3)X, filed March 13, 1981. Applicant: ROCHESTER CHEESE EXPRESS, INC., 4219 N. Frontage Road, Rochester, MN 55901. Representative: Val M. Higgins, 1600 TCF Tower, 121 So. 8th St., Minneapolis, MN 55402. Applicant seeks to remove restrictions from its Sub-No. 2F permit to (a) broaden the commodity description from cheese to "food and related products"; and (b) expand the territorial scope to "between points in the U.S." under continuing contract(s) with named shippers.

MC 147873 (Sub-3)X, filed March 10, 1981. Applicant: G. BAKER EXPRESS, INC., Suite 402, 1250 Executive Place, Geneva, IL 60134. Representative: Joel H. Steiner, 39 South La Salle St., Chicago, IL 60603. Applicant seeks to remove restrictions in its lead and Sub-No. 2F permits to broaden the territorial description in both permits to authorize service between points in the U.S.,

under continuing contract(s) with named shippers.

MC 147902 (Sub-2)X, filed March 13, 1981. Applicant: N–W INVESTMENTS, INC., P.O. Box 25387, Houston, TX 77005. Representative: J. G. Dail, Jr., P.O. Box LL, McLean, VA 22101. Applicant seeks removal of restrictions in its lead certificate to remove a restriction limiting service to traffic having a prior or subsequent movement by water on its general commodities authority between various TX and LA commercial zones.

MC 149024 (Sub-2)X, filed March 11, 1981. Applicant: JOHNSTON INTERMODAL TRANSPORT, INC., 850 Jersey Avenue, Jersey City, NJ 07302. Representative: Ira S. Lipsius, 255 West 34th Street, New York, NY 10122. Applicant seeks to remove restrictions in its Sub-No. 1F certificate to (1) broaden the commodity description by removing the "commodities in bulk" restriction, and (2) remove the restriction against traffic moving on bills of lading of a freight forwarders on its general commodities authority between points 15 states.

MC 150793 (Sub-2)X, filed March 9, 1981. Applicant: MARINE TRANSPORT SERVICE, INC., P.O. Box 3589, Portland, OR 97208. Representative: Roger Weidner, 6825 S.W. Macadam, Portland, OR 97208. Applicant seeks to remove restrictions in its Sub-No. If permit to broaden the territorial description by removing the restriction limiting service only to traffic having a prior or subsequent movement by water, and to authorize service between points in the United States, under continuing contract(s) with a named shipper.

MC 152823 (Sub-3)X, filed March 10, 1981. Applicant: WESTERN CARRIERS, INC., P.O. Box 925, Worcester, MA 01613. Representative: David M. Marshall, 101 State St., Suite 304, Springfield, MA 01103. Applicant seeks to remove restrictions in its certificate No. 133590 Sub-No. 27F certificate which authorizes service over irregular routes, transporting alcoholic beverages, malt beverages, wines, and drink mixes (except in bulk), between points in CT, MA, MD, NJ and NY, and points in the U.S., to eliminate the in bulk exception from the commodity description.

[FR Doc. 81–8016 Filed 3–24–81; 8:45 am]
BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special Rule 247 was published in the Federal Register of July 3, 1980, at 45 FR 45539. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient interest in the form of verified statements filed on or before [45days from date of publication], (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirments which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OP1–087

Decided March 17, 1981.

By the Commission, Review Board No. 1, Members, Parker, Chandler, and Taylor.

MC 153121 (Sub-1), filed February 2, 1981. Applicant: CALIFORNIA WESTERN EXPRESS, INC., 1315 D N.E. 134th, Vancouver, WA 98665. Representative: George R. LaBissoniere, 15 S. Grady Way, Suite 233, Renton, WA 98055, (206) 228–3607. Transporting *bananas*, between points in Los Angeles County, CA, on the one hand, and, on the other, points in CA, AR, NM, NE, OR, WA, ID, MT, WY, VT, CO, ND, SD, KS, OK, TX, MN, WI, IA, MO, AZ, LA, IL and ID.

Volume No. OP2–048

Decided March 17, 1981.

By the Commission Review Board No. 1, Members Chandler and Taylor.

MC 2392 (Sub-139) (correction), filed January 19, 1981, published in the Federal Register, issue of February 24, 1981, and republished, as corrected, this issue. Applicant: WHEELER TRANSPORT SERVICE, INC., P.O. Box 14248, West Omaha Station, Omaha, NE 68124. Representative: Edward J. Kiley, 1730 M St., NW., Washington, DC 20036 (202) 296–2900. Transporting *chemicals and related products* between Memphis, TN, and points in NE and IA, on the one hand, and, on the other, points in the U.S.

Note.—The purpose of this republication is to correct the territorial description.

MC 72243 (Sub-72), filed January 16, 1981. Applicant: THE AETNA FREIGHT LINES, INC., 2507 Youngstown Rd., S.E., P.O.B. 350, Warren, OH 44482. Representative: Paul F. Beery, 275 E. State St., Columbus, OH 43215, (614) 228–8575. *(1) Commodities which, because of size or weight, require the use of special equipment, and (2) self-propelled vehicles*, between points in AL, AR, LA, KY, MS, TN, on the one hand, and, on the other, WY, CO, SD, NE, MN, KS, and MO.

Note.—Applicant now participates in heavy hauling service between the states requested. The purpose of the application is to (1) eliminate gateways and interlines and (2) to remove a territorial restriction.

MC 121372 (Sub-11), filed January 21, 1981. Applicant: EXPRESS TRANSPORT CO., 1217 Dalton St., Cincinnati, OH 45203. Representative: Michael Spurlock,

275 E. State St., Columbus, OH 43215. I. Irregular routes: Transporting *general commodities* (except classes A and B explosives), between Cincinnati, OH, on the one hand, and, on the other, points in OH. II. Regular routes: Transporting *metal products* (a) between Cincinnati, OH and Clarksville, OH: from Cincinnati, OH over U.S. Hwy 22 to junction OH Hwy 350, then over OH Hwy 350 to Clarksville, OH, and return over the same route, and (b) between Cincinnati, OH and Middletown, OH: from Cincinnati over Interstate Hwy 75 to junction OH Hwy 122, then over OH Hwy 122 to Middletown, OH, and return over the same route. Applicant indicates intention to tack authority in Parts I and II with otherwise authorized operations. Condition: At applicant's request, the issuance of this certificate is subject to prior or coincidental cancellation of applicant's certificate of Registration, in MC 121372 Sub 1.

MC 134922 (Sub-341), filed February 6, 1981. Applicant: B. J. McADAMS, INC., Route 6, Box 15, North Little Rock, AR 72118. Representative: Diane Price (same as applicant), (505) 758-0777. Transporting (1) *such commodities* as are dealt in or used by breweries, between points in Jefferson County, CO, on the one hand, and, on the other, points in TN, LA, MS and AR; (2) *machinery*, between the facilities of Black & Decker, at points in the U.S., on the one hand, and, on the other, points in the U.S.; (3) *pulp, paper and related products*, between the facilities of Thilmany Pulp and Paper Co., at points in the U.S., on the one hand, and, on the other, points in the U.S.; (4)(a) *pulp, paper and related products*, (b) *lumber and wood products*, (c) *chemicals and related products*, and (d) *rubber and plastic products*, (i) between the facilities of Crown Zellerbach at points in CA and OR, on the one hand, and, on the other, those points in the U.S. in and east of MN, IA, MO, KS, OK and TX, (ii) between the facilities of Crown Zellerbach at points in CA and OR, on the one hand, and, on the other, points in CA and OR, and (iii) between the facilities of Crown Zellerbach at points in the U.S. in and east of MN, IA, MO, KS, OK and TX, on the one hand, and, on the other, those points in the U.S. in and east of MN, IA, MO, KS, OK and TX, (5) *food and related products* (a) between the facilities of Hills Bros. Coffee, Inc., at points in the U.S., on the one hand, and, on the other, points in the U.S. and (b) between the facilities of Vogel's, Inc., at or near Little Rock, AR, on the one hand, and, on the other, points in the U.S., (6) *general commodities* (except classes A and B explosives), (a) between the facilities of American Hoechst, at points in the U.S., on the one hand, and, on the other, points in the U.S., (b) between the facilities of Joseph Schlitz Brewing Company, at points in the U.S., on the one hand, and, on the other, points in the U.S., (c) between the facilities of Lehn & Fink Products Group, Division of Sterling Drug, Inc., at points in the U.S., (d) between the facilities of International Paper Company, at points in the U.S., on the one hand, and, on the other, points in the U.S., (e) between the facilities of E. I. du Pont de Nemours & Company, Inc., at points in the U.S., on the one hand, and, on the other, points in the U.S., and (f) between the facilities of Trans-Am Shippers Co-operative Association, Inc., and its members in Chicago, IL, at points in the U.S., and, on the other, points in the U.S.

MC 150103 (Sub-12), filed January 26, 1981. Applicant: SCHWEIGER INDUSTRIES, INC., 116 West Washington St., Jefferson, WI 53549. Representative: Michael J. Wyngaard, 150 East Gilman St., Madison, WI 53703, (608) 256-7444. Transporting *lumber and wood products*, and *chemicals and related products*, between points in the U.S., under a continuing contract(s) with American Excelsior Co., of Arlington, TX.

MC 151142 (Sub-2), filed January 5, 1981. Applicant: H & H TRANSPORTATION, INC., 1425 East Main St., Newark, OH 43055. Representative: Andrew Jay Burkholder, 275 East State St., Columbus, OH 43215, (614) 228-8575. Transporting *containers and container ends* between those points in the U.S. in and east of MN, IA, MO, AR and LA.

MC 153843, filed January 16, 1981. Applicant: JIM C. TAYLOR, JR., d.b.a. TAYLOR TRUCK & RIGGING, P.O. Box 235, Coffeyville, KS 67337. Representative: Norman A. Cooper, 145 W. Wisconsin Ave., Neenah, WI 54956, (414 722-2848. Transporting (1) *machinery*, (2) *Mercer commodities*, and (3) *such commodities* as are dealt in or used by foundries, between points in Montgomery County, KS, on the one hand, and, on the other, points in OK.

Volume No. OP4-870

Decided March 18, 1981.

By the Commission, Review Board No. 2, Members Carleton, Fisher and Williams.

MC 134806 (Sub-71), filed January 21, 1981, previously noticed in the **Federal Register** of February 20, 1981. Applicant: B-D-R TRANSPORT, INC., P.O. Box 1277, Vernon Dr., Brattleboro, VT 05301. Representative: Francis J. Ortman, 7101 Wisconsin Ave., Suite 605, Washington, D.C. 20014. Transporting *textile products, notions, and holiday decorations*, between points in the U.S., under continuing contract(s) with Wm. E. Wright Co., of West Warren, PA, and Molnlyoke, Inc., of Fresno, CA.

Note.—The prior notice incorrectly showed West Warren, PA as Warren, PA.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later beomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly

noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OPY-2-017

Decided March 13, 1981.

By the Commission Review Board No. 1, Members Parker, Chandler and Taylor.

MC 143052 (Sub-1), filed February 27, 1981. Applicant: RESOURCE RECOVERY CORPORATION, 5501 Airport Way South, Seattle, WA 98108. Representative: George Kargianis, 2120 Pacific Bldg., Seattle, WA 98104, (206) 624-5370. Transporting *hazardous and chemical wastes*, between points in WA, on the one hand, and, on the other, points in WA, OR, ID, and CA. Condition: The person or persons who appear to be engaged in common control of applicant and another regulated carrier must either file an application under 49 U.S.C. § 11343(A) or submit an affidavit indicating why such approval is unnecessary.

MC 147003 (Sub-138), filed March 6, 1981. Applicant: RAWHIDE CARRIERS, INC., P.O. Box 1171, Grand Island, NE 68802. Representative: Max H. Johnston, P.O. Box 6597, Lincoln, NE 68506. Transporting *meat, meat products, and articles distributed by meat packinghouses*, (1) between points in Osborne County, KS, on the one hand, and, on the other, Los Angeles, Lodi, and Fresno, CA, York, NE, and St. Joseph, MO, and (2) between York County, NE, on the one hand, and, on the other, points in CA, WA, and OR.

MC 149563 (Sub-6), filed March 6, 1981. Applicant: SUPER TRUCKERS, INC., 3900 Commerce Ave., Fairfield, AL 35064. Representative: Gerald D. Colvin, Jr., 603 Frank Nelson Bldg., Birmingham, AL 35203. Transporting *metal products and rubber and plastic products*, between points in Harris and Wichita County, TX, Tulsa County, OK, Barton County, KS and Chilton County, AL, on the one hand, and, on the other, points in the U.S.

MC 154523, filed March 5, 1981. Applicant: MAC'S TRANSPORT, INC., 20352 U.S. 6, Milford, IN 46542. Representative: Paul D. Borghesani, Suite 300, Communicana Bldg., 421 So. Second St., Elkhart, IN 46516, (219) 293-3597. Transporting *trailers designed to be drawn by passenger automobiles, portable buildings, buildings in sections*, between points in the U.S., under continuing contract(s) with Fairmont Homes, Inc., of Nappanee, IN.

MC 154533, filed February 19, 1981. Applicant: LOWELL TULLIS, d.b.a. TULLIS TRUCKING, 136 S. Main St., Mechanicsburg, OH 43004. Representative: James Duvall, P.O. Box 97, 220 W. Bridge St., Dublin, OH 43017. Transporting *chemicals and related products*, between points in IN and OH.

Volume No. OPY2-018

Decided: March 17, 1981.

By the Commission Review Board No. 1, Members Parker, Chandler, and Taylor.

MC 16682 (Sub-100), filed March 10, 1981. Applicant: MURAL TRANSPORT, INC., P.O. Box 1785, North Brunswick, NJ 08902. Representative: W. C. Mitchell, 370 Lexington Ave., New York, NY 10017, (212) 532-5100. Transporting *general commodities* (except classes A and B explosives), between points in the U.S. Condition: Issuance of a certificate in this proceeding is subject to coincidental cancellation of all outstanding certificates issued in No. MC-16682, at applicant's written request.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81–8014 Filed 3–24–81 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule 251 of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the service proposed, and to conform to the requirement of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later become unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

BILLING CODE 7035–01–M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

[Redelegation of Authority No. 40.4]

Director, Office of Commodity Management; Redelegation of Authority Regarding Ocean Transportation Source

Pursuant to the authority delegated to me by Delegation of Authority No. 40 dated February 20, 1961 (46 FR 15237) from the AID Administrator, I hereby redelegate to the Director, Office of Commodity Management the following authorities with respect to ocean transportation flag eligibility requirements:

I. Selected Free World

Authority to waive, in accordance with the criteria prescribed by Supplement B of AID Handbook 1, requirements that ocean transportation services be on U.S. flag vessels in order to permit financing of ocean transportation on vessels under flag registry of the cooperating country or any country included in AID Geographic Code 941 (Selected Free World) with funds made available under the Foreign Assistance Act of 1961, as amended.

II. Free World

Authority to waive, in accordance with the criteria prescribed by Supplement B of AID Handbook 1, ocean transportation flag registry requirements in order to permit the financing of transportation on vessels under flag registry of any country included in AID Geographic Code 899 (Free World) or AID Geographic Code 935 (Special Free World) with funds made available under the Foreign Assistance Act of 1961, as amended; *Provided, however:* That all waivers approved pursuant to this paragraph II shall contain a certification by the approving official that "The interests of the U.S. are best served by permitting financing of transportation services on ocean vessels under flag registry of free world countries other than the cooperating country and countries included in Code 941."

III. General Provisions

(a) The authority herein redelegated to the Director, Office of Commodity Management may be exercised by duly authorized persons who are performing the functions of the Director in an "Acting" capacity and may be redelegated, *Provided, however,* that such authority shall not be redelegated for shipments for which the transportation costs exceed $25,000.

(b) The authorities herein are to be exercised in accordance with regulations, procedures, and policies now or hereafter established or modified and promulgated within the Agency for International Development.

(c) Redelegation of Authority No. 40.4 dated June 7, 1978 (43 FR 25894, June 15, 1978) is hereby revoked. This revised redelegation shall not be construed to affect the validity of any waiver or redelegation granted by a properly authorized official prior to the effective date of this revised redelegation and any such waiver or redelegation shall continue in effect unless modified or revoked by an official to whom such authority has been redelegated by this order.

(d) I retain for myself concurrent authority to exercise any of the functions herein delegated.

(e) This redelegation of authority shall be effective immediately.

Dated: March 16, 1981.

John F. Owens,

Acting Assistant Administrator, Bureau for Program and Management Services.

BILLING CODE 4710–02–M

Joint Research Committee of the Board for International Food and Agricultural Development; Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a)(2), Pub. L. 92–463, Federal Advisory Committee Act, notice is hereby given of the thirty-eighth meeting of the Joint Research Committee (JRC) of the Board for International Food and Agricultural Development (BIFAD) on April 14 and 15, 1981.

The purpose of the meeting is to: receive and discuss reports from the Planning Entity on Integrated Crop Protection; the JRC Work Group on research needed for food production in Africa; the JRC Livestock Work Group on exploratory studies on research needed on hemotropic diseases, African swine fever and water buffalo; to receive and act on recommendations from the JRC Work Group on composition and role of boards, technical committees and external evaluation panels in Collaborative Research Support Programs (CRSPs); and to discuss JRC responsibilities vis-a-vis international agricultural research centers.

The meeting will convene from 1 p.m. to 4 p.m. on April 14, and 8:30 a.m. to noon on April 15. The meeting will be held in Room 1205, New State Department Building, 22nd and C Streets, N.W., Washington, D.C. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Mr. William F. Johnson, BIFAD Support Staff is the designated AID Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, BIFAD Support Staff, Department of State, Washington, D.C. 20523 or telephone him at (202) 632-7935.

Dated: March 18, 1981.

William F. Johnson,

A.I.D. Advisory Committee Representative, Joint Research Committee, Board for International Food and Agricultural Development.

BILLING CODE 671-02-M

INTERNATIONAL TRADE COMMISSION

[332-124]

Investigation; Study of Floating Exchange Rates and U.S. Competitiveness

AGENCY: United States International Trade Commission.

ACTION: In accordance with the provisions of section 332 of the Tariff Act of 1930 (19 U.S.C. 1332), the Commission has instituted investigation No. 332-124 for the purpose of analyzing the effects of changes in the value of the dollar, vis-a-vis other currencies, on the international competitiveness of U.S. industries.

In conducting the investigation, the Commission will consider factors that determine the U.S. exchange rate and the effects of the exchange rate on U.S. trade. The study will consider such things as the business cycle, inflation, monetary and fiscal policies, and the pricing behavior of importers.

EFFECTIVE DATE: February 20, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry Tempalski, Research Division, U.S. International Trade Commission, Washington, D.C. 20436 (Phone 202-523-1515).

WRITTEN SUBMISSIONS: Since there will be no public hearing scheduled for this study, written submissions from interested parties are invited concerning any phase of the study. Commercial or financial information which a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be assured of consideration by the Commission in this study, written statements should be submitted at the earliest practicable date, but no later than July 31, 1981. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: March 17, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-76]

Certain Food Slicers and Components Thereof; Prehearing Conference and Hearing

Notice is hereby given that a prehearing conference will be held in this investigation at 9:00 a.m. on March 30, 1981, in Room 201, 1010 Wisconsin Ave., NW., Washington, D.C.

Notice is also given that the hearing in this proceeding will commence immediately following the prehearing conference.

The Secretary shall publish this notice in the **Federal Register**.

Issued: March 13, 1981.

Janet D. Saxon,

Administrative Law Judge.

[FR Doc. 81-9075 Filed 3-24-81; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-76]

Certain Food Slicers and Components Thereof; Termination of Crest Industries Corp. as Respondent

AGENCY: U.S. International Trade Commission.

ACTION: Termination of Crest Industries Corp. as a party respondent in the above-captioned investigation.

SUMMARY: Having determined that this matter is properly before the Commission and having reviewed the record in this investigation, the Commission on March 20, 1981, terminated Crest Industries Corp. as a party respondent in Investigation No. 337-TA-76.

SUPPLEMENTARY INFORMATION: This investigation under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) concerns alleged infringement of U.S. Letters Patent 3,766,817 by respondents E. Mishan & Sons, Albert E. Price, Inc., Crest Industries Corp., and Taiwan Timing Trading Co. The Commission instituted the investigation on December 4, 1979, and published notice thereof in the **Federal Register** of December 21, 1979 (44 FR 75733). On August 1, 1980, complainant Prodyne Enterprises, Inc. entered into a licensing agreement with respondent Crest Industries Corp. The Commission published notice that it was considering terminating Crest as a respondent in the above-captioned investigation in the **Federal Register** of January 14, 1981, (46 FR 3391) along with the text of the licensing agreement, and requested comments from certain Government agencies pursuant to 19 CFR 210.14(a)(2). No comments were received from the public or the parties. No government agency objected to terminating the investigation as to Crest on the basis of the licensing agreement.

Any party wishing to petition for reconsideration of the Commission's action must do so within fourteen (14) days of service of the Commission Action and Order. Such petitions must be in accord with § 210.56 of the Commission's Rules of Practice and Procedure (19 CFR 210.56).

Copies of the Commission Action and Order in this matter and any other public documents in this investigation are available to the public during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S.

International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Warren H. Maruyama, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0143.

By order of the Commission.

Issued: March 20, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 701-TA-68 (Final)]

Leather Wearing Apparel From Uruguay; Change in Hearing Date

AGENCY: United States International Trade Commission.

ACTION: Change in date of public hearing.

SUMMARY: The date of the public hearing to be held in connection with Commission investigation No. 701–TA–68 (Final), Leather Wearing Apparel from Uruguay, is changed from March 18, 1981, to March 26, 1981. The hearing will begin at 10 a.m., e.s.t., in the Hearing Room of the U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C.

EFFECTIVE DATE: March 18, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Patrick Magrath, Office of Investigations, U.S. International Trade Commission; telephone 202–523–0283.

SUPPLEMENTARY INFORMATION: On February 27, 1981, the U.S. Department of Commerce and the Government of Uruguay signed an agreement regarding this investigation in which the Government of Uruguay agreed to eliminate completely the amount of the net subsidy found by Commerce to exist with respect to leather wearing apparel exported directly or indirectly to the United States. Accordingly, the countervailing duty investigations underway at Commerce and at the Commission will be suspended, pursuant to section 704(f)(1) of the Tariff Act of 1930 (19 U.S.C. 1671c(f)(1)). On March 11, 1981, however, the Government of Uruguay requested that the investigations be continued pursuant to section 704(g)(1) of the Act (19 U.S.C. 1671c(g)(1)). The Commission has delayed its public hearing until March 26, 1981 to permit **Federal Register** publication of an anticipated continuation of the investigation by appropriate Department of Commerce notice.

By order of the Commission.

Issued: March 17, 1981.

Kenneth R. Mason,

Secretary.

[FR Doc. 81-8677 Filed 3-24-81; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 731-TA-30 (Final)]

Unrefined Montan Wax From East Germany; Investigation and Hearing

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigation.

SUMMARY: As a result of an affirmative preliminary determination by the United States Department of Commerce that there is a reasonable basis to believe or suspect that exports of unrefined montan wax from East Germany are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673), the United States International Trade Commission hereby gives notice of the institution of investigation No. 731–TA–30 (Final) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. Unrefined montan wax is classifiable in item 494.20 of the Tariff Schedules of the United States. This investigation will be conducted according to the provisions of Part 207, Subpart C, of the Commission's Rules of Practice and Procedure (19 CFR Part 207, 44 FR 76457).

EFFECTIVE DATE: March 4, 1981.

FOR FURTHER INFORMATION CONTACT: Ms. Judith Case, Office of Investigations, U.S. International Trade Commission, Room 350, 701 E Street NW., Washington, D.C. 20436; telephone 202–523–0339.

SUPPLEMENTARY INFORMATION: On October 23, 1980, the Commission unanimously determined, on the basis of the information developed during the course of Investigation No. 731–TA–30 (Preliminary), that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of imports of unrefined montan wax from East Germany, which were allegedly being sold in the United States at LTFV. As a result of the Commission's affirmative preliminary determination, the Department of Commerce continued its investigation into the question of LTFV sales. Unless the investigation is extended, the final LTFV determination will be made by the Department of Commerce on or before May 18, 1981.

Written Submissions

Any person may submit to the Commission a written statement of information pertinent to the subject of this investigation. A signed original and nineteen (19) true copies of each submission must be filed at the Office of the Secretary, U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436, on or before June 4, 1981. All written submissions, except for confidential business data, will be available for public inspection.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6).

A staff report containing preliminary findings of fact will be available to all interested parties on May 20, 1981.

Public Hearing

The Commission will hold a public hearing in connection with this investigation on June 8, 1981, in the Hearing Room of the U.S. International Trade Commission Building, beginning at 10 a.m., e.d.t. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m., e.d.t.) on May 18, 1981. All persons desiring to appear at the hearing and make oral presentations must file prehearing statements and should attend a prehearing conference to be held at 10 a.m., e.d.t., on May 21, 1981, in Room 117 of the U.S. International Trade Commission Building. Prehearing statements must be filed on or before June 4, 1981.

Testimony at the public hearing is governed by § 207.23 of the Commission's Rules of Practice and Procedure (19 CFR 207.23). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing statements and to new information. The Commission will not receive prepared testimony for the public hearing, as would otherwise be provided for by rule 201.12(d). All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing statements in accordance

with rule 207.22. Post-hearing briefs will also be accepted within a time specified at the hearing.

For further information concerning the conduct the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

This notice is published pursuant to § 207.20 of the Commission's Rules of Practice and Procedure (19 CFR 207.20, 44 FR 76458).

By order of the Commission.

Issued: March 17, 1981.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

DEPARTMENT OF JUSTICE

Proposed Consent Decree in Action To Enjoin Discharge of Air Pollutants at Northern States Power Company Plant in St. Paul, Minnesota

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed substitute consent decree in *United States* v. *Northern States Power Company*, Civil Action No. 3-80-539, has been lodged with the District Court for the District of Minnesota. Since lodging the original decree on September 25, 1980, Northern States has decided to sell the Third Street facility in question to Saint Paul District Heating Development Company, Inc. (District Heating), which will completely eliminate the emission of air pollutants from the plant by ceasing to burn coal. The plant will be used as a distribution point for a hot water and steam heating system, and not as a generating plant. Northern States will make a non-refundable grant of $500,000 to District Heating for this purpose. If for any reason Northern States or District Heating decide to shutdown the boilers by November 1, 1982 as an alternative means of compliance, Northern States is required to post a $626,170 performance bond to insure shutdown.

The period of time during which the Department of Justice will receive written comments on this modified consent decree is shortened from 30 days to 14 days since the proposed decree represents no major change to the original decree. Comments should be addressed to the Deputy Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *"United States* v. *Northern States Power Company,"* Ref. No. 90-5-2-1-335.

The proposed consent decree may be examined at the Office of the United States Attorney, United States Courthouse, Minneapolis, Minnesota, at the Region V Office of the Environmental Protection Agency, Enforcement Division, 230 South Dearborn Street, Chicago, Illinois 60604, and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1254, Tenth Street and Pennsylvania Avenue NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice. In order to cover the reproduction costs, all requests for copies must be accompanied by a check or money order made out for $1.30 to the Treasurer of the United States.

Angus Macbeth,

Deputy Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

National Institute of Justice

Racial Tension in Prison; Competitive Research Grant Solicitation

The National Institute of Justice announces a competitive research grant solicitation for proposals to study the methods for alleviating racial tension in prisons. The overall goal is to identify promising administrative strategies to improve prison race relations.

The solicitation requests submission of proposals which will then be considered by a peer review panel. In order to be considered, proposals must be postmarked to the National Institute no later than April 30, 1981. This announcement envisions one grant award with funding up to a total of $125,000.00 and an expected duration of 18 months.

Additional information and copies of the solicitation may be obtained by sending a mailing label to: Solicitation Request, Research on Causes and Control of Racial Tension in Prison, National Criminal Justice Reference Service, Box 6000, Rockville, Maryland 20850.

Dated: March 18, 1981.

Harry M. Bratt,

Acting Director, National Institute of Justice.

BILLING CODE 4410-18-M

Stranger-to-Stranger Crime; Victim Response; Research Solicitation

The National Institute of Justice is planning to fund a study of the effects of various kinds of victim response in stranger to stranger violent crimes. Existing National Crime Survey data are required to be used. The objective is to examine victim reponses in various kinds of violent, stranger to stranger crimes.

The award may be a grant or cooperative agreement not to exceed 24 months or $150,000. Proposals are due at the National Institute of Justice postmarked not later than May 7, 1981.

To receive a copy of the solicitation, send a self-addressed mailing label to: Research on Victim Response and Its Effects in Stranger to Stranger Violence, National Criminal Justice Reference Service, P.O. Box 6000, Rockville, Maryland 20850. Do not telephone requesting the solicitation; telephone requests are not accepted by NCJRS or by the National Institute.

Dated: February 20, 1981.

Approved:

Harry M. Bratt,

Acting Director, National Institute of Justice.

BILLING CODE 4410-18-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Color Television Receivers From Republic of Korea; Amendment of Tariff Schedules of United States (19 U.S.C. 1202)

Proclamation No. 4769 of June 30, 1980, extended the temporary quantitative limitations on color television receivers and certain subassemblies thereof, the products of the Republic of Korea and Taiwan. The proclamation was issued pursuant to the President's decision to extend orderly marketing agreements with the Republic of Korea and the Coordinating Council for North American Affairs.

Pursuant to Proclamation No. 4769, in which the President authorized the United States Trade Representative to make any changes to the Tariff Schedules of the United States (TSUS) which might be necessary to carry out the agreements, the following conforming technical change is necessary and shall be effective March 25, 1981.

Accordingly, subpart A, part 2 of the Appendix to the TSUS is amended by deleting "923.72" wherever that item

number still appears and substituting "923.77" in lieu thereof.

William E. Brock,

United States Trade Representative.

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

Gulf Energy Corp., Suspension of Trading.

March 18, 1981.

It appears to the Commission that the market for Gulf Energy Corporation's ("GEC") stock is being distorted by a lack of adequate and acurate information available to the public concerning the status of GEC's oil and gas interests in Cheyenne County, Nebraska. These interests have been featured prominently in certain of GEC's public statements and market reports. Drilling information provided to the Commission indicates that the Company has not publicly reported that tests on the three wells drilled subsequent to the initial well have been dry or marginal. Corporate insiders have sold over 840,000 shares of GEC stock during the past year and have filed Form 144's indicating an intention to sell or sales of almost two million shares. Therefore, the Commission is of the opinion that the public interest and the protection of investors requires a summary suspension of trading in the securities of GEC.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in GEC on a national securities exchange or otherwise is suspended, for the period from 1:30 p.m. on March 18, 1981 through midnight on March 27, 1981.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 04/04-5203]

First Alabama Capital Corp.; Application for License To Operate as a Small Business Investment Company (SBIC)

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1980)), under the name of First Alabama Capital Corporation, 3201 Dauphin Street, Suite B, Mobile, Alabama 36606, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 et seq.), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders of the Applicant are as follows:

Name and Address, Title and Relationship and Percent of Ownership

David C. DeLaney, 2431 River Forest Road, Mobile, Alabama 36605—President, (General Manager) and Director; 0

Dessa Ava Phillips, 573 Stuart Street, Daphne, Alabama 36526—Secretary; 0

Chris C. DeLaney, Rt. 4, Box 180, Spanish Fort, Alabama 36527—Vice President, Treasurer and Director; 0

Bryan C. DeLaney, 514 General Maury Drive, Spanish Fort, Alabama 36527—Director; 0

Michael C. DeLaney, Rt. 4, Box 180, Spanish Fort, Alabama 36527—Director; 0

Robin C. DeLaney, 1055-A Church Street, Mobile, Alabama 36604—Director; 0

First SBIC of Alabama, 3201 Dauphin Street, Suite B, Mobile, Alabama 36606—Parent Company; 100

It will begin operations with $500,000 of private capital derived from the sale of 10,000 shares to First SBIC of Alabama.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of

performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's considerations of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may on or before April 9, 1981, submit written comments on the proposed company to the Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in Mobile, Alabama.

Gary A. Stoltz, 7300 Metro Blvd., Suite 585, Minneapolis, Minnesota 55435—Vice President, Secretary, and Director; 0.351 through attribution

Pathfinder Venture, Capital Fund, 5001 W. 80th St., Suite 800, Minneapolis, Minnesota 55437—Parent Company; 100

Pathfinder Venture Capital Fund, a Limited Partnership, was formed September 24, 1980, under the Minnesota Uniform Limited Partnership Act for the purpose of providing venture capital to corporations, partnerships, and joint ventures, and assisting in the development of the business of those enterprises.

The limited partner investors are large corporations, pension funds, trust companies, and individual investors all investing in excess of $500,000 each. The investors are not affiliated with the general partners and are involved in the partnership entirely for investment purposes and not for resale.

The Applicant will begin operations with a capitalization of $3.0 million and will be a source of equity capital and long-term loan funds for qualified small business concerns whose needs might not be met by traditional funding sources.

Matters involved in SBA's considerations of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may on or before April 9, 1981 submit written comments on the proposed company to the Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in Minneapolis, Minnesota.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: March 17, 1981.

Peter F. McNeish,

Acting Associate Administrator for Investment.

BILLING CODE 8025-01-M

Small Business Investment Company Maximum Annual Cost of Money to Small Business Concerns

13 CFR 107.301(c) sets forth the SBA Regulation governing the maximum annual cost of money to small business concerns for Financing by small business investment companies.

Section 107.301(c)(2) requires that SBA publish from time to time in the Federal Register the current Federal Financing Bank (FFB) rate for use in computing the maximum annual cost of money pursuant to § 107.301(c)(1). It is anticipated that a rate notice will be published each month.

13 CFR 107.301(c) does not supersede or preempt any applicable law that imposes an interest ceiling lower than the ceiling imposed by that regulation. Attention is directed to new subsection 308(i) of the Small Business Investment Act, added by section 524 of Pub. L. 96–221, March 31, 1980 (94 Stat. 161), to that law's Federal override of State usury ceilings, and to its forfeiture and penalty provisions.

Effective April 1, 1981, and until further notice, the FFB rate to be used for purposes of computing the maximum cost of money pursuant to 13 CFR 107.301(c) is 12.975% per annum.

Dated: March 20, 1981.

Peter F. McNeish,

Deputy Associate Administrator for Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF THE TREASURY

Fiscal Service

Treasury Current Value of Funds Rate

AGENCY: Bureau of Government Financial Operations.

ACTION: Notice to Heads of Government Departments and Agencies.

SUMMARY: This notice, applicable only to Governmental concerns, provides the percentage rate based on the current value of funds to the Treasury for use in Federal billing, collection, and

disbursement operations pursuant to cash management regulations contained in the Treasury Fiscal Requirements Manual (I TFRM 6–8000). The percentage rate applicable to these operations is *17.74%*.

DATES: The rate will be in effect for the period beginning on April 1, 1981 and ending on June 30, 1981.

FOR FURTHER INFORMATION CONTACT: Agency inquiries should be addressed to the Regulations and Compliance Staff, Bureau of Government Financial Operations, Department of the Treasury, Treasury Annex No. 1, Washington, D.C. 20226 (Telephone: 202/566–6251).

SUPPLEMENTARY INFORMATION: Revisions to I TFRM 6–8000, "Cash Management," in June 1980, provided for the fine-tuning of billing, collection, and disbursement guidelines applicable to Government department and agency operations. A major procedural change established the current value of funds rate, which reflects the short-term value of funds to the Treasury, to be utilized for (1) assessing charges for late payments to the Government, and (2) determining cost effective prompt payment discounts. This rate, updated quarterly, is based on rates set for purposes of Pub. L. 95–147, 91 Stat. 1227. In addition, the requirement that interest should be charged on delinquent debts and debts being paid in installments in accordance with I TFRM 6–8000 is contained with the Federal Claims Collection Standards (4 CFR 102.11).

Dated: March 20, 1981.

W. E. Douglas,

Commissioner.

BILLING CODE 4810–35–M

Office of the Secretary

[Department Circular Public Debt Series No. 10–81]

Treasury Notes of April 15, 1988, Series D–1988; Invitation for Tenders

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,750,000,000 of United States securities, designated Treasury Notes of April 15, 1988, Series D–1988 (CUSIP No. 912827 LT 7). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated April 6, 1981, and will bear interest from that date, payable on a semiannual basis on October 15, 1981, and each subsequent 6 months on April 15 and October 15 until the principal becomes payable. They will mature April 15, 1988, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issed in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered, and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Tuesday, March 31, 1981. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, March 30, 1981.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1 for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent

required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.5., must be made or completed on or before Monday, April 6, 1981. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the generel regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, April 3, 1981. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference betwen the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been compleded on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations for assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer indentifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are Authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Paul H. Taylor,

Fiscal Assistant Secretary.

Supplementary Statement

The announcement set forth above does not meet the Department's criteria for significant regulations and, accordingly, may be published without compliance with the departmental procedures applicable to such regulations.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Health Maintenance Organizations

AGENCY: Public Health Service, HHS.

ACTION: Notice, February—qualified health maintenance organization

SUMMARY: This notice sets forth the name, address, service area, and date of qualification of an entity determined by the Secretary to be a qualified health maintenance organization (HMO).

FOR FURTHER INFORMATION CONTACT: Howard R. Veit, Director, Office of Health Maintenance Organizations, Park Building, Third Floor, 12420 Parklawn Drive, Rockville, Maryland 20857, 301/443-4106.

SUPPLEMENTARY INFORMATION: Regulations issued under Title XIII of the Public Health Service Act, as amended, (42 CFR 110.605(b)) require that a list and description of all newly qualified HMOs be published on a monthly basis in the **Federal Register**. The following entity has been determined to be a qualified HMO under Section 1310(d) of the Public Health Service Act (42 U.S.C. 300e-9(d)):

Qualified Health Maintenance Organization

Name, Address, Service Area, and Date of Qualification

(Operational Qualified Health Maintenance Organization: 42 CFR 110.603(a))

1. Health First, (Staff Model, see Section 1310(b)(1) of the Public Health Service Act), 6445 Poplar Avenue, Memphis, Tennessee 38119. Service area: Shelby County, Tennessee. Date of qualification: February 1, 1981. (Preoperationally qualified—January 28, 1981.)

Files containing detailed information regarding qualified HMOs will be available for public inspection between the hours of 8:30 a.m. and 5:00 p.m. on Tuesdays and Thursdays, except for Federal holidays, in the Office of Health Maintenance Organizations, Office of the Assistant Secretary for Health, Department of Health and Human Services, Park Building, 3rd Floor, 12420 Parklawn Drive, Rockville, Maryland 20857.

Questions about the qualification review process or requests for information about qualified HMOs should be sent to the same office.

Dated: March 17, 1981.

Howard R. Veit,

Director, Office of Health Maintenance Organizations.

[FR Doc. 81-8846 Filed 3-23-81; 8:45 am]

BILLING CODE 4110-86-M

Health Maintenance Organizations; Noncompliance Determination

AGENCY: Public Health Service, HHS.

ACTION: Notice, Continued Regulation of Health Maintenance Organizations: Determination of Noncompliance and Revocation of Federal Qualification.

SUMMARY: On December 3, 1980, the Office of Health Maintenance Organizations (OHMO) determined that Monumental Health Plan, Inc. (MHP), 2300 Garrison Boulevard, Baltimore, Maryland 21216, a federally qualified health maintenance organization (HMO), was not in compliance with the assurances it had provided to the Secretary that it would (1) maintain a fiscally sound operation, (2) maintain satisfactory administrative and managerial arrangements, and (3) comply with the National Data Reporting Requirements. On February 20, 1981, the Director of OHMO notified MHP that he was revoking MHP's Federal qualification. Accordingly, MHP is no longer a federally qualified HMO.

FOR FURTHER INFORMATION CONTACT: Howard R. Veit, Director, Office of Health Maintenance Organizations, Park Building, 3rd Floor, 12420 Parklawn Drive, Rockville, Maryland 20857, 301/443-4106.

SUPPLEMENTARY INFORMATION: Under Section 1312(b)(1) of the Public Health Service Act (the Act) (42 U.S.C. 300e-11(b)(1)), if the Secretary makes a determination under section 1312(a) that a qualified HMO is not organized or operated in the manner prescribed by section 1301(c), then the HMO shall be (1) notified in writing of the determination and (2) directed to initiate corrective action to bring it into compliance with the assurances it provided to the Secretary under section 1310(d)(1). The notice of December 3, 1980, gave MHP an opportunity to initiate corrective action to bring it into compliance with the assurances that it would (1) maintain a fiscally sound operation, (2) maintain satisfactory administrative and managerial arrangements, (3) comply with the National Data Reporting Requirements. The basis for the revocation of Federal qualification was OHMO's determination that MHP had not carried out and would not carry out the corrective action necessary to return to compliance. The revocation of qualification was to become effective five working days after MHP received the February 20 letter; however, on February 26, 1981, the U.S. District Court for the District of Maryland issued an order temporarily restraining the effectiveness of the revocation. *Monumental Health Plan, Inc. v. U.S. Department of Health and Human Services,* Civil Action No. J81-387. That order expired by its own terms on March 8, 1981. The District Court is presently conducting evidentiary proceedings relative to the Director's decision and will issue a final decision in this case in the near future. The revocation of MHP's qualification is effective now, and will remain so unless the District Court orders otherwise.

The effect of the revocation of MHP's Federal qualification is as follows: (1) MHP may not seek inclusion in employees' health benefits plans under section 1310 of the Act; (2) with respect to employers including MHP in the health benefits plan offered their employees, MHP is not a qualified HMO for purposes of section 1310 of the Act; (3) the inclusion of MHP in an employees' health benefits plan will be disregarded for purposes of determining whether, and to what extent, the employer is subject to 42 CFR Part 110, Subpart H, and will not constitute

compliance with the requirements of that subpart; and (4) MHP is not a qualified HMO for purposes of the financial assistance programs under 42 CFR Part 110.

Section 1312(b)(1) of the Act requires that a notice of the determination of noncompliance and of the revocation of Federal qualification of an HMO be published in the Federal Register.

Dated: March 23, 1981.

Howard R. Veit,

Director, Office of Health Maintenance Organization.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, March 30, 1981, to consider the following matters:

Disposition of minutes of previous meetings.

Request by the Comptroller of the Currency for a report on the competitive factors involved in a proposed merger of The First National Bank of Lapeer, Lapeer, Michigan, and Imlay City State Bank, Imlay City, Michigan.

Memorandum and Resolution re: Proposed Amendments to the Financial Institutions Regulatory and Interest Rate Control Act of 1978.

Memorandum and Resolution re: Uniform Interagency Community Reinvestment Act (CRA) Rating System.

Memorandum and Resolution re: Banco Credito y Ahorro Ponceno (In Liquidation), Ponce, Puerto Rico—Extension of Settlement Period.

Reports of committees and officers:

Minutes of the actions approved by the Committee on Liquidations, Loans, and Purchases of Assets pursuant to authority delegated by the Board of Directors.

Reports of the Director of the Division of Bank Supervision with respect to applications or requests approved by him and the various Regional Directors pursuant to authority delegated by the Board of Directors.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 23, 1981.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of Agency Meeting.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, March 30, 1981, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of Title 5, United States Code, to consider the following matters:

Applications for Federal deposit insurance:

Westside Bank, a proposed new bank, to be located at 60 West 10th Street, Tracy, California.

The Bank of the Delta, a proposed new bank, to be located at 410 Highway #82 East, Indianola, Mississippi.

Webster County Bank, a proposed new bank, to be located at 225 North Clay Street, Marshfield, Missouri.

Application for Federal deposit insurance, consent to establish a branch, and consent to exercise limited trust powers:

Security Trust Company, a proposed new bank, to be located at 321 Bush Street, San Francisco, California, for Federal deposit insurance, for consent to establish a branch at 624 South Grand Avenue, Los Angeles, California, and for consent to exercise limited trust powers.

Request for modification of a condition imposed in granting consent to establish a branch:

Progressive Bank and Trust Company, Houma, Louisiana, for modification of a condition imposed in granting consent to establish a branch at 2734 West Main Street, Houma, Louisiana.

Application for consent to merge and establish branches:
Colonial Bank, Waterbury, Connecticut, for consent to merge under its charter and title with The Bank of Trumbull, Trumbull, Connecticut, and for consent to establish the three offices of The Bank of Trumbull as branches of the resultant bank.
Request for relief from reimbursement for violations of Regulation Z:
Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A)(ii)).
Request pursuant to section 19 of the Federal Deposit Insurance Act for consent to service of persons convicted of offenses involving dishonesty or a breach of trust as directors, officers, or employees of insured banks:
Names of person and of bank authorized to be exempt from disclosure pursuant to the provisions of subsection (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6)).
Requests for exemptions pursuant to Part 348 of the Corporation's rules and regulations entitled "Management Official Interlocks":
City and County Bank of Anderson County, Lake City, Tennessee, for an exemption pursuant to section 348.6(a)(2).
Texas Commerce Bank-Tanglewood, Houston, Texas, and The Western Saving Fund Society of Philadelphia, Haverford, Pennsylvania, for exemptions pursuant to section 348.4(b)(5).
Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:
Case No. 44,698-SR—Bank of Lake Helen, Lake Helen, Fla.
Case No. 44,707-SR—American Bank & Trust Company, New York, N.Y.
Case No. 44,708-L—Franklin National Bank, New York, N.Y.
Case No. 44,713-L—The Mission State Bank & Trust Company, Mission, Kans.
Case No. 44,722-L—The Drovers' National Bank of Chicago, Chicago, Ill.
Case No. 44,725-NR—United States National Bank, San Diego, Calif.
Memorandum and resolution re: United States National Bank, San Diego, Calif.
Memorandum and resolution re: Surety Bank and Trust Company, Wakefield, Mass.
Memorandum and resolution re: Northeast Bank of Houston, Houston, Tex.
Memorandum and resolution re: Centennial Bank, Philadelphia, Pa.
Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents, or other persons participating in the conduct of the affairs thereof:
Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).
Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:
Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).
Reports of committees and officers:
Report of the Director, Office of Corporate Audits:
Audit Report re: First National Bank of Carrington, Carrington, North Dakota.
Reports of the Director, Division of Liquidation:
Memorandum re: Reports Required Under Delegated Authority Releases of Collateral for Fair Market Value.
Memorandum re: Reports Required Under Delegated Authority Expenditures.
Memorandum re: Reports Required Under Delegated Authority Foreclosure Bids.

The meeting will be held in the Board Room on the Sixth Floor of the FDIC Building located at 550–17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 23, 1981.

Federal Deposit Insurance Corporation.

FEDERAL MARITIME COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: March 20, 1981, 46 FR 17949.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 9:00 a.m., March 26, 1981.

CHANGES IN THE MEETING: The time of the meeting is changed from 9:00 a.m. to 11:00 a.m. on Thursday, March 26, 1981.

Addition of the following items to the closed session:

2. Docket No. 80–45—Agreement No. 10386, as Amended, and 10382, as Amended, Cargo Revenue Pooling/Equal Access Agreements in the United States/Argentine Trades—Foreign Discovery Matters.

3. Discussion of Interstate Commerce Commission Ex Parte 230 (Sub. 5).

FEDERAL RESERVE SYSTEM: Board of Governors.

TIME AND DATE: 10:00 a.m., Monday, March 30, 1981.

PLACE: 20th Street and Constitution Avenue, NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: March 20, 1981.

James McAfee,

Assistant Secretary of the Board.

9

NUCLEAR REGULATORY COMMISSION.

DATE: Week of March 23, 1981.

PLACE: Commissioners' Conference Room, 1717 H St., NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Wednesday, March 25, 10:00 a.m.

1. Discussion of Policy, Planning and Program Guidance for FY 1983–87 (public meeting).

Thursday, March 26, 10:00 a.m.

1. Briefing on Nuclear Data Link (approximately 1½ hrs., public meeting).
2. Affirmation/Discussion Session (public meeting).

Affirmation and/or discussion and vote: a. Proposed Denial of Motions To Suspend NRC's Enforcement of 40 CFR 190 Uranium Mills.

Automatic telephone answering service for schedule update: (202) 634–1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

CONTACT PERSON FOR MORE INFORMATION: Walter Magee (202) 634–1410.

Walter Magee,

Office of the Secretary.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of March 23, 1981, in Room 825, 500 North Capitol Street, Washington, D.C.

An open meeting will be held on Wednesday, March 25, 1981, at 10:00 a.m., followed by a closed meeting.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402(a)(4)(8)(9)(i) and (10).

Commissioner Evans, as duty officer, determined to hold the aforesaid meeting in closed session.

The subject matter of the open meeting scheduled for Wednesday, March 25, 1981, at 10:00 a.m., will be:

Consideration of whether to adopt, on an interim basis, three forms for use by companies seeking to be regulated as business development companies under the Investment Company Act of 1940 and Consideration of whether to authorize the publication of the views of the Division of Investment Management on the adaptation of existing registration statement forms for use by such companies. For further information, please contact Dianne E. O'Donnell at (202) 272–2116.

The subject matter of the closed meeting scheduled for Wednesday, March 25, 1981, following the 10:00 a.m. open meeting, will be: Settlement of administrative proceeding of an enforcement nature.

At times changes in commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Nancy Wojtas at (202) 272–2178.

March 20, 1981.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [To be published].

STATUS: Open meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Friday, March 20, 1981.

CHANGES IN THE MEETING: Additional item.

The following additional item will be considered at an open meeting scheduled for Wednesday, March 25, 1981, at 10:00 a.m.:

Consideration of whether to issue orders extending the registrations of thirteen temporarily registered clearing agencies until March 31, 1982. For further information, please contact JoAnn Carpenter at (202) 272–2902.

Commissioner Friedman, as duty officer, determined that Commission business required the above change and that no earlier notice thereof was possible.

At times changes in commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Nancy Wojtas at (202) 272–2178.

March 23, 1981.

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION.

TIME AND DATE: 10 a.m., Monday, April 13, 1981.

PLACE: Board Room, 712 Jackson Place N.W., Washington, D.C. 20006.

STATUS: Parts of the meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Portions open to the public:

1. Call meeting to order. Check quorum.
2. Adoption of proposed agenda.
3. Approval of minutes of September 8, 1980 meeting.
4. Report of Chairman.
5. Report of Executive Secretary.
6. Discussion of Awards Ceremony.
7. New Business.
8. Set date for next meeting in September, 1981.

Portions closed to the public:

1. Selection of Truman Scholars for 1981–82.

CONTACT PERSON FOR MORE INFORMATION: Malcolm C. McCormack, Executive Secretary, telephone, 202–395–4831.

Malcolm C. McCormack,

Executive Secretary.

Part II

Department of the Interior

Fish and Wildlife Service

Migratory Bird Hunting; Proposed 1981–82 Migratory Game Bird Hunting Regulations

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service
50 CFR Part 20
Migratory Bird Hunting; Proposed 1981–82 Migratory Game Bird Hunting Regulations (Preliminary)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The Service proposes to establish hunting seasons, daily bag and possession limits, and shooting hours for designated groups or species of migratory game birds in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands during 1981–82. The Service annually prescribes migratory bird hunting regulations. The effect of these hunting regulations is to continue providing hunting opportunity, a popular form of outdoor recreation, to the public and to aid Federal and State governments in the management of migratory game birds.

DATES: The comment period for proposed regulations frameworks for Alaska, Puerto Rico, and the Virgin Islands will end on June 19, 1981; for early season proposals on July 13, 1981; and for late season proposals on August 24.

Public Hearings: on Early Season Regulations—June 19, 1981, at 9 a.m.; on Late Season Regulations—August 4, 1981, at 9 a.m.

ADDRESSES: Comments and requests to testify may be mailed to Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Both public hearings will be held in the Auditorium, Interior Department Building, 18th and C Streets, NW., Washington, D.C. Comments received may be inspected from 8 a.m. to 4 p.m. at the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 525–B, Matomic Building, 1717 H Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (AC 202–254–3207).

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service proposes to establish hunting seasons, bag and possession limits, and shooting hours for migratory game birds during 1981–82 under §§ 20.101 through 20.107 of subpart K of 50 CFR Part 20.

"Migratory game birds" are those migratory birds so designated in conventions between the United States and several foreign nations for the protection and management of these birds. During the 1981–82 hunting season, regulations are proposed for certain designated members of the avian families *Anatidae* (ducks, geese, brant and swans); *Columbidae* (doves and pigeons); *Gruidae* (cranes); *Rallidae* (rails, coots, and gallinules); and *Scolopacidae* (woodcock and snipe). These proposals are described under Proposed 1981–82 Migratory Game Bird Hunting Regulations (Preliminary) in this document.

Notice of Intention To Establish Open Seasons

This notice announces the intention of the Director, U.S. Fish and Wildlife Service, to establish open hunting seasons, daily bag and possession limits, and shooting hours for certain designated groups or species of migratory game birds for 1981–82 in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

Factors Affecting Regulations Process

This is the first in a series of proposed and final rulemaking documents for migratory bird hunting regulations. Proposed season frameworks, shooting hours, and daily bag and possession limits are set forth for various groups of migratory game birds for which these regulations ordinarily do not vary significantly from year to year.

The proposals set forth here and the schedule by which more detailed proposals for these and other species will be developed are dependent upon a number of factors. Among these are the times when various annual population, habitat, and harvest surveys are conducted and results are available for analysis; times of migration and other biological considerations; and times during which hunting may be allowed. The regulatory process for migratory game birds is strongly influenced by the times when the best and latest information is available for consideration in the development of regulations. For these reasons, the overall regulations process for hunting seasons and limits is divided into the following segments: (1) regulations for migratory game birds in Alaska, Puerto Rico, the Virgin Islands, and Hawaii; (2) seasons in the remainder of the United States opening prior to October 1 (early seasons); and (3) seasons opening in the remainder of the United States on or about October 1 (late seasons). Regulations development for each of the three categories will follow similar but independent schedules. Proposals relating to the harvest of migratory game birds that may be initiated after publication of this proposed rulemaking will be made available for public review in supplemental proposed rulemakings to be published in the Federal Register. Also, additional supplemental proposals will be published for public comment in the Federal Register as population, habitat, harvest, and other information becomes available.

Because of the late dates when certain of these data become available, it is anticipated that comment periods on some proposals will necessarily be abbreviated. Special circumstances that limit the amount of time which the Service can allow for public comment are involved in the establishment of these regulations. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on one hand, to establish final rules at a time early enough in the summer to allow State agencies to adjust their licensing and regulatory mechanisms and, on the other hand, the lack before late July of current data on the status of most waterfowl.

Publication of Regulatory Documents

The process relating to the establishment of migratory bird hunting regulations in the United States involves a series of regulatory announcements published in the Federal Register in accordance with the Administrative Procedure Act. The publicaton of these documents is divided into three phases, as follows:

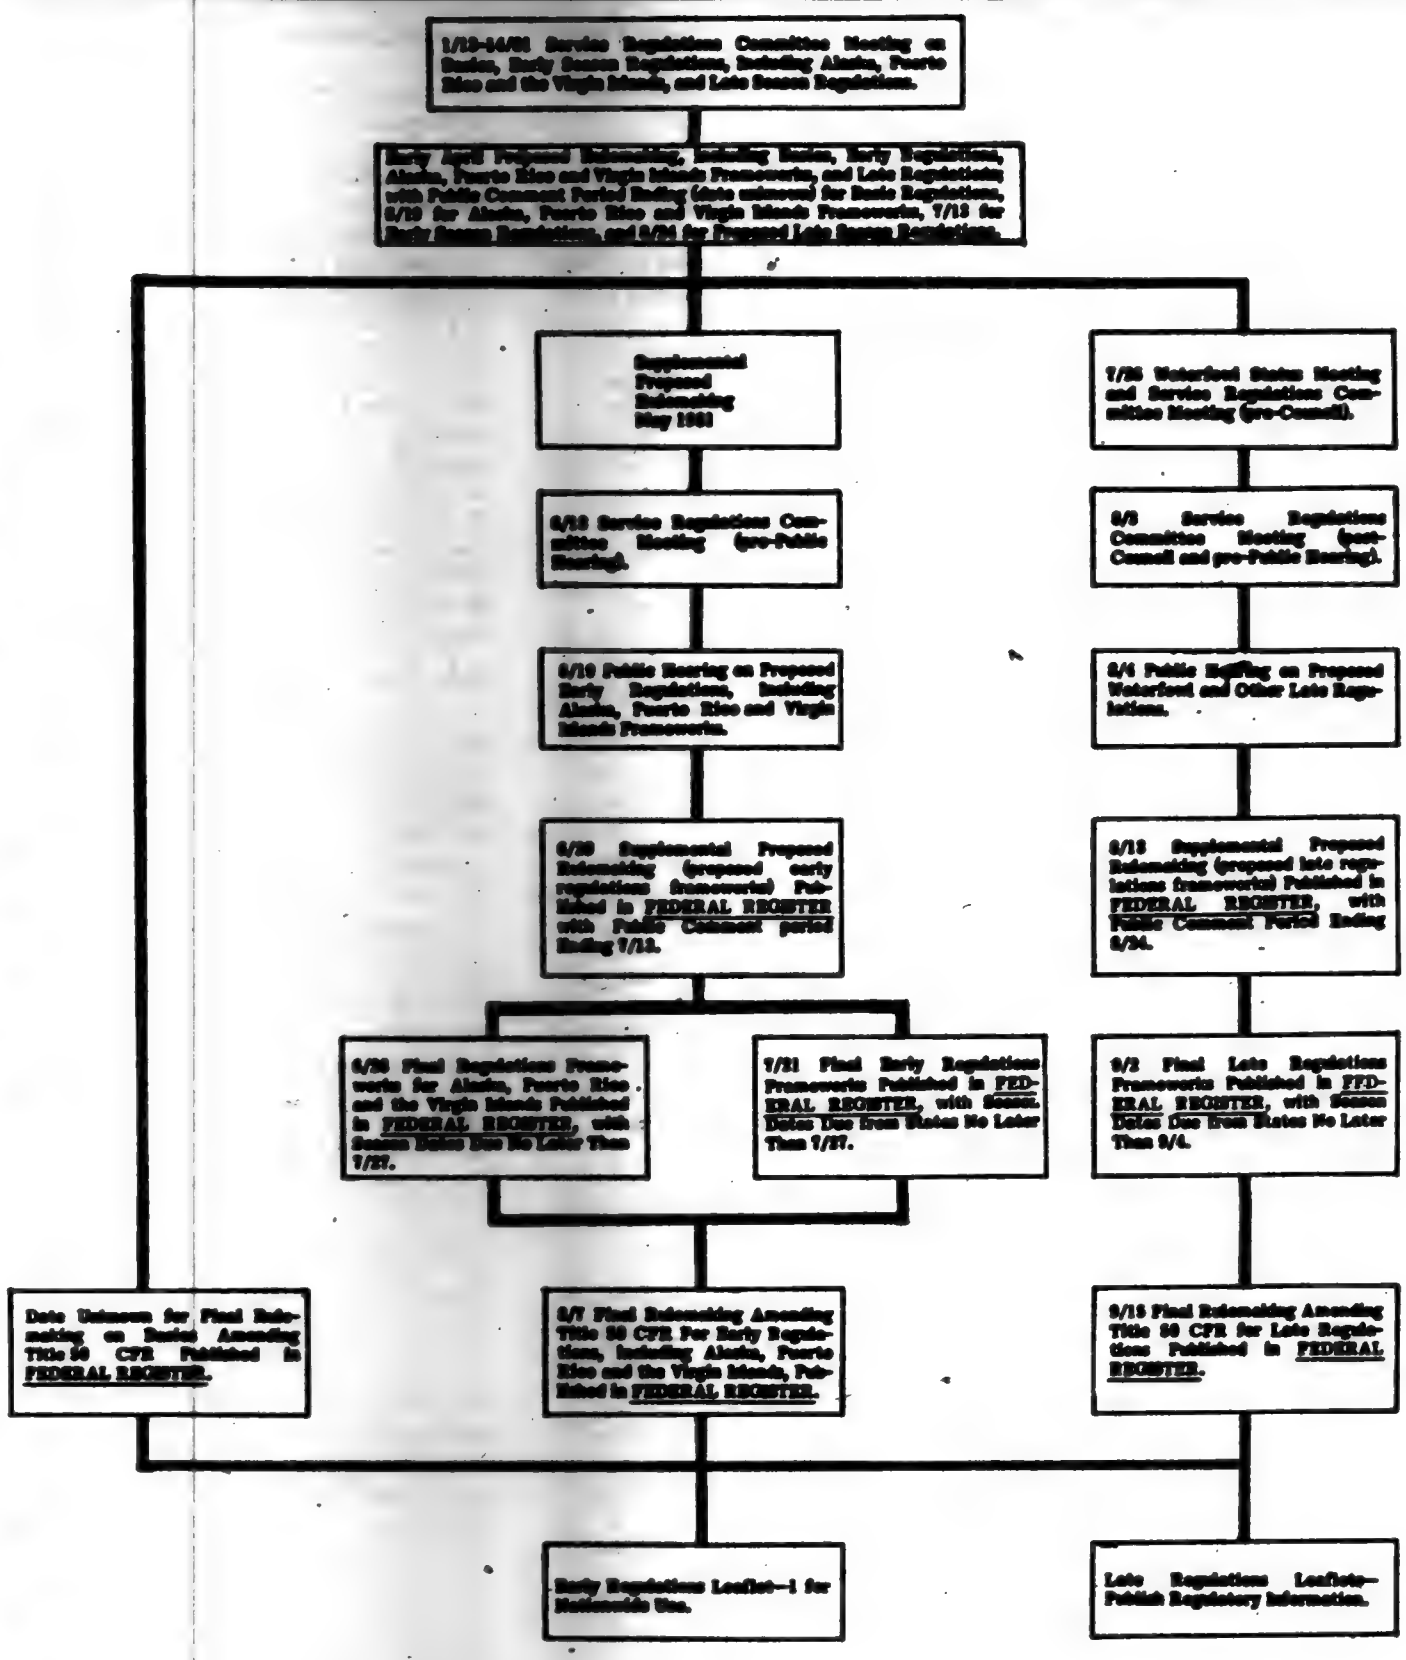
1. Proposed rulemakings—proposals to amend Subpart K (and other subparts when necessary) of 50 CFR Part 20, including supplementary proposed migratory game bird hunting regulations, and/or regulations frameworks which prescribe season lengths, bag and possession limits, shooting hours, and outside dates within which States may make season selections.

2. Final rulemakings—frameworks. Final migratory game bird regulations framework which prescribe season lengths, bag and possession limits, shooting hours, and outside dates within which States may make season selections.

3. Final rulemakings—season selections. Amendments to the various specific sections of Subpart K (and other subparts when necessary) of 50 CFR Part 20 based on the final migratory game bird hunting regulations and the final regulations frameworks and on season selections made and communicated by the States to the Service.

Major steps in the 1981–82 regulatory cycle relating to public hearings and Federal Register notifications are illustrated in the accompanying diagram.

BILLING CODE 4310-55-M



1981 SCHEDULE OF REGULATIONS MEETINGS

AND

PUBLICATIONS IN THE FEDERAL REGISTER

BILLING CODE 4310-55-C

All dates shown for frameworks and seasons in the Service's regulatory documents are inclusive.

Non-toxic shot regulatory proposals and final regulations are published separately under section 20.21 of subpart C and section 20.108 of Subpart K.

Objectives of the Migratory Bird Hunting Regulations

The objectives of these annual regulations are as follows:

(1) To provide an opportunity to harvest a portion of certain migratory game bird populations by establishing legal hunting seasons.

(2) To limit harvest of migratory game birds to levels compatible with their ability to maintain their populations.

(3) To avoid the taking of endangered or threatened species so that their continued existence is not jeopardized, and their conservation is enhanced.

(4) To limit taking of other protected species where there is a reasonable possibility that hunting is likely to adversely affect their populations.

(5) To provide equitable hunting opportunity in various parts of the country within limits imposed by abundance, migration, and distribution patterns of migratory game birds.

(6) To assist, at times and in specific locations, in preventing depredations on agricultural crops by migratory game birds.

The management of mirgratory birds in North America is international in scope, and involves other nations, notably Canada and Mexico. Within the United States, other Federal agencies, State conservation agencies, national and regional conservation groups, universities, and the public provide much support to the achievement of these objectives.

Data Used in Regulatory Decisions

The establishment of hunting regulations for migratory game birds in the United States during the 1981–82 season will take into consideration available population information, data from harvest surveys, and information on habitat conditions. Consideration will also be given to accumulated data and trends. The main sources of data result from operational surveys conducted by the U.S. Fish and Wildlife Service in cooperation with the Canadian Wildlife Service, Direccion General de la Fauna Silvestre of Mexico, State and Provincial wildlife agencies, and others. The Service will also consider technical information provided by consultants of the four waterfowl flyway councils. The information from these sources will be analyzed by the U.S. Fish and Wildlife Service with an opportunity for the public to review and provide comments on management rationales and proposed regulations, either in public hearings, by correspondence, or other communications.

Various surveys are used to ascertain the status, condition, and trends of migratory game bird populations. These include annual surveys of major waterfowl wintering habitats in the United States and in portions of Mexico each January; aerial surveys of major waterfowl production areas in the United States and Canada in May and early June for breeding population data, and again in July for production information; nationwide surveys in the United States and Canada of waterfowl hunters and the waterfowl harvest, including their geographical and temporal distributions, and species, age, and sex composition of the harvest; and band recovery information. Waterfowl breeding pair and production surveys also provide information on the abundance, duration, and quality of water and other habitat conditions in major production areas. Information on waterfowl populations and habitat conditions outside the aerial survey area is furnished by cooperating State, Provincial and private agencies. Banding information provides insight into shooting pressures sustained by migratory game bird populations under different population levels and types of regulations. When viewed over many years, information on harvests and regulations is useful for predicting approximate harvest levels which may result from various regulation changes.

Many of the surveys conducted primarily for ducks also provide information on geese. In addition, satellite imagery is used to monitor the rate at which snow and ice disappear from subarctic and arctic breeding grounds traditionally used by most species, and the greatest numbers of North American geese. Field observations of geese in the fall and winter also provide information on the production success of the past breeding season. Special population surveys are undertaken for many identifiable populations of geese throughout the year.

The annual call-count survey conducted nationwide in the United States in late May and early June provides information on the breeding population index of mourning doves. Information from past years and the current year is used to establish population trends. The woodcock singing-ground survey is conducted throughout the breeding range of the species in the eastern United States and Canada. Insight into production success is provided by wing-collection surveys of woodcock hunters in the United States and Canada; data from these surveys indicate the age and sex composition of the harvest and its geographical and temporal distribution. Accumulated and current data are examined for possible long-term trends in population size and productivity. Information on white-winged dove populations in Texas and the Southwest is provided by cooperating State agencies. Winter and spring surveys of sandhill cranes are conducted annually on major wintering areas and at the key staging area of the species along the Platte River in central Nebraska. The Service also solicits information on these and other species from knowledgeable individuals.

Definitions of Flyways

Flyways are biological-ecological units frequently used for reference in setting hunting regulations on many migratory game birds. These are defined as follows:

Atlantic Flyway: Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

Mississippi Flyway: Alabama, Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Ohio, Tennessee, and Wisconsin.

Central Flyway: Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas; Colorado and Wyoming east of the Continental Divide; Montana east of Hill, Chouteau, Cascade, Meagher and Park Counties; and New Mexico east of the Continental Divide but outside the Jicarilla Apache Indian Reservation.

Pacific Flyway: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington; those portions of Colorado and Wyoming lying west of the Continental Divide; New Mexico west of the Continental Divide plus the Jicarilla Apache Indian Reservation; and in Montana, the counties of Hill, Chouteau, Cascade, Meagher, and Park, and all counties west thereof. Flights of most migratory game birds breeding or produced in Alaska are more strongly oriented to this flyway than to the other flyways.

Hearings

Two public hearings pertaining to migratory bird hunting regulations being

considered for the 1981–82 hunting seasons are scheduled. Both meetings will be conducted in accordance with 455 DM 1 of the Departmental Manual. On June 19 a public hearing for reviewing proposed hunting regulations for species for which early seasons (opening prior to October 1) are set will be held at 9 o'clock in the Auditorium of the Department of the Interior Building, on C Street, between 18th and 19th Streets, NW., Washington, D.C. This hearing is scheduled primarily for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, and common snipe. Proposed hunting regulations will be discussed for these species plus regulations for sandhill cranes in some States; migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons; and special sea duck seasons in the Atlantic Flyway. On August 4 a public hearing for reviewing the status of other waterfowl and consideration of proposed regulations for those waterfowl and other migratory game birds for which regulations were not previously formulated will be held at 9 o'clock in the Auditorium of the Department of the Interior Building, address above. These deliberations will pertain to seasons commencing October 1 or later. The public is invited to participate in both hearings.

Persons wishing to participate in these hearings should write the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, or telephone AC 202–254–3207. Those wishing to make statements should file copies of them with the Director before or during each hearing.

Public Comments Solicited

Based on the results of current migratory game bird studies and having due consideration of all data and views submitted by interested parties, the amendments resulting from these proposals will specify open seasons, shooting hours, and bag and possession limits for doves, pigeons, rails, gallinules, woodcock, common snipe, coots, cranes, and waterfowl; coots, cranes, common snipe and waterfowl in Alaska; sea ducks in coastal waters of certain eastern States; migratory game birds in Puerto Rico and the Virgin Islands; and mourning doves in Hawaii.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons are invited to submit written comments, suggestions, or recommendations regarding the proposed amendments.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals.

Final promulgation of migratory bird hunting regulations will take into consideration all comments received by the Director. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals. Interested persons are invited to participate in this rulemaking by submitting written comments as follows:

For comments on Proposed 1981–82 Migratory Game Bird Hunting Regulations (preliminary) write to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Comments received on the proposed annual regulations will be available for public inspection during normal business hours at the Service's office in Room 525–B, Matomic Building, 1717 H Street, NW., Washington, D.C. The Service will acknowledge but may not respond in detail to each comment. Specific comment periods will be established for each of the three series of proposed rulemakings. Experience has shown that in some cases public comments were received after the close of an established comment period but before a supplemental rulemaking on the same regulatory topic appeared in the Federal Register, thus opening a new comment period. In order to alleviate this confusion, all relevant comments will be accepted through the closing date of the last comment period opened on the particular proposal under consideration. As in the past, the Service will summarize all comments received during the comment period and respond to them.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the Federal Register on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement.

Endangered Species Act Consideration

Prior to finalization of the 1981–82 migratory game bird hunting regulations, consideration will be given to provisions of the Endangered Species Act of 1973, and as amended, (16 U.S.C. 1531–1543; hereinafter the Act) to insure that hunting is not likely to jeopardize the continued existence of any species designated as endangered or threatened or modify or destroy its critical habitat and is consistent with conservation programs for those species. Consultations under section 7 of this Act may cause changes to be made to proposals in this and future supplemental proposed rulemaking documents.

Determinations of Significance, Major Rules, and Regulatory Flexibility Act Consideration

A new law, regulations, and an executive order now supplement and provide additional procedures to be followed by Federal agencies in developing new regulations. These include:

Regulatory Flexibility Act (Public Law 96–354), which became effective on January 1, 1981;

Interim Regulations Implementing the Regulatory Flexibility Act (at 45 FR 95376 in the Federal Register dated December 24, 1980);

Executive Order 12291 of February 17, 1981 (at 46 FR 13193 in the Federal Register dated February 19, 1981), which also revoked Executive Order 12044.

The Service's actions in complying with these requirements in developing its initial migratory bird hunting regulations for the 1981–82 season follow in chronological order.

On January 15, 1981, the Assistant Secretary determined that the Service's rules establishing annual hunting regulations are significant and that no regulatory analysis is required under E.O. 12044. However, the rules were determined to have a substantial impact on small entities, as defined in the Regulatory Flexibility Act, and a regulatory flexibility analysis as described under 5 U.S.C. 601–612 would be prepared. The Assistant Secretary further granted the Service a partial exemption from the Departmental procedures implementing E.O. 12044 and 5 U.S.C. 601–612 for developing significant rules and those with substantial effect on small entities.

Additional requirements regarding the promulgation of new rules are contained in Executive Order 12291, dated February 17, 1981, which revoked E.O. 12044. E.O. 12291 specifies that different

procedures be followed for developing rules determined to be "major." One criterion for determining that a rule is "major" is that it have an annual effect on the economy of $100 million or more. Available data indicate that annual expenditures related to migratory bird hunting exceed this amount, and provide economic benefits in excess of one billion dollars. Thus, the Service considers its annual hunting regulations as "major" rules under E.O. 12291, and subject to the new requirements.

Need for Regulatory Analyses. The Office of Management and Budget (OMB) has indicated to the Service special procedures it should follow in developing its regulatory analyses. Among these is a recommendation that the analyses required by the Regulatory Flexibility Act and Executive Order 12291 be consolidated. The information to be included in the Regulatory Impact Analysis is described in Section 3(d)(1–5) of E.O. 12291, while the contents of the small entity flexibility analysis requirements of the Regulatory Flexibility Act are found in Section 14.9 of the Interim Rules. Section 14.3(f)(ii)(B) of the Interim Regulations provides that an Agency may include a summary statement of its regulatory flexibility analysis with its proposed rule in the **Federal Register.**

Pursuant to Executive Order 12291, a regulatory analysis must describe the potential benefits and costs of the rule, including those not quantifiable in monetary terms, and identify those persons likely to receive the benefits or bear the costs. The description is to identify the net benefits of the rule, alternative approaches that could substantially achieve the same regulatory goal at lower cost, and include a brief explanation of the legal reasons why such alternatives, if proposed, could not be adopted. Small entities are also to be considered, with an estimate of affected small entities provided, together with a description of the projected information collection, recordkeeping and other compliance requirements of the rule. An estimate of the classes of small entities subject to the requirements and their compliance burdens, are to be included. Again, a description must be made by significant alternatives to the rule which would accomplish the stated objectives of applicable statutes and minimize any significant economic effect of the rule on small entities.

Discussions with OMB resulted in agreement to provide available data on the above points at the time of this proposed rulemaking. Further economic and small entity data will be developed by the Service and provided in a final regulatory analysis before issuing final rulemakings for the 1981 season later this year. Discussions with OMB indicate that, in a manner consistent with section 3 of the Migratory Bird Treaty Act, this analysis will be focused on determining the economic effects of varying season lengths (number of hunting days) and bag limits. The final regulatory analysis will describe the additional information which must be gathered to improve the economic analysis prior to issuing regulations for next year's (1982) season.

The Service's preliminary regulatory impact analysis provides data on the effects of setting open seasons and bag limits for migratory bird hunting. Data available to the Service indicate that migratory bird hunting is a major form of recreation which is of importance to many segments of the economy. The *1975 National Survey of Hunting, Fishing and Wildlife-Associated Recreation* states that 8.8 million hunters participated in 87.7 million days of migratory bird hunting in the United States in 1975. Their expenditures totaled $949 million, which after adjustment by the Consumer Price Index represents 1.45 billion 1981 dollars. Hunter expenditures were incurred for equipment and supplies; private transportation; food, drink, and refreshments; public transportation; lodging; and fees. These expenditures benefit a large number of individuals and businesses, many of which would be classed as "small businesses."

The initial analysis also outlines steps planned to review and gather additional information needed for the final analysis. In this respect, the Service solicits information and data which might be useful in its analysis. Such material should be sent to the Director (MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Copies of the Service's initial analysis may be obtained upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240. The final regulatory analysis relating to the proposed 1981–82 regulations will be available in late June.

Authorship

The primary author of the proposed rules on annual hunting regulations is Henry M. Reeves, Office of Migratory Bird Management, working under the direction of John P. Rogers, Chief, AC 202–254–3207.

Proposed 1981–82 Migratory Game Bird Hunting Regulations (preliminary)

The following general frameworks and guidelines for hunting certain waterfowl, sandhill cranes, mourning doves, white-winged doves, Zenaida doves, scaly-naped pigeons, band-tailed pigeons, gallinules, rails, coots, common snipe and woodcock are proposed during the 1981–82 season. Changes or possible changes, when noted, are in comparison to 1980–81 final frameworks or regulations, and reflect the Service's position at this time. As noted earlier, public responses, additional data and information, and other considerations may lead to changes in the regulations being proposed at this time. In this respect, date changes of one or two days, because of the 1981–82 calendars causing dates to fall on different days of the week, are regarded as "no change." All mentioned dates are inclusive. The Service also wishes to alert the public to various recommentations it has received since the 1980–81 regulations were finalized, and prior to the initiation of this year's regulatory cycle.

Stablized Regulations for Duck Hunting. During the 1980–81 hunting season, the Service implemented a program of stabilized regulations (numbers of hunting days and limits) for ducks in the United States. On July 1, 1980, the Service advised in the **Federal Register** (at 45 FR 44546) that it planned to take this action in connection with an evaluation program to be conducted in cooperation with the Canadian Wildlife Service. A stabilized regulations program was initiated in Canada in the 1979–80 hunting season. The study was described at that time, and is repeated for informational purposes as follows:

At the Public Hearing held on August 2, 1979, to review the proposed waterfowl and other late hunting season regulations, the Canadian Wildlife Service announced its intention to initiate a new waterfowl management program that had been developed cooperatively with the Provinces of Alberta, Manitoba, and Saskatchewan. A major element of this program is the stabilization of waterfowl hunting regulations for five years. The Service, in responding to the Canadian statement, noted that annual changes in hunting regulations constitute a source of difficulty in understanding the population dynamics of waterfowl, particularly the relationship between regulations and harvest rates. It also noted the advantages of the two nations jointly implementing a study of stabilized regulations.

Duck bag limits and season lengths have not been markedly altered among years in the United States for some time. The objectives of this approach have been to hold hunting opportunity reasonably constant, but within a range that would not result in an

overharvest of any population, and to provide an opportunity to define more precisely the relationships between regulations and harvest.

During the past few months, the Service has been discussing a cooperative study with Canadian Wildlife Service aimed at investigating more thoroughly the impact of environmental variables on waterfowl populations. To this end, the Service proposes to initiate a program in which hunting regulations during the next five years in each of the Flyways would be maintained at the same general levels as during the 1979–80 hunting season. The focus of the program would be primarily on ducks, and on seasons and bag limits. Consideration will be given to special situations regarding particular species or other aspects of the regulations. An environmental assessment is in preparation in which the proposed program will be examined in more detail, and criteria to be used in guiding it will be defined. The assessment will be made available for public review as soon as possible. The Service proposes to conduct the program in cooperation with the State wildlife agencies and the Canadian Wildlife Service. The program will provide a unique opportunity to study the impact of hunting on North American waterfowl, and to initiate or redirect studies relating to other aspects of waterfowl population dynamics.

The assessment noted above was subsequently issued, and copies are available from the Office of Migratory Bird Management. The hunting regulations for the 1980–81 season incorporated the concept of regulations stability and represent the first year of a five-year study. The Service proposes to continue with the program of stabilized regulations during the 1981–82 hunting season.

It is therefore proposed to amend 50 CFR Part 20 as follows:

1. *Shooting hours.* (No change.) Basic shooting hours beginning one-half hour before sunrise and ending at sunset are proposed with the option that more restrictive shooting hours within this framework may be selected by the States or may be established for special seasons.

Shooting hours were subjected to extensive review and discussion during the regulatory process for the 1977–78 hunting seasons. The Service undertook a study of information and data in its files and prepared an environmental assessment on shooting hours which was made available to the public in August 1977. The Director concluded, after study of this assessment, that the proposed shooting hours did not constitute a major impact upon the environment, and signed a negative declaration to the effect. Copies of the assessment are available and can be supplied upon request to the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

The Service adopts and incorporates by reference for purposes of this rulemaking the rationale for the proposed shooting hours set forth in the four past years' proposed and final regulations for migratory bird hunting. Because of the interest in the shooting hours issue, the Service has continued to gather and analyze additional data. Reports will be made available after analyses have been completed.

2. *Framework dates for ducks and geese in the continental United States.* (No change.) These frameworks are to be generally the same as during the 1980–81 season. From October 1, 1981, to January 20, 1982 for the Atlantic Flyway; from October 3, 1981, to January 20, 1982, for the Mississippi Flyway; and from October 3, 1981, through January 17, 1982, for the Central and Pacific Flyways, with the following exceptions:

(a) Sea ducks: in designated sea duck hunting areas in the Atlantic Flyway-September 15, 1981, through January 20, 1982.

(b) September teal season framework: September 1 through September 30, 1981, in specified areas to be identified in response to public comments.

(c) Special scaup season framework: October 1, 1981, through January 31, 1982, in specified areas to be identified in response to public comments.

(d) Experimental season frameworks: In Iowa, up to 7 days of the regular duck season may begin as early as September 19, 1981. In Mississippi, the waterfowl season framework may extend to January 31, 1982.

(e) Snow (including blue) and white-fronted geese: In Louisiana, between October 3, 1981, and February 14, 1982, in zones established for duck hunting seasons.

(f) Pacific Flyway brant season framework: Deferred pending additional information.

(g) Alaska waterfowl: September 1, 1981, through January 26, 1982.

3. *Black ducks.* (No change.) An environmental assessment of proposed hunting regulations for black ducks was issued by the Service in August 1976. Subsequently, a three-year cooperative research and management program was developed by the Service and States of the Atlantic and Mississippi Flyways. This was reported in the Federal Register dated March 10, 1977; 42 FR 13315, and for informational purposes is repeated as follows:

A research and management program for this species is presently being developed by the Service in cooperation with States in the Atlantic and Mississippi Flyways. The first phase of this program calls for a three-year intensified winter banding program in these Flyways. The winter banding program is under way now. During this period, restrictive black duck bag limits similar to those in effect in 1976 are to be retained. The winter banding program will be supplemented by pre-season banding of black ducks. In line with this effort, the Atlantic Flyway Council's Eastern Canada Cooperative Banding Program was renewed in 1976 for a 5-year period. Information from these banding programs, and from other sources, will be used to establish values for certain black duck population parameters. Future management programs will be evaluated by measuring the effect of such programs on black duck population parameters developed from the 1977–79 banding programs.

In order to assure achievement of banding objectives, the banding program was extended to include the 1980 winter and pre-season banding periods. Pending the analysis of data derived from the banding study, as well as from other sources, and the completion of a black duck management plan currently under development in a joint effort by the U.S. Fish and Wildlife Service, Canadian Wildlife Service, and the Atlantic Flyway Council, no changes in black duck hunting regulations are proposed.

4. *Wood ducks.* (No change.) In 1977 regulations for this species were changed to permit southeastern States the option of an early October hunting season during which no special bag and possession limits applied under conventional regulations; under point system regulations, the species was placed in the mid-point category. The criteria for such seasons were described in the Federal Register dated May 25, 1977 (42 FR 26869), and are summarized and updated for informational purposes:

The southeastern United States is defined as Virginia, Kentucky, Tennessee, Arkansas, and Louisiana and all States east thereof in the Atlantic and Mississippi Flyways. The Service proposes to again consider regulations aimed at additional wood duck harvest in the southeastern States only within the following guidelines:

(a) In 1981 States in the southeastern United States may split their regular duck hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15.

(b) During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway in 1981 shall apply to wood ducks, and under the point system, the point value for wood ducks shall be reduced from the high to the mid-point category. For other species of ducks daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations.

(c) In addition, the extra blue-winged teal option available to States in the Atlantic and Mississippi Flyways that select conventional regulations and do not have a September teal season may be applied during the period.

(d) This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

(e) This special provision for wood ducks shall be regarded as experimental, and subject to annual and final evaluations by participating States of population, harvest, banding, and other available information.

(f) The experiment shall be conducted for a specified time period to be agreed upon between the Service and participating States.

The Service proposes to retain this option for the 1981 season.

Although no changes are proposed in the wood duck frameworks at this time, the Service notes that some southeastern States have indicated the early October option does not adequately provide for early season wood duck harvest opportunity. Last year these States requested that other arrangements be considered, and have indicated that they wish to discuss this matter further during the 1981 regulatory process. The Service will consult with interested States, flyway councils, and others on this matter, and any new proposal which may be forthcoming will be published in the **Federal Register** for public comment.

5. *Sea ducks.* (No change.) A maximum open season of 107 days for taking scoter, eider, and oldsquaw ducks is proposed during the period between September 15, 1981, and January 20, 1982, in all coastal waters and all waters of rivers and streams seaward from the first upstream bridge in Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut; in those coastal waters of New York lying in Long Island and Block Island Sounds and associated bays eastward from a line running between Miamogue Point in the town of Riverhead to Red Cedar Point in the town of Southampton, including any ocean waters of New York lying south of Long Island; in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 1 mile of open water from any shore, island, and emergent vegetation in New Jersey, South Carolina, and Georgia; and in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 800 yards of open waters from any shore, island, and emergent vegetation in Delaware, Maryland, North Carolina, and Virginia. Such areas shall be described, delineated, and designated as special sea duck hunting areas under the hunting regulations adopted by the respective States. In all other areas of these States and in all other States in the Atlantic Flyway, sea ducks may be taken only during the regular open season for ducks.

The daily bag limit is 7 and the possession limit is 14, singly or in the aggregate of these species. During the regular duck season in the Atlantic Flyway, States may set, in addition to the regular limits, a daily bag limit of 7 and a possession limit of 14 scoter, eider, and oldsquaw ducks, singly or in the aggregate of these species.

Any State desiring its sea duck season to open in September must make its selection no later than July 27, 1981. Those States desiring their sea duck season to open after September may make their selection at the time they select their waterfowl seasons.

6. *September teal season.* (No change.) An open season on all species of teal may be selected by Alabama, Arkansas, Colorado (Central Flyway portion), Illinois, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, New Mexico (Central Flyway portion), Ohio, Oklahoma, Tennessee and Texas in areas delineated by State regulations.

Shooting hours are from sunrise to sunset daily. The season may not exceed 9 consecutive days with a bag limit of 4 teal daily and 8 in possession. States must advise the Service of season dates and special provisions to protect nontarget species by July 27, 1981.

The Service has received a request from Florida that September teal hunting be permitted there during the 1981 season. No action is proposed at this time pending further evaluation.

7. *Extra blue-winged teal option.* (No change.) States in the Atlantic, Mississippi, and Central Flyways selecting neither a September teal season nor the point system may select an extra daily bag of 2 and possession limit of 4 blue-winged teal for 9 consecutive days designated during the regular duck season. These extra limits are in addition to the regular duck and possession limits.

8. *Special scaup season.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with a daily bag limit of 5 and possession limit of 10 scaup. This special season is subject to the following conditions:

1. The season must occur between October 1, 1981, and January 31, 1982.

2. The season must occur outside the open season for any other ducks except sea ducks.

3. The season is limited to areas mutually agreed upon between the State and the Service prior to September 1, 1981, and

4. These areas must be described and delineated in State hunting regulations.

5. In lieu of a special scaup only season, Vermont may, for the Lake Champlain Area, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate, and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate subject to the same provisions that apply to special scaup seasons elsewhere.

9. *Extra scaup option.* (No change.) As an alternative to a special scaup season, States in the Atlantic, Missippi, and Central Flyways, except those selecting the point system, may select an extra daily bag of 2 and possession limit of 4 scaup during the regular duck hunting season, subject to conditions 3 and 4 listed for special scaup seasons. These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

10. *Mergansers.* (No change.) States in the Atlantic and Mississippi Flyways may select separate bag limits for mergansers in addition to the regular duck bag limits during the regular duck season. The bag limit is 5 daily and 10 in possession. Elsewhere, mergansers are included within the regular daily bag and possession limits for ducks. The restriction on hooded mergansers of 1 daily and 2 in possession is continued in the Atlantic, Mississippi, and Central Flyways.

11. *Canvasback and redhead ducks.* (No change.) Except in designated portions of the Atlantic Flyway, no changes in hunting frameworks for canvasbacks are proposed at this time. No changes in the redhead frameworks are proposed at this time. Additional information on the population status and trends of thw two species, plus their production success this summer, will become available prior to the date that the frameworks for the 1981–82 season are finalized. The management rationales for canvasbacks and redheads were described in an environmental assessment issued in August 1976. As an outgrowth of the assessment, a number of area closures were established where full protection from hunting was given to the two species. In other areas, minimal harvests were allowed under the point system and conventional regulations. Area closures for redheads were judged unnecessary and were eliminated in 1980 because of the improved status of that species. The assessment also established short-term and long-term population objectives.

The Service conditionally proposes to implement this year a special, limited canvasback season directed primarily at the harvest of drakes on a trial basis in designated areas of the Atlantic Flyway. Conditions affecting the implementation of the trial season include population levels, habitat conditions, and production of canvasbacks during the 1981 breeding season. The proposal for such a season was first made in 1979 (see FR 9884, dated February 15, 1979). A modified proposal was considered in 1980 by the Service but not implemented because of poor canvasback production during the 1980 breeding season (at 45 FR 53963 dated August 13, 1980). The Atlantic Flyway Council was advised that implementation of the proposal would be deferred, pending a year of good production.

In order to facilitate public understanding of the proposal and response to it, the plan as formulated by the Atlantic Flyway Council and modified by the Service is provided below:

1. Duration of the experimental season: 3 years.

2. Season length: 11 days, to be taken during the last 11 days of each participating State's regular waterfowl season, and limited to the areas described below.

3. Bag limit: conventional—4 canvasbacks, only 1 of which may be a female; point system—male, 25 points; female, 100 points. The possession limits would be twice the daily bag limits.

4. Harvest guidelines: not to exceed 10 percent of the wintering population (3-year average) in each harvest area, and the 3-year average harvest shall not exceed 10 percent of the combined wintering population (3-year average) in the 5-State area. The latter condition makes allowance for annual deviations in excess of the guideline during the study period. Emphasis will be placed on the harvest of male canvasbacks.

5. Harvest areas:

a. New York—Lake Cayuga and the Upper Niagara River between the Peace Bridge at Buffalo, New York, and the Niagara Falls.

b. New Jersey—(1) east of the Garden State Parkway from Route 440, south to Route 36 (Raritan and Sandy Hook Bays, Navesink and Shrewsbury Rivers); (2) east of the Garden State Parkway from Route 88 south to Route 72 (Barnegat, Silver and Manahawkin Bays, Metedeconk and Toms Rivers).

c. Maryland—Anne Arundel, Calvert, St. Marys, Charles, and Prince Georges Counties; the Chesapeake Bay western shore and its tributaries to the first upstream bridge; and the Potomac River downstream from the Possum Point Power Plant (on Virginia side).

d. Virginia—In waters bordering on and tributary to the Potomac River below the Possum Point Power Plant, but in no case above any highway bridge across such tributaries; in the Rappahannock River upstream to Route 360; and in the Chesapeake Bay and its tributaries between the Potomac River and the Rappahannock River in Lancaster County, and in Northumberland County upstream to Routes 644 and 200. An east-west line from Stingray Point, Middlesex County, to the main channel of the bay constitutes the southern boundary of the canvasback harvest zone; the main channel forms the eastern boundary and the Maryland state line forms the northern boundary.

e. North Carolina—that portion of Pamlico Sound in Hyde County from Long Shoal River, west; Beaufort County, and Pamlico County from the Beaufort County line east to and including Jones Bay.

In the above proposal the remaining portions of areas in each of the five participating States presently closed to the taking of canvasbacks shall remain closed.

As an option, Maryland and Virginia may select a 6- (rather than 11-) day season that would apply to a larger portion of Chesapeake Bay and its tributaries than is designated above. The areas open for hunting will be selected and described in consultation with Maryland and Virginia.

Evaluation of the experimental season would be a cooperative State-Federal effort. The Service would require, as one condition of the proposed experimental season, that an adequate sampling frame of participants be developed by each State to permit the conduct of harvest surveys (questionnaries and waterfowl parts collections). Maryland, New Jersey, New York, and North Carolina would use a mandatory permit system; Virginia would use its blind registration system, plus a follow-up mailing to blind registrants to identify all participants in the experimental season. Each State would draw a random sample of hunters who would be provided harvest questionnaires and waterfowl parts collection envelopes by the State. The sampling procedure for each State would be determined later.

State and Federal officials would conduct hunter observations, bag checks and ground observations of waterfowl numbers, distribution, and behavior during the experimental canvasback season. In addition, aerial surveys would be made before, during, and following the experimental canvasback season to determine waterfowl species composition, numbers, and distribution; and to measure hunting pressure in the experimental season zones before, during, and following the experimental canvasback season. Aerial photographic surveys would be made on the Chesapeake Bay before and following the experimental canvasback season to measure, if possible, the effect of the harvest on the sex composition of the wintering canvasback population, and to assess changes in canvasback numbers and distribution more accurately than by visual estimates alone.

The analysis of hunter questionnaire, wing survey, and hunter observation data would be undertaken jointly by State and Federal biologists. The results of each experimental canvasback season would be provided in an annual report developed jointly by State and Federal personel.

The Service further proposes that the trial be limited to the Atlantic Flyway for a period of 3 years, and that results of the experiment be analyzed and made available for public review before considering similar trials elsewhere.

Wisconsin recommended that 3 canvasback closure areas (lakes of Poygan, Winneconne, and Butte des Morts in Winnebago and Waushara Counties) be abolished because of low canvasback use. Fall migrating canvasbacks have shifted their major migration route to the Mississippi River where other closure areas exist. The Service has this request under study.

12. *Zoning.* (Change.) States of the Atlantic and Mississippi Flyways may divide their States into zones for establishing different hunting seasons in accordance with criteria described in the Federal Register dated May 25, 1977; 42 FR 26671. States of the Central Flyway recently have requested that the zoning option be made available in that Flyway. The Service proposes to do so for the 1981–82 season. The criteria for zoning are as follows:

1. The establishment of any of these zones shall be considered experimental until the effects of the zoning are more clearly defined and understood.

2. The primary purpose of the zoning shall be to provide more equitable distribution of harvest opportunity for hunters throughout a State.

3. Proposed zones and season dates shall not substantially change the pattern of harvest distribution among the States within a flyway.

4. Zoning shall not detrimentally change the harvest distribution pattern among species or populations at either the State or Flyway level.

5. Each zoning proposal shall include a detailed evaluation plan describing how

changes in harvest will be measured, and what steps will be taken to compensate for any significant changes that might occur.

6. Each zoning proposal shall include an evaluation of anticipated changes due to zoning. If on the basis of this evaluation the Service and the State agree that no significant increase in harvest is likely, the zoning experiment may be conducted without a reduction in season length for each zone, pending further evaluation. If the evaluation indicates that a significant increase in harvest is likely, an appropriate reduction in season length compared to what would be permitted without zoning shall be made for each zone.

7. Where two or more adjoining States in a flyway may be involved simultaneously in zoning experiments, consideration shall be given to the possibility of consolidating zones.

Memoranda of Agreement have been signed between the Service and each State participating in the experimental zoning.

The Service recently received a zoning proposal from New Hampshire, and statements of interest from Colorado, Nebraska, Oklahoma, South Dakota, and Wyoming. With the approval of the respective Flyway Council of specific plans that meet the above criteria, the Service proposes to implement zoning studies in these States. Pennsylvania requested a modification in its zoning program whereby 4 zones, including a new Northwest Zone, would be used for establishing duck hunting regulations. The Service proposes to allow the modification with the understanding that a new 3-year study commence with the change, and other zoning requirements are fulfilled. Nebraska also has notified the Service that they are considering requests for other options such as a three-way split duck season or zoning. These options are not being proposed at this time by the Service.

13. *Goose and brant seasons.* The Canadian Wildlife Service, State conservation agencies, the four waterfowl flyway councils, and others traditionally provide population and harvest information useful in setting annual regulations for geese and brant. The midwinter survey, the past season's waterfowl harvest surveys, and satellite imagery and ground studies for May and June of 1981 will provide additional information later. The following proposed general regulations are subject to revision as additional information becomes available. No changes from 1980–81 regulations are proposed at this time.

Atlantic Flyway. Seasons and bag limits are to be generally the same as last year pending receipt of additional information and recommendations from the public. The following regulations are tentatively proposed:

Between October 1, 1981, and January 20, 1982, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, West Virginia, New Jersey, Maryland, and Virginia (excluding those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17) may select 70-day seasons on Canada geese; the daily bag and possession limits will be 3 and 6 geese, respectively. However, in the area comprised of Delaware, the Delmarva Peninsula portions of Maryland and Virginia, that portion of Pennsylvania lying east and south of a boundary beginning at Interstate Highway 83 at the Maryland border and extending north to Harrisburg, and then east on U.S. Highway 22 to the New Jersey border, and that portion of New Jersey south of the Atlantic City Expressway from its juncture with Interstate 76 near Camden southeast to Atlantic City, the Canada goose season length will be 90 days with the closing framework date extended to January 31, 1982. The daily bag limit within this area may not exceed 4 birds with a possession limit of 8 birds. North Carolina and those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17 in Virginia may select 50-day seasons on Canada geese within the October 1, 1981, to January 20, 1982, framework; the daily bag and possession limits will be 2 and 4 Canada geese, respectively. South Carolina may select a 50-day season on Canada geese within the October 1, 1981, to January 20, 1982, framework. The daily bag and possession limits will be 1 and 2 Canada geese, respectively. The season will be closed on Canada geese in Florida and Georgia.

Between October 1, 1981, and January 20, 1982, States in the Atlantic Flyway may select 70-day seasons on snow geese (including blue geese); the daily bag and possession limits may not exceed 4 and 8 geese, respectively.

No open season is proposed for Atlantic brant pending further information on population status. Because of a reduced population, there has been no Atlantic brant hunting season since the 1975–1976 season. In 1979 the Service advised that a closed season would continue until the population has recovered from losses sustained during the winters of 1976–77 and 1977–78 to starvation and freezing, and poor production during 1978. Data indicate that the population made a moderate response to improved habitat conditions in 1979 and 1980. Reopening the Atlantic brant hunting season will be determined based on at least three data sources: (1) population inventories in February or March along the Atlantic coast, and in the fall on migration and wintering areas; (2) an evaluation of conditions on the breeding grounds as determined by satellite imagery, and air and ground inspections; and (3) an evaluation of breeding ground production and the age structure of the population.

Environmental assessments made available to the public in 1975 articulate the management rationale being followed for Atlantic brant and greater snow geese.

Mississippi Flyway. Seasons and bag limits for Canada geese to be generally the same as last year, that is, not to exceed 70 days and bag limits not to exceed 2 daily and 4 in possession pending additional information and recommendations. Seasons and bag limits for specific populations of Canada geese and for snow geese (including blue geese) and with-fronted geese are to be determined later when more information is available.

Harvests of the Eastern Prairie and Mississippi Valley Canada goose populations in this flyway are controlled by quota allocations. Specific quotas will be established after population management objectives, recent population information, probable production, and expected fall flights have been taken into consideration. It is intended that the entire quota can be safely taken without detriment to the population and that such harvests are justifiable under the appropriate population objectives. Goose seasons in quota areas end when the quota has been achieved and the season terminated by emergency order under provision of § 20.26 of Title 50, or when the permissible number of hunting days has expired.

Central Flyway. Seasons and bag limits for Canada, white-fronted, Ross', and snow geese (including blue geese) are deferred pending additional information and recommendations. No significant changes from those in effect in 1980–81 are anticipated at this time.

South Dakota reported that 303,000 Canada geese belonging to the Western Prairie Population remained along the Missouri River after the hunting season closed. This population has grown rapidly in recent years. South Dakota requested that the Service consider raising the daily bag limit for these geese in certain South Dakota counties from 1 to 2 birds. The Service will consider the request as additional

information becomes available from this year's surveys.

Pacific Flyway. (Possible change.) Seasons and bag limits to be generally the same as last year, that is, not to exceed 93 days with overall goose bag limits not to exceed 6 daily and in possession. Specific season frameworks, season lengths, and daily bag limits for geese are deferred pending additional information and recommendations. Possible regulatory changes in the Pacific Flyway include modifications of areas and times of hunting of Canada geese to provide necessary protection for the endangered Aleutian Canada goose. No action will be taken pending assembly and study of population and other data, and completion of consultations under section 7 of the Endangered Species Act.

14. *Whistling swan.* (No change.) In Utah, Nevada, and Montana, an open season for taking a limited number of whistling swans may be selected subject to the following conditions: (a) the season must run concurrently with the duck season; (b) in Utah, no more than 2,500 permits may be issued authorizing each permittee to take 1 whistling swan; (c) in Nevada, no more than 500 permits may be issued authorizing each permittee to take 1 whistling swan in Churchill County; (d) in Montana, no more than 500 permits may be issued authorizing each permittee to take 1 whistling swan in Teton County; (e) permit forms and correspondingly numbered metal locking seals furnished by the Service must be issued to hunters by the appropriate State conservation agency on an equitable basis without charge.

15. *Sandhill cranes.* (No change.) Pending evaluation of harvest data from the 1980 season, to be available later, seasons for hunting sandhill cranes may be selected within specified areas in Colorado, New Mexico, Texas, Oklahoma, North Dakota, South Dakota, Montana, and Wyoming with no substantial change in dates from the 1980–81 seasons and with a daily bag limit of 3 and a possession limit of 6 sandhill cranes. The provision for the Federal sandhill crane hunting permit is continued.

16. *Coot bag limit.* (No change.) Within the regular duck season, States in the Atlantic, Mississippi, and Central Flyways may permit a daily bag limit of 15 and a possession limit of 30 coots, and States in the Pacific Flyway may permit 25 coots daily and in possession, singly or in the aggregate with gallinules.

17. *Gallinules.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1981, and January 20, 1982, of not more than 70 days. States may split gallinule seasons without penalty. The daily bag and possession limits may not exceed 15 and 30, respectively. States may select gallinule seasons at the time they select their waterfowl seasons. In this case, daily bag and possession limits will remain the same and the season length may not exceed that for waterfowl, or 70 days, whichever is the shorter period.

States in the Pacific Flyway must select their gallinule hunting seasons within the waterfowl seasons. A gallinule season selected by any State or portion thereof in the Pacific Flyway may be the same as but not exceed its waterfowl season, and the daily bag and possession limits may not exceed 25 coots and gallinules, singly or in the aggregate of the two species.

18. *Rails.* (No change.) The States included herein may select seasons between September 1, 1981, and January 20, 1982, on clapper, king, sora, and Virginia rails as follows:

The season lengths for all species of rails may not exceed 70 days.

Clapper and king rails.

1. In Rhode Island, Connecticut, New Jersey, Delaware, and Maryland, the daily bag and possession limits may not exceed 10 and 20 clapper and king rails, respectively, singly or in the aggregate of these two species.

2. In Texas, Louisiana, Mississippi, Alabama, Georgia, Florida, South Carolina, North Carolina, and Virginia, the daily bag and possession limits may not exceed 15 and 30 clapper and king rails, respectively, singly or in the aggregate of the two species.

3. The season will remain closed on clapper and king rails in all other States.

Sora and Virginia rails.

In addition to the prescribed limits for king and clapper rails, daily bag and possession limits not exceeding 25, singly or in the aggregate of sora and Virginia rails, may be selected in States in the Atlantic, Mississippi, and Central Flyways, and portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway. No hunting season is proposed for rails in the remainder of the Pacific Flyway.

19. *Common snipe.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1981, and February 28, 1982, not to exceed 107 days, except that in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia the season must end no later than January 31. Seasons between September 1, 1981, and February 28, 1982, not exceeding 93 days may be selected in the Pacific Flyway portions of Montana, Wyoming, Colorado, and New Mexico.

All States in the Pacific Flyway except those portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway, must select their snipe seasons to run concurrently with their regular duck seasons. In these Pacific Flyway States, except portions of the four States noted previously, it will be unlawful to take snipe when it is unlawful to take ducks.

Daily bag and possession limits may not exceed 8 and 16, respectively. Any State may split its snipe season without penalty.

States or portions thereof in the three eastern flyways may defer selections of snipe seasons until the time they choose their waterfowl seasons in August. In that event, the daily bag and possession limits will remain the same but shooting hours must conform with those for waterfowl.

20. *Woodcock.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1981, and February 28, 1982, of not more than 65 days, with daily and possession limits of 5 and 10, respectively. In Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia the season must end by January 31. Any State may split its woodcock season without penalty. New Jersey may select woodcock hunting seasons by north and south zones divided by State Highway 70. Seasons in each zone may not exceed 55 days.

21. *Band-tailed pigeons.* (No change.)

West Coast States (California, Oregon, and Washington). These States may select hunting seasons not to exceed 30 consecutive days between September 1, 1981, and January 15, 1982. The daily bag and possession limits may not exceed 5 band-tailed pigeons.

California may zone by selecting hunting seasons of 30 consecutive days for each of the following two zones:

1. In the Counties of Alpine, Butte, Del Norte, Glenn, Humboldt, Lassen, Mendocino, Modoc, Plumas, Shasta, Sierra, Siskiyou, Tehama, and Trinity; and

2. The remainder of the State.

Four-Corner States: (Arizona, Colorado, New Mexico, and Utah). These States may select hunting seasons not to exceed 30 consecutive days between September 1 and November 30, 1981. The daily bag and possession limits may not exceed 5 and 10, respectively. Each hunter must have

been issued and carry while hunting band-tailed pigeons a valid band-tailed pigeon hunting permit issued by the respective State wildlife agency, and such permit will be valid in that State only. The season shall be open only in the areas delineated by the respective States in their hunting regulations. New Mexico may divide its State into two zones along a line following U.S. Highway 60 from the Arizona State line east to Interstate Highwy 25 at Socorro and along Interstate Highway 25 from Socorro to the Texas State line. Between September 1, 1981, and November 30, 1981, in the North Zone, and October 1, 1981, and November 30, 1981, in the South Zone, hunting seasons not to exceed 20 consecutive days in each zone may be selected.

22. *Mourning doves.* (No change.) Concern has been expressed by some organizations and individuals about the hunting of mourning doves in September.

Accordingly, the Service reviewed and analyzed available information and data on the subject and issued an environmental assessment in July 1977. It was concluded that hunting in September was not detrimental to overall mourning dove populations and that by not permitting September hunting, the opportunities for dove hunting would be curtailed in many areas. Field work in a cooperative Federal-State research program to obtain further information on this mater was completed in 1980 but the analysis of resulting data has not been completed. The results of this investigation will be used in future evaluations of September hunting of mourning doves.

The Service proposes the following regulations for this year.

Unless otherwise noted, the shooting hours are one-half hour before sunrise to sunset.

Between September 1, 1981, and January 15, 1982, except as noted, States may select hunting seasons and bag limits as follows:

Eastern Management Unit: All States east of the Mississippi River, and Louisiana.

1. Shooting hours between 12 o'clock noon and sunset daily, or as an option, between one-half hour before sunrise to sunset daily.

2. Daily bag and possession limits not to exceed 12 and 24, respectively, in all States;

3. Hunting seasons of not more than 70 half or full days which may run consecutively or be split into not more than three periods.

4. As an option to the above, Alabama, Georgia, Louisiana, and Mississippi may elect to zone their States as follows:

A. Two zones per State having the following descriptions or division lines:

Alabama.—The South Zone is defined as that area lying south of U.S. Highway 84 running east to the Covington County line, and including Coffee, Covington, Dale, Geneva, Henry, and Houston Counties. The North Zone consists of the remainder of Alabama.

Georgia.—The North Zone is defined as that area lying north of U.S. Highway 280 east to Abbeville, thence along Ocmulgee and Altamaha Rivers to the Atlantic Ocean. The South Zone consists of the remainder of Georgia.

Louisiana.—The North Zone is defined as that area lying north of Interstate Highway 10 from the Texas State line to Baton Rouge, Interstate Highway 12 from Baton Rouge to Slidell, and Interstate Highway 10 from Slidell to the Mississippi State Line. The South Zone consists of the remainder of Louisiana.

Mississippi.—The North Zone is defined as that area lying north of U.S. Highway 84. The South Zone consists of the remainder of Mississippi.

B. Within each zone, these States may select hunting seasons of not more than 70 half-days which may run consecutively or be split into not more than three periods.

C. The hunting seasons in the south zones of these States may commence no earlier than September 20, 1981.

Central Management Unit: Arkansas, Colorado, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

1. Daily bag and possession limits not to exceed 10 and 20, respectively, in all States;

2. Hunting seasons in all States of not more than 60 full days which may run consecutively or be split into not more than three periods.

3. Texas may select hunting seasons for each of two previously established zones subject to the following conditions:

A. The hunting season may be split into not more than two periods.

B. The North Zone may have a season of not more than 60 days between September 1, 1981, and January 22, 1982.

C. The South Zone may have a season of not more than 60 days between September 20, 1981, and January 22, 1982. In that portion of Texas where white-winged dove hunting is allowed, the mourning dove season may be held concurrently with the white-winged dove season and with shooting hours coinciding with those for white-winged doves. However, the remaining days must be within the September 20, 1981–January 22, 1982, period.

Texas may select hunting seasons for each of three zones (to be designated), subject to the following conditions:

A. The hunting season may be split into not more than two periods, except in that portion of Texas where white-winged dove hunting is allowed, the mourning dove season may be held concurrently with the white-winged dove season and with shooting hours coinciding with those for white-winged doves.

B. Each zone may have a season of not more than 60 days between September 1, 1981, and January 25, 1982.

4. In New Mexico, daily bag and possession limits of mourning and white-winged doves may not exceed 10 and 20, singly or in the aggregate of the two species.

Western Management Unit: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington.

1. Daily bag and possession limits not to exceed 10 and 20, respectively;

2. Hunting seasons of not more than 50 full days which may run consecutively or be split into not more than three periods (except in Arizona option and portions of Nevada and California described below). In the Nevada counties of Clark and Nye, and in the California counties of Imperial, Riverside, and San Bernardino, daily bag and possession limits of mourning and white-winged doves may not exceed 10 and 20, respectively, singly or in the aggregate of the two species.

Arizona may select for designated white-winged dove management units seasons of 70 half days beginning or ending at noon with a daily bag limit of 12 doves in the aggregate, no more than 6 of which may be white-winged doves, and a possession limit twice the daily bag limit after the opening day.

Wyoming indicated that it would propose an experimental increase in the mourning dove bag limit in northern States which cannot avail themselves of the full hunting season length because of early dove migration southward in early September. No specific limit was proposed. The Service desires to know the specifics of the proposal, including means by which any relaxation could be evaluated, before taking a position on the proposal and offering it for public consideration.

23. *White-winged doves.* (No change.) Arizona, California, Nevada, New Mexico, and Texas may select hunting seasons between September 1 and December 31, 1981, and daily bag limits as stipulated below.

Arizona may select a hunting season of not more than 29 consecutive days running concurrently with the first period of the split mourning dove season. The daily bag and possession limits may not exceed 10 white-winged doves, excepting in those areas selected under the option for mourning dove season of 70 half days where limits on white-winged doves shall be no more than 6 a day with 12 in possession after the opening day.

California may select a hunting season for the counties of Imperial, Riverside, and San Bernardino only. The daily bag and possession limits may not exceed 10 and 20 white-winged and mourning doves, respectively, singly or in the aggregate of the two species. Dates, limits, and hours are to conform with those for mourning doves.

Nevada may select a hunting season for the counties of Clark and Nye only. The daily bag and possession limits may not exceed 10 and 20 white-winged and mourning doves, respectively, singly or in the aggregate of the two species. Dates, limits and hours are to conform with those for mourning doves.

New Mexico may select a hunting season with daily bag and possession limits not to exceed 10 and 20 white-winged and mourning doves, respectively, singly or in the aggregate of the two species. Dates, limits, and hours are to conform with those for mourning doves.

Texas may select a hunting season, the length of which will be determined when information from State surveys is available, for that portion of the State where the species occurs. The daily bag and possession limits may not exceed 10 and 20 white-winged doves, respectively. The season may be split within the overall time frame.

24. *Migratory game bird seasons in Alaska.* (No change.) In 1977, by mutual agreement, the Service and the Alaska Department of Fish and Game initiated a study of stablized hunting regulations for the 5-year period, 1977 through 1981. Background information on this experiment was given in the Federal Register dated March 10, 1977; 42 FR 13317. Regulations proposed to be in effect during the 1981–82 season are as follows:

Proposed Frameworks for Selecting Open Season Dates for Hunting Migratory Birds in Alaska, 1981–82

Between September 1, 1981, and January 26, 1982, Alaska may select seasons on waterfowl, snipe, and cranes, subject to the following limitations:

1. *Shooting hours:* One-half hour before sunrise to sunset daily.

2. *Season lengths:*

A. In the Pribilof and Aleutian Islands, except Unimak Island, an open season of 107 consecutive days for ducks, geese, and brant. In the Kodiak (state game management unit 8) area, an open season of 107 days for ducks, geese, and brant, and the season may be split without penalty.

B. Exception: the season is closed on Canada geese from Unimak Pass westward in the Aleutian Island chain.

C. In the remainder of Alaska, including Unimak Island, an open season of 107 consecutive days for ducks, geese, and brant.

D. An open season for snipe concurrent with the duck season.

E. An open season for sandhill cranes concurrent with the duck season.

3. *Bag and possession limits:*

A. Ducks—Except as noted, a basic daily bag limit of 7 and a possession limit of 21 ducks. Daily bag and possession limits in the North Zone are 10 and 30, and in the Gulf Coast Zone they are 8 and 24, respectively. In addition to the basic limit, there is a daily bag limit of 15 and a possession limit of 30 scoter, eider, oldsquaw, harlequin, and American and red-breasted mergansers, singly or in the aggregate of these species.

B. Geese—A basic daily bag limit of 6 and a possession limit of 12, of which not more than 4 daily and 8 in possession may be white-fronted or Canada geese, singly or in the aggregate of these species. In addition to the basic limit, there is a daily bag limit of 6 and a possession limit of 12 Emperor geese.

C. Brant—A daily bag limit of 4 and a possession limit of 8.

D. Common Snipe—A daily bag limit of 8 and a possession limit of 16.

E. Sandhill cranes—A daily bag limit of 2 and a possession limit of 4.

25. *Migratory game birds in Puerto Rico and doves and pigeons in the Virgin Islands.* (Minor change.)

Proposed Frameworks for Selecting Open Season Dates for Hunting Migratory Birds in Puerto Rico, 1981–82

Doves and Pigeons. An open season of 60 days between September 1, 1981, and January 15, 1982, may be selected for hunting Zenaida, mourning and white-winged doves, and scaly-naped pigeons in Puerto Rico. Shooting hours may extend from one-half hour before sunrise until sunset daily. The daily bag and possession limit for doves of the species named herein is 10, singly or in the aggregate. The daily bag and possession limit for scaly-naped pigeons is 5. No open season is prescribed for pigeons on Mona Island in order to give the reduced population of white-crowned pigeon (*Columba leucocephala*) a chance to recover. No open season is prescribed for doves and pigeons in the municipality of Culebra and Desecheo Island. (The latter is a new restriction. Desecheo Island is included in a national wildlife refuge and inadvertently in past frameworks has not been shown as closed to hunting. The area has been closed under Commonwealth regulations.)

Special Closure for Protection of the Puerto Rican Parrot

No season is prescribed for doves and pigeons in those areas of the municipalities of Rio Grande and Loiza delineated as follows: (1) all lands lying east of Route 186 (from the town of El Verde in the north to the southernmost extent of Route 186) to the boundary of the Luquillo Experimental Forest; (2) all lands between Route 186 and Route 956 extending from an east-west line through the town of El Verde, south; (3) all lands lying west of Route 186 for one kilometer from the juncture of Routes 186 and 956 south to the southernmost point on Route 186; and (4) all lands within the Caribbean National Forest boundary, whether private or public lands. The purpose of these closures is to afford protection to the Puerto Rican parrot (*Amazona vittata*), presently listed as an endangered species under the Endangered Species Act of 1973.

Special Closure for Protection of the Plain Pigeon

The hunting of doves and pigeons of any species is prohibited in all of Cidra Municipality and in portions of Aguas Buenas, Caguas, Cayey, and Comerio Municipalities as encompassed within the following boundary: Beginning on Highway 172 as it leaves the Municipality of Cidra on the west edge, north to Highway 156, east on Highway 156 to Highway 1, south on Highway 1 to Highway 765, south on Highway 765 to Highway 763, south on Highway 763 to the Rio Guavate, west along Rio Guavate to Highway 1, southwest on Highway 1 to Highway 14, west on Highway 14 to Highway 729, north on Highway 729 to Cidra Municipality, and westerly, northerly, and easterly along the Cidra Municipality boundary to the point of beginning. The purpose of this closure is to protect the Puerto Rican Plain Pigeon (*Columba inornata*), locally known as Paloma Sabanero, which is known to be present in the above locale in small numbers and which is listed presently as an endangered species under the Endangered Species Act of 1973.

Ducks, Coots, Gallinules, and Snipe. A season of 55 consecutive days between December 1, 1981, and January 31, 1982, may be selected for hunting ducks, coots, common gallinules and common snipe.

Shooting hours may extend from one-half hour before sunrise until sunset daily.

The limits for ducks are 4 daily and 8 in possession except that the season is closed on the ruddy duck (*Oxyura jamaicensis*) and the Bahama pintail (*Anas bahamensis*), which are protected by the Commonwealth of Puerto Rico.

The limits for coots are 6 daily and 12 in possession.

The limits for common gallinules are 6 daily and 12 in possession. The season is closed on purple gallinules (*Porphyrula martinica*).

The limits for common snipe are 6 daily and 12 in possession.

No open season for ducks, coots, gallinules, and snipe is prescribed in the municipality of Culebra and Desecheo Island.

Proposed Framework for Selecting Open Season Dates For Hunting Migratory Birds in the Virgin Islands, 1981–82

Doves and pigeons. A season of 60 days between September 1, 1981, and January 15, 1982, may be selected for hunting Zenaida doves throughout the Virgin Islands, and scaly-naped pigeons on the island of St. Thomas only.

Shooting hours may extend from one-half hour before sunrise until sunset daily.

The daily bag and possession limits are 10 Zenaida doves and 5 scaly-naped pigeons.

No open season is prescribed for waterfowl, ground or quail doves, or other pigeons in the Virgin Islands.

Local Names for Certain Birds

Zenaida dove (*Zenaida aurita*)—mountain dove.

Bridled quail dove (*Geotrygon mystacea*)—Barbary dove, partridge (protected).

Ground dove (*Columbina passerina*)—stone dove, tobacco dove, rola, tortolita (protected).

Scaly-naped pigeon (*Columba squamosa*)—red-necked pigeon, scaled pigeon.

28. *Migratory game bird seasons for falconers.* (No change.)

Special Falconry Frameworks

Falconry is a permitted means of taking migratory game birds.

It is proposed that any State listed in 50 CFR 21.29(k) as meeting Federal falconry standards may select an extended season for taking migratory game birds in accordance with the following:

1. Seasons must fall within the regular season framework dates and, if offered, other special season framework dates for hunting.

2. Season lengths for all permitted methods of hunting within a given area may not exceed 107 days for any species.

3. Hunting hours shall not exceed 1/2 hour before sunrise to sunset.

4. Falconry daily bag and possession limits for all permitted migratory game birds shall not exceed 3 and 6 birds, respectively, singly or in the aggregate, during both regular hunting seasons and extended falconry seasons.

5. Each State selecting extended seasons shall report to the Service the results of the special falconry season by March 15, 1982.

6. Each State selecting the special season must inform the Service of the season dates and publish said regulations. General hunting regulations, including seasons, hours, and limits, apply to falconry in each State listed in 50 CFR 21.29(k) which does not select an extended falconry season.

27. *Hawaii mourning doves.* (No change.) The mourning dove is the only migratory game bird occurring in Hawaii in numbers to permit hunting. It is proposed that mourning doves may be taken in Hawaii in accordance with regulations set by the State of Hawaii as has been done in the past and subject to the applicable provisions of part 20 of Title 50 CFR. Such a season must be within the constraints of applicable migratory bird treaties and annual regulatory frameworks. These constraints provide that the season must be within the period of September 1, 1981, and January 15, 1982, the length may not exceed 60 full days; the daily bag and possession limits may not exceed 10 and 20 doves, respectively. Other applicable Federal regulations relating to migratory game birds shall also apply.

28. *Other.*

Low Plains Proposal. Nebraska, Oklahoma, and South Dakota expressed continued interest in the Low Plains proposal for waterfowl seasons in the eastern part of the Central Flyway. This proposal was considered and discussed at length last year, and a decision was made not to implement it. The rationale was described in the Federal Register dated September 4, 1980 (at 45 FR 58542) as follows:

> The Low Plains proposal was briefly described in the Federal Register dated February 29, 1980 (at 45 FR 13042). The Service noted in the Federal Register dated July 1, 1980 (at 45 FR 44545) that the proposal was aimed primarily at increasing the harvest of mallards in the mid-continent area of the United States, an action felt to be inconsistent with present mallard population goals and harvest guidelines. It was further observed that a balanced program of reasonable mallard hunting opportunity among the four flyways, as developed over the past few years, existed and that further changes in hunting opportunity should be based on changes in the status of the populations involved. In the Federal Register dated August 13, 1980 (at 45 FR 53984), the Service noted that recently completed surveys of major production areas indicated that the numbers of breeding mallards had declined from 1979, and that deteriorating habitat conditions severely curtailed production to the extent that a reduced 1980 fall flight was anticipated. For these reasons, the Service recommended against adoption of the Low Plains proposal.

The Service does not propose to offer the Low Plains option in the Central Flyway at this time because of the reasons given in 1980.

Dated: March 5, 1981.

F. Eugene Hester,

Acting Deputy Director, U.S. Fish and Wildlife Service.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.
Comments on this program are still invited.
Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

REMINDERS

The "reminders" below identify documents that appeared in issued of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

Deadlines for Comments On Proposed Rules For the Week of March 29 through April 4, 1981

AGRICULTURE DEPARTMENT

Agricultural Marketing Service—

12000 2-12-81 / Spearmint oil produced in the Far West; salable quantities and allotment percentages for 1981-82 marketing year; comments by 4-3-81

Commodity Credit Corporation—

9556 1-29-81 / Noncommercial risk assurance program (GSM-101); assuring against defaults caused by noncommercial risk occurrences; comments by 3-30-81

Farmers Home Administration—

8435 1-27-81 / Population limits for community facilities loan eligibility; comments by 3-30-81

9617 1-29-81 / Servicing and liquidation of Chattel Security; comments by 3-30-81

[Corrected at 46 FR 11666, 2-10-81]

Food and Nutrition Service—

8935 1-27-81 / Replacement of lost or stolen food stamp authorizations, and replacement of nondelivered, stolen or destroyed coupons; comments by 3-30-81

Food Safety and Quality Service—

14899 3-3-81 / Solicitation of information on proposed shelled peanuts standards; comments by 4-2-81

Rural Electrifcation Administration—

10498 2-3-81 / Adoption of the 1981 edition of the National Electrical Safety Code—ANSI C2; proposed revision of REA Bulletin 40-7; comments by 4-3-81

Soil Conservation Service—

9810 1-29-81 / Archeological and historical properties encountered in assistance programs; protection procedures; comments by 3-30-81

CIVIL AERONAUTICS BOARD

8561 1-27-81 / Oversales and denied boarding compensation; comments by 3-30-81

10184 2-3-81 / Pro rata and single entity charters; removal of restrictions on administration costs; comments by 3-30-81

COMMERCE DEPARTMENT

National Oceanic and Atmospheric Administration—

12244 2-20-81 / Atlantic Billfishes Fishery Management Plan; comments by 3-30-81

Office of the Secretary—

9910 1-27-81 / Proposed amendment to the National Voluntary Laboratory Accreditation program procedures to include criteria for accrediting testing laboratories and to eliminate the need for criteria committees; comments by 3-30-81

Patent and Trademark Office—

9121 1-28-81 / Continuation-in-part application oath or declaration; additional requirements; comments by 3-31-81

COMMODITY FUTURES TRADING COMMISSION

9958 1-30-81 / Reparation proceedings; delegation of authority to Chief of Operations Section; comments by 3-31-81

13525 2-23-81 / Speculative position limits; comments by 4-1-81

[Originally published at 45 FR 79631, 12-2-80]

COMMUNITY SERVICES ADMINISTRATION

9661 1-29-81 / Grantee fiscal responsibility and auditing; comments by 3-30-81

DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

15131 3-4-81 / Premiums, finders fees, and the payment of interest; comments by 4-1-81

ENERGY DEPARTMENT

Conservation and Solar Energy Office—

9996 1-27-81 / Residential conservation service program; comments by 3-30-81

Economic Regulatory Administration—

15112 3-3-81 / Establishment of mechanism for entitlements adjustments for periods prior to decontrol of crude oil; comments by 4-2-81

V. 46 No. 57 MAR 25 1981 UMI

Federal Energy Regulatory Commission—

15513 3-6-81 / Public utilities and licensees; application for authorization of the issuance of securities or assumption of liabilities; comments by 3-30-81

ENVIRONMENTAL PROTECTION AGENCY

14398 2-27-81 / Air pollution; beverage can surface coating industry, standards of performance; reopening of comment period; comments by 3-30-81 [*See also* 45 FR 78880, 11-25-80]

9124 1-23-81 / Air quality implementations; prevention of significant deterioration and emission offset; new source review requirements; comments by 3-30-81

8581 1-27-81 / Approval and promulgation of implementation Plans; Ohio; comments by 3-30-81

14136 2-25-81 / Approval and Promulgation of Implementation Plans; Ohio; comments by 3-30-81

15181 3-4-81 / Chlorpyrifos, proposed tolerance; comments by 4-3-81

15182 3-4-81 / Ethephon, proposed tolerance; comments by 4-3-81

15083 3-10-81 / Motor vehicle pollution control, waiver of oxides of nitrogen emission standards; comments by 4-3-81

86732 12-31-80 / Noise emission standards for motorcycles and motorcycle exhaust system; additional testing requirement; comments by 3-31-81

10911 2-6-81 / Resource conservation and recovery; guidance on personnel training; selected interim status requirements; closure and post-closure; and financial requirements, availability of draft documents; comments by 3-31-81

8962 1-27-81 / Tampering enforcement regulations; comments by 3-30-81

15122 3-3-81 / Tolerances and exemptions from tolerances for pesticide chemicals in or on raw agricultural commodities; ethylene dibromide; comments by 4-3-81

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

9070 1-30-81 / Age discrimination; procedural regulations; comments by 3-31-81

FEDERAL COMMUNICATIONS COMMISSION

9133 1-28-81 / Common carrier services; AT&T; wideband circuits to communications companies and public; reply comments by 4-3-81

85125 12-24-80 / Direct broadcast satellites for the period following the 1983 Regional Administrative Radio Conference, development of regulatory policy (permanent regulatory issue); comments by 3-31-81

16104 3-11-81 / Interservice sharing of frequencies in the Private Land Mobile Service below 470 MHz; facilitation; comments by 4-3-81

15754 3-9-81 / Policies governing the ownership and operation of domestic satellite earth stations in the Bush Communities in Alaska; order extending time for reply comments to 4-3-81

9138 1-28-81 / Telephone company—cable television cross-ownership rules; exemption for rural areas; comments by 3-30-81

FEDERAL HOME LOAN BANK BOARD

15175 3-4-81 / Adjustable-rate mortgage instrument amendments; comments by 4-3-81

FEDERAL MARITIME COMMISSION

8599 1-27-81 / Exclusion of certain routine rate actions from reporting requirements; comments by 3-30-81

10178 2-3-81 / Exemption of certain agreements from the requirements of section 15, Shipping Act, 1916; comments by 4-3-81

GENERAL SERVICES ADMINISTRATION

77436 11-24-80 / Motor vehicles for disposal and release after sale, reporting of odometer information by Federal Agencies; comments by 4-1-81

HEALTH AND HUMAN SERVICES DEPARTMENT

Food and Drug Administration—

15519 3-6-81 / Dental devices classification; comments period extended to 4-1-81

[*See also* 45 FR 86982, 12-30-80]

INTERIOR DEPARTMENT

Fish and Wildlife Service—

12214 2-13-81 / Bay checker spot butterfly; review of status; comments by 4-1-81

86512 12-31-80 / National Wildlife Refuge System; surface management of lands under U.S. mining laws; hardrock and placer mining; comments by 3-31-81

National Park Service—

85480 12-29-80 / Glacier Bay National Monument; protection of Humpback Whales; comments by 3-30-81

INTERSTATE COMMERCE COMMISSION

14365 2-27-81 / Intermodal transportation trailer on flatcar (TOFC) and container on flatcar (COFC); exemption for railroad affiliated and other motor carriers; comments by 3-30-81

14382 2-27-81 / Recordation of documents; rule revisions; comments by 3-30-81

LABOR DEPARTMENT

8999 1-27-81 / Procedure for determination of applicability of Section 8(f) of the Longshoremen's and Harbor Workers' Compensation Act and Special Fund assessments; comments by 3-30-81

Employment and Training Administration—

9008 1-27-81 / Comprehensive Employment and Training Act; regulations concerning complaints, investigations and sanctions; comments by 3-30-81

Employment Standards Administration—

8570 1-27-81 / Claims for benefits under Part C of Title IV of the Federal Mine Safety and Health Act; comments by 3-30-81

8954 1-27-81 / Procedures for handling of discrimination complaints under the Black Lung Benefits Act; comments by 3-30-81

Occupational Safety and Health Administration—

7402 1-23-81 / Identification, classification and regulation of potential occupational carcinogens; proposed amendments; comments by 3-31-81

Pension and Welfare Benefit Programs Office—

8571 1-27-81 / Definitions and coverage under the Employee Retirement Income Security Act of 1974; proposed regulations relating to supplemental payments; comments by 3-30-81

[*See also* 46 FR 11292, 2-6-81; corrected at 46 FR 12214, 2-13-81]

MANAGEMENT AND BUDGET OFFICE

Federal Procurement Policy Office—

9069 1-29-81 / Federal Aquisition Regulation; disputes and appeals, draft; comments by 3-31-81

PENSION BENEFIT GUARANTY CORPORATION

9492 1-28-81 / Valuation of plan benefits in non-multiemployer plans (interim rule); comments by 3-30-81

PERSONNEL MANAGEMENT OFFICE

8529 1-27-81 / Personnel records; comments by 3-30-81

SECURITIES AND EXCHANGE COMMISSION

14749 3-2-81 / Net capital requirements for brokers and dealers; comments by 4-1-81

SELECTIVE SERVICE SYSTEM

8998 1-22-81 / Alternative service; proposed concept; comments by 3-31-81

TRANSPORTATION DEPARTMENT

Coast Guard—

11556 2-9-81 / Qualifications of persons in charge of oil transfer operations; comments by 4-1-81

Federal Aviation Administration—

80434 12-4-80 / Airworthiness standards: aircraft and products design and procedural standards for type certificates, type certificate amendments, and supplemental type certificates; comments by 3-31-81

Federal Highway Administration—

9642 1-29-81 / Construction and maintenance; general material requirements; comments by 3-30-81

National Highway Traffic Safety Administration—

10429 2-2-81 / Consumer information regulations; uniform tire quality grading; comments by 4-3-81

Office of the Secretary—

9603 1-29-81 / Aircraft air pollution standards, exemptions; delegation of authority to Federal Aviation Administrator of Environmental Protection Agency regulations; final rule; comments by 3-30-81

Research and Special Programs Administration—

8065 1-26-81 / Trailer-on-flatcar transportation of hazardous materials; comments by 4-2-81

TREASURY DEPARTMENT

Alcohol, Tobacco and Firearms Bureau—

9644 1-29-81 / Denatured alcohol and rum formulas; comments by 3-30-81

9969 1-30-81 / New specially denatured alcohol formula; comments by 3-31-81

Comptroller of the Currency—

9618 1-29-81 / Securities Exchange Act Disclosure rules; financial statements of national banks; falsification of accounting records, etc; comments by 3-30-81

Internal Revenue Service—

9965 1-30-81 / Income tax; consolidated return regulations; comments by 3-31-81

12502 2-17-81 / Reporting the generation skipping transfer tax; comments by 4-3-81

Comments On Proposed Rules for the Week of April 5 through April 11, 1981

AGRICULTURE DEPARTMENT

Agricultural Marketing Service—

17207 3-18-81 / Milk in the New York-New Jersey marketing area; recommended decision and opportunity to file written exceptions on proposed amendments to tentative marketing agreement and to order; comments by 4-7-81

Commodity Credit Corporation—

10746 2-4-81 / 1981 upland and extra long staple cotton loan program provisions; comments by 4-6-81

Farmers Home Administration—

11552 2-9-81 / Operating loan policies, procedures and authorizations; comments by 4-10-81

Food Safety and Quality Service—

1296 1-6-81 / Use of fumaric acid in meat and poultry products; comments by 4-6-81

Rural Electrification Administration—

11287 2-6-81 / Electric borrowers; contract modifications and alternative bidding provisions; "Construction Methods and Purchase of Materials and Equipment" (Bulletin 40-6); comments by 4-7-81

ARTS AND HUMANITIES, NATIONAL FOUNDATION

11557 2-9-81 / Nondiscrimination in Federally assisted programs; comments by 4-10-81

CIVIL AERONAUTICS BOARD

The Federal Register: What It Is and How To Use It

A Guide for the User of the Federal Register—Code of Federal Regulations System

This handbook is used for the educational workshops conducted by the Office of the Federal Register. For those persons unable to attend a workshop, this handbook will provide guidelines for using the *Federal Register* and related publications, as well as an explanation of how to solve a sample research problem, and a discussion of how the consumer can be a participant in the regulatory process.

18758 **Grant Programs—Education** ED publishes closing dates for the transmittal of fiscal year 1981 applications for the Discretionary Grant Programs under the Vocational Rehabilitation Act of 1973

CONTINUED INSIDE

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

18791 **Grant Programs—Health** HHS/PHS announces the availability of funds for fiscal year 1981 for cooperative agreements for State-based Diabetes Control Programs

18827 **Nuclear Safety** NRC solicits comments by 5-26-81, regarding a plan to develop safety goals for nuclear power plants

18918 **Hazardous Materials Transportation** DOT/RSPA/MTB discusses certain city regulations on the transportation of hazardous materials (Part IV of this issue)

18751 **Antidumping** Commerce/ITA advises public of an administrative review of the countervailing duty order on sugar from the United Kingdom; effective 3-26-81

18886 **Aviation** DOT/FAA invites public comments on the draft U.S. National Aviation Standard for the Automatic Traffic Advisory and Resolution Service (ATARS) (Part III of this issue)

18846 **Aviation** DOT/FAA publishes proposed standard for the Very High Frequency Omnidirectional Radio Range (VOR), Distance Measuring Equipment (DME) and Tactical Air Navigation (TACAN); comments by 5-29-81

18789 **Privacy Act Document** FCSC

18879 **Sunshine Act Meetings**

Separate Parts of This Issue

18883 **Part II, Justice/JJDPO**
18886 **Part III, DOT/FAA**
18918 **Part IV, DOT/RSPA/MTB**

Proclamation 4829 of March 23, 1981

Small Business Week, 1981

By the President of the United States of America

A Proclamation

Two centuries ago in this country, small business owners—the merchants, the builders, the traders—rebelled against excessive taxation and government interference and helped found this Nation. Today we are working to bring about another revolution, this time against the intolerable burdens inflation, over-regulation, and over-taxation have placed upon the Nation's 12 million small businesses, which provide the livelihood for more than 100 million of our people.

To revitalize the Nation, we must stimulate small business growth and opportunity. Small business accounts for over 60 percent of our jobs, half of our business output, and at least half of the innovations that keep American industry strong. The imagination, skills, and willingness of small business men and women to take necessary risks symbolize the free enterprise foundation of the American economy and must be encouraged.

I urge all Americans who own or work in a small business to continue their resourcefulness and successes, for these efforts contribute so much to the entrepreneurial spirit which made this Nation great. It is with justifiable pride that the American small business man can point to himself as the backbone of our Nation.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning May 10, 1981, as Small Business Week. I call upon every American to join me in this tribute.

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of March, in the year of our Lord nineteen hundred eighty-one, and of the Independence of the United States of America the two hundred and fifth.

Ronald Reagan

Exceptions From the Competitive Service

By the authority vested in me as President of the United States of America by Sections 3301 and 3302 of Title 5 of the United States Code, and having determined that it is necessary and warranted by conditions of good administration that certain positions in the Department of Agriculture ought to be excluded from the coverage of Section 2302 of Title 5 of the United States Code, and excepted from the competitive service because of their confidential, policy-determining, policy-making, or policy-advocating character, in order to ensure their deep involvement in the development and advocacy of Administration proposals and policies and to ensure their effective and vigorous implementation, it is hereby ordered that Section 6.8 of Civil Service Rule VI (5 C.F.R. 6.8) is amended by adding thereto the following new subsection:

"(c) Within the Department of Agriculture, positions in the Agricultural Stabilization and Conservation Service the incumbents of which serve as State Executive Directors and positions in the Farmers Home Administration the incumbents of which serve as State Directors or State Directors-at-Large shall be listed in Schedule C for all grades of the General Schedule.".

Rules and Regulations

Federal Register
Vol. 46, No. 58
Thursday, March 26, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 515]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period March 27, 1981–April 2, 1981. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This rule has been reviewed under USDA procedures and Executive Order 12291 and has been classified "not significant", and is not a major rule. This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1980–81. The marketing policy was recommended by the committee following discussion at a public meeting on October 14, 1980. A regulatory impact analysis on the marketing policy is available from William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again publicly on March 24, 1981 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navels deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges has improved.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

1. Section 907.815 is added as follows:

§ 907.815 Navel Orange Regulation 515.

The quantities of navel oranges grown in Arizona and California which may be handled during the period March 27, 1981, through April 2, 1981, are established as follows:

(1) District 1: 1,592,000 cartons;

(2) District 2: 158,000 cartons;

(3) District 3: unlimited cartons;

(4) District 4: unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated:

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 81-9126 Filed 3-25-81; 11:30 am]

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 78

Brucellosis Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: These amendments add all of Alaska except the Aleutian Islands below 56° latitude to the list of Certified Brucellosis-Free Areas and delete this area from the list of Modified Certified Brucellosis Areas. It has been determined that this area qualifies to be designated as a Certified Brucellosis-Free Area. The effect of this action will allow for less restrictions on cattle moved interstate from this area. These amendments also add the counties of Hickory in Missouri, Corson, Custer, Dewey, Hyde, McPherson, Meade, and Spink in South Dakota, and Kerr in Texas, to the list of Modified Certified Brucellosis Areas and delete them from the list of Certified Brucellosis-Free Areas because it has been determined that these counties now qualify only as Modified Certified Brucellosis Areas. The effect of this action will provide for more restrictions on cattle moved interstate from these areas.

EFFECTIVE DATE: March 26, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. A. D. Robb, USDA, APHIS, VS, Room 805, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8713.

SUPPLEMENTARY INFORMATION: This final action is issued in conformance with Executive Order 12291 and has been determined to be "not major." The emergency nature of this action makes it impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule.

Dr. Paul Becton, Director, National Brucellosis Eradication Program, USDA, APHIS, VS, has determined that an emergency situation exists which warrants publication without opportunity for a public comment period on this final action. The amendment designating areas as Certified Brucellosis-Free Areas relieves certain restrictions presently imposed on the interstate movement of cattle. These restrictions are no longer deemed necessary to prevent the spread of brucellosis from such areas. Therefore,

the amendment should be made effective immediately in order to permit affected persons to move cattle interstate from such areas without unnecessary restrictions.

The amendment designating areas as Modified Certified Brucellosis Areas imposes restrictions presently not imposed on the interstate movement of cattle from these areas. The additional restrictions are necessary in order to prevent the spread of brucellosis from such areas and, therefore, must be made effective immediately.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the **Federal Register**.

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because the change in brucellosis status affects less than 0.25 percent of the farms in the United States and does not have a significant economic impact on a substantial number of other types of small entities.

A complete list of brucellosis areas was published in the **Federal Register** (45 FR 85718–85720) effective December 30, 1980. These amendments add all of Alaska except the Aleutian Islands below 56° latitude to the list of Certified Brucellosis-Free Areas in § 78.20 and delete this area from the list of Modified Certified Brucellosis Areas in § 78.21, because it has been determined that such area now comes within the definition of a Certified Brucellosis-Free Area contained in § 78.1(l) of the regulations. These amendments add the counties of Hickory in Missouri, Corson, Custer, Dewey, Hyde, McPherson, Meade, and Spink in South Dakota, and Kerr in Texas to the list of Modified Certified Brucellosis Areas in § 78.21 and remove these counties from the list of Certified Brucellosis-Free Areas in § 78.20, because it has been determined that they now qualify only as Modified Certified Brucellosis Areas as defined in § 78.1(m) of the regulations. This list is updated monthly and reflects actions taken under criteria for designating areas according to brucellosis status. Accordingly, Part 78, Title 9, Code of Federal Regulations, is hereby amended in the following respects:

1. The authority citation for Part 78 reads as follows:

Authority: (Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; sec. 3, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693; and secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111–113, 114a–1, 115, 117, 120, 121, 125, 134b, 134f, 37 FR 28464, 28477; 38 FR 19141.)

§ 78.20 [Amended]

2. In § 78.20, paragraph (b) is amended by adding: *Alaska.* All of Alaska except the Aleutian Islands below 56° latitude; and deleting: *Missouri.* Hickory; *South Dakota.* Corson, Custer, Dewey, Hyde, McPherson, Meade, Spink; and *Texas.* Kerr.

§ 78.21 [Amended]

3. In § 78.21, paragraph (a) is amended by removing *Alaska* and adding the word "None."

4. In § 78.21, paragraph (b) is amended by adding: *Alaska.* The Aleutian Islands below 56° latitude; *Missouri.* Hickory; *South Dakota.* Corson, Custer, Dewey, Hyde, McPherson, Meade, Spink; *Texas.* Kerr.

Done at Washington, D.C., this 20th day of March 1981.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

[FR Doc. 81-9147 Filed 3-25-81; 8:45 am]

BILLING CODE 3410-34-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 523 and 545

Mutual Fund Investments

Dated: March 12, 1981.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final regulations.

SUMMARY: These amendments implement section 401 of the Depository Institution Deregulation and Monetary Control Act of 1980 by authorizing Federal associations to invest in mutual funds holding assets that Federal associations may invest in without limitation. Further, the amendments clarify and correct certain provisions of the Board's current regulations regarding (1) mutual fund investment by Federal associations pursuant to their corporate debt security and commercial paper investment authority, and (2) investment for liquidity purposes in mutual funds by Federal Home Loan Bank member institutions.

EFFECTIVE DATE: March 26, 1981.

FOR FURTHER INFORMATION CONTACT: David J. Bristol, Attorney, Office of General Counsel, 1700 G Street, N.W., Washington, D.C. 20552, telephone (202) 377–6461.

SUPPLEMENTARY INFORMATION:

Federal Association Investment in Mutual Funds

Section 401 of the Depository Institutions Deregulation and Monetary Control Act of 1980 ("Act"), Pub. L. 96–221, 94 Stat. 132, authorizes Federal associations to invest in any open-end management investment company registered with the Securities and Exchange Commission under the Investment Company Act of 1940, the portfolio of which is restricted by such management company's investment policy, changeable only by shareholder vote, to investments in which Federal associations may invest without limitation. The Board therefore has added this new statutory authorization to the list of permitted investments for Federal associations set forth at 12 CFR 545.9 by adding a new paragraph (i) to that section.

Federal associations currently also may invest in mutual fund companies that invest in corporate debt securities and commercial paper pursuant to 12 CFR 545.9–4(a) (Board Resolution No. 80–701; 44 FR 76104; published November 18, 1980). This authority was intended to allow associations to invest either directly or indirectly in corporate debt securities and commercial paper within the statutory 20-percent-of-assets category for such investments (12 U.S.C. 1464(c)(2)(B)). However, in order not to be unnecessarily restrictive with regard to association investments in mutual funds holding a mixed portfolio of corporate debt securities, commercial paper and investments authorized under the Section 401 mutual fund investment authority, § 545.9–4(a) provided for investment in mutual funds with portfolios restricted in investments authorized for Federals under § 545.9–4 "and other regulations or law." In response to questions that have arisen subsequent to adoption of § 545.9–4 regarding the scope of the quoted language, the Board by this Resolution is amending § 545.9–4(a) to clarify that within the 20-percent-of-assets category Federal associations may invest in mutual funds with portfolios restricted to investments authorized under § 545.9–4 and new § 545.9(i).

Federal Association Liquidity Investment in Corporate Debt Obligations and Commercial Paper

Section 325 of the Housing and Community Development Act of 1980 ("HCDA") (Pub. L. 96–399; 94 Stat. 132 (October 8, 1980)) provides that Federal Home Loan Bank member institutions may maintain assets in the form of

corporate debt obligations and commercial paper for liquidity purposes. As discussed more fully below, the Board implemented Section 325 by amending 12 CFR 523.10 of the Board's Bank System regulations to provide that such instruments are eligible liquid assets. Section 545.9(a) of the Board's Federal savings and loan association regulations authorizes Federal associations to invest, without limitation, in assets eligible under § 523.10(g), other than time deposits and bankers' acceptances. Section 545.9(a) could be interpreted to allow Federal associations to invest in corporate debt obligations and commercial paper eligible as liquid assets under § 523.10(g) in excess of the 20 percent limit placed on such investments by § 401 of the Depository Institutions Deregulation and Monetary Control Act of 1980 and § 545.9–4 of the Board's regulations. The Board believes that it is prudent to retain the 20-percent-of-assets limitation of § 545.9–4 and, therefore, is amending § 545.9(a) accordingly.

Mutual Fund Investment Counting Toward Liquidity Requirements

Section 405 of the Act amended Section 5A(b)(1) of the Federal Home Loan Bank Act (12 U.S.C. § 1425a) to provide that, subject to Federal Home Loan Bank Board approval, institutions that are members of Federal Home Loan Banks may count toward their liquidity requirements investments in mutual funds whose portfolios are restricted to investments specifically described in Section 405, i.e. cash and certain time and savings deposits, government obligations, and bankers acceptances (revised § 5A(b)(1)(A), (B), and (C)).

On August 21, 1980, the Board implemented Section 405 by adding a new subparagraph (7) to § 523.10(g) of the Regulations for the Federal Home Loan Bank System, which sets forth investments eligible as liquid assets, and a new subparagraph (6) to § 523.10(h), setting forth investments eligible as short-term liquid assets (Board Resolution No. 80–530; 45 FR 578113, published August 27, 1980). New subparagraph 523.10(g)(7) provided that a mutual fund investment would be an eligible liquid asset if the fund's portfolio were restricted to assets described in § 523.10(g), all of which are included in revised § 5A(b)(1)(A), (B), and (C).

On December 31, 1980, the Board again amended liquidity regulation § 523.10(g) to implement Section 325 of HDCA, which provided that, subject to Board approval, a member institution could include as eligible liquid assets certain corporate debt obligations and commerical paper (Board Resolution No. 80–844; 46 FR 2029, published January 8, 1981). At that time, the mutual fund liquidity investment provision was inadvertently moved from subparagraph (g)(7) to subparagraph (g)(8) and the new corporate-debt obligation and commercial-paper liquidity investment authority inserted at (g)(7). Thus, the mutual fund liquidity investment language, with its inclusion of any investments described in paragraph (g), encompassed investments in mutual funds holding corporate debt obligations and commercial paper despite the exclusion of such fund under the mutual fund liquidity investment authority of Section 405. Accordingly, the Board is amending § 523.10(g) by redesignating the mutual fund liquidity eligibility as subparagraph (g)(7), specifically setting out the portfolio restrictions of such funds by reference to subparagraphs (g)(1) through (6), and by redesignating the corporate debt obligation and commercial paper liquidity eligibility as subparagraph (g)(8).

The definition of the term "corporate" given in Board Resolution No. 80–701 for use with § 545.9–4 includes government corporations. Using such a definition for § 523.10 would effectively extend from two to three years the permissible maturity for eligible liquid assets in the form of obligations issued by a State or local government corporation, and backed by the taxing authority of such State or local government. The definition also would include otherwise ineligible obligations of government corporations not so secured. As noted in Board Resolution No. 80–844, the obligations of such government corporations are less liquid than highly rated obligations of non-governmental business corporations. Accordingly, the Board is amending redesignated subparagraph (g)(8) of § 523.10 to clarify that the instruments of such State and Local government corporations are to be considered State or local government obligations that may qualify as an eligible liquid asset pursuant to subparagraph (g)(6), but that such instruments may not be considered corporate debt or commercial paper pursuant to subparagraph (g)(8).

In addition, subparagraph (h)(6) of § 523.10 currently allows an investment in an eligible mutual fund to qualify as a short-term liquid asset to the extent that the investments of such fund "are eligible under this paragraph (h)", i.e., consist of short-term liquid assets. Under the present rule, therefore, associations must constantly keep track of the contents of the portfolio of a qualifying fund to be certain that the proper percentage of the fund's portfolio is made up of short-term liquid assets.

The Board believes that the difficulties involved in tracking the frequent portfolio changes of a mutual fund may inhibit member institutions from using such a fund as a short-term liquid asset. The Board, therefore, is amending § 523.10(h)(6) to provide that a mutual fund investment may count as a short-term liquid asset if the investment policy of the fund, changeable only by vote of the shareholders, restricts the fund's portfolio to short-term liquid assets specified in subparagraphs (h)(1) through (5). The Board believes that such a change will enable member institutions to better identify those funds which qualify as short-term liquid assets, thereby facilitating investment in such funds to satisfy the liquidity requirements.

In addition, the Board is taking this opportunity to clarify Board Resolution No. 80–844 by amending paragraph (a) of § 523.10 to expressly allow demand deposits at the Savings Banks Trust Company, New York, New York, to be treated as cash for liquidity purposes, and by making a typographical correction in subparagraph (g)(1) of that section.

Because these amendments in part implement statutory directives and in part are clarifying or corrective in nature, the Board finds that observance of the notice and comment procedures of 12 CFR 508.11 and 5 U.S.C. § 553(b) and the 30-day delay of effective date provision of 12 CFR 508.14 and 5 U.S.C. § 553(d) is unnecessary and contrary to the public interest, and the amendments therefore will become effective as provided above.

The reader's attention is also invited to Board Resolution 81–135, adopted today, which proposes further amendments to the Board's liquidity regulations.

Accordingly, the Board hereby amends Part 523 of Subchapter B and Part 545 of Subchapter C, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

PART 523—MEMBERS OF BANKS

1. Amend § 523.10 by (1) revising paragraph (a), and (2) amending paragraph (g) by revising subparagraph (g)(1), redesignating existing subparagraphs (g)(7) and (g)(8) as subparagraphs (g)(8) and (g)(7), respectively, and revising new subparagraphs (g)(7) and (g)(8); to read as follows:

§ 523.10 Definition for the purposes of this section, §§ 523.11 and 523.12.

(a) *Cash.* Cash on hand and unpledged demand deposits in a Bank, an insured bank, the Bank for Savings and Loan Associations, Chicago, Illinois, or the Savings Banks Trust Company, New York, New York, but not gold in any form.

* * * * *

(g) *Liquid assets.*

* * * * *

(1) Time deposits in a Bank, the Bank for Savings and Loan Associations, Chicago, Illinois, or the Savings Banks Trust Company, New York, New York;

* * * * *

(7) Shares or certificates in any open-end management investment company registered with the Securities and Exchange Commission under the Investment Company Act of 1940, while the portfolio of such company is restricted by its investment policy, changeable only by vote of shareholders, to investments described in subparagraphs (1) through (6) of this paragraph (g); and

(8) corporate debt obligations and commercial paper denominated in dollars and issued by a non-governmental entity domiciled in the United States, if:

(i) such corporate debt obligations (*a*) continue to be rated in one of the four highest grades by the most recently published rating of such obligations by a nationally recognized investment rating service, (*b*) will mature in 3 years or less, and (*c*) are not convertible to common stock;

(ii) such commercial paper (*a*) continues to be rated in one of the two highest grades by the most recently published rating of such paper by a nationally recognized investment rating service, and (*b*) will mature within 270 days or less;

Provided, that an amount not in excess of 1 percent of such institution's assets invested in eligible corporate debt obligations or commercial paper of a single issuer shall be counted as a liquid asset.

* * * * *

2. Amend § 523.10 by redesignating existing subparagraphs (h)(6) and (h)(7) as (h)(7) and (h)(6), respectively, and revising new subparagraphs (h)(6) and (h)(7) to read as follows:

* * * * *

(h) *Short-term liquid assets.* * * *

(6) Shares or certificates of any investment company qualifying under subparagraph (g)(7) of this section, while the portfolio of such company is restricted by its investment policy, changeable only by vote of the shareholders, to investments described in subparagraphs (1) through (5) of this paragraph (h); and

(7) Corporate debt obligations and commercial paper specified in subparagraph (g)(8) of this section which will mature in six months or less.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

3. Amend § 545.9 by (1) revising paragraph (a), (2) removing the word "and" at the end of paragraph (g), (3) deleting the period at the end of paragraph (h) and replacing it with a semi-colon and the word "and", and (4) adding a new paragraph (i); to read as follows:

§ 545.9 Securities and other investments.

A Federal associations may invest in:

(a) Assets which qualify as liquid assets, as defined in § 523.10(g) of this Chapter (provided that total investment in corporate debt obligations and commercial paper shall be subject to the limitation of § 545.9–4(a) of this Part), and assets, other than time deposits and bankers' acceptances, which would so qualify except for the maturity limitations in § 523.10(g);

* * * * *

(i) Shares or certificates in any open-end management investment company which is registered with the Securities and Exchange Commission under the Investment Company Act of 1940 and the portfolio of which is restricted by such management company's investment policy, changeable only if authorized by shareholder vote, solely to investments that an association is authorized, without limitation as to percentage of assets, to invest in, sell, redeem, hold, or otherwise deal with. The authority to invest in such companies includes the authority to redeem or hold the shares or certificates of such companies.

4. Revise § 545.9—4(a) to read as follows:

§ 545.9–4 Commercial paper and corporate debt securities.

(a) *General.* A Federal association may invest in, sell, or hold commercial paper and corporate debt securities, including corporate debt securities convertible into stock, subject to the limitations set forth in paragraph (b): *provided,* that at any one time the total investment made under this section and § 545.7–10 ("Consumer loans"), added together, shall not exceed 20 percent of the association's assets. An investment under this section includes the investing in, redeeming, or holding shares of any open-end management investment company which has registered with the Securities and Exchange Commission under the Investment Company Act of 1940 and whose portfolio is restricted by such management company's investment policy, changeable only if authorized by shareholder vote, solely to the investments that an association is authorized to invest in pursuant to this section and paragraph (i) of § 545.9 of this Part.

* * * * *

FARM CREDIT ADMINISTRATION

12 CFR Part 611

Compensation of District Board Members; Correction

AGENCY: Farm Credit Administration.

ACTION: Final rule; correction.

SUMMARY: This document corrects the effective date relating to a final regulation increasing the maximum level of compensation of Farm Credit district board members which was published on March 17, 1981 (46 FR 17011).

FOR FURTHER INFORMATION CONTACT:

Larry H. Bacon, Deputy Governor, Office of Administration, Farm Credit Administration, 490 L' Enfant Plaza, S.W., Washington, DC 20578 (202–755–2181).

The following correction is made in FR Doc. 818077 appearing on page 17011 in the issue of March 17, 1981:

On page 17011 "Effective Date: March 17, 1918." is corrected to read "Effective Date: April 16, 1981.".

Donald E. Wilkinson,

Governor.

BILLING CODE 6705-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 81-SO-10; Amdt. No. 39-4071]

Airworthiness Directives; Teledyne Continental Motors A-65, A75, C75, C85, C90, A-100, C125, and 0-200 Series Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires disassembly, inspection and cleaning or replacement as necessary of the engine driven fuel pump on certain Teledyne Continental Motors A-65, A75, C75, C85, C90, A-100, C125, and 0-200 series engines. The AD is prompted by reports of contaminated and obstructed fuel pump screens which has resulted in fuel flow restriction.

DATE: Effective April 1, 1981.

Compliance Schedule—As prescribed in body of AD.

ADDRESSES: The applicable service bulletin may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, Alabama 36601.

A copy of the service bulletin is also contained in the Rules Docket, Room 275, Engineering and Manufacturing Branch, FAA, Southern Region, 3400 Norman Berry Drive, East Point, Georgia 30344.

FOR FURTHER INFORMATION CONTACT: Gil Carter, ASO-214, Engineering and Manufacturing Branch, FAA, Southern Region, P.O. Box 20636, Atlanta, Georgia 30320, telephone (404) 763-7435.

SUPPLEMENTARY INFORMATION: There have been reports of clogged and contaminated fuel pump screens on certain Teledyne Continental Motors (TCM) C75 Model engines. The manufacturer's service instructions will be revised to define periodic inspection and cleaning procedures for the fuel pump and screen. Since this situation is likely to exist or develop on other engines of the same type design, an Airworthiness Directive is being issued which requires an initial and periodic fuel pump inspection on certain TCM A-65, A75, C75, C85, C90, A-100, C125, and 0-200 series engines. It also requires cleaning or replacement of the fuel pump or fuel pump screen on these TCM engines.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive (AD):

Teledyne Continental Motors: Applies to Continental A-65, A75, C75, C85, C90, A-100, C125, and 0-200 series engines with AC fuel pumps, TCM part number 40585, 40695 or 631391 installed. Compliance required within 30 days after the effective date of this AD, or within the next 25 hours time in service after the effective date of this AD, whichever occurs first, unless already accomplished within the last 12 months and at intervals not to exceed 12 months after the last inspection. To prevent fuel starvation due to fuel flow restriction through the pump screen accomplish the following:

a. Remove safety wire and bolt from fuel pump top cover. Discard fiber washer under bolt.

b. Remove the fuel pump top cover. Discard cork cover gasket.

c. Remove fuel pump screen.

d. Inspect the fuel pump and fuel pump screen for contamination.

(1) If contaminated, clean fuel pump and fuel pump screen.

(2) If fuel pump is damaged by corrosion, replace with an applicable serviceable fuel pump.

(3) If fuel pump screen is damaged by corrosion or handling, replace with a serviceable fuel pump screen, TCM p/n 643913.

e. Reinstall fuel pump screen, fuel pump cover with new cork cover gasket, TCM p/n 643915 and new bolt gasket p/n 643914. Torque bolt to 30± 5 inch-pounds.

f. Re-safety wire fuel pump top cover bolt and check for leaks.

g. Make the appropriate maintenance record entry.

An equivalent method of compliance may be approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southern Region.

Teledyne Continental Motors Service Bulletin M81-8, dated March 9, 1981, pertains to this subject.

This amendment becomes effective April 1, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation under the President's Memorandum of January 29, 1981, and an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 24, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in East Point, Georgia, on March 11, 1981.

George R. LaCaille,

Acting Director, Southern Region.

[Docket No. 81-CE-3-AD; Amdt. 39-4049]

Airworthiness Directive; Cessna Models 152, A152, 172N, 172P, R172K and 172RG

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction of final rule.

SUMMARY: This action corrects a rule issued on February 13, 1981, and appearing in FR Doc. 81-5864 on pages 13497 and 13498 in the issue of Monday, February 23, 1981 (81-CE-3-AD). Figure 1 was inadvertently omitted when the Airworthiness Directive (AD) was published in the Federal Register thereby necessitating this correction.

EFFECTIVE DATE: March 16, 1981.

FOR FURTHER INFORMATION CONTACT: Paul O. Pendleton, Aerospace Engineer, Wichita Engineering and Manufacturing District Office, FAA, Room 238, Terminal Building No. 2299, Mid-Continent Airport, Wichita, Kansas; Telephone (316) 942-7927.

SUPPLEMENTARY INFORMATION: The FAA issued a Final Rule AD with an effective date of March 2, 1981. Inadvertently Figure 1 was omitted from the AD when it was published in the Federal Register on February 23, 1981. Action is taken herein to make this correction. Since the change is editorial in nature, notice and public procedure thereon are not considered necessary.

In FR Doc. 81-5864 appearing on pages 13497 and 13498 in the Federal Register of February 23, 1981, make the following correction:

(1) Immediately following the Acting Director's signature, insert Figure 1.

(Sec. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423; Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Section 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Issued in Kansas City, Missouri, on March 16, 1981.

John E. Shaw,
Acting Director, Central Region.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. C-3065]

Benton & Bowles, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires, among other things, a New York City advertising agency to cease, in connection with the advertising and sale of Encare or any similar over-the-counter vaginal contraceptive suppository product, misrepresenting or failing to substantiate claims relating to the product's effectiveness, safety and performance characteristics. The firm is further prohibited from disseminating advertisements using performance or quality heightening modifiers such as "highly," or "extremely," in conjunction with words like "effective" or "reliable." Additionally, the order requires the company to disclose in print, radio and TV consumer advertising, certain facts material to contraceptive suppository use; and to maintain business records for a period of three years.

DATE: Complaint and order issued March 4, 1981.[1]

FOR FURTHER INFORMATION CONTACT: Leroy C. Richie, Director, 8R, New York Regional Office, Federal Trade Commission, 2243–EB Federal Bldg., 26 Federal Plaza, New York, N.Y. 10007. (212) 264–1207.

SUPPLEMENTARY INFORMATION: On Monday, December 22, 1980, there was published in the Federal Register, 45 FR 84076, a proposed consent agreement with analysis In the Matter of Benton & Bowles, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Advertising Falsely or Misleadingly: § 13.10 Advertising falsely or misleadingly, 13.10–5 Knowingly by advertising agent; § 13.20 Comparative data or merits; § 13.135 Nature of product or service; § 13.160 Promotional sales plans; § 13.170 Qualities or properties of product or service, 13.170–18 Contraceptive, 13.170–70 Preventive or protective; § 13.190 Results; § 13.195 Safety; § 13.205 Scientific or other relevant facts; § 13.210 Scientific tests. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements, 13.533–10 Corrective advertising, 13.533–20 Disclosures, 13.533–45 Maintain records. Subpart—Disseminating Advertisements, Etc.: § 13.1043 Disseminating advertisements, etc. Subpart—Failing To Provide Foreign Language Translations: § 13.1052 Failing to provide foreign language translations. Subpart—Misrepresenting Oneself and Goods—Goods: § 13.1575 Comparative data or merits; § 13.1665 Nature; § 13.1710 Qualities or properties; § 13.1730 Results; § 13.1740 Scientific or other relevant facts. Subpart—Misrepresenting Oneself and Goods—Promotional Sales Plans: § 13.1830 Promotional sales plans. Subpart—Neglecting, Unfairly or Deceptively, To Make Material Disclosure: § 13.1863 Limitations of product; § 13.1885 Qualities or properties; § 13.1890 Safety; § 13.1895 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45, 52)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-6-FRL 1788-6]

Approval and Promulgation of State Implementation Plans: Approval of Elements in the New Mexico Plan for Nonattainment Areas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: The purpose of this notice is to approve and conditionally approve elements of the State Implementation Plan (SIP) revisions for New Mexico for which EPA has expressly taken no action in the April 10, 1980 Notice of Final Rulemaking (45 FR 24460). These revisions were submitted by the Governor on March 17, 1980, to fulfill the requirements of Part D of Title I of the Clean Air Act, as amended in 1977 (the Act), with regard to nonattainment areas. The revisions being acted on today are those relating to the Bernalillo County (Albuquerque) nonattainment area for carbon monoxide (CO).

EFFECTIVE DATE: This rulemaking is effective April 27, 1981.

FOR FURTHER INFORMATION CONTACT: Estela S. Wackerbarth, Chief, Implementation Plan Section, Air Program Branch, Air and Hazardous Materials Division, Environmental Protection Agency, Region 6, 1201 Elm Street, Dallas, Texas 75270, (214) 767–1518.

SUPPLEMENTARY INFORMATION: On August 9, 1979 (at 44 FR 46895), EPA published a notice of proposed rulemaking on revisions to the New Mexico SIP. The Part D requirements were discussed in the General Preamble, which was published on April 4, 1979 (at 44 FR 20372) and supplemented on July 2, 1979 (44 FR 385583), August 28, 1979 (44 FR 50371), September 17, 1979 (44 FR 5376), and November 23, 1979 (44 FR 67182).

No action was taken on the portion of the SIP revisions pertaining to the Bernalillo County (Albuquerque) nonattainment area for carbon monoxide (CO) in the final rulemaking on April 10, 1980 (45 FR 24460). This portion of the SIP was revised and submitted by the Governor on March 17, 1980.

This notice will address each of the deficiencies of the Albuquerque CO portion of the SIP previously discussed on August 9, 1979 (at 44 FR 46895) and April 10, 1980 (45 FR 24460).

The August 9th notice of rulemaking stated that an incorrect carbon monoxide (CO) design value was used to determine the emission reduction required to demonstrate attainment. This deficiency was not corrected in the State's submittal. The appropriate CO design value is 22 parts per million (ppm), which is the highest second high 8-hour average of all sites. This value, 22 ppm, should have been used in determining the required emission reduction. Based on this design value, an emission reduction of 60 percent is required to demonstrate attainment as compared to the reduction of 49 percent as stated in the SIP. However, the SIP did demonstrate that a 61 percent reduction would occur from the implementation of the regulations. Therefore, the control strategy is adequate to meet an emission reduction of 60 percent. The State will be required to use the appropriate design value in the future.

As previously stated in the April 10, 1980 notice, the control strategy demonstrates that only a 27 percent reduction will occur by 1982. Based upon that demonstration, EPA approved the requested extension to December 31, 1987 for attainment of the CO standard in the April 10, 1980 Federal Register (45 24466).

Section 172 of the Clean Air Act provides that for areas which will not attain the ambient air quality standards for ozone or carbon monoxide by the end of 1982, despite the implementation of all reasonably available measures, an extension to 1987 will be granted. In such cases Section 172(b)(11)(B) requires that: "the plan provisions shall establish a specific schedule for implementation of a vehicle emission control inspection and maintenance program * * *" "Inspection/Maintenance" (I/M) refers to a program whereby motor vehicles receive periodic inspections to assess the functioning of their exhaust emission control systems. Vehicles which have excessive emissions must then undergo mandatory maintenance. Generally, I/M programs include passenger cars, although other classes can be included as well. Operation of a non-complying vehicle is prohibited. This is more effectively accomplished by requiring proof of compliance to purchase license plates or to register a vehicle. A windshield sticker system, much like that of many safety inspection programs, can be used if it can be demonstrated that equal effectiveness will be achieved.

EPA issued guidance on February 24, 1978, on the general criteria for SIP approval including I/M, and on July 17, 1978, regarding the specific criteria for I/M SIP approval. Both of these items are part of the SIP guidance material referred to in the General Preamble for Proposed Rulemaking 44 FR 20372, 20373, n 6. Though the July 17, 1978, guidance should be consulted for details, the key elements for I/M SIP approval are as follows:

Legal Authority. States or local governments must have adopted the necessary statutes, regulations, ordinances, etc., to implement and enforce the inspection/maintenance program (Section 172(b)(10)).

Commitment. The appropriate governmental unit(s) must be committed to implement and enforce the I/M program (Section 172(b)(10)).

Resources. The necessary finances and resources to carry out the I/M program must be identified and committed (Section 172(b)(7)).

Schedule. A specific schedule to establish the I/M program must be included in the State Implementation Plan (Section 172(b)(11)(b)). Interim milestones are specified in the July 17, 1978, memorandum in accordance with the general requirement of 40 CFR 51.15(c).

Program Effectiveness. As set forth in the July 17, 1978 guidance memorandum, the I/M program must achieve a 25% reduction in passenger car exhaust emissions of hydrocarbons and a 25% reduction for carbon monoxide. This reduction is measured by comparing the levels of emission projected to December 31, 1987, with and without the I/M program. This policy is based on Section 172(b)(2) which states that "the plan provisions * * * shall * * * provide for the implementation of all reasonably available control measures * * *".

Specific detailed requirements of these five provisions are discussed below.

To be acceptable, I/M legal authority must be adequate to implement and effectively enforce the program and must not be conditioned upon further legislative approval or any other substantial contingency. However, the legislation can delegate certain decision making to an appropriate regulatory body. For example, a state department of environmental protection or department of transportation may be charged with implementing the program, selecting the type of test procedure as well as the type of program to be used, and adopting all necessary rules and regulations. I/M legal authority must be included with any plan revision which must include I/M (i.e., a plan which

establishes an attainment date beyond December 31, 1982) unless an approved extension to certify legal authority is granted by EPA. The granting of such an extension, however, is an exceptional remedy to be utilized only when a state legislature has had no opportunity to consider enabling legislation.

Written evidence is also required to establish that the appropriate governmental bodies are "committed to implement and enforce the appropriate elements of the plan." (Section 172(b)(10).) Under Section 172(b)(7), supporting commitments for the necessary financial and manpower resources are also required.

A specific schedule to establish an inspection/maintenance program is required. (Section 172(b)(11)(B).) The July 17, 1978, guidance memorandum established as EPA policy the key milestones for the implementation of the various I/M programs. These milestones were the general SIP requirement for compliance modified at 40 CFR 51.15(c). This section requires that increments of progress be incorporated for compliance schedules of over one year in length.

To be acceptable an I/M program must achieve the requisite 25% reductions in both hydrocarbon and carbon monoxide exhaust emissions from passenger cars by the end of calendar year 1987. The Act mandates "Implementation of all reasonably available control as expeditiously as practicable." Section 172(b)(2). At the time of passage of the Clean Air Act Amendments of 1977, several inspection/maintenance programs were already operating, including mandatory programs of New Jersey and Arizona operating at about a 20% stringency. (The stringency of a program is defined as the initial proportion of vehicles which would have failed the program's standards if the affected fleet had not undergone I/M before. Because some motorists tune their vehicles before I/M tests, the actual proportion of vehicles failing is usually a smaller number than the stringency of the program.) Depending on program type (private garage or centralized inspection) a mandatory I/M program may be implemented as late as December 31, 1982 and the attainment date may be as late as December 31, 1987. Based on an implementation date of December 31, 1982 and a 20% stringency factor, EPA predicts the reductions of both CO and HC exhaust emissions of 25% can be achieved by December 31, 1987. Earlier implementation of I/M will produce greater emission reductions. Thus, because of the Act's requirement for the implementation of all reasonably available control measures and because New Jersey and Arizona have effectively demonstrated practical operation of I/M programs with 20% stringency factors, it is EPA policy to use a 25% emission reduction as the criterion to determine compliance of the I/M portion with Section 172(b)(2).

EPA had discussed in the April 10, 1980 Notice of Final Rulemaking that the Bernalillo County I/M ordinance was not approvable due to a referendum requirement. The referendum requirement was stipulated in the ordinance as a prerequisite to its legal existence. The New Mexico Attorney General determined that the Bernalillo County Commission is without authority to impose such a referendum condition, therefore making the I/M ordinance illegal. The referendum requirement was deleted from the ordinance by an amendment enacted on January 8, 1980 by the Commission. The revised ordinance was included in the submittal made by the Governor on March 17, 1980. Therefore, EPA is approving the amended I/M ordinance for Bernalillo County as satisfying the requirement for legal authority.

As stated in the April 10, 1980 Notice of Final Rulemaking, responsible officials had not committed to implement and enforce the I/M program. On April 23, 1980, EPA notified the Mayor of Albuquerque by letter that a commitment to enforce the I/M program was necessary prior to approval of the SIP. In particular, support for the enactment of statutes to connect the I/M program to motor vehicle registration was encouraged. Additionally, a more definitive plan showing the availability of adequate financial and manpower resources for local enforcement was requested. On May 27, 1980, the Mayor of Albuquerque and the Chairman of the Bernalillo County Commission responded to EPA. Their letter described a plan for working with the State to tie I/M requirements into the motor vehicle registration process. In addition, the letter demonstrated that discussions were underway to develop the necessary supplementary information for the effective implementation and enforcement of the program on a local level. While the May 27, 1980 letter is evidence that the City and County are making an effort to establish an I/M program, the lack of a precise enforcement mechanism and precise commitments prevents EPA from fully approving the I/M plan. Therefore, the local officials were then notified that the May 27, 1980, submittal was deficient. On November 5, 1980, these officials submitted a commitment to provide a detailed enforcement plan (based on State legislation or such alternative enforcement program that would be equivalent to registration based enforcement) by June 30, 1981. This submittal was signed by the Mayor and Chairman of the Bernalillo County Commission. EPA approves the I/M portion of the SIP upon the condition that, by June 30, 1981, the State submit to EPA in more detail the procedures which will actually be used to enforce the program, and provide more specific commitments of the manpower and financial resources to enforce the program.

The August 9, 1979, notice of proposed rulemaking stated that the City and County must submit a final implementation schedule including specific dates for the key milestone events described in EPA's July 17, 1978, policy. The final schedule was included in the submittal by the Governor on March 17, 1980. SIP compliance requires that increments of progress be demonstrated for schedules of over one year in length. To date, however, the State has been unable to meet implementation milestones included in this schedule. Given that it is still possible for the I/M program to be implemented within the deadlines established by EPA policy, and that the City and County are moving forward with implementation of the program, EPA feels that it will be better public policy to conditionally approve the plan based on the submittal of a revised schedule rather than to disapprove the plan. Therefore, EPA is approving the plan on the condition that the State submit to EPA a revised implementation schedule including interim milestones and a final implementation date for mandatory inspection and maintenance consistent with EPA policy by June 30, 1981.

The April 10, 1980 notice pointed out that the SIP did not contain a commitment to implement currently planned transportation control measures (TCMs) having beneficial air quality impacts. The revised plan contains a list of TCMs to be implemented this fiscal year. TCM planning and analysis will be carried out by the Middle Rio Grande Council of Governments (MRGCOG). Currently planned TCMs include transit system improvements, development of a bikeway network, new traffic lanes, intersection improvements, and computerized signals. EPA considers these commitments to implement currently planned TCMs to be adequate. Therefore, EPA is approving this portion of the plan.

To assure that the requirements of Section 176(c) and 176(d) are met, EPA policy requires that the plan contain procedures for the determination of conformity with the SIP of any project, program, or plan over which the metropolitan planning organization has approval authority, and that the plan contain procedures to ensure that priority is given to the implementation of those portions of any plan or program with air quality related transportation consequences that contribute to the attainment and maintenance of the primary NAAQS. Specifically, these procedures would address the granting of priority to projects in the Transportation Improvement Program which contribute to the attainment and maintenance of the NAAQS. EPA requires that criteria procedures to determine conformity be submitted in the fiscal year 1982. Such determinations shall be made every year thereafter in annual reports.

As stated in the April 10, 1980 notice the new source review (NSR) program (Section 20 of the Albuquerque-Bernalillo County regulations) did not meet the requirements set forth in Section 172(b)(11)(A) of the Act. This section of the Act requires that an analysis of alternative sites, sizes, production processes and control techniques be completed before a construction permit is issued. The Albuquerque agency has verbally agreed to revise their permit regulations to incorporate alternate site analysis ninety days after the State modifies their permit regulations. EPA is conditionally approving this portion of the SIP on the condition the Albuquerque agency will adopt and submit NSR regulations that require alternate site analysis to EPA by December 1, 1981. This conditional approval is expressly granted to allow the State to meet the requirements of Section 172(b)(11)(A) and Section 173 of the Act.

PUBLIC COMMENTS: The public was given the opportunity to comment on the substance and schedules contained in the New Mexico SIP in the proposed rulemaking of August 9, 1979 (44 FR 46695). Comments concerning the Albuquerque CO portion of the New Mexico SIP were addressed in the April 10, 1980 Notice of Final Rulemaking (45 FR 24460).

Under Section 307(b)(1) of the Clean Air Act, judicial review of the final rulemaking is available *only* by the filing of a petition for review on the United States Court of Appeals for the appropriate circuit within 60 days of (date of publication in **Federal Register**). Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

The Office of Management and Budget has exempted this regulation from the OMB review requirements of Executive Order 12291 pursuant to Section 8(b) of that Order.

This Notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act, as amended.

Dated: January 27, 1981.

Walter C. Barber,

Acting Director.

Note.—Incorporation by reference of the State Implementation Plan for the State of New Mexico was approved by the Director of the Federal Register on July 1, 1980.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I Title 40 of the Code of Federal Regulations is amended as follows:

Subpart GG—New Mexico

1. In § 52.1620, paragraph (c) is amended by revising paragraphs (11) and (15) and adding new paragraphs (16), (17), and (18) as follows:

§ 52.1620 Identification of Plan.

* * * * *

(c) * * *

(11) Revisions to the plan for attainment of standards for particulate matter in Albuquerque and Grant, Eddy and Lea Counties, sulfur dioxide in San Juan and Grant Counties; ozone in Albuquerque and carbon monoxide in Las Cruces, Farmington and Santa Fe were submitted by the Governor on January 23, 1979.

* * * * *

(15) No action is being taken on the carbon monoxide strategies submitted by the Governor on January 23, 1979 for Farmington and Santa Fe.

(16) Revisions to the plan for attainment of the standard for carbon monoxide in Bernalillo County were submitted by the Governor on March 17, 1980.

(17) A commitment to not issue permits to stationary sources located in nonattainment areas was submitted by the Governor on May 20, 1980.

(18) A commitment to submit an enforcement plan for the Albuquerque-Bernalillo County inspection/maintenance program was submitted by the Governor on October 10, 1980.

2. Section 52.1627 is added as follows:

§ 52.1627 Control strategy and regulations: Carbon monoxide.

(a) *Part D Conditional Approval.* The Bernalillo County carbon monoxide plan is conditionally approved on the condition that the State submit to EPA a revised implementation schedule and a detailed enforcement plan for the inspection/maintenance program, including specific commitments of the manpower and financial resources to enforce the program, by June 30, 1981.

3. Section 52.1628 is amended by adding
a new paragraph (b) to read as follows:

§ 52.1628 Review of new sources and modifications.

* * * * *

(b) *Part D Conditional Approval.* The Bernalillo County carbon monoxide plan is conditionally approved on the condition that a revised Section 20, "Permits," are submitted to EPA by December 1, 1981. In addition the Albuquerque-Bernalillo County Air Quality Control Board must continue their policy of not issuing permits to new or modified stationary sources, as specified in the Governor's letter of May 20, 1980, to fulfill the requirements of Part D.

40 CFR Part 180

[PP OF2418/R310; PH-FRL 1786-1]

Tolerances and Exemptions for Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Phytophthora Palmivora

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for residues of the fungus mycoherbicide *Phytophthora palmivora*. This regulation was requested by Abbott Laboratories. This regulation eliminates the need to establish a maximum permissible level for residues of *Phytophthora palmivora*.

EFFECTIVE DATE: Effective on March 26, 1981.

ADDRESS: Written objections may be submitted to the: Hearing Clerk, Environmental Protection Agency, Rm. M-3708 (A-110), 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm.

412, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–7070).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the Federal Register of November 18, 1980 (45 FR 76242) that Abbott Laboratories, 14th St. and Sheridan Rd., Chicago, IL 60064 had filed pesticide petition OF2418 with the EPA. The petition proposed that 40 CFR Part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of the fungus mycoherbicide *Phytophthora palmivora* on citrus fruit. No comments were received in response to this notice of filing.

The data submitted or referenced in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed exemption from the requirement of a tolerance included an acute dermal infectivity study in rats, an acute oral infectivity study in rats, effect of simulated gastric and intestinal fluids on survival of *Phytophthora palmivora* viable units including chlamydospores; primary ocular irritation study in rabbits; an acute infectivity study—p. *palmivora* administered intratracheally to rats; a mycotoxin screen study; and a dermal sensitization study in male guinea pigs. No adverse effects were noted in any of these studies.

In regard to whether *Phytophthora palmivora* is pathogenic to fish and wildlife species, the agency is requiring the registrant to submit, within 1 year of registration, the following studies.

1. Avian single-dose oral toxicity and pathogenicity studies.
2. Avian injection pathogenicity study.
3. Freshwater fish aquatic invertebrate toxicity and pathogenicity studies.
4. Freshwater aquatic invertebrate toxicity and pathogenicity studies.

After full review of the data, *Phytophthora palmivora* may be determined to be nonpathogenic to fish and wildlife. In the meantime, the granting of an exemption from the requirement of tolerance would be in the public interest because of the beneficial role of this mycoherbicide in citrus grove pest management. The strangler or milkweed vine has become a major weed pest in Florida citrus groves. This member of the milkweed family is a native of subtropical South America. The time of introduction of the plant into Florida is not certain, but it was known to be cultivated as an ornamental in this State. This first report of the spread to citrus groves was in 1957. This infestation plus the original planting became the source for seed that has spread throughout the citrus-producing areas of Florida. Its large seed production and ease of wind dissemination, and its persistence and difficulty of control with chemical herbicides have resulted in the rapid spread of the weed. Thorough coverage of the infested area by chemical herbicides is difficult due to restricted boom movement under tree canopies. Approximately 300,000 acres of citrus in central Florida are infested. The toxicity and infectivity studies submitted adequately demonstrate that humans or domestic animals will not be adversely affected. Additionally, the registration under which use will be permitted is a conditional one, and may be terminated quickly should additional data not be provided or should adverse effects manifest from review of new data and/or other information.

An examination of the available literature indicates that the genus *Phytophthora* is not known to infect or cause any health hazards in humans or domestic animals. Due to its inability to survive a drying process, it is prepared in a wet state and refrigerated until use. It is not expected to enter the human food chain. Thus, acceptable daily intake (ADI) and maximum permissible intake (MPI) considerations are not relevant to this petition. No enforcement actions are anticipated. Therefore, the requirements of an adequate analytical method for enforcement purposes is not applicable to this exemption request.

The *Phytophthora palmivora* fungus milkweed vine pathotype (MWV) controls *Morrenia odorata*, strangler or milkweed vine, in citrus groves in central Florida and occurs naturally in the intended use area. It selectively infects only the pest weed, causing rot symptoms; dying plants are girdled at the soil line and slightly above this line. The root rot induces leaf wilt; the leaves wither and eventually fall from the pest plant. This is the first exemption from the requirement of a tolerance for this fungus mycoherbicide. The fungus mycoherbicide is considered useful for the purpose for which the exemption for the requirement of a tolerance is sought, and it is concluded that the exemption will protect the public health.

Any person adversely affected by this regulation may, on or before April 27, 1981, file written objections with the Hearing Clerk, EPA, Rm. 3708 (A–110), 401 M St. SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under procedure to implement Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective date: March 26, 1981.

(Sec. 408(d)(2), 68 Stat. 512, (21 U.S.C. 346a(d)(2)))

Dated: March 19, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Therefore, Subpart D of 40 CFR Part 180 is amended by adding § 180.1057 to read as follows:

§ 180.1057 Phytophthora palmivora; exemption from requirement of tolerance.

Phytophthora palmivora is exempted from the requirement of a tolerance in or on the raw agricultural commodity citrus fruit.

[FR Doc. 81-9171 Filed 3-25-81; 8:45 am]
BILLING CODE 6560-32-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101–38

[FPMR Amendment G–51]

Acquisition of Fuel Efficient Light Trucks

AGENCY: Transportation and Public Utilities Service, General Services Administration.

ACTION: Final rule.

SUMMARY: This action incorporates the requirement for Federal Executive agencies to acquire fuel efficient light trucks (up to 8,500 pounds Gross Vehicle Weight Rating) into Subchapter G of the Federal Property Management Regulations.

EFFECTIVE DATE: October 1, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Lowell A. Stockdale, Director, Federal Fleet Management Division (202–275–1021).

SUPPLEMENTARY INFORMATION: FPMR Temporary Regulation G–42 (44 FR 74832, December 18, 1979) is canceled and deleted from the appendix at the end of Subchapter G in 41 CFR Chapter 101.

PART 101–38—MOTOR EQUIPMENT MANAGEMENT

1. The table of contents for Part 101–38 is amended by adding the following entries:

Sec. 101–38.1307 Acquistion of fuel efficient light trucks.
Sec. 101–38.1307–1 Definitions.
Sec. 101–38.1307–2 Agency forecast of planned acquisitions.
Sec. 101–38.1307–3 GSA assistance.

2. Sections 101–38.1307, 101–38.1307–1, 101–38.1307–2 and 101–38.1307–3 and added to read as follows:

§ 101–38.1307 Acquisition of fuel efficient light trucks.

This section sets forth policy and procedures govering the acquisition of fuel efficient light trucks by executive agencies and provides for the administration of a consolidated Federal fleet plan for use in monitoring those acquisitions. The authority for this Subpart 101–38.1307 derives from section 1(b) of Executive Order 12003, dated July 20, 1977.

(a) In compliance with Executive Order 11912 and 12003, GSA administers a consolidated Federal fleet plan for light trucks acquired by executive agencies. The plan is based on forecasts of total light truck acquisition requirements by vehicle class, submitted by executive agencies to GSA on or before December 15 of each fiscal year. This forecast will serve as substantiation that each agency's acquisition plan is in conformance with Executive Order 12003; i.e., the agency plan will result in the achievement of the fleet average fuel economy prescribed for the applicable fiscal year. GSA will administer the plan by maintaining a master record of the miles per gallon rating for light trucks actually acquired by each agency during the fiscal year. Periodically, each agency will be furnished a listing of light trucks acquired with the cumulative fleet average fuel economy achieved to compare with its forecast. This will enable each agency to adjust future vehicle acquisitions when necessary to comply with the Executive order by the end of the fiscal year. The Federal fleet plan will enable GSA to predict the total fleet average fuel economy to be achieved by all executive agencies prior to the end of the fiscal year and to provide management assistance to agencies when necessary to ensure compliance with the Executive Order. Forecasts of planned acquisitions shall be forwarded to the Federal Fleet Management Division (TMM), General Services Administration, Washington, DC 20406, not later than December 15 of each fiscal year in accordance with the requirements set forth in § 101–38.1307–2. Interagency control number 0162 GSA–AN has been assigned to this required forecast.

(b) All light trucks acquired by executive agencies must achieve the fleet average set forth below for the appropriate fiscal year except as provided for in paragraph (c) of this section, or acquired to be used outside the conterminous United States, Alaska, Hawaii, Guam, the Virgin Islands, and the Commonwealth of Puerto Rico.

Fiscal year	Fleet average fuel economy miles per gallon (MPG)	
	4 x 2	4 x 4
1981	16.7	15.0
1982	18.0	16.0
1983	19.5	17.5
1984	20.3	18.5
1985	21.6	19.0

(c) An agency may request exemptions from the provisions of § 101–38.1307 for individual light trucks or for specific categories of light trucks used for special purposes, such as fire support. These requests shall be submitted in writing to the General Services Administration (A), Washington, DC 20405, and shall state the reasons why the acquisition of such a light truck or category of light trucks will preclude the agency from meeting the fleet average fuel economy established by Executive Order 12003 and this regulation. The Administrator of General Services will review the request and, with the concurrence of the Secretary of Energy, determine the merits of the request and inform the requesting agency of the determination. Light trucks exempted under the provisions of this paragraph shall not be included in the calculation of an agency's fleet average fuel economy.

(d) The provisions of this regulation are not applicable to light trucks designed to perform combat related missions for the U.S. Armed Forces or designed to be used in law enforcement work or emergency rescue work.

§ 101–38.1307–1 Definitions.

As used in §§ 101–38.1307, 101–38.1307–1, 101–38.1307–2, and 101–38.1307–3, the following terms shall have the stated meanings:

(a) "Executive agency" means an executive department, a Government corporation, or an independent establishment.

(b) "Light truck" means any truck up to 8,500 pounds Gross Vehicle Weight Rating (GVWR), which is a four-wheeled vehicle propelled by fuel (gasoline or diesel oil), is manufactured primarily for use on public streets, roads, and highways, and is covered by Federal Standard Number 307 (Trucks: light commercial, two wheel drive) or Federal Standard Number 292 (Trucks: light commercial, four wheel drive).

(c) "Fleet average fuel economy" means the total number of light trucks of a certain configuration (4 by 2 or 4 by 4) acquired during a fiscal year by an executive agency, divided by a sum of terms, each of which is a function created by dividing the number of light trucks of a given model type by the fuel economy of that model type (light trucks designed for combat-related missions, law enforcement work, or emergency rescue work are exempt).

The method of calculating the fleet average fuel economy uses harmonic averaging and is specifically required by section 510 of the Motor Vehicle Information and Cost Savings Act (89 Stat. 915; 15 U.S.C. 2010) for passenger automobiles. It is being extended to apply to the calculation of the light truck fleet average fuel economy.

The fleet average fuel economy is calculated as shown in the following example:

4 by 2

Total number of light trucks (600) divided by:

(1) Six-cylinder automatic transmission van-wagons and van-panels for use in 49 States (100) divided by 17 mpg, plus

(2) Eight-cylinder automatic transmission van-wagons and van-panels for use in California (50) divided by 14 mpg, plus

(3) Six-cylinder automatic transmission pickups for use in 49 States (200) divided by 17 mpg, plus

(4) Eight-cylinder automatic transmission pickups for use in California (50) divided by 14 mpg, plus

(5) Four-cylinder automatic transmission compact pickups for use in 49 States (150) divided by 22 mpg, plus

(6) Four-cylinder, 4-speed manual transmission compact pickups for use in California (25) divided by 24 mpg, plus

(7) Six-cylinder automatic transmission sedan deliveries for use in 49 States (25) divided by 19 mpg.

$$= \frac{600}{\frac{100}{17} + \frac{50}{14} + \frac{200}{17} + \frac{50}{14} + \frac{150}{22} + \frac{25}{24} + \frac{25}{19}}$$

$$= \frac{600}{5.88 + 3.57 + 11.76 + 3.57 + 6.82 + 1.04 + 1.32}$$

$$= \frac{600}{33.96} = 17.7 \text{ (Rounded to the nearest 0.1 mpg)}$$

4 by 4

Total number of light trucks (190) divided by:

(1) Six-cylinder automatic transmission utility trucks for use in 49 States (180) divided by 18 mpg, plus

(2) Eight-cylinder, 3-speed manual transmission utility trucks for use in California (10) divided by 15 mpg.

$$= \frac{190}{\frac{180}{18} + \frac{10}{15}}$$

$$= \frac{190}{10.0 + .67}$$

$$= \frac{190}{10.67} = 17.8 \text{ (Rounded to the nearest 0.1 mpg)}$$

(d) "Acquired" means purchased or leased for a period of 60 continuous days or more but does not include light trucks obtained on assignment from the Interagency Motor Pool System (IMPS) or rented for periods less than 60 days through the Federal Supply Schedule or other source.

(e) "Light trucks designed for use in law enforcement work" means a light truck which is specifically approved in an agency's appropriation act and certified by the head of an agency for use in law enforcement work. For light trucks so certified the following equipment is required:

(1) Emergency warning lights must be displayed.

(2) Vehicle must be identified with markings; such as "POLICE."

§ 101-38.1307-2 Agency forecasts of planned acquisitions.

(a) Executive agencies shall furnish to the Federal Fleet Management Division (TMM), General Services Administration, Washington, DC 20406, their light truck acquisition requirements for each fiscal year based on the combined city/highway mileage ratings for light trucks for 49 States and California vehicles developed by the Environmental Protection Agency (EPA). The forecast shall be submitted to GSA by December 15 of each fiscal year. GSA will publish information concerning the EPA mileage ratings, a sample agency forecast, and the miles-per-gallon ratings to be used for the forecast in an FPMR bulletin each year in sufficient time to enable agencies to plan the acquisitions and to prepare the forecast. Agencies not planning any of these acquisitions (purchases or commercial leases) or those that satisfy their total motor vehicle requirements through the GSA IMPS shall furnish a negative forecast.

(b) The forecast of the total agency light truck acquisition requirements shall include light trucks to be procured or leased for use in the conterminous United States, Alaska, Hawaii, Guam, the Virgin Islands, and the Commonwealth of Puerto Rico. The forecast shall not include light trucks (1) to be procured or leased outside the foregoing area, (2) designed to perfrom combat-related missions for the Armed Forces, or (3) designed to be used in law enforcement work or emergency rescue work.

(c) Requisitions for light trucks sent to GSA for procurement action, but for which a contract is not effected during the same fiscal year the requisitions are submitted, shall be included in the agency's acquisition forecast for the following fiscal year.

(d) When a light truck lease contains an option to renew and the option is exercised, that renewal action shall count as a new acquisition and shall be included in the applicable year's forecast.

(e) In order to maintain a master record of all light truck acquisitions, agencies shall forward to the Federal Fleet Management Division (TMM), General Services Administration, Washington, DC 20406, copies of all agreements for the leasing of light trucks for a period of 60 continuous days or more, including agreements to renew existing leases. When the lease agreement does not provide the following information, it shall be submitted as an attachment to the lease:

(1) Year
(2) Make
(3) Model
(4) Transmission type (if manual, number of forward speeds)
(5) Cubic-inch displacement (CID)
(6) Fuel system (fuel injection or carburetor (number of barrels))
(7) Whether it is a 4 by 2 or 4 by 4
(8) If leased in California
(9) Gross vehicle weight rating (GVWR)

(f) Submission of requisitions for procurement, or requests for authority to lease light trucks which, in the opinion of GSA, will result in noncompliance with the fleet average fuel economy by the end of the fiscal year may result in requisitions being held in abeyance pending adjustment to the agency's acquisition plan.

§ 101-38.1307-3 GSA assistance.

(a) GSA periodically will furnish each agency a listing showing the status of light trucks acquired with the fleet average fuel economy achieved to enable the agency to determine the extent to which it is in conformance with the forecast originally submitted to GSA. The listing will enable an agency to make adjustments to its acquisition plan, when necessary, to ensure that its fleet average fuel economy is achieved for the applicable fiscal year.

(b) Agencies may request GSA's assistance when preparing the forecasts

of light truck acquisition requirements by contacting the Federal Fleet Management Division (TMM), General Services Administration, Washington, DC 20406, telephone (202) 275–1021, or Autovon 285–0694.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: March 2, 1981.

Ray Kline,

Acting Administrator of General Services.

BILLING CODE 6820-AM-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 755–5585 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii Call Toll Free (800) 424–9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevations for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Final Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	# Depth in feet above ground. *Elevation in feet (NGVD)
Illinois	(V), Browning, Schuyler County (Docket No. FEMA-5944)	Illinois River	At the downstream corporate limits	*452
			At the upstream corporate limits	*452
Maps available for inspection at the Public Works Office, Village Hall, Browning, Illinois.				
Illinois	(C), Geneva, Kane County (Docket No. FEMA-5944)	Fox River	At the downstream corporate limit	*669
			Just downstream of the Geneva Dam	*676
			Just upstream of the Geneva Dam	*679
			At the upstream corporate limit	*682
		Geneva Creek	At the confluence with Fox River	*673
			Just upstream of Pedestrian bridge located 300 feet downstream of State Route 31.	*689
			Just upstream of State Route 31	*694
			About 100 feet upstream of Cheever Avenue	*699
			Just upstream of the Chicago and North Western railroad.	*707
			Just downstream of South Street	*714
			Just upstream of South Street	*722
Maps available for inspection at the Building Commissioner's Office, City Hall, 22 South First Street, Geneva, Illinois.				
Illinois	(V), Lynwood, Cook County (Docket No. FEMA-5886)	Lansing Ditch	Downstream corporate limit	*615
			Just upstream of 204th Street	*617
			Upstream corporate limits (about 2,800 feet upstream of Glenwood-Dyer Road).	*627
		Shallow Flooding (Overflow from Tributary A of North Creek).	About 100 feet east of intersection of Glenwood-Lansing Road and Torrence Avenue.	¹614
			About 100 feet west of intersection of 201st Street and Park Avenue.	¹615
			Intersection of 202nd Street and Burnham Avenue	¹616
¹BFE's for Tributary A of North Creek were previously listed in the Proposed BFE notice with an A–0 Zone and a depth.				
Maps available for inspection at the Office of the Village Clerk, Village Hall, 3107 East Lynwood-Dyer Road, Lynwood, Illinois.				
Indiana	(Unincorporated), Adams County (Docket No. FEMA-5920)	St. Mary's River	About 5,000 feet downstream of confluence of Holthouse Ditch.	*787
			About 2,700 feet upstream of Borum Run confluence	*791
		Wabash River	About 1,700 feet downstream State Route 116	*822
			About 1,500 feet downstream 37 West Road	*826
			About 2,000 feet upstream Conrail	*830
			About 3.3 miles upstream State Route 116	*834
		Borum Run	Just upstream of U.S. Route 33	*791
			About 1.3 miles upstream Norfolk & Western Railroad	*791
		Holthouse Ditch	About 600 feet downstream Nuttman Road	*788
			About 1,000 feet upstream Nuttman Road	*790
		Limberlost Creek	At confluence with Loblolly Creek	*833
			About 5,000 feet upstream confluence with Loblolly Creek.	*833
		Koos Ditch	About 600 feet downstream U.S. Route 224	*789
			About 50 feet downstream East Road	*792

Final Base (100-Year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	# Depth in feet above ground. *Elevation in feet (NGVD)
		Loblolly Creek	Just downstream Conrail	*832
			Just upstream 300 feet West Road	*833
		Kohne Drain No. 1	Just downstream Nuttman Road	*788
			About 50 feet downstream County Road 050 West	*793
			Just upstream County Road 050 West	*796
			About 100 feet upstream Conrail	*799
Maps available for inspection at the Office of the Zoning Superintendent, Courthouse Annex, Decatur, Indiana.				
Indiana	(Unincorporated), Cass County (Docket No. FEMA-6820)	Wabash River	About 4.2 miles downstream U.S. Route 25	*579
			About 300 feet downstream Cicott Street	*591
			About 2,700 feet downstream 16th Street	*595
			About 9,300 feet upstream 16th Street	*604
			About 360 feet upstream County Road 625 East	*621
			About 15,800 feet upstream County Road 625 East	*635
		Eel River	About 4,650 feet downstream Davis Street Road	*607
			About 660 feet upstream Davis Street Road	*613
			About 840 feet downstream County Road 150 North	*634
			About 9,800 feet upstream County Road 150 North	*644
		Goose Creek	About 320 feet downstream Humphry Street	*589
			About 100 feet downstream Humphry Street	*589
			About 60 feet upstream Humphry Street	*601
Maps available for inspection at the Auditor's Office, Cass County Government Building, Room 202, Logansport, Indiana.				
Indiana	Clarksville, Town, Clark County (Docket No. FEMA-6868)	Ohio River	Downstream Corporate Limits	*448
			Upstream Corporate Limits	*450
		Silver Creek	Confluence with Ohio River	*448
			1,584 feet upstream of Chessie System at Corporate Limits.	*448
			Approximately 2,800 feet downstream of Interstate Route 265 at Corporate Limits.	*448
			Upstream of Interstate Route 65	*456
			Approximately 600 feet upstream of State Route 60 at upstream Corporate Limits.	*459
Maps available for inspection at the Town Clerk's Office, Clarksville Town Hall, 203 East Montgomery Street, Clarksville, Indiana.				
Indiana	(C), Kokomo, Howard County (Docket No. FEMA-6820)	Kokomo Creek	At confluence with Wildcat Creek	*792
			Just downstream of South Washington Street	*797
			At upstream corporate limits	*807
		Wildcat Creek	At downstream corporate limits	*784
			About 1,400 feet upstream of Norfolk and Western Railway.	*790
			Just downstream of Washington Street	*798
			At upstream corporate limits	*807
Maps available for inspection at the Courthouse, Kokomo, Indiana.				
Iowa	(C), Nevada, Story County (Docket No. FEMA-6911)	West Branch Indian Creek	About 2,000 feet downstream of U.S. Highway 30	*945
			Just downstream of County Road S14 bridge	*957
			Just downstream of Chicago and North Western railroad.	*962
Maps available for inspection at the City Hall, Nevada, Iowa.				
Iowa	(C), Oakland, Pottawattamie County (Docket No. FEMA-6820).	West Nishnabotna River	Downstream corporate limits (about 4,000 feet upstream of U.S. Highway 6).	*1,079
			Upstream corporate limits (north of Kimberly Airport)	*1,085
Maps available for inspection at the City Hall, Oakland, Iowa.				
Iowa	(C), Red Oak, Montgomery County (Docket No. FEMA-6820).	East Nishnabotna River	At southern corporate limits	*1,031
			At northern corporate limits	*1,039
		Red Oak Creek	About 50 feet upstream Broadway	*1,034
			Just upstream East Fifth Street	*1,044
			About 50 feet upstream East Eighth Street	*1,048
			About 900 feet downstream intersection of Coolbaugh Street and Highland Avenue.	*1,051
			Just upstream intersection of Coolbaugh Street and Highland Avenue.	*1,057
			Just upstream Forest Avenue	*1,082
			About 200 feet downstream Summit Street	*1,086
Maps available for inspection at the City Hall, 901 Sixth Street, Red Oak, Iowa.				
Kentucky	City of South Shore, Greenup County (FEMA-6820)	Ohio River	Along entire shoreline within Corporate limits	*536
Maps available for inspection at City Hall, 9041 Second Avenue, South Shore, Kentucky 41175.				
Louisiana	City of Opelousas, St. Landry Parish (FEMA-6847)	Bayou Teeson	Just upstream of U.S. Highway 167	*26
			Approximately 1,100 feet downstream Dunbar Avenue	*49
			Just downstream of Berthaud Avenue	*51
			Just upstream of Church Street	*64
		Bayou Teeson Tributary 2	Just upstream of West Joseph Street extended	*71
		Bayou Yarbor	Just upstream of McCarthy Avenue	*49
			Just downstream of Hulphan Street	*54
		Bayou Davey	Just downstream of Moulon Street	*54
		Bayou Rawles	Just downstream of West Linwood Street	*38
			Just upstream of Heather Drive	*44
		East Bayou Rawles	Just downstream of Prescott Street	*80
		Bayou Del Puent (South Branch)	Just upstream of Bellevue	*85

Final Base (100-Year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	# Depth in feet above ground. *Elevation in feet (NGVD)
		Bayou Del Puent (North Branch)	Just downstream of Sandoz Street	*50
		East Fork Bayou Plaquemine Brule	Just upstream of Missouri Pacific Railroad	*71
	Maps available for inspection at City Hall, North Court Street, Opelousas, Louisiana 70570.			
Michigan	(V), Almont, Lapeer County (Docket No. FEMA-5944)	North Branch Clinton River	About 220 feet downstream Kidder Road	*822
			Just upstream Kidder Road	*824
			Just downstream Main Street	*833
			About 2,650 feet upstream Main Street	*840
		Farnum Drain	At confluence with North Branch Clinton River	*834
			Just downstream St. Clair Street	*836
	Maps available for inspection at the Village Hall, 817 North Main Street, Almont, Michigan.			
Michigan	(C), Pinconning, Bay County (Docket No. FEMA-5912)	Pinconning River	About 0.5 mile downstream of Water Street	*591
			At upstream corporate limit	*595
	Maps available for inspection at the City Hall, 208 Manitou Street, Pinconning, Michigan.			
Missouri	(T), Catron, New Madrid County (Docket No. FEMA-5944)	Shallow Flooding (Ditch No. 1)	Within corporate limits	*281
	Maps available for inspection at the Office of the Mayor, P.O. Box 24, Catron, Missouri 63833.			
Missouri	(C), Matthews, New Madrid County (Docket No FEMA-5926)	Shallow Flooding (Little River)	About 500 feet upstream of Main Street bridge over Little River.	*293
			About 1,000 feet southwest of intersection of Moore Street and Belt Avenue.	*293
		Shallow Flooding (From Rainfall)	About 1,400 feet north of Main Street and about 2,100 feet east of St. Louis-San Francisco Railway.	#3
			About 900 feet south of Main Street and about 1,200 feet east of St. Louis-San Francisco Railway.	#3
			North of Summit Drive between Ridgeview Drive and Davis Street.	#3
			North of Critchlow Street, on west side of Railroad Avenue.	#3
			Just north of Main Street on Railroad Avenue	#3
			At Hall Street and Railroad Avenue	#3
			Just west of Morgan Street and Belt Avenue intersection.	#3
			Just east of Morgan Street and Dean Street intersection.	#3
	Maps available for inspection at the City Hall, P.O. Box 54, Matthews, Missouri.			
Missouri	(V), North Lilbourn, New Madrid County (Docket No. FEMA-5944).	Shallow Flooding (from Little River)	Within the corporate limits	*291
	Maps available for inspection at the Village Hall, P.O. Box 136, Lilbourn, Missouri.			
Missouri	(C), Risco, New Madrid County (Docket No. FEMA-5944)	Shallow Flooding (Ditch No. 8)	Between the western corporate limit and the St. Louis-San Francisco Railroad.	*277
		Shallow Flooding (Ditch No. 44)	Between the eastern corporate limit and the St. Louis-San Francisco Railroad.	*276
	Maps available for inspection at the City Hall, Risco, Missouri.			
Missouri	(C), Tallapoosa, New Madrid County (Docket No FEMA-5944).	Shallow Flooding (Ponding from Unnamed Ditch).	Between the eastern corporate limits and 1st Street	*273
		Shallow Flooding (Ponding from Ditch No..	Within the corporate limits	*273
	Maps available for inspection at the Office of the City Clerk, City Hall, Tallapoosa, Missouri.			
Nebraska	(C), Madison, Madison County (Docket No. FEMA-5944)	Union Creek	About 7,000 feet downstream of U.S. Highway 81	*1,566
			Just downstream of Main Street	*1,574
			Just upstream of Jackson Street	*1,579
			About 10,000 feet upstream of 3rd Street	*1,588
		Taylor Creek	Confluence with Union Creek	*1,575
			Just upstream of North 8th Street	1,579
			About 1,300 feet upstream of Union Pacific Railroad	*1,586
	Maps available for inspection at the City Hall, Madison, Nebraska.			
Nebraska	(V), Raymond, Lancaster County (Docket No. FEMA-5944)	Oak Creek	About 1.1 miles downstream West Mill Road (at extra-territorial limits).	*1,203
			Confluence of North Oak Creek	*1,212
			Just downstream State Highway 79	*1,213
		North Oak Creek	About 200 feet upstream West Raymond Road	*1,216
			Just downstream West Branched Oak Road	*1,226
	Maps available for inspection at the Village Hall, Raymond, Nebraska.			
New Jersey	Atlantic Highlands, Borough, Monmouth County (Docket No. FEMA-5875).	Sandy Hook Bay	Entire shoreline	*12
			Tidal flooding on Wagner Creek downstream from upstream corporate limits.	*12
			Tidal flooding of Many Mind Creek downstream of State Route 36.	*12
	Maps available for inspection at the Borough Clerk's Office, Atlantic Highlands, New Jersey.			
New Jersey	Califon, Borough, Hunterdon County (Docket No. FEMA-5895).	South Branch Raritan River	Downstream Corporate Limits	*455
			Upstream Califon Dam	*468
			Upstream Corporate Limits	*475

Final Base (100-Year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	# Depth in feet above ground. *Elevation in feet (NGVD)
Maps available for inspection at Borough Clerk's Office, Municipal Building, Main Street, Califon, New Jersey.				
New Jersey	Franklin, Township, Hunterdon County (Docket No. FEMA-5912).	Capoolog Creek	3,970' downstream of Quakertown Road	*345
			2,570' downstream of Quakertown Road	*357
			1,860' downstream of Quakertown Road	*363
			Downstream of Quakertown Road	*366
			450' upstream of Quakertown Road	*398
			1,130' upstream of Quakertown Road	*405
			1,910' upstream of Quakertown Road	*415
			2,645' upstream of Quakertown Road	*425
		Tributary A	Downstream of Conrail	*172
			1,500' upstream of Conrail	*183
			Sidney Road	*192
			1,895' upstream of Sidney Road	*205
			Pittstown Road	*215

BILLING CODE 6718-03-M

---

44 CFR Part 65

[Docket No. FEMA 6017]

List of Communities With Special Hazard Areas Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule identifies communities with areas of special flood, mudslide, or erosion hazards as authorized by the National Flood Insurance Program. The identification of such areas is to provide guidance to communities on the reduction of property losses by the adoption of appropriate flood plain management or other measures to minimize damage. It will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

EFFECTIVE DATES: The effective date shown at the top right of the table or April 24, 1981, whichever is later.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program (202) 426–1460 or Toll Free Line 800–424–8872, Room 5150, 451 Seventh Street SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply in respect to conventional mortgage loans by federally regulated, insured, supervised, or approved lending institutions.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the **Federal Register** or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the **Federal Register** or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 64 or Title 44 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128).

Section 65.3 is amended by adding in alphabetical sequence a new entry to the table:

44 CFR Part 64

[Docket No. FEMA 6018]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program.

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–8620.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line 800–424–8872, Room 5150, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of Eligible Communities.

State	County	Location	Community No.	Effective date of authorization of sale of flood insurance for area	Hazard area identified

44 CFR Part 64

[Docket No. FEMA 6014]

Suspension of Community Eligibility Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final Rule.

SUMMARY: This rule lists communities where the sale of flood insurance, as authorized under the National Flood Insurance Program (NFIP), will be suspended because of noncompliance with the flood plain management requirements of the program.

EFFECTIVE DATES: The third date ("Susp.") listed in the fifth column.

FOR FURTHER INFORMATION CONTACT: Mr. Gary D. Johnson, National Flood Insurance Program, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date subsidized flood insurance is no longer available in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended, provides that no direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elapsed since identification of the community as having flood prone areas, as shown on the Office of Federal Insurance and Hazard Mitigation's initial flood insurance map of the community. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

In each entry, a complete chronology of effective dates appears for each listed community.

§ 64.6 List of Eligible Communities.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 401

[CGD 80-148]

Great Lakes Pilotage Rates

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending its regulations governing the pilotage of vessels on the Great Lakes. These amendments increase the basic pilotage rates by an average of approximately ten percent in the U.S. Great Lakes pilotage system. Reasonable travel expenses are included in the cancellation charge if a pilot has commenced travel to that assignment prior to the cancellation notice received. In addition, if a pilot is available for service but not utilized for more than one hour due to delay or cancellation, then charges are made for the entire period. These changes are made in order to increase the revenue received by the pilot organizations so that they may cover their increased operating costs.

EFFECTIVE DATE: April 1, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. John J. Hartke (G-MVP-4), Room 1400, Department of Transportation, Coast Guard Headquarters, 2100 Second Street, S.W., Washington, D.C. 20593. (202) 755-8683.

SUPPLEMENTARY INFORMATION: On January 12, 1981, the Coast Guard published a proposed rule (46 FR 2656) concerning this amendment. Interested persons were given until February 26, 1981, to submit comments. No comments were received and the proposed rule is being adopted without change.

Effective Date: The final regulations establishing the rates are to become effective on April 1, 1981. This date was selected after consultation with the Canandian Great Lakes Pilotage Authority, Ltd., the U.S. and Canadian pilots associations, and representatives of shippers, and corresponds to the approximate opening of the Great Lakes shipping season. The Canadian regulatory process has been completed and the rates for the Canadian pilots on the Great Lakes will increase on April 1. A failure of the United States rate to increase by an equal amount will lead to two rate structures on the same bodies of water. The initial consultation process was developed in response to similar situations which lead to difficulties on the Lakes and a source of friction among all the parties involved. Since all interested parties have reached a mutual agreement as to the rate increase and a failure to coordinate the effective dates may lead to unnecessary difficulties, the Coast Guard has determined that the rule must be made effective as scheduled. For these reasons, the Coast Guard, for good cause, finds it necessary to give less than thirty days notification prior to the effective date of the rule.

Executive Order 12291: The rate increase does not constitute a major rule as defined by Executive Order 12291. The estimated annual effect of the rate increase will be a $700,000 increase in the fees that pilots may charge for their services. The Great Lakes Pilotage Act requires that U.S. registered vessels and foreign vessels use pilots. Very few U.S. registered vessels operate on the Lakes. Most U.S. vessels on the Great Lakes are enrolled vessels and are not required to use registered pilots. The rate increase will be borne primarily by foreign vessels. It is estimated that the cost of the rate increase will be approximately $0.000047 per ton/mile, which will not constitute a major increase in costs or prices for the shippers, governmental entities, or geographical regions. The rates were established after consultation with the U.S. and Canadian pilot associations, representatives of the shippers, and the Canadian Great Lakes Pilotage Authority, Ltd. The size of the rate increase is such that it will have no significant adverse effect on competition, employment, investments, or the ability of U.S. enterprises to compete.

Regulatory Flexibility Act: The Coast Guard has reviewed this regulation under the Regulatory Flexibility Act and has determined that it does not have a significant economic impact on small businesses, small governments or other small orgainzations. This determination is based on the small overall and per ton/mile costs created by the regulation which will not create a significant economic impact on anyone. The small economic impact that the rule does create will be spread widely among carriers and shippers so that none will feel any significant effect. Consequently, the Coast Guard has not prepared a Regulatory Flexibility Analysis.

Drafting Information

The principal persons involved in drafting this rule are: John J. Hartke, Project Manager, Office of Merchant Marine Safety, and LT Michael Tagg, Project Attorney, Office of the Chief Counsel.

In consideration of the foregoing, Part 401 of Title 46 of the Code of Federal Regulations is amended as follows:

1. Section 401.405 is revised to read as follows:

§ 401.405 Basic rates and charges on designated waters.

Except as provided under § 401.420, the following basic rates shall be payable for all services and assignments performed by U.S. Registered Pilots in the areas described in § 401.300.

(a) *District 1:*

(1) For passage through the District or any part thereof, $7.24 for each statute mile, plus $96 for each lock transited, but with a minimum basic rate of $211 and a maximum basic rate for a through trip of $927.

(2) For a moveage in any harbor, $318.

(b) *District 2:*

(1) Southeast Shoal to Toledo or any point on Lake Erie west of Southeast Shoal, $494.

(2) Between points on Lake Erie west of Southeast Shoal, $292.

(3) Southeast Shoal to Port Huron Change Point or any point on the St. Clair River when pilots are not changed at Detroit Pilot Boat, $660.

(4) Southeast Shoal to Detroit/Windsor or any point on the Detroit River, $494.

(5) Southeast Shoal to Detroit Pilot Boat, $358.

(6) Toledo or any point on Lake Erie west of Southeast Shoal and Port Huron Change Point, when pilots are not changed at Detroit Pilot Boat, $990.

(7) Toledo or any point on Lake Erie west of Southeast Shoal and Detroit/

Windsor or any point on the Detroit River, $641.

(8) Toledo or any point on Lake Erie west of Southeast Shoal and the Detroit Pilot Boat, $494.

(9) Detroit/Windsor or any point on the Detroit River and between points on the Detroit River, $292.

(10) Detroit/Windsor or any point on the Detroit River to Port Huron Change Point or any point on the St. Clair River, $648.

(11) Detroit Pilot Boat to any point on the St. Clair River, $548.

(12) Detroit Pilot Boat to Port Huron Change Point, $503.

(13) Between points on the St. Clair River, $292.

(14) Port Huron Change Point to any point on the St. Clair River, $358.

(c) *District 3:*

(1) Between the southerly limit of the District and the northerly limit of the District or the Algoma Steel Corporation Wharf at Sault Ste. Marie, Ontario, $844.

(2) Between the southerly limit of the District and Sault Ste. Marie, Ontario or any point in Sault St. Marie, Ontario other than the Algoma Steel Corporation Wharf, $706.

(3) Between the northerly limit of the District and Sault Ste. Marie, Ontario, including the Algoma Steel Corporation Wharf, or Sault Ste. Marie, Michigan, $318.

(4) For a movage in any harbor, $318.

2. Section 401.410 (a) is revised to read as follows:

§ 401.410 Basic rates and charges on undesignated waters.

(a) Except as provided under § 401.420 and subject to paragraph (b) of this section, the basic rates for each 6 hour period or part thereof that a U.S. pilot is on board in the undesignated waters shall be:

(1) In Lake Ontario, $171

(2) In Lake Erie, $211

(3) In Lakes Huron, Michigan and Superior, $171

plus $162 for each time a U.S. pilot performs the docking or undocking of the ship.

(b) When in direct transit of the undesignated waters of Lake Erie between Southeast Shoal and Port Colborne, or between Port Colborne and Southeast Shoal, and the vessel's master plans to use an appropriate certificate in lieu of a pilot, the ship shall pick up or discharge the pilot at the Cleveland pilot boat. No charge is to be made for the transit between Southeast Shoal and the Cleveland pilot boat or between the Cleveland pilot boat and Southeast Shoal unless the services of the pilot are utilized.

3. Section 401.420 is revised to read as follows:

§ 401.420 Cancellation, delay or interruption in rendition of services.

(a) Except as provided in this paragraph, whenever the passage of a ship is interrupted and the services of a U.S. pilot are retained during the period of the interruption or when a U.S. pilot is detained on board a ship after the end of an assignment for the convenience of the ship, the ship shall pay an additional charge calculated on a basic rate of $26 for each hour or part of an hour during which each interruption lasts with a maximum basic rate of $422 for each continuous 24 hour period during which the interruption continues. There is no charge for an interruption caused by ice, weather, or traffic, except during the period beginning the 1st of December and ending on the 8th of the following April. No charge shall be made for an interruption if the total interruption ends during the 6 hour period for which a charge has been made under § 401.410.

(b) When the departure or movage of a ship for which a U.S. pilot has been ordered is delayed for the convenience of the ship for more than one hour after the U.S. pilot reports for duty at the designated boarding point or after the time for which the pilot is ordered, whichever is later, the ship shall pay an additional charge calculated on a basic rate of $26 for each hour or part of an hour including the first hour of the delay, with a maximum basic rate of $422 for each continuous 24 hour period of the delay.

(c) When a U.S. pilot reports for duty as ordered and the order is cancelled, the ship shall pay:

(1) A cancellation charge calculated on a basic rate of $160;

(2) A charge for reasonable travel expenses if the cancellation occurs after the pilot has commenced travel; and

(3) If the cancellation is more than one hour after the pilot reports for duty at the designated boarding point or after the time for which the pilot is ordered, whichever is later, a charge calculated on a basic rate of $26 for each hour or part of an hour including the first hour, with a maximum basic rate of $422 for each 24 hour period.

4. Section 401.425 is revised to read as follows:

§ 401.425 Provision for additional pilot.

The Director, Great Lakes Pilotage Staff, U.S. Coast Guard, or the General Manager, Great Lakes Pilotage Authority, Ltd., Canada, may require the assignment of two pilots to a ship upon request of the ship or when in his judgment, because of anticipated long transit, uncommon ship size, adverse weather or sea conditions or other abnormal circumstances, the assignment of two pilots is considered necessary for the safe navigation of the ship. The Director or General Manager shall direct which of the pilots is to be in charge, as circumstances require. The charge to the ship shall be twice the appropriate charge provided for in §§ 401.405, 401.410, and 401.420. This section does not apply to a ship in a direct transit of the undesignated waters of Lake Erie between Southeast Shoal and Port Colborne unless the ship is required by law to have a registered pilot on board in these waters.

5. Section 401.428 is revised to read as follows:

§ 401.428 Basic rates and charges for carrying a U.S. pilot beyond normal change point.

If a U.S. pilot is carried beyond his or her normal change point or is unable to board at the normal boarding point the pilot shall be paid at the rate of $162 per day or part thereof, plus reasonable travel expenses to or from the pilot's base. These charges are not appliable if the ship utilizes the services of the pilot beyond the normal change point and the ship is billed for those services. The change points to which this section applies are designated in § 401.450.

(Sec. 5, 74 Stat. 259 (46 U.S.C. 216c); Sec. 6(a)(4), 80 Stat. 937, as amended (49 U.S.C. 1655(a)(4); 49 CFR 1.46(a))

Dated: March 23, 1981.

Henry H. Bell,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 13 and 83

[FCC 81-95]

Definition of Term "Radio Officer"; Clarification of Requirements for Qualification for Six Months' Service Endorsement for Radio Officers on Ship Board in the Maritime Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Communications Act of 1934, as amended, requires that U.S. cargo vessels which are not equipped with a radiotelegraph auto alarm must carry, for safety purposes, at least two radio officers. However, if the cargo

vessel is equipped with a radiotelegraph auto alarm, it may carry a single radio officer who has had at least six months previous service as a radio officer in a station on board a ship or ships of the United States.

The Commission's Rules provide that an endorsement attesting to the six months service may be placed on First and Second Class Radiotelegraph Operator Licenses; however, they do not clearly define the requirements which must be met to qualify for the endorsement.

This action is intended to define the term "Radio Officer" and clearly delineate the requirements to qualify for the six month service endorsement.

DATE: Effective April 27, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Vernon P. Wilson, Field Operations Bureau, (202) 632-7240.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of Parts 13 and 83 of the Commission's rules to define the term "Radio Officer" and clarify the requirements for qualification for the six months' service endorsement for radio officers on ship board in the maritime services; Order.

Adopted: March 11, 1981.

Released: March 20, 1981.

By the Commission: Chairman Ferris not participating.

Purpose

1. Section 13.94 of the Commission's Rules provides that an endorsement attesting to at least six months satisfactory service may be placed upon the First or Second Class Radiotelegraph Operator License of a "qualified operator". Applicants for the six months' service endorsement have complained that the Commission's Rules, as presently written, do not clearly state the requirements which must be met. The amendments to Parts 13 and 83 of the Rules are intended to define the term "Radio Officer" and clearly delineate the requirements which must be met to qualify for the six months' service endorsement in conformance with the Communications Act and the Safety of Life at Sea Convention (SOLAS), to which the United States is signatory.

Background

2. On August 13, 1965, Congress adopted Public Law 89-121 (79 Stat. 511) which amended the Communications Act to conform to the 1960 Convention for the Safety of Life at Sea (SOLAS).[1] Among the Communications Act changes effected was a newly defined term "radio officer" to replace the term "qualified operator" as required on board United States cargo ships equipped with radiotelegraph stations and subject to part II of title III of the Communications Act.

3. Specifically, Public Law 89-121 replaced the term "qualified operator" as found in prior Section 3(y)(2) of the Communications Act, with the term "radio officer," as found in present Section 3(z)(1) of the Communications Act, and defined "radio officer" as follows:

> "Radio officer" on a ship of the United States means, for the purpose of part II of title III of this Act, a person holding at least a first or second class radiotelegraph operator's license as prescribed and issued by the Commission. When such person is employed to operate a radiotelegraph station aboard a ship of the United States, he is also required to be licensed as a radio officer in accordance with the Act of May 12, 1948 (46 U.S.C. 229 a-h).[2]

The United States Coast Guard is the administering authority responsible for licensing radiotelegraph operators as radio officers employed on ships of the United States.[3] Therefore, a "radio officer" is defined by the Communications Act as a person holding a first or second class radiotelegraph operator license issued by the Commission *and* also holding a license as a radio officer issued by the United States Coast Guard pursuant to 46 U.S.C. 229 a-h.

4. Public Law 89-121 also replaced the term "qualified operator", as used throughout part II of title III of the Communications Act, with the newly defined term of "radio officer". As one of the provisions so amended, Section 353 of the Communications Act requires that cargo ships of the United States which are not equipped with a radiotelegraph auto alarm must carry, for safety purposes, at least two radio officers. However, if the cargo ship is equipped with a radiotelegraph auto alarm, it may carry a single radio officer who has had at least six months' previous service as a radio officer in a station on board a ship or ships of the United States.

5. The amendments of Section 353 and 3(z)(1) of the Communications Act by Public Law 89-121 provide that the six months' service requirement as a radio officer under Section 353 can be met only if the six months' experience was obtained on board a ship or ships of the United States, while holding a first- or second-class radiotelegraph license issued by the Commission and a U.S. Coast Guard radio officer license.

Amendments

6. Present § 83.152 of the Commission's Rules defines "radio officer" on a ship of the United States as a person holding at least a first- or second-class radiotelegraph license, as prescribed and issued by the Commission. This definition does not presently reference the necessity of holding a U.S. Coast Guard radio officer license. Therefore, we are amending § 83.152(b) of the Rules to define a "radio officer" as a person who, in addition to holding a first- or second-class radiotelegraph license, is employed aboard ship to operate a radiotelegraph station in compliance with part II of title III of the Communications Act and who is also licensed as a radio officer by the United States Coast Guard.

7. As discussed *supra*, Section 353(b) of the Communications Act requires that the holder of a first or second class radiotelegraph operator license must have had at least six months' previous service in the aggregate as a radio officer in a station on board a ship of the United States in order to be employed as the sole radio officer aboard a U.S. cargo ship equipped with a radiotelegraph auto alarm. In view of this provision and the definition of radio officer imposed by Section 3(z)(1) of the Act, we are delineating clearly the requirements which must be met to qualify for the six month service endorsement presently provided by § 13.94 of the Commission's Rules. We are deleting §§ 13.91, 13.92, 13.93,[4] and 13.94 and substituting a new § 13.12(b) to specify that applicants seeking

---

[1] Effective May 25, 1980, the 1974 International Convention for the Safety of Life at Sea came into force replacing and abrogating the previous SOLAS Convention of 1960. *See* note 2, *supra*.

[2] Regulation 2(c) of Chapter IV of the 1974 International Convention for the Safety of Life at Sea (SOLAS) defines "radio officer" as a person holding at least a first or second class radiotelegraph operator's certificate, or a radiocommunication operator's general certificate. To date, the Commission has not implemented the issuance of a radiocommunication operator's general certificate. Moreover, Article VI(d) of the SOLAS Convention appears to permit the retention of domestic legislative requirements more stringent than that of SOLAS. Therefore, we do not regard the definition of "radio officer" in the Communications Act to be inconsistent with that of the 1974 SOLAS Regulations.

[3] 46 U.S.C. 229 a-h; S. Rep. No. 1045, 80th Cong., 2d Sess., *reprinted in* (1948)-U.S. Code Cong. and Ad. News 1532-37; 46 CFR 10.13-1 through 10.13-33.

[4] Sections 13.91, 13.92, and 13.93 pertain to the renewal service requirements which were eliminated in the *Third Report and Order* in Docket 20817, FCC 80-416, 79 FCC 2d 281, (adopted July 17, 1980).

Commission endorsement must submit proof of having obtained at least six months' satisfactory service as a radio officer under *all* of the following conditions:[4]

(a) On board a ship or ships of the United States equipped with a radiotelegraph station in compliance with part II of title III of the Communications Act of 1934, as amended;

(b) Under the authority of a first or second class radiotelegraph operator license prescribed and issued by the Federal Communications Commission; and

(c) While licensed as a radio officer by the U.S. Coast Guard in accordance with the Act of May 12, 1948 (46 U.S.C. 229 a–h).

8. The Commission's Rules specify the six months service endorsement for sole radio operators aboard cargo ships subject to part II of title III of the Communications Act and for cargo ships subject to SOLAS only.[5] however, the term "qualified radiotelegraph operator" is presently referenced in the Commission's Rules, rather than the more appropriate term of "radio officer." Therefore, we are amending §§ 13.61(a)(3), 13.61(b)(4), 83.155(b), 83.155(c), 83.156(a)(1)(i), 83.156(a)(1)(ii), and 83.156(a)(2)(i) to substitute the term "radio officer" for the term "qualified radiotelegraph operator."

9. Authority for these amendments appears in Sections 4(i) and 303 of the Communications Act of 1934, as amended. Because the amendments adopted herein are editorial in nature, the prior notice and public procedure provisions of the Administrative Procedure Act, 5 U.S.C. are not applicable. Accordingly, IT IS ORDERED that, effective April 27, 1981, Parts 13 and 83 of the Commission's Rules ARE AMENDED as set forth in the attached Appendix.

[5] The Commission recognizes that persons whose radiotelegraph experience has been limited to U.S. Government vessels cannot meet these requirements as these vessels are not subject to the Act or the SOLAS Convention. However, in December, 1979, the Commission recommended deletion of Section 353 of the Communications Act in its *Report to Congress: A Study of Maritime Public Coast Station Operations, Services and Industry*. Deletion of Section 353 would eliminate the statutory requirement of six months prior service as a "radio officer" and would allow the Commission greater flexibility in determining radio operator requirements for ship radio communications. *Report to Congress, supra* at 21–27.

[6] There are currently fewer than 10 United States ships which are subject to SOLAS only; however, each of these ships is, as a practical matter, also in compliance with part II of title III of the Communications Act insofar as their radio officers are concerned.

10. For information on this matter contact Vernon P. Wilson, Regional Services Division, FCC, Washington, D.C. (202) 632-7240.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083, 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 13 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 13—COMMERCIAL RADIO OPERATORS

(1) Section 13.12 is revised to read as follows:

§ 13.12 Special provisions.

(a) Radiotelegraph first class operator license.

(1) Applicant must be at least 21 years old.

(2) Applicant must have one year of experience in sending and receiving public correspondence by radiotelegraph. The experience may be obtained at ship stations, coast stations, or both.

(b) Six months service endorsement.

(1) An endorsement may be placed on a first or second class radiotelegraph operator license attesting that the holder has had at least six months satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

(2) To qualify for the six month service endorsement, the applicant must submit proof that the service was obtained under the following conditions:

(i) On board a ship or ships of the United States equipped with a radiotelegraph station in compliance with part II of title III of the Communications Act of 1934, as amended;

(ii) Under the authority of a first or second class radiotelegraph operator license prescribed and issued by the Federal Communications Commission; and

(iii) While licensed as a radio officer by the U.S. Coast Guard in accordance with the Act of May 12, 1948 (46 U.S.C. a–h).

(3) In the event documentary evidence cannot be produced, a statement under oath embodying the following information may be submitted:

(i) Names of ships on which employed.

(ii) Call letters of stations.

(iii) Types of emission employed.

(iv) Whether radiotelegraph operation employed.

(v) Whether service was satisfactory or unsatisfactory.

(vi) Period of employment.

(vii) Name of master, employer, licensee, or his duly authorized agent.

(2) Section 13.61 is amended by revising paragraphs (a)(3) and (b)(4) to read as follows:

§ 13.61 Operating authority.

(a) * * *

(3) On a cargo vessel (other than a vessel operated exclusively on the Great Lakes) required by treaty or statute to be equipped with a radiotelegraph installation, the holder of this class of license may not act as chief or sole operator without having had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

* * * * *

(b) * * *

(4) On a vessel (other than a vessel operated exclusively on the Great Lakes) required by treaty or statute to be equipped with a radiotelegraph installation, the holder of this class of license may not act as chief or sole operator without having had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

* * * * *

§§ 13.91, 13.92, 13.93, and 13.94 [Removed]

(3) Sections 13.91, 13.92, 13.93, and 13.94 are removed.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

(1) In § 83.152, paragraph (b) is revised to read as follows:

§ 13.152 Operator required.

* * * * *

(b) As used in this subpart, "radio officer" on board a ship of the United States means a person holding at least a first or second class radiotelegraph operator license as prescribed and issued by the Commission who is employed to operate the radiotelegraph station in compliance with part II of title III of the Communications Act of 1934, as amended. Such person is also required to be licensed as a "radio officer" by the U.S. Coast Guard in accordance with the Act of May 12, 1948 (46 U.S.C. 229 a–h).

* * * * *

(2) In § 83.155, paragraphs (b) and (c) are revised to read as follows:

§ 83.165 Operator(s) required by title III of Communications Act of 1934.

* * * * *

(b) Each cargo ship of the United States which in accordance with part II of title III of the Communications Act is equipped with a radiotelegraph station, which is not fitted with a radiotelegraph auto alarm in proper operating condition, shall for safety purposes carry at least two radio officers, each of whom shall hold a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license; Provided, That the holder of a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer without having had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

(c) Each cargo ship of the United States which in accordance with part II or title III of the Communications Act is equipped with a radiotelegraph station, which is fitted with a radiotelegraph auto alarm in proper operating condition, shall for safety purposes carry at least one radio officer holding a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license, who has had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

* * * * *

(3) Section 83.156 is amended by revising paragraphs (a)(1)(i), (a)(1)(ii), and (a)(2)(i) to read as follows:

§ 83.156 Operator(s) required by the Safety Convention.

(a) * * *

(1) * * *

(i) Each cargo ship, and each passenger ship carrying or certificated to carry 250 passengers or less, or more than 250 passengers but engaged on a voyage of less than 16 hours duration between two consecutive ports, shall carry at least one radio officer holding a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license; who has had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

(ii) Each passenger ship carrying or certificated to carry more than 250 passengers and engaged on a voyage exceeding 16 hours duration between two consecutive ports, shall carry at least two radio officers, each of whom shall hold a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license; Provided, That the holder of a radiotelegraph second class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer without having had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

(2) * * *

(i) Each cargo ship shall carry at least two radio officers, each of whom shall hold a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license; Provided, That the holder of a radiotelegraph first or second class operator license or a temporary limited radiotelegraph operator license may not act as chief radio officer until he has had at least six months' satisfactory service in the aggregate as a radio officer in a station on board a ship or ships of the United States.

47 CFR Part 25

[Docket No. 19770]

Communications Satellite Corp.; Issuance of Securities, Borrowing of Money, Assumption of Obligations

AGENCY: Federal Communications Commission.

ACTION: Termination of Docket No. 19770.

SUMMARY: This Order terminates Docket No. 19770 as mooted by Docket No. 80-634. Docket No. 19770 is a rulemaking proceeding limited to considering whether Part 25 of the Commission's Rules and Regulations should be amended to add a subpart intended to assist the Commission in fulfilling its duties under section 201(c)(8) of Communications Satellite Act of 1962. The issues raised in Docket No. 19770 have become encompassed in the broader proceeding initiated by the Commission as Docket No. 80-634.

FOR FURTHER INFORMATION CONTACT: James L. Ball, International Facilities Planning Division, Common Carrier Bureau, Federal Communications Division, Washington, D.C. 20554, (202) 632-3214.

SUPPLEMENTARY INFORMATION:

Adopted: March 10, 1981.

Released: March 13, 1981.

In the matter of amendment of Part 25 of the Commission's Rules and Regulations with respect to Commission authorization of the issuance of securities, borrowing of money, or assumption of obligations in respect of the securities of another person by the Communications Satellite Corporation; *order.*

1. On June 18, 1973, the Commission released a Notice of Proposed Rulemaking (June 21, 1973; 38 FR 16245) in the above-captioned proceeding to amend Part 25 of the Rules and Regulations by adding a subpart to assist the Commission in fulfilling its duties under section 201(c)(8) of the Communications Satellite Act of 1962, as amended, 47 U.S.C. 701 (1962). Section 201(c)(8) requires the Commission to approve or disapprove the issuance of capital stock, borrowing of money, or assumption of obligations in respect to the securities of another person by the Communications Satellite Corporation. The proposed rules are designed to (1) insure that the Commission obtains the information necessary to determine whether the statutory public interest standards contained in section 201(c)(8) are met, and (2) set forth the procedures that Comsat must follow in meeting these standards.

2. The issues raised by the Commission's Notice in this proceeding have been encompassed in a broader rulemaking proceeding recently initiated by the Commission as Docket No. 80-634 (45 FR 71823). *Communications Satellite Corporation,* 81 FCC 2d 257 (1980). The purpose of Docket No. 80-634 is to consider tentative proposals that the Commission made in its Comsat Study for changes in Comsat's corporate structure and operations. See *Communications Satellite Corporation,* 77 FCC 2d 564 (1980). The Commission is considering a variety of issues arising out of Comsat's diversification into non-INTELSAT activities. One such issue is whether the opportunities created for unfair cross-subsidization and the financial risks that may be associated with new activities require imposition of restrictions on the support Comsat can give to the competitive ventures of its subsidiaries. This issue effectively encompasses the question of how the Commission will fulfill its section 201(c)(8) duties should this provision come into play. In view of this, we regard the Commission's earlier Notice in the above-captioned proceeding as moot.

3. Accordingly, it is ordered, That pursuant to §§ 0.91 and 0.291 of the Commission's Rules and Regulations, 47

CFR 0.91, 0.291. Docket No. 19779 is terminated.

Joseph A. Marlon,

Acting Chief, Common Carrier Bureau.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 531

[Docket No. LVM 77-07; Notice 5]

Passenger Automobile Average Fuel Economy Standards; Exemption from Average Fuel Economy Standards

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Final decision to grant exemption from fuel economy standards and to establish alternative standards.

SUMMARY: This notice exempts Officine Alfieri Maserati, S.p.A. (Maserati) from the generally applicable average fuel economy standards of 19.0 miles per gallon (mpg) and 20.0 mpg for 1979 and 1980 model year passenger automobiles, respectively, and establishes alternative standards for Maserati. The alternative standards are 12.5 mpg in the 1979 model year and 9.5 mpg in the 1980 model year.

DATES: The exemptions and alternative standards set forth in this notice apply in the 1979 and 1980 model years.

FOR FURTHER INFORMATION CONTACT: Robert Mercure, Office of Automotive Fuel Economy Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202-755-9384).

SUPPLEMENTARY INFORMATION: The National Highway Traffic Safety Administration (NHTSA) is exempting Maserati from the generally applicable average fuel economy standards for the 1979 and 1980 model years and establishing alternative standards applicable to that company in those model years. This exemption is issued under the authority of section 502(c) of the Motor Vehicle Information and Cost Savings Act, as amended (the Act) (15 U.S.C. 2002(c)). Section 502(c) provides that a manufacturer of fewer than 10,000 vehicles annually may be exempted from the generally applicable average fuel economy standard for a particular model year if that standard is greater than the low volume manufacturer's maxmimum feasible average fuel economy and if the NHTSA establishes an alternative standard applicable to that manufacturer at the level of the low volume manufacturer's maximum feasible average fuel economy. In determining the manufacturer's maximum feasible average fuel economy, section 502(e) of the Act (15 U.S.C. 2002(e)) requires NHTSA to consider:

(1) Technological feasibility;

(2) Economic practicability;

(3) The effect of other Federal motor vehicle standards on fuel economy; and

(4) The need of the Nation to conserve energy.

This final rule was preceded by a notice announcing the NHTSA's proposed decision to grant exemptions to Maserati for the 1979 and 1980 model years (45 FR 84103, December 22, 1980). No comments were received on the proposed decision.

Based on the conclusions that it was not technologically feasible and economically practicable for Maserati to improve the fuel economy of its 1979 and 1980 model year passenger automobiles above an average of 12.5 mpg and 9.5 mpg, respectively, that other Federal automobile standards did not affect achievable fuel economy beyond the extent considered in this analysis, and that the national effort to conserve energy will be negligibly affected by the granting of the requested exemptions and establishment of alternative standards, this agency concludes that the maximum feasible average fuel economy for Maserati in the 1979 and 1980 model years is 12.5 and 9.5 mpg, respectively. Therefore, NHTSA is exempting Maserati from the generally applicable standards and is establishing alternative standards of 12.5 mpg for the 1979 model year and 9.5 mpg for the 1980 model year.

In consideration of the foregoing, § 531.5(b)(7) is revised to read as follows:

531—PASSENGER AUTOMOBILE AVERAGE FUEL ECONOMY STANDARDS

§ 531.5 Fuel economy standards.

* * * * *

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

* * * * *

(7) Officine Alfieri Maserati, S.p.A.

Model year	Average fuel economy standard (MPG)
1978	12.5
1979	12.5
1980	9.5

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

[Revised Service Order No. 1492]

Chicago and North Western Transportation Company Authorized To Use Tracks and/or Facilities of Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie, Trustee)

AGENCY: Interstate Commerce Commission.

ACTION: Revised Service Order No. 1492.

SUMMARY: Revised Service Order No. 1492, authorizes Chicago and North Western Transportation Company to use tracks and/or facilities of Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie, Trustee). The provisions of this order are to permit the involved carriers and shippers to undertake negotiations for acquisition of the involved lines, and to establish a date certain beyond which this order will not be extended unless applied for jointly by the Milwaukee and North Western.

EFFECTIVE: 11:59 p.m., March 30, 1981, and continuing in effect until 11:59 p.m., April 30, 1981, unless modified, amended or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT: M. F. Clemens, Jr., (202) 275-7840.

Decided March 20, 1981.

Pursuant to Section 122 of the Rock Island Transition and Employee Assistance Act, Pub. L. 96-254, the Commission is authorizing the Chicago and North Western Transportation Company (CNW) to provide interim service over Chicago, Milwaukee, St.

Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie, Trustee) (MILW) and to use such tracks and facilities as are necessary for that operation.

In a special conference held in Washington, D.C., on March 13, 1981, the Railroad Service Board (RSB) recognized complaints of the MILW with respect to the length of time interim operations had been conducted by CNW without compensation to the Trustee; the urgeny for MILW to liquidate the lines in question, preferably for continued rail service; and the MILW's need for salvaged rail in other parts of its system. The RSB agreed that sufficient time has passed for negotiation of compensation to the MILW trustee, and for acquisition of the subject lines. Therefore, the RSB intends to establish a date certain beyond which the authority contained in this order will not be extended unless applied for jointly by the CNW and MILW.

The RSB intends that this order should be served as notice to certain interested shippers (list compiled by CNW and MILW) located on the affected lines, in order to provide notice concerning this matter.

Shippers interested in supporting the acquisition of the lines, described in Appendix A to this order, for continued rail operations should communicate that interest directly to the CNW and MILW as time is of the essence.

At this time, it is the opinion of the Commission that an emergency exists requiring that the CNW be authorized to conduct operations, identified in the appendix, using MILW tracks and/or facilities; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1492 Service Order No. 1492.

(a) Chicago and North Western Transportation Company authorized to use tracks and/or facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie, Trustee). Chicago and North Western Transportation Company (CNW) is authorized to use tracks and/or facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW), as listed in Appendix A to this order, to provide interim service over the MILW, subject to the condition that this order may not be extended beyond its stated expiration date unless petitioned for jointly by CNW and MILW.

(b) The Trustee shall permit the CNW to enter upon the property of the MILW to conduct service essential to these interim operations.

(c) The Trustee will be compensated on terms established between the Trustee and the affected carrier(s); or upon failure of the parties to agree as hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by Section 122(a), Pub. L. 96-254.

(d) The interim operator, authorized in Appendix A to this order, shall, within fifteen (15) days of its effective date, notify the Railroad Service Board of the date on which interim operations were commenced or the expected commencement date of those operations.

(e) The interim operator, authorized in Appendix A to this order, shall, within thirty days of commencing operations under authority of this order, notify the MILW Trustee of those facilities they believe are necessary or reasonably related to the authorized operations.

(f) During the period of this operation over the MILW lines, the interim operator shall be responsible for preserving the value of the lines, associated with this interim operation, to the MILW estate, and for performing necessary maintenance to avoid undue deterioration of lines and associated facilities.

(g) Any operational or other difficulty associated with the authorized operations shall be resolved through agreement between the affected parties or, failing agreement, by the Commission's Railroad Service Board.

(h) Any rehabilitation, operational, or other costs related to the authorized operations shall be the sole responsibility of the interim operator incurring the costs, and shall not in any way be deemed a liability of the United States Government.

(i) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(j) *Rate applicable.* Inasmuch as this operation by an interim operator over tracks previously operated by the MILW is deemed to be due to carrier's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via MILW, until tariffs naming rates and routes specifically applicable become effective.

(k) In transporting traffic over these lines, the interm operator involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to that traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between the carriers; or upon failure of the carriers to so agree, the division shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(l) *Employees*—In providing service under this order the interim operator, to the maximum extent practicable, shall use the employees who normally would have performed work in connection with the traffic moving over the lines subject to this Service Order.

(m) *Effective date.* This order shall become effective at 11:59 p.m., March 30, 1981.

(n) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 30, 1981, unless otherwise modified, amended, or vacated by order of this Commission.

(49 U.S.C. 10304-10306 and Section 122, Pub. L. 96-254)

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John H. O'Brien.

Agatha L. Mergenovich,

Secretary.

Appendix A—Milw Lines Authorized To Be Operated By Interim Operator

1. Chicago and North Western Transportation Company (CNW):
   - A. At DeKalb, Illinois.
   - B. At Appleton, Wisconsin.
   - C. At Lake Preston and Sioux Falls, South Dakota, and from Wolsey to but not including Aberdeen, South Dakota.
   - D. At Montgomery, Minnesota.
   - E. Between Jefferson (milepost 68.5) and Waukee, Iowa; and between Manning and Huxley, Iowa.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No 801-0215]

American Hospital Supply Corporation; Proposed Consent Agreement with Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, would require, among other things, American Hospital Supply Corporation, ("AHSC"), An Evanston, Illinois manufacturer and distributor of health care products, to timely divest, in accordance with the terms of the order, either 100 percent of the stock of American Latex Corporation, ("ALC"), or all assets and properties constituting ALC together with all the assets of American Cystoscope Makers, Inc. The order would further require AHSC to maintain ALC as a viable business entity pending divestiture; to offer to purchase for a period of one year all urological catheters from the acquirer of ALC; and to refrain for five years from acquiring more than one percent of stock or any interest in an entity engaged in the manufacture and distribution of urological catheters.

DATE: Comments must be received on or before May 20, 1981.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/C, E. Perry Johnson, Washington, D.C. 20580. (202) 523-3601.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

In the matter of American Hospital Supply Corporation, a corporation.

The Federal Trade Commission having initiated an investigation of the acquisition of American Cystoscope Makers, Inc. by American Hospital Supply Corporation and it now appearing that American Hospital Supply Corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order with respect to the acquisition being investigated.

It is hereby agreed by and between American Hospital Supply Corporation, by its duly authorized officers and attorneys, and counsel for the Federal Trade Commission that:

1. Proposed respondent American Hospital Supply Corporation is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Illinois with its office of principal place of business located at One American Plaza, Evanston, Illinois.

2. American Cystoscope Makers, Inc., is a corporation organized, existing, and doing business under and by virtue of the laws of the State of New York with its offices and principal place of business located at 300 Stillwater Avenue, Stamford, Connecticut.

3. American Latex Corporation, a wholly owned subsidiary of American Cystoscope Makers, Inc., is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Delaware with its office and principal place of business in Sullivan, Indiana.

4. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

5. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

6. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint and explanatory material, pursuant to Rule 2.34, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

7. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

8. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of Section 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order in disposition of the proceeding and (2) make information public with respect thereto. When so entered, the order shall have the same force and effect and may be altered, modified, or set aside in the manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to order to the proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation or interpretation not contained in the terms of the order or this agreement may be used to vary or contradict the terms of the order.

9. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered, that subject to the prior approval of the Federal Trade Commission, respondent, through its officers, directors, employees, subsidiaries, affiliates, divisions, successors, and assigns, shall within eighteen (18) months from the date on which this order becomes final divest absolutely and in good faith either 100% of the stock of American

Latex Corporation (hereinafter "ALC") or all assets, properties, rights, and privileges, tangible and intangible, of ALC, including but not limited to corporate name, real property, plant, equipment, machinery, raw material inventory, product inventory, lists of customers, product trade names, product trademarks, patents, licenses, manufacturing specifications and procedures, marketing materials, sales training materials, research and development projects, and together therewith shall also divest those assets of American Cystoscope Makers, Inc. (hereinafter "ACMI") intrinsically related to the manufacture, distribution, sale, research or development of the products manufactured by ALC including but not limited to copies of all customer lists, records of sales in the previous two years, market projections and surveys, marketing plans and studies, and promotional or advertising materials. Such divestiture shall be made to a third party which represents that it intends to use the assets in the manufacture, distribution or sale of urological catheters in the United States.

II

It is further ordered that, at the option of the acquirer of the stock or assets of ALC, respondent (including its newly acquired ACMI subsidiary or any successor organization) shall, for a period of one year from the date of compliance with Paragraph I of this order, purchase from ALC all catheters that respondent purchases during such one year period for resale under any trademark or trade name of ACMI of a type which ACMI obtained from ALC at the time of the acquisition of ACMI by respondent.

III

It is further ordered that, pending the divestiture required by this order, respondent shall not cause, and shall use its best efforts to prevent, any diminution of the value of the products or assets of ALC and shall preserve ALC as a viable, ongoing business.

IV

It is further ordered that, pursuant to the requirements of Paragraph I above, none of the assets of ALC shall be divested directly, or indirectly to anyone who is, at the time of divestiture, an officer, director, employee, or agent of, or under the control, direction, or influence of, respondent or any of respondent's subsidiaries or affiliated corporations, whether direct or indirect, or who owns or controls more than one (1) percent of the outstanding shares of the capital stock of respondent.

V

It is further ordered that, for a period of five (5) years from the date this order becomes final, neither respondent, nor its subsidiaries, affiliates, divisions, successors or assigns, shall, without the prior approval of the Federal Trade Commission, directly or indirectly acquire more than one percent (1%) of any stock, share capital, or equity interest in any concern, corporate or noncorporate, engaged in, or any of the assets of such concern relating to, the manufacture, distribution, or sale in the United States of urological catheters.

VI

It is further ordered that respondent shall, within ninety (90) days after the date of service of this order, and every ninety (90) days thereafter until respondent has fully complied with the divestiture provision of this order, and annually thereafter, for the duration of this order, submit in writing to the Federal Trade Commission a verified report setting forth in detail the manner and form in which respondent intends to comply, is complying or has complied with this order. Until divestiture is accomplished, all compliance reports shall include, among other things that are from time to time required, a summary of contacts or negotiations with anyone for the disposition of the assets or stock specified in Paragraph I of this order, the identity of all such persons and copies of all written communications between such persons and respondent.

VII

It is further ordered that respondent notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation, which may affect compliance obligations arising out of this order.

American Hospital Supply Corporation, File No. 801 0215

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from American Hospital Supply Corporation (AHSC). The agreement is the product of the Commission's investigation of AHSC's acquisition of American Cystoscope Makers, Inc (ACMI). The agreement requires AHSC to divest ACMI's subsidiary, American Latex Corporation, and other assets of ACMI related to the manufacture or sale of American Latex Corporation's products within eighteen months from the date on which the order becomes final.

The proposed consent order is being placed on the public record for sixty (60) days for comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

AHSC is a multinational manufacturer and distributor of a wide range of products used and consumed in the health care field including medical supplies, pharmaceuticals, medical and surgical instruments and laboratory supplies. AHSC manufactures urological catheters through its American Pharmaseal, American Hospital Supply, and American V. Mueller Divisions.

ACMI was engaged primarily in the research, development, manufacture and marketing of endoscopes. ACMI, through its subsidiary, American Latex Corporation, manufactured and sold urological catheters.

On October 10, 1980, AHSC acquired substantially all of the assets of ACMI for approximately $38.5 million, including 100% of the stock of American Latex Corporation.

The complaint alleges that AHSC's acquisition of ACMI violates Section 7 of the Clayton Act and Section 5 of the Federal Trade Commission Act. The complaint asserts that the effect of the acquisition may be substantially to lessen competition or tend to create a monopoly in the manufacture and sale of urological catheter products in the United States.

The purpose of this proposed order is to restore to the marketplace the substantial competition that formerly existed among the urological catheter products of AHSC, American Latex Corporation, and other firms.

Section I of the proposed order requires AHSC to divest the stock or assets of American Latex Corporation and the assets of ACMI related to the research, development, manufacture or sale of American Latex Corporation's products to a party who intends to use the assets in the manufacture, distribution or sale of urological catheters in the United States. The order allows eighteen months for the divestiture and requires that it be approved by the Commission.

Section II requires AHSC, for one year from the divestiture, to purchase from American Latex Corporation all catheters which AHSC may wish to sell under an ACMI trademark. This provision applies only to those types of catheters which ACMI was purchasing from American Latex Corporation at the time of AHSC's acquisition of ACMI, and only if the acquirer of American Latex Corporation wishes to sell catheters to AHSC. The purpose of this provision is to guarantee American Latex Corporation for one year a market for the catheters it was selling to ACMI.

AHSC has agreed under Section III not to cause any diminution of the value of the products or assets of American Latex Corporation and to preserve it as a viable, ongoing business pending divestiture.

Under Section IV, none of the assets of American Latex Corporation may be divested to an officer, director, or employee of AHSC or to a person who owns more than one percent of AHSC's stock.

Section V prevents AHSC, for a period of five years from the date the order becomes final, from acquiring more than one percent of the stock of a company engaged in or any assets of a company relating to the manufacture, distribution, or sale of urological catheters in the United States without the prior approval of the Commission.

Section VI requires AHSC to file a report setting forth the way in which it has been complying with the order every ninety days until the divestiture provision is satisifed and annually thereafter until the expiration of the order.

In Section VII, AHSC agrees to notify the Commission at least thirty days prior to any organizational change that would affect compliance obligations.

The purpose of this analysis is to facilitate public comment on the

proposed order, and it is not intended to consitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Carol M. Thomas,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-10-FRL 1788-2]

Idaho; State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Notice of Availability.

SUMMARY: EPA announces today receipt of the Lewiston Total Suspended Particulate (TSP) Control Strategy as a revision to the Idaho State Implementation Plan. The public is invited to submit written comments to the record. A Notice of Proposed Rulemaking describing this revision and the action that EPA intends to take regarding this proposed revision will be published in the Federal Register at a later date. A second comment period for submittal of written comments will extend for thirty (30) days after the publication of the Notice of Proposed Rulemaking.

DATE: Preliminary comments on the proposed revision will be accepted by EPA until such time as EPA proposes its decision on the Idaho State Implementation Plan. Subsequent to such proposal, EPA will again invite public comment on this proposed revision to the Idaho SIP.

ADDRESSES: The relevant material in support of this revision may be examined during normal business hours at the following locations:

Central Docket Section (10A-80-2), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

Air Programs Branch, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101

State of Idaho, Department of Health, and Welfare, 450 W. State Street, Boise, Idaho 83720

COMMENTS SHOULD BE ADDRESSED TO: Lurie M. Kral, Air Programs Branch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Michael F. Gearheard, Air Programs Branch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101. Telephone: (206) 442-1226, FTS: 399-1226.

SUPPLEMENTARY INFORMATION: Section 172 of the Clean Air Act as amended in August 1977, requires that states submit revisions to their implementation plans by January 1, 1979 to provide for the attainment of the national ambient air quality standards (NAAQS) in areas designated nonattainment.

On March 3, 1978 [43 FR 8964] EPA designated certain areas in Idaho as nonattainment. Subsequently, EPA published specific guidance for an approvable Part D SIP. This guidance is described in a General Preamble on April 4, 1979, Federal Register [44 FR 20373] and supplemented in the Federal Register on July 2, 1979 [44 FR 38583], August 28, 1979 [44 FR 50371], September 17, 1979 [44 FR 53761], and November 23, 1979 [44 FR 67182]. This guidance is incorporated by reference and will not be restated here.

The purpose of this Notice is to call the public's attention to the fact that the Lewiston Total Suspended Particulates Control Strategy has been formally submitted to EPA and is available for public inspection at the locations listed above. The public is encouraged to submit written comments regarding the proposed revision and thus participate in this rulemaking activity.

Those interested may wish to first read the General Preamble for proposed rulemaking published by the EPA on April 4, 1979 [44 FR 20372] and supplemented in the Federal Register on July 2, 1979 [44 FR 38583], August 28, 1979 [44 FR 50371], September 17, 1979 [44 FR 53761], and November 23, 1979 [44 FR 67132] which identifies the major considerations that will guide EPA's evaluation of SIP revisions. A more detailed description of this revision will be published in the Federal Register at a later date as part of a Notice of Proposed Rulemaking.

Pursuant to the provisions of 5 U.S.C. Section 605(b) I hereby certify that the attached rule will not if promulgated, have a significant economic impact on a substantial number of small entities. This action only approves State actions. It imposes no new requirements. Moreover, due to the nature of the federal-state relationship, federal inquiry into the economic reasonableness of the State actions would serve no practical purpose and could well be improper.

(Secs. 110 and 172 of the Clean Air Act [42 U.S.C. 7410 and 7502])

Dated: March 10, 1981.
Donald P. Dubois,
Regional Administrator.

[WH-FRL 1788-3]

Iron and Steel Manufacturing Point Source Category Effluent Limitations Guidelines Correction

AGENCY: Environmental Protection Agency.

ACTION: Notice of correction.

SUMMARY: EPA is correcting coding and other minor errors in the January 7, 1981, Federal Register (46 FR 1858) notice of effluent limitations for the Iron and Steel Manufacturing Point Source Category.

FOR FURTHER INFORMATION CONTACT: Mr. Ernst P. Hall, Effluent Guidelines Division (WH-552), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, Telephone (202) 426-2726.

Correction

In the Federal Register notice published on January 7, 1981 (46 FR 1858), corrections are required as follows:

1. On page 1858, column 2; after line 42, add: D. Iron and Steel Model Treatment Summary.

2. On page 1859, column 2, line 8, change "effluent limitations guidelines for BPT and BAT", to "effluent limitations and standards for BPT, BAT, NSPS and".

3. On page 1859, column 3, line 31, change "27936-2777" to "27736-27773".

4. On page 1859, column 3, line 37, change "classification" to "Classification".

5. On page 1860, column 2, line 55, change "analytical" to "Analytical".

6. On page 1861, column 1, line 38, change "NDRC" to "NRDC".

7. On page 1862, column 3, line 56, change "require adviced" to "requires advanced".

8. On page 1867, column 3, last line, change "336,400" to "366,400".

9. On page 1869, column 1, line 28, change "0.6 of the total" to "0.6 percent of the total".

10. On page 1871, column 3, line 63, change "oppose the establishment a central" to "propose the establishment of a central".

11. On page 1874, column 3, line 14, change "the appropriation sampling" to "the appropriate sampling".

12. On page 1887, Subcategory L, change: "Hot Casting" to "Hot Coating".

13. On page 1878, column 1, after line 2 insert "ENVIRONMENTAL PROTECTION AGENCY".

14. On page 1880, and in all other tables in the proposed regulation change table heading from "Kg/kkg" to "kg/kkg".

15. On page 1880, column 3, Subpart A—NSPS Table, TSS, change "0.34418" to "0.03418".

16. On page 1882, column 1, change "§ 402.24" to "§ 420.24".

17. On page 1883, column 1, Subpart C, § 420.33(a) BAT Table Phenols(4AAP), change ".000584" to ".0000584".

18. On page 1885, column 2 § 420.45(a)(1), (b)(1), and (c)(1); and § 420.46(a)(1), and (c)(1) change: "No discharge of process wastewater pollutants to navigable waters" to "No introduction of process wastewater pollutants into publicly owned treatment works".

19. On page 1887, Subpart F, § 420.64 change "TTS" to "TSS".

20. On page 1887 and 1888 Subpart F, § 420.66, PSNS Table (and others): Tables split between columns or pages should repeat the complete proper headings with each part.

21. On page 1888, Subpart G, § 420.72(a)(1) and (a)(2), change "TTS" to "TSS".

22. On page 1891, Subpart G, § 420.75(c)(1) change: 0.0000108 to 0.000108 for chromium, lead, and zinc.

23. On page 1897, § 420.95(a) change: "Sulfuric acid recovery" to "Sulfuric acid pickling".

24. On page 1897 Subpart I, § 420.95(c)(2) change: chromium 0.0000432 to 0.000432, 0.0000144 to 0.000144; copper 0.0000432 to 0.000432, 0.0000144 to 0.000144; nickel 0.0000648 to 0.000648, 0.0000288 to 0.000288.

25. On page 1897, Subpart I, § 420.96(3) Continuous acid regeneration PSNS tables; Zinc, change ".0000867" to ".0000876".

26. On page 1899, column 1, line 36, Subpart J; change "§ 420.101" to "§ 420.102".

27. On page 1900, column 2, line 76, Subpart J § 420.106 PSNS Anthracene; change ".00000417" to ".000000417".

28. On page 1901, column 1, line 42, Subpart K, § 420.112 table heading should be "BPT Effluent Limitations".

29. On page 1904, column 2, last line, Subpart L, § 420.124, paragraph (c)(4); change heading "fastners without fume" to "fastners with fume".

30. On page 1906, Subpart L, § 420.126 paragraphs: (c)(1), (c)(2), (c)(3) and (c)(4) table footnotes should be designated with an asterisk rather than a superscript one (1).

Dated: March 20, 1981.

James N. Smith,

Acting Assistant Administrator for Water and Waste Management.

BILLING CODE 6560-29-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6015]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below and proposed changes to base flood elevations for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, Federal Emergency Management Agency, Federal Insurance Administration, National Flood Insurance Program, (202) 755-5585, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 and Section 208 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4 (presently appearing at its former Title 24, Chapter 10, Part 1917.4).

These elevations, together with the flood plain management measures required by Section 60.3 (formerly Section 1910.3) of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Proposed Base (100-Year) Flood Elevations

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 78-72-Phase II]

MTS and WATS Market Structure; Order Extending Time for Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule; Extension of reply comment period.

SUMMARY: General Communication, Inc. has requested a seven day extension of time in which to file reply comments in the MTS/WATS Market Structure Inquiry (CC Docket 78-72-Phase II) in order to permit it to complete its analysis of Alascom's revenue and market model.

DATE: Reply comments are now due on or before March 25, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Douglas L. Slotten, Policy and Program Planning Division, Common Carrier Bureau, (202) 632-9342.

SUPPLEMENTARY INFORMATION:

Adopted: March 17, 1981.

Released: March 17, 1981.

By the Chief, Common Carrier Bureau:

1. On March 13, 1981, General Communication, Inc. ("GCI"), filed a request for a seven day extension of time in which to file reply comments in the above-captioned proceeding. The request would extend the time for filing reply comments in this proceeding from March 18, 1981, to March 25, 1981.

2. In support of its request, GCI states that an additional week will permit it to complete its analysis of Alascom's revenue and market model; that, being located in Alaska, it can make a special contribution to the record in this proceeding; and that the additional week will help offset the days in communication resulting from the distance factors involved.

3. We conclude that the grant of GCI's request will serve the public interest. In a proceeding of this complexity, the grant of an additional week in which to complete the required analysis would appear to be unlikely to harm any party, while potentially improving the record in the proceeding. Furthermore, Alascom has stated that it does not object to this short extension.

4. Accordingly, it is ordered, pursuant to Sections 4(i) and 5(d)(1) of the Communications Act of 1934, as amended, and § 0.291 of the Commission's Rules, that the date for filing reply comments in response to the *Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking* is extended to and including March 25, 1981.

Federal Communications Commission.

Joseph A. Marino,

Acting Chief, Common Carrier Bureau.

[FR Doc. 81-9239 Filed 3-25-81; 8:45 am]

BILLING CODE 6712-01-M

47 CFR Part 73

[Docket No. 80-201, etc.]

FM Broadcast Station in North Charleston, Eastover, and Ravenel, S.C.; Elloree, S.C.; Mount Pleasant, Parris Island, Manning, Bamberg, and Batesburg, S.C.; Johnston, Leesville, Winnsboro Mills, Saluda, Union, and Batesburg, S.C.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action consolidates BC Docket Nos. 80-201, 80-211, and 80-213 which contemplate FM assignments to North Charleston, Eastover, Ravenel, Elloree, Mt. Pleasant, Parris Island, Manning, Bamberg, and Batesburg, South Carolina, and further consolidates these dockets with petitions for rule making seeking FM channel assignments to Johnston, Leesville, Saluda, Union, and Winnsboro Mills, South Carolina. The petitions were filed by Edgefield Saluda Radio Company, William K. Durst, Ridge Broadcasting Company and Edward L. B. Osborne, respectively. Several alternative FM channel assignment plans are presented for comment in the Further Notice. The licensees of FM Stations WWBD-FM, Bamberg, South Carolina, and WKWQ, Batesburg, South Carolina, are ordered to show cause why their licenses should not be modified.

DATES: Comments must be filed on or before May 12, 1981, and reply comments on or before June 1, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Michael A. McGregor or Molly Pauker, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (North Charleston, Eastover,[1] and Ravenel,[1] South Carolina), BC Docket No. 80-201, RM-3249, RM-3710; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Elloree, South Carolina), BC Docket No. 80-211, RM-3579; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Mount Pleasant, Parris Island,[1] Manning,[1] Bamberg,[1] and Batesburg,[1] South Carolina), BC Docket No. 80-213, RM-3406, RM-3718, RM-3719; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Johnston, Leesville, Winnsboro Mills, Saluda, Union, and Batesburg, South Carolina), BC Docket No. 81-171, RM-3518, RM-3556, RM-3613, RM-3666, RM-3771. *Further Notice of Proposed Rule Making and Orders To Show Cause.*

Adopted: March 13, 1981.

Released: March 24, 1981.

By the Chief, Policy and Rules Division:

1. This proceeding consolidates three *Notices of Proposed Rule Making* in the above-captioned dockets, four counterproposals to the three *Notices*, and five additional petitions for rule making not previously docketed. Because all of the various proposals are in some way related as set forth herein, we have decided to consolidate the proceedings and offer several comprehensive assignment plans for comment. We begin by setting out the proposals and counterproposals which have already been available for comment in response to the three *Notices*. This will be followed by an explanation of the additional petitions which have not yet been the subject of a Notice of Proposed Rule Making.

Proposals in BC Docket No. 80-201

2. The *Notice of Proposed Rule Making* in BC Docket 80-201, 45 FR 34938, published May 23, 1980, proposes the assignment of Class C FM Channel 241 to North Charleston, S.C., at the

[1] These communities are added to the caption.

request of T. B. Trammel. A counterproposal to assign Channel 240A to Eastover, S.C., was submitted by William G. Dudley.[2] A second counterproposal to assign channel 240A to Ravenel, S.C., was submitted by M. E. Foley.[3] The assignment of Channel 240A to either Eastover or Ravenel is mutually exclusive with an assignment of Channel 241 to North Charleston. However, the assignment of Channel 240A to both Eastover and Ravenel can be accomplished in compliance with our minimum distance separation requirements. Additionally, a staff study indicates that Channel 257A is also available for assignment to Eastover with a site restriction of 3.8 miles southeast, while Channel 269A could alternatively be assigned to Ravenel.[4]

Proposal in BC Docket No. 80–211

3. The *Notice of Proposed Rule Making* in Docket 80–211, 45 FR 34935, published May 23, 1980, proposes the assignment of FM Channel 257A to Elloree, S.C., in response to a petition filed by Santee-Cooper Broadcasting Company. No counterproposals were filed. The assignment of Channel 257A to Elloree conflicts, however, with the possible assignment of Channel 257A to Eastover. A staff study indicates that no other Class A channels are available at Elloree.

Proposals in BC Docket No. 80–213

4. The *Notice of Proposed Rule Making* in Docket 80–213, 45 FR 24837, published May 23, 1980, proposes the assignment of FM Channel 221A to Mount Pleasant, S.C., in response to a petition filed by John M. Dunnagan. A counterproposal to assign Channel 221A to Parris Island, S.C., was submitted by D. W. McFarland.[5] This assignment requires a site restriction of 4.3 kilometers (2.7 miles) north-northwest. A second counterproposal was filed by Clarendon County Broadcasting Corporation ("CCBC").[6] The intent of CCBC's counterproposal is to substitute Class C Channel 223 for Channel 221A in Manning, S.C. To accomplish this, Channel 221A would have to be substituted for Channel 224A in Bamberg, S.C., and Channel 237A would have to be substituted for Channel 221A in Batesburg, S.C. The latter would preclude the assignment of Channel 221A in Mount Pleasant. However, as a replacement for Mount Pleasant, Channel 285A can be assigned there since it was recently replaced with Channel 259 at Beaufort, S.C.[7] The assignment to Manning requires a site restriction of 25.6 kilometers (16 miles) southeast. Assigning Channel 221A to Bamberg requires a site restriction of 4.5 kilometers (2.8 miles) west-northwest. Several parties to the proceeding also note, and a staff study confirms, that Channel 269A is available for assignment to Mount Pleasant. (See footnote 3.) One of the commenters, Santee-Cooper, supports assigning two channels to Mount Pleasant. The proposal for two Mount Pleasant assignments would foreclose one alternative assignment (Channel 269A) to Ravenel (Docket 80–201). Should Channel 269A be assigned to Ravenel, on the other hand, as stated before, either Eastover or Elloree (Docket 80–211) would be left without an assignment.

6. In addition to these proposals, the Commission has before it five petitions for rule making which relate to the proposals discussed above. These additional proposals are listed below.

Proposal in RM–3518

Edgefield Saluda Radio Company ("Edgefield Saluda"), licensee of daytime-only AM Station WJES, Johnson, S.C., filed a petition seeking the assignment of Channel 221A to Johnston, and the substitution of Channel 237A for Channel 221A in Batesburg.[8] If the CCBC counterproposal in Docket 80–213 were adopted, Channel 221A could not be assigned to Johnston due to short-spacing with that assignment as a substitute for Bamberg. However, Channel 224A would then be available in Johnston due to its deletion at Bamberg. A site restriction of 7 kilometers (4.4 miles) south is needed if Channel 224A is assigned to Johnston.

Proposal in RM–3556

William K. Durst ("Durst") filed a petition requesting the assignment of FM Channel 237A to Leesville, S.C., as that community's first local aural service.[9] If that channel is assigned to Leesville, then it could not be used as a substitute at Batesburg.

Proposal in RM–3613

Ridge Broadcasting Company ("Ridge"), licensee of FM Station WKWO–FM (Channel 221A) in Batesburg, asks us to reassign Channel 221A from Batesburg to Winnsboro Mills, S.C., and substitute Channel 237A for Channel 221A in Batesburg.[10] The Channel 237A substitution conflicts with the Leesville proposal. The Channel 221A assignment conflicts with the assignment of that channel (but not Channel 224A) at Johnston and other requests that follow for Saluda and Union.

Proposal in RM–3668

William K. Durst filed a second petition seeking the assignment of Channel 221A to Saluda, S.C., and the substitution of Channel 237A for Channel 221A at Batesburg.[11] As before, the Channel 237A substitution conflicts with the Leesville proposal. The Channel 221A proposal conflicts with the Johnston and Winnsboro Mills proposals, as well as the following one for Union.

Proposal in RM–3771

Edward L. B. Osborne, president of Broadcasting Company of Union, Inc. ("Union B/C"), licensee of Station WBCU(AM), Union, S.C., requests the assignment of Channel 221A to Union and the substituion of Channel 237A for Channel 221A in Batesburg.[12] As before, the Channel 237A substitution conflicts with the Leesville proposal; the Channel 221A proposal conflicts with requests at Winnsboro Mills and Saluda.

7. These rule making petitions affect the docketed proceedings because if the Batesburg substitution is not made, then Channel 221A is not available as a substitute at Bamberg which in turn would foreclose the Manning assignment (BC Docket No. 80–213). Taken altogether, a total of fourteen communities in South Carolina are involved in this proceeding. The following paragraphs briefly describe these communities in terms of population, location, present aural service, and need for an FM assignment.[13]

---

[2] Public Notice of the petition was given on July 21, 1980, Report No. 1240.

[3] The Commission inadvertently neglected to give public notice of the Ravenel counterproposal. However, this *Further Notice* can serve that function and provide those persons who did not already have actual notice of the proposal the opportunity to submit comments.

[4] Channel 269A became available to Ravenel by virtue of our action dismissing the proposal to assign the same channel to Goose Creek, South Carolina, due to a lack of interest expressed in the assignment. *Report and Order*, 46 FR 10968, published February 4, 1981.

[5] Public Notice was given on August 6, 1980, Report No. 1242.

[6] Public Notice of the petition was given on August 6, 1980, Report No. 1242.

[7] BC Docket No. 80–214, 46 FR 14017, published February 25, 1981.

[8] Public Notice of the petition was given on October 31, 1979, Report No. 1198.

[9] Public Notice of the petition was given on February 1, 1980, Report No. 1211.

[10] Public Notice of the petition was given on March 31, 1980, Report No. 1221.

[11] Public Notice of the petition was given on May 20, 1980, Report No. 1229.

[12] Public Notice of the petition was given on November 3, 1980, Report No. 1254.

[13] The city of Bamberg is not discussed because the only change contemplated there is the substitution of one Class A channel for another.

8. North Charleston (pop. 19,864),[14] in Charleston County (pop. 247,650), is located approximately 10 kilometers (6 miles) north of Charleston. North Charleston is presently served locally by daytime-only AM Station WNCG and FM Station WKTM (Channel 273). The petitioner for the North Charleston assignment, T. B. Trammel, asserts that the city plays an important role in the growth and expansion of the entire county. Trammel states that North Charleston contains the largest share of industry in the area, as well as the Charleston Naval Base, which makes North Charleston a large center of employment.

9. Eastover (pop. 817), in Richland County (pop. 233,866), is located 40 kilometers (25 miles) east of Columbia, S.C. The city has no local aural service. Petitioner for the Eastover assignment, William G. Dudley III, states that Eastover is an incorporated town which is governed by an elected mayor and four town council members. Eastover is located in the heart of a large agricultural section of Richland County and serves as a marketplace for area farmers and agricultural workers and the employees of the East Coast steel mill, Westvaco forestry activities, and a new South Carolina electricity and gas complex.

10. Ravenel (pop. 961) is located in Charleston County (pop. 247,650), approximately 27 kilometers (17 miles) west of Charleston. The city has no local aural service. M. E. Foley, the proponent of the assignment to Ravenel, states that Ravenel is an incorporated town governed by a mayor and six town council members. In addition to being a "convenient resting place for travelers," Foley asserts that small locally owned businesses and a nearby chemical plant support the economy of the city. Recent estimates place the population of Ravenel at approximately 1,064.

11. Elloree (pop. 970), in Orangeburg County (pop. 69,789), is located approximately 106 kilometers (67 miles) northwest of Charleston, South Carolina. The city presently has no local aural service. Petitioner, Santee-Cooper, asserts that Elloree and its surrounding area is the retirement and recreational spot in the heart of South Carolina. It asserts that the proposed station would provide a first local aural service to Elloree and would also serve an important section of rural population in Orangeburg County.

12. Mount Pleasant (pop. 6,155), in Charleston County (pop. 247,650), is located approximately 6 kilometers (4 miles) from Charleston. The city does not presently have any local aural broadcast service. John M. Dunnagan, the proponent of the Mount Pleasant assignment, points out that Mount Pleasant has had a 20.3% increase in population between 1960 and 1970. He states that the most important industry in and around the city is fishing, with large seafood packing companies located in Mount Pleasant. Dunnagan notes that because of the community's rapid growth, the construction and service industries have expanded greatly.

13. Parris Island (pop. 8,668), in Beaufort County (pop. 51,136), is located approximately 85 kilometers (53 miles) southwest of Charleston, South Carolina. It has no local aural service. According to the petitioner for the Parris Island assignment, D. W. McFarland, Parris Island is a Marine Corps Recruiting Depot housing 2,300 permanent personnel and from 5,000 to 10,000 temporary personnel at any one time. Petitioner states that for assignment purposes Parris Island has many attributes of a community including a Base Exchange (general store), commissary, library, golf course, service station, post office, commercial bank, and bowling alley.

14. Manning (pop. 4,035), in Clarendon County (pop. 25,604), is located approximately 112 kilometers (70 miles) northwest of Charleston. Manning is presently served locally by FM Station WTWE (Channel 221A), licensed to Clarendon County Broadcasting Corporation ("CCBC"). CCBC is the proponent of the counterproposal in Docket 80-213 which would substitute Channel 223 for Channel 221A at Manning. CCBC states that a Class C station at Manning would provide a first aural nighttime service to 13,485 people in an area of 947 square kilometers (370 square miles) and a second FM service to 61,820 people in an area of 2,439 square kilometers (953 square miles). Manning's economy is supported by tourism, agriculture and agriculturally oriented businesses.

15. Batesburg, South Carolina (pop. 4,036) is located on the Saluda-Lexington County line (combined population 103,540), approximately 48 kilometers (30 miles) west of Columbia, South Carolina. Batesburg is currently served by FM Station WKWO-FM (Channel 221A), licensed to Ridge, and daytime-only AM Station WBLR.

16. Johnston (pop. 2,552) is in Edgefield County (pop. 15,692), approximately 72 kilometers (45 miles) west-southwest of Columbia. Johnston is currently served locally by daytime-only AM Station WJES, of which Edgefield Saluda is licensee. Edgefield Saluda tells us that Johnston is steadily growing in population and that farming, and peach growing, in particular, is its major industry, though manufacturing is increasing in importance in the local economy.

17. Leesville (pop. 1,907) is located in Lexington County (pop. 69,012), approximately 43 kilometers (27 miles) north of Columbia. Leesville has no local service at present. Durst states that both Leesville and Lexington County have been steadily growing in population.

18. Saluda (pop. 2,442), seat of Saluda County (pop. 14,528), is approximately 66 kilometers (41 miles) west of Columbia. Saluda has no local aural service. Durst states that Saluda is the commercial center for Saluda County agricultural and manufacturing industries, and that there are about 100 business establishments in the community.

19. Union (pop. 10,775), seat of Union County (pop. 29,230), is located 95 kilometers (60 miles) northwest of Columbia, S.C. Union is currently served by fulltime AM Station WBCU (1460 kHz). Union B/C submitted community data indicating that Union could support an FM outlet.

20. Winnsboro Mills (pop. 2,312) is in Fairfield County (pop. 19,099), approximately 42 kilometers (26 miles) north of Columbia. Winnsboro Mills currently has no local aural service. Ridge tells us that, although unincorporated, Winnsboro Mills is a separate community from nearby Winnsboro, with its own stores and business establishments, including a plant which employs nearly 900 people in manufacturing tire cord and industrial yarns.

21. Before discussing the various alternative plans being presented in this *Further Notice*, the comments addressing the newly added petitions for rule making will be summarized. The comments submitted in response to the three *Notices* before the Commission, unless indicated otherwise, will not be discussed at this time but will be considered and analyzed in any action taken in response to this *Further Notice* and are thus incorporated herein. The following paragraphs, therefore, set out the arguments made in response to the petitions for rule making which have not yet been the subject of a Notice of Proposed Rule Making. These include the proposals for Johnston, Saluda, Winnsboro Mills, Union (all of which also require a channel substitution at Batesburg), and Leesville.

[14] Population figures are taken from the 1970 U.S. Census.

22. Edgefield Saluda's petition to assign Channel 221A to Johnston and substitute Channel 237A for Channel 221A in Batesburg, was opposed by Durst because it would preclude the assignment of Channel 237A to Leesville. Durst notes that if Channel 237A were to be assigned as a substitute for Station WKWQ–FM, its present site would be short-spaced to FM Stations WNGC (Channel 238), Athens, Georgia, and WROQ (Channel 236), Charlotte, North Carolina. Clarke Broadcasting Corporation, licensee of Station WNGC, also opposes the substitute assignment of Channel 237A to Batesburg on grounds of short spacing to Athens. Edgefield Saluda points out in reply comments that a 5.5 kilometer (3.5 miles) south site relocation for Station WKWO–FM would solve this problem, and adds that, were it the successful applicant at Johnston, it would provide reimbursement to Ridge under *Circleville* [16] guidelines, for Station WKWO–FM's frequency and site changes. Edgefield Saluda has affirmed its intent to apply for Channel 221A, if that frequency is assigned to Johnston. Edgefield Saluda also submitted preclusion data regarding the assignment of Channels 221A and 237A to Johnston and Batesburg, respectively, which reveal no additional significant preclusion.

23. Ridge acknowledges the necessity for Station WKWQ to relocate its transmitter site, if Channel 237A is substituted for Channel 221A at Batesburg. It also affirms its intent to apply for Channel 221A, if that frequency is reassigned to Winnsboro Mills. Ridge's preclusion data indicates that the assignment of Channel 221A to Winnsboro Mills will not cause any additional preclusion, and that the assignment of Channel 237A to Batesburg will preclude only a very small area southeast of the community, which includes no communities of over 1,000 population. Edgefield Saluda opposes the Winnsboro Mills assignment, on the ground that it would preclude its proposed Johnston assignment, which it claims is a more efficient use of the spectrum because it is compatible with an additional assignment of Channel 221A at Union or Great Falls, South Carolina, while Channel 221A at Winnsboro Mills is not. Durst opposes the Ridge proposal on the ground that Winnsboro Mills is not in fact a separate community from Winnsboro and therefore does not warrant an FM assignment. Additionally, he raises the conflict posed with respect to his petition for the assignment of Channel 237A to Leesville. He asks that, if we delete Channel 221A from Batesburg for reassignment elsewhere and substitute Channel 237A at Batesburg, we should open Channel 237A for application and that he would apply for Channel 237A, to be used at Leesville under the Commission's "ten mile" rule. His preclusion study indicates no preclusive effect other than on Channel 237A in the Leesville-Batesburg area, which is said to contain no communities of over 1,000 population other than Leesville and Batesburg. In a later pleading, Durst requested that Channel 221A be reassigned from Batesburg to Saluda, and affirms his intent to apply for Channel 221A, if assigned to Saluda. [18]

24. Staff analysis reveals that Channel 237A is available for assignment as a "drop-in" channel, to either Leesville or Batesburg, only. [17] To comply with the Commission's minimum distance separation requirements, the site for Channel 237A would have to be located at least 5 kilometers (3.1 miles) southeast of Batesburg (5.5 kilometers (3.5 miles) south of Station WKWO–FM's present site) or at least 7 kilometers (4.6 miles) south of Leesville.

25. Our analysis of all the proposals being considered in this proceeding indicates that two sets of communities can be addressed independently. The first set of communities, which will be referred to as "Set A," includes North Charleston, Eastover, Ravenel, Elloree, Parris Island, and Mount Pleasant. The second set of communities, "Set B," includes Manning, Bamberg, Batesburg, Johnston, Winnsboro Mills, Saluda, Union, and Leesville. The two sets are independent because any of the assignment plans discussed below for Set A can be coupled with any assignment plan for Set B. The following section of this *Further Notice* will set out each of the assignment plans for both sets of communities. These plans have been developed based on the technical feasibility of making the assignments. At this stage of the proceeding, the Commission has not yet determined the merits of assigning channels to any particular community. Individual determinations as to each city's need for an assignment will be made following the receipt of all responses to this *Further Notice*. In commenting on the proposed alternatives, the original petitioners should indicate whether they still seek their requested assignments and whether they still commit themselves to applying for authority to operate a station on their requested channels, if assigned.

26.

Set A

City	Plan I	Plan II	Plan III
North Charleston, S.C.	241	241	
Eastover, S.C.	257A		240A
Ravenel, S.C.	288A	288A	240A
Elloree, S.C.		257A	257A
Parris Island, S.C.	221A	221A	221A
Mount Pleasant, S.C.	285A	285A	288A, 285A

27. The differences in the three plans in Set A are readily apparent. In Plan A–I, North Charleston is assigned a Class C channel, and all of the other communities are assigned Class A channels except Elloree. Plan A–II is similar except Elloree receives an assignment and Eastover does not. In comparing the two plans, it should be noted that Eastover (pop. 617) presently receives a 60 dBu service from four FM stations [19] while Elloree (pop. 970) currently receives a 60 dBu service from three FM stations. [19] Also, there is an application pending for a daytime-only AM station in Elloree-Santee. Plan A–III proposes no assignment to North Charleston, but assigns two Class A channels to Mount Pleasant. [20] The assignment of two channels to Mount Pleasant is supported by one of the parties to this proceeding, Santee-Cooper.

28.

Set B

City	Plan I	Plan II	Plan III	Plan IV
Manning, S.C.	223	223	223	
Bamberg, S.C.	221A	221A	221A	
Batesburg, S.C.	237A	237A	237A	
Johnston, S.C.	224A	224A		
Winnsboro Mills, S.C.	221A			
Saluda, S.C.			221A	

[16] *Circleville, Ohio*, 8 FCC 2d 158, 9 R.R. 2d 1579 (1967).

[17] The channel cannot be assigned to both communities, since they are approximately 5 kilometers (3 miles) apart, and the rules require a 104 kilometer (65 mile) separation.

[18] Durst acknowledges that his counterproposal seeking assignment of Channel 221A to Saluda conflicts with his petition seeking assignment of Channel 237A to Leesville (since Channel 237A would be unavailable for substitution at Batesburg). He suggests that Saluda merits a first FM assignment to a greater degree than Leesville, given Leesville's proximity to Batesburg and smaller population, but acknowledges that the comparative evaulation is within the ambit of Commission discretion.

[19] WCOS–FM and WNOK–FM, Columbia, South Carolina; WPJS, Orangeburg, South Carolina; and WWDM, Sumter, South Carolina.

[19] WDWQ, St. George, South Carolina; WWDM, Sumter; and WPJS, Orangeburg.

[20] The assignment of Channel 285A to Mount Pleasant requires the deletion of that channel from Beaufort, South Carolina. Class C FM Channel 259 was substituted for Channel 285A in Beaufort in the *Report and Order* in BC Docket No. 80–214, see footnote 6, *supra*.

Set B—Continued

City	Plan I	Plan II	Plan III	Plan IV
Union, S.C.		221A		
Leesville, S.C.				237A

29. Plans B–I, B–II and B–III all incorporate the counterproposal of Clarendon County Broadcasting Corporation ("CCBC") in Docket 80–213. According to CCBC, the substitution of a Class C channel in Manning would enable its station to provide a first aural nighttime service to 947 square kilometers (370 square miles) for 13,845 persons and a second FM service to 2,439 square kilometers (963 square miles) for 61,820 persons. CCBC asserts that, excluding the Charleston, South Carolina, urbanized area, only two cities with a population over 1,000 lie in or near the area which would be precluded by the assignment of Channel 223 to Manning. These cities are Folly Beach, South Carolina (pop. 1,157), and Pinehurst-Sheppard Park, South Carolina (pop. 1,711). CCBC's counterproposal requires a change of channels in Bamberg and Batesburg. Substituting Channel 221A for Channel 224A in Bamberg would require a site restriction of 2.8 kilometers west-northwest of the city. CCBC states that the transmitter site of WWBD–FM (the station currently using Channel 224A in Bamberg) meets this site restriction. CCBC states that it will reimburse the licensee of WWBD–FM for expenses incurred in the channel change if the substitution is made.

30. The CCBC counterproposal and the petitions seeking a channel assignment to Johnston, Winnsboro Mills, Saluda and Union all require the substitution of Channel 237A for Channel 221A in Batesburg. As noted above, the site for Channel 237A at Batesburg would have to be located at least 5 kilometers (3.1 miles) southeast of Batesburg which is 5.5 kilometers (3.5 miles) south of Station WKWQ–FM's present site. In view of the extraordinary expense involved and the difficulty in finding new sites for transmitters, ordinarily we do not make assignments which require existing stations to change sites. *See Ashville, North Carolina*, 36 R.R. 2d 810 (1976). Before we would make such an assignment, we ordinarily would need an expression of willingness to change sites on the part of the existing licensee, as well as a willingness to provide reimbursement on the part of the eventual permittees who would benefit from the modification.[21] However, since here Ridge has itself proposed changing Station WKWQ's site in connection with the assignment of Channel 221A to Winnsboro Mills, there may be no obstacle to our consideration of alternative assignments for Channel 221A, which would also require the site change for Station WKWQ. We shall look to Ridge's comments for any reason why it would not be willing to make a site change if Channel 221A were assigned to one of the other communities, instead,[22] and if it were not the ultimate permittee on the new Channel 221A assignment.

31. Regarding Johnston, Saluda, Winnsboro Mills, Union, and Leesville, each of the communities are seeking a first FM assignment. At this point in the proceeding, the primary distinguishing factor of the alternative assignment plans concerns the number of cities that can be accommodated. Plan B–I proposes assignments to both Johnston and Winnsboro Mills, favoring Winnsboro Mills over Union or Saluda for Channel 221A. Plan B–II proposes assignments to Johnston and Union favoring Union over Winnsboro Mills and Saluda. However, Saluda would receive a first service under Plan B–III in preference to Union, Winnsboro Mills and Johnston. Plan B–IV proposes only the assignment of Channel 237A to Leesville which would not involve a change in the transmitter site for Station WKWQ–FM.

32. Of the cities in Set B seeking first assignments, only Johnston and Union currently have a local aural service. Leesville receives a city-grade signal from Station WKWQ–FM in Batesburg. We do not generally require such information from petitioners seeking first FM assignments of Class A frequencies, but our deliberations would be aided by *Roanoke Rapids/Anamosa* studies,[23] and preclusion data from those who have not already provided it.

33. In addition to seeking comment on the alternative assignment plans proposed in this *Further Notice*, we are also issuing *Orders to Show Cause* to the licensees of Station WWBD–FM in Bamberg and Station WKWQ–FM in Batesburg. In this regard, William K. Durst, the proponent of the Leesville assignment, urges that Channel 237A, if substituted at Batesburg, be made available for application so that he may apply for use of Channel 237A at Leesville, under the "ten mile" rule (Section 73.203(b) of the Commission's Rules). See para. 23, *supra*. We believe that Batesburg channel, if substituted as proposed in Plans B–I, B–II and B–III, should not be open to the filing of completing applications. In the past, we have held that the principle announced in *Cheyenne, Wyoming*, 62 FCC 2d 63 (1976), was applicable in situations where channels were being reassigned at the request of or for the personal convenience of the petitioners. We do not believe the *Cheyenne* doctrine applies in the instant case. We are not proposing to modify Ridge's license and require a site change at Batesburg merely for Ridge's convenience, so that Ridge might apply for Channel 221A elsewhere, while maintaining its Batesburg license on Channel 237A. Here, we are proposing to modify Ridge's license because it is the only way to make a Class C channel available in Manning and make an FM channel available for Johnston, Saluda, Winnsboro Mills or Union. The public interest, and not merely Ridge's private interest, would be served by the provision of this additional local service, and we could merely modify Ridge's license without subjecting the Batesburg channel to competing applications to facilitate this public interest goal.

34. We have determined that an *Order to Show Cause* to CCBC is not necessary because consent to the modification of its license at Manning is indicated by CCBC's stated interest in the Class C channel at Manning. However, in the event additional interests are expressed in the Class C channel here proposed, CCBC's license may not be modified to specify operation on Channel 223. According to Commission policy as expressed in *Cheyenne, Wyoming, supra*, other parties must be afforded an opportunity to state their interest in applying for a newly assigned Class C channel.

35. In view of the foregoing, the Commission seeks comment on the following proposed amendments to the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with regard to the communities listed below. As stated above, any plan from Set A can be combined with any plan from Set B.

---

[21] CCBC states that because the licensee of WKWQ–FM in Batesburg is one of the parties seeking the substitution of Channel 237A for 221A in Batesburg, CCBC should not be required to reimburse WKWQ–FM for the channel change. We invite comment on this matter.

[22] We note that Ridge could apply for Channel 221A in any community to which we might assign it, and, conversely, assignment of Channel 221A to Winnsboro Mills in no way assures that Ridge will be the successful applicant for its use there.

[23] *Roanoke Rapids, North Carolina*, 9 FCC 2d 672 (1967); *Anamosa, Iowa*, 46 FCC 2d 520 (1974).

Set A

Community	Plan A–I		Plan A–II		Plan A–III	
	Present	Proposed	Present	Proposed	Present	Proposed
North Charleston	273	241, 273	273	241, 273	273	273

Union				221A				
Leesville								237A

36. *It Is Ordered,* That pursuant to Section 316(a) of the Communications Act of 1934, as amended, and with the understanding that it will receive reasonable reimbursement of expenses incurred in changing the channel on which it has a license, Station WWBD–FM, Bamberg, South Carolina, *Shall Show Case* why its license *Should Not Be Modified* to specify operation on Channel 221A as proposed herein instead of the present Channel 224A.

37. *It Is Further Ordered,* That, pursuant to Section 316(a) of the Communications Act of 1934, as amended, and with the understanding that it will receive reasonable reimbursement of expenses incurred in changing the channel on which it has a license, Station WKWQ–FM, Batesburg, South Carolina, *Shall Show Cause* why its license *Should Not Be Modified* to specify operation on Channel 237A as proposed herein instead of the present Channel 221A.

38. Pursuant to Section 1.87 of the Commission's Rules, the licensees of Stations WWBD–FM, Bamberg, South Carolina, and WKWQ–FM, Batesburg, South Carolina, may, not later than May 12, 1981, request that a hearing be held on the proposed modifications. Pursuant to § 1.87(f), if the right to request a hearing is waived, Stations WWBD–FM and WKWQ–FM may, not later than May 12, 1981, file a written statement showing with particularity why their licenses should not be modified as proposed in these *Orders To Show Cause.* In this case, the Commission may call on WWDB–FM and WKWQ–FM to furnish additional information, designate the matters for hearing, or issue, without further proceedings, an *Order* modifying the licenses as provided in the *Orders To Show Cause.* If the right to request a hearing is waived and no written statement is filed by the date referred to above, WWBD–FM and WKWQ–FM will be deemed to have consented to the modifications as proposed in the *Orders To Show Cause* and a final *Order* will be issued by the Commission, if the above mentioned channel modifications are ultimately found to be in the public interest.

39. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

40. Interested parties may file comments on or before May 12, 1981, and reply comments on or before June 1, 1981.

41. *It Is Further Ordered,* That the Secretary of the Commission *Shall Send* a copy of this *Order* by Certified Mail, Return Receipt Requested, to Radio Station WWBD–FM, Inc., P.O. Box 543, Bamberg, South Carolina 29003, and to The Ridge Broadcasting Company, P.O. Box 410, Batesburg, South Carolina 29006, the parties to whom the *Orders To Show Cause* are directed.

42. For further information concerning this proceeding, contact Michael A. McGregor or Molly Pauker, Broadcast Bureau, (202) 632–7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

43. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, Section 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 Do Not Apply to Rule makings to Amend §§ 73.202(b), 73.504, and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Henry L. Baumann,

Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, *It Is Proposed to Amended* the FM Table of Assigments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filing in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this

effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments: Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submission by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc. 81-9001 Filed 3-25-81; 8:45 am]
BILLING CODE 6712-01-M

47 CFR Part 73

[BC Docket No. 81-168; RM-3561, and RM-3608]

FM Broadcast Station in Ellsworth, Farmington, Lewiston, and Skowhegan, Maine; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking and orders to show cause.

SUMMARY: Action taken herein proposes three alternative plans for FM assignments to Lewiston and Skowhegan, Maine. Involved in the plans are related frequency changes at Ellsworth or Farmington, Maine, for which Orders to Show Cause are issued. The action taken herein was requested by WRXV, Inc. and Robert Harris.

DATES: Comments must be filed on or before May 12, 1981, and reply comments on or before June 1, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Molly Pauker, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations. (Ellsworth, Farmington, Lewiston, and Skowhegan, Maine); Notice of proposed rulemaking and orders to show cause.

Adopted: March 13, 1981.

Released: March 23, 1981.

By the Chief, Policy and Rules Division:

Petitions

1. We have under consideration two petitions for rulemaking. WRXV, Inc., licensee of WRXV(AM), Auburn, Maine, ("WRXV") seeks the assignment of Channel 238 to Lewiston, Maine, as that community's third FM assignment.[1] In order to meet the mileage separation requirements, Channels 232A and 239 would have to be deleted from Ellsworth, Maine. WRXV proposes Channels 296A and 233 as substitutes. A conflicting petition, filed by Robert Harris ("Harris"), seeks the assignment of either Channel 232A or 237A to Skowhegan, Maine, as the community's second FM assignment.[2] Channel 237A would be short-spaced to Channel 238 at Lewiston, and Channel 232A would be short-spaced to Channel 233 at Ellsworth. Consequently, Harris' petition is considered as a counterproposal to WRXV's proposal.[3]

Comments

2. Comments on WRXV's petition were filed by Alpine Broadcasting Corporation, licensee of Station WHOM(FM), Mount Washington, New Hampshire ("Alpine"). Alpine opposes a third FM assignment at Lewiston,[4] averring that Lewiston does not warrant additional aural service, and, further, should future Commission action prohibit ownership of AM–FM combinations in adjacent communities, WRXV may be required to divest Station WRXV(AM), Auburn, and should therefore indicate its willingness to do so. WRXV replies that Lewiston is the second largest community in Maine, and that it is not at present necessary for WRXV to agree to divest Station WRXV(AM). WRXV responded to Harris's petition for a Skowhegan channel by noting in a supplementary pleading that Channel 296A might be assigned to Skowhegan, instead. In a separate letter, WRXV further suggested that Channel 249A might be substituted for Channel 257A at Farmington, Maine, which would make Channel 257A available for Skowhegan.[5]

Community Data

3. Lewiston, Maine (population 41,779)[6] is located in Androscoggin County (population 91,279), approximately 56 kilometers (35 miles) north of Portland, Maine. Lewiston is currently served by FM stations WAYU (Channel 230) and WBLM (Channel 296) and fulltime AM Stations WCOU (1240 kHz) and WLAM (1470 kHz). WRXV states that Lewiston is a growing community, with a number of manufacturing and retail industries.

4. Skowhegan, Maine (population 7,601) is the seat of Somerset County (population 40,597), approximately 136 kilometers (85 miles) northeast of Portland, Maine. Skowhegan is currently served by FM Station WTOS (Channel 286) and daytime-only AM Station WSKW (1150 kHz). Harris states that Skowhegan is growing in population and is the home of a number of commercial services and sporting facilities.

Conflicts

5. The proposed site for Channel 238 at Lewiston would be 123 kilometers (77 miles) from WDEA's site on Channel 239 at Ellsworth. The mileage separation

[1] Public Notice of this petition was given on February 1, 1980, Report No. 1211.

[2] Public Notice of the petition was given on March 20, 1980, Report No. 1220.

[3] A separate petition filed on January 22, 1981 by Bloor Communications, Inc., licensee of Station WCUY–FM, Brewer, Maine, proposes to assign Channel 296 in place of Channel 296A. The latter channel would be substituted at Ellsworth for Channel 232A. (RM–3638) We have not consolidated that request with this proceeding since the Brewer assignment can be made on a non-comparative basis. However, since both proposals involve the Ellsworth substitute channel, comments may be submitted to the extent they address the substitute channel proposed at Ellsworth.

[4] Alpine also noted a short-spacing to a Canadian assignment which has since been deleted and no longer poses a conflict.

[5] This proposal would also require Station WKTJ–FM, Farmington (Channel 257A), to change frequency to 249A.

[6] Population data are based on 1970 U.S. Census figures.

rules requires 166 kilometers (105 miles) between first adjacent Class B channels. If Channel 233 is substituted for Channel 239, this short spacing can be avoided; however, unoccupied Channel 232A would then be only 19 kilometers (12 miles) from WDEA–FM's transmitter on Channel 233. The rules require 104 kilometers (65 miles) between first adjacent Class A and B channels. This short spacing can be corrected by substituting Channel 296A for 232A in Ellsworth. A site restriction of at least 16 kilometers (10 miles) east of Lewiston would be required for Channel 238.

6. However, both of Harris' requested channels for Skowhegan are incompatible with the Lewiston assignment. Channel 237A at Skowhegan would be 74 kilometers (46 miles) from Channel 238 at Lewiston. The rules require a 104 kilometer (65 miles) separation. Channel 232A at Skowhegan would be 88 kilometers (55 miles) from WDEA–FM's transmitter on Channel 233 at Ellsworth. The rules require a 104 kilometer (65 mile) separation. While the latter short spacing could be avoided by moving the WDEA–FM transmitter site approximately 16 kilometers (10 miles) east, we are reluctant to consider options which would result in such great expense, without a willingness expressed on the part of WDEA–FM to change its site. See *Asheville, N.C.*, 52 FCC 2d 1147, recon. den. 57 FCC 2d 1289 (1976). Therefore, we have not proposed any assignments which would involve moving the WDEA–FM transmitter.

Preclusion Considerations

7. The assignment of Channel 232A to Skowhegan would cause only co-channel preclusion in parts of Somerset and Franklin Counties (Maine). The assignment of Channel 237A to Skowhegan would cause co-channel preclusion only, in all or part of eleven Maine counties: Androscoggin, Franklin, Kennebec, Knox, Lincoln, Oxford, Penobscot, Piscataquis, Sagadahoc, Somerset and Waldo. Channel 238 at Lewiston, with a transmitter site 20 kilometers (12.7 miles) northeast of the city, as requested, would cause preclusion on Channels 237A, 238 and 239 in all or part of the following thirteen Maine counties: Androscoggin, Cumberland, Franklin, Hancock, Kennebec, Knox, Lincoln, Penobscot, Piscataquis, Sagadahoc, Somerset, Waldo and York.

Discussion and Options

8. WRXV's request for Class B Channel 238 in Lewiston can be accomplished by the deletion of Channels 232A and 239 in Ellsworth and substitution of Channels 296A and 233 respectively in their place. Harris' request for a Class A channel in Skowhegan can be satisfied by a drop in of Channel 237A, 261A or 296A or by reassigning Channel 257A to Skowhegan from Farmington and substituting Channel 249A at Farmington. As a result, there are four combinations of assignments possible. However, one alternative, a Channel 237A assignment to Skowhegan, would require that a Channel 238 assignment to Lewiston be located beyond the point from which a city grade signal could be provided. Thus, there remain three feasible plans which are listed and discussed below.

Plan I

	Delete	Add
Ellsworth	232A, 239	233, 296A
Lewiston		238
Skowhegan		296A

Proposed site for Channel 238 in Lewiston is 21 kilometers (12.7 miles) northeast. Channel 296A in Skowhegan would preclude the change from Channel 296B to Channel 296C in Lewiston applied for by Stereo Corporation, the licensee on that assignment. WDEA–FM on Channel 239 in Ellsworth would have to change to Channel 233 (to be reimbursed by the ultimate Lewiston permittee, the beneficiary of this change).

Plan II

	Delete	Add
Ellsworth	232A, 239	233, 296A
Lewiston		238
Skowhegan		261A

Proposed site for Channel 238 in Lewiston is 21 kilometers (12.7 miles) northeast. WDEA–FM on Channel 239 in Ellsworth would have to change to Channel 233 (to be reimbursed by the ultimate Lewiston permittee, the beneficiary of this change). The assignment of Channel 261A to Skowhegan is possible due to the recent adoption in BC Docket 80–204, which assigned Channel 260 (with a site restriction) in place of Channel 261A in Auburn, Maine. A site restriction on the Skowhegan assignment of 4.8 kilometers (3 miles) northeast would be required.

Plan III

	Delete	Add
Ellsworth	232A, 239	233, 296A
Farmington	257A	249A
Lewiston		238
Skowhegan		257A

Proposed site for Channel 238 in Lewiston is 21 kilometers (12.7miles) northeast. WDEA–FM on channel 239 in Ellsworth would have to change to Channel 233 (to be reimbursed by the ultimate Lewiston permittee, the beneficiary of this change). WKTJ–FM on Channel 257A in Farmington would have to change to Channel 249A. This would cause a slight shortspacing to the present site of WJBQ on Channel 260 in Portland, Maine, but not to the site specified in its new construction permit. The cost of this channel change would be paid by the ultimate Skowhegan permittee as the beneficiary.

9. We seek comments on the feasibility and desirability of the three alternative plans, and the willingness of Harris and WRXV to provide reimbursement if they become permittees of their respective assignments. Intermixture of channel classes in Skowhegan is not a problem as Harris has expressed interest in a Class A assignment there. A preclusion study should be submitted to support an interest in any channel for which no such study has yet been presented. Canadian concurrence is required for all the possible assignments discussed. The proposed changes to the FM Table of Assignments (Section 73.202(b) of the FCC's Rules) with regard to listed communities are set forth in para. 8, *supra*.

10. It is ordered, That, pursuant to Section 316(a) of the Communications Act of 1934, as amended, and with the understanding that it will receive reasonable reimbursement of expenses incurred in changing the channel on which it has a license, Station WDEA–FM, Ellsworth, Maine, shall show cause why its license should not be modified to specify operation on Channel 233 as proposed herein instead of the present Channel 239.

11. Pursuant to § 1.87 of the Commission's Rules and Regulations, the licensee of Station WDEA–FM Ellsworth, Maine, may not later than May 12, 1981, request that a hearing be held on the proposed modification. Pursuant to Section 1.879(f), if the right to request a hearing is waived, WDEA–FM may, not later than June 1, 1981, file a written statement showing with particularity why its license should not be modified as proposed in this *Order to Show Cause*. In this case, the Commission may call on WDEA–FM to furnish additional information, designate the matter for hearing, or issue, without further proceeding, an Order modifying the license as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no

written statement is filed by the date referred to above, WDEA–FM will be deemed to consent to the modification as proposed in the *Order to Show Cause* and a final Order will be issued by the Commission, if the above-mentioned channel modifications are ultimately found to be in the public interest.

12. It is further ordered, That, pursuant to Section 316(a) of the Communications Act of 1934, as amended, and with the understanding that it will receive reasonable reimbursement of expenses incurred in changing the channel on which it has a license, Station WKTJ–FM, Farmington, Maine, shall show cause why its license should not be modified to specify operation on Channel 249A as proposed in Plan III herein instead of the present Channel 257A.

13. Pursuant to Section 1.87 of the Commission's Rules and Regulations, the licensee of Station WKTJ–FM, Farmington, Maine, may not later than May 12, 1981, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to a hearing is waived, WKTJ–FM may, not later than June 1, 1981, file a written statement showing with particularity why its license should not be modified as proposed in this *Order to Show Cause*. In this case, the Commission may call on WKTJ–FM to furnish additional information, designate the matter for hearing, or issue, without further proceeding, an Order modifying the license as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no written statement is filed by the date referred to above WKTJ–FM will be deemed to consent to the modification as proposed in the *Order to Show Cause* and a final Order will be issued by the Commission, if the above-mentioned channel modifications are ultimately found to be in the public interest.

14. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

15. Interested parties may file comments on or before May 12, 1981, and reply comments on or before June 1, 1981.

16. It is further ordered, That the Secretary of the Commission shall send a copy of this *Order* by Certified Mail, Return Receipt Requested, to Dudman Communications Corporation, 66 State Street, Ellsworth, Maine 04605 one of the parties to whom this *Order to Show Cause* is directed.

17. It is further ordered, That the Secretary of the Commission shall send a copy of this *Order*, by Certified Mail, Return Receipt Requested, to Franklin Broadcasting Corporation, Voter Hill Road, Farmington, Maine 04938, one of the parties to whom this *Order to Show Cause* is directed.

18. For further information concerning this proceeding, contact Molly Pauker, Broadcast Bureau, (202) 632–6302. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or Court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

19. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. *See, Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, IT IS PROPOSED TO AMEND the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

47 CFR Part 73

[BC Docket 81–169; RM–3776]

TV Broadcast Station in Oroville, California; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the assignment of UHF television Channel 28 to Oroville, California, in response to a petition filed by

Sacramento Valley Family Television, Inc. The proposed assignment would provide a first commercial television service to Oroville.

DATES: Comments must be filed on or before May 12, 1981, and reply comments on or before June 1, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.606(b), table of assignments, television broadcast stations (Oroville, California); Notice of proposed rule making.

Adopted: March 13, 1981.

Released: March 20, 1981.

By the Chief, Policy and Rules Division:

1. The Commission has before it a petition for rule making,[1] filed by Sacramento Valley Family Television, Inc. ("petitioner"), which seeks the amendment of § 73.606(b) of the Commission's Rules (Television Table of Assignments) by assigning UHF-TV Channel 28 to Oroville, California. Petitioner states that it will apply for authority to construct and operate on Channel 28, if assigned. No oppositions to the proposal were received.

2. Oroville (pop. 7,356)[2] in Butte County (pop. 101,969), is located approximately 112 kilometers (70 miles) north of Sacramento. It has no local television service.

3. Petitioner claims that Oroville has experienced a significant growth in population and construction (housing and light industry), which is expected to continue. Further, it has become the trade center for Butte County, the area's recreation center, and has a daily newspaper. Petitioner also states that the community's substantial economic and population growth, and its commercial and cultural vitality, support its obtaining its first local television service.

4. In view of the above, we propose to amend the Television Table of Assignments (Section 73.606(b) of the Commission's Rules) with respect to the following community:

City	Channel No. Present	Proposed
Oroville, California		28

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 12, 1981, and reply comments on or before June 1, 1981.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Montrose H. Tyree, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

(Secs. 4, 303, 48 Stat. as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Henry L. Baumann,

Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, IT IS PROPOSED TO AMEND the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket 81-03, Notice 2]

Evaluation Report on Federal Motor Vehicle Safety Standard No. 203, Impact Protection for the Driver from the Steering Control System, and No. 204, Steering Column Rearward Displacement

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Extension of comment period.

SUMMARY: On January 26, 1981 (46 FR 8066), the agency announced the publication of an Evaluation Report on Federal Motor Vehicle Safety Standard No. 203, *Impact Protection for the Driver from the Steering Control System* (49 CFR 571.203), and Standard No. 204, *Steering Control Rearward Displacement* (49 CFR 571.204). The report evaluates the effectiveness and costs of the the Federal standards that limit the impact force and rearward displacement of the steering assemblies in passenger cars. The agency set April 27, 1981 as the closing date for submitting comments on the evaluation report.

On February 12, 1981, Ford Motor Company (Ford) requested the agency to extend by 60 days the period for submitting comments on the evaluation report. Ford said that essentially the same personnel that are responding to the final and proposed rules issued by the agency in December and January would be needed to analyze and respond to the evaluation report. Ford said that without the use of extensive overtime, it would have difficulty submitting comments on the evaluation report by April 27, 1981.

In order to give Ford and other manufacturers sufficient time to thoroughly analyze the evaluation report, the agency has decided to extend the comment closing date by 60 days to June 26, 1981.

DATE: Deadline for submission of comments is extended to June 26, 1981.

FOR FURTHER INFORMATION CONTACT:
Mr. Frank G. Ephriam (202) 426-1575.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 1 and 2

Implementation of Commission's Delegation of Authority To Determine Whether There Have Been Significant Changes in Operating License Applicant's Activities or Proposed Activities Since the Construction Permit Antitrust Determination

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission proposes to amend its regulations to implement the Commission's delegation of authority to make the "significant changes" determination to the Director of Nuclear Reactor Regulation and the Director of Nuclear Material Safety and Safeguards. The "significant changes" determination is whether there have or have not been changes of antitrust significance in an operating license applicant's activities or proposed activities under its license that have occurred subsequent to the antitrust review conducted in connection with the construction permit under Section 105(c)(2) of the Atomic Energy Act of 1954, as amended. This proposed rule would implement NRC internal procedural changes and has no substantive effect on licensees of any class.

DATES: Comments must be submitted on or before April 27, 1981.

ADDRESSES: Written comments concerning the proposed amendments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT:
Robert S. Wood, Utility Finance Branch, Division of Engineering, Office of Nuclear Reactor Regulation, Washington, DC 20555, Telephone: (301) 492-8303.

SUPPLEMENTARY INFORMATION: On September 12, 1979, the Nuclear Regulatory Commission delegated its authority to make a "significant changes" determination under Section 105c(2) of the Atomic Energy Act of 1954, as amended, to the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate. In connection with that delegation, the Commission approved procedures to be used until such time as effective regulations implementing those procedures were adopted.

The Commission now proposes to amend its rules of practice in 10 CFR Part 2 which pertain to the Commission's authority to make a "significant changes" determination to implement the delegation of that authority to the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate. The proposed rules are self-explanatory: they require that a determination be made as to whether or not there have been changes of antitrust significance in an operating license applicant's activities or proposed activities under his license that have occurred subsequent to the review conducted in connection with the construction permit and afford the public an opportunity to participate in the making of the determination by submitting comments. Also, the Commission proposes to amend 10 CFR Part 2 and Appendix A to Part 2 to reflect the fact that all applications for operating licenses for facilities for which construction permits were issued under Section 104b of the Atomic Energy Act have already been reviewed. It is therefore proposed that appropriate deletions be made in regulations under that Section in 10 CFR 2.101(d)(1) and in Appendix A to Part 2. Conforming amendments to the regulations in 10 CFR Part 1 are also proposed.

Because these amendments relate to rules of agency procedures and practice, notice of proposed rulemaking and public procedure thereon are not required. Nonetheless, the Commission would welcome public comment on the proposed amendments, since they enlarge public notice and the opportunity for public participation in the Commission's determination of whether there have been significant competitive changes in an operating license applicant's activities or proposed activities under its license which have occurred subsequent to the review conducted in connection with the construction permit.

REGULATORY FLEXIBILITY STATEMENT: In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that the proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The proposed rule would implement NRC

internal procedural changes and would have no substantive effect on licensees of any class.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of Title 5 of the United States Code, notice is hereby given that adoption of the following amendments to Title 10, Chapter 1, Code of Federal Regulations Parts 1 and 2 is contemplated:

PART 1—STATEMENT OF ORGANIZATION AND GENERAL INFORMATION

10 CFR Part 1 is amended as follows:

1. The authority citation for Part 1 reads as follows:

Authority: Sec. 161, Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); secs. 201, 203, 204, 205, and 209, Pub. L. 93-438, 88 Stat. 1242, 1244, 1245, 1246 and 1248 (42 U.S.C. 5841, 5843, 5844, 5845, and 5849); Pub. L. 94-79, 89 Stat. 413; and 5 U.S.C. 552 and 553.

2. 10 CFR 1.42 is amended by revising paragraph (e) to read as follows:

§ 1.42 Office of the Executive Legal Director.

* * * * *

(e) The Antitrust Division acts as counsel for the NRC staff in public administrative proceedings before the Commission, Atomic Safety and Licensing Appeal Boards, Atomic Safety and Licensing Boards, and administrative law judges, in matters relating to antitrust aspects of applications for nuclear facility licenses; provides legal advice regarding NRC antitrust responsibilities; and, for operating license antitrust reviews, together with the Utility Finance Branch of the Office of Nuclear Reactor Regulation, recommends to the appropriate Office Director (NRR or NMSS) whether or not finding of significant changes should be made.

3. 10 CFR 1.61 is amended by revising paragraph (e) to read as follows:

§ 1.61 Office of Nuclear Reactor Regulation.

* * * * *

(e) The Utility Finance Branch conducts prelicensing reviews of applications for nuclear facilities to assure that issuance of a license will not create or maintain a situation inconsistent with the antitrust laws; for operating license antitrust reviews, together with the Antitrust Division of the Office of the Executive Legal Director, recommends to the appropriate Office Director (NRR or NMSS) whether or not a finding of significant changes should be made; and is responsible for ascertaining compliance with license conditions pertaining to antitrust matters. It administers the Commission's program for indemnification of licensees against public liability claims arising out of nuclear incidents; and executes indemnification agreements with licensees pursuant to sections 170c, 170k, and 170.1 of the Atomic Energy Act of 1954, as amended.

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

10 CFR Part 2 is amended as follows:

1. The authority citation for Part 2 reads as follows:

Authority: Sec. 161, Pub. L. 83-703, 68 Stat. 948 as amended (42 U.S.C. 2201); Pub. L. 90-23, 81 Stat. 54 (5 U.S.C. 552), unless otherwise noted. Section 2.200-2.206 also issued under sec. 186, Pub. L. 83-703, 68 Stat. 955 (42 U.S.C. 2236), and sec. 206, Pub. L. 93-438, 88 Stat. 1246 (42 U.S.C. 5846), and §§ 2.800-2.807 also issued under Pub. L. 89-554, 80 Stat. 883 (42 U.S.C. 553), unless otherwise noted.

2. 10 CFR 2.101 is amended by revising the introductory text of paragraph (c) and revising paragraph (e) to read as follows:

§ 2.101 Filing of application.

* * * * *

(c) The notice published in the Federal Register announcing receipt of the antitrust information part of the application for a facility license under section 103 of the Act, except for those applications described in § 2.101(e) and § 2.102(d)(2), will state that:

* * * * *

(e) (1) Upon receipt of the antitrust portion of an application for a facility operating license under section 103 of the Act, the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, will publish in the Federal Register and in appropriate trade journals a "Notice of Receipt of Operating License Application and Request for Antitrust Information." Such notice will invite persons to submit within sixty (60) days after publication of the notice comments or information concerning the antitrust aspects of the application to assist the Director in determining whether significant changes in the licensee's activities or proposed activities have occurred since the completion of the previous antitrust review in connection with the construction permit pursuant to section 105c of the Act. Such notice will also state that persons who wish to have their views on the antitrust aspects of the application presented to the Attorney General for consideration should submit such views within sixty (60) days after publication of the notice to: U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Utility Finance Branch.

(2) If the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, after reviewing any comments or information received in response to the published Notice and any comments or information regarding the applicant received from the Attorney General, concludes that there have been no significant changes since the completion of the previous antitrust review in connection with the construction permit, a finding of no significant changes will be published in the Federal Register together with a notice stating that a request for reevaluation of such proposed finding should be submitted within sixty (60) days of publication of the notice. If no requests for reevaluation are received within that time, the proposed finding shall become the NRC's final determination. Requests for a determination of significant changes will be accepted after the date when the NRC determination becomes final but before the issuance of the OL only if they contain new information such as information of facts or events of antitrust significance that have occurred since that date, or information that could not reasonably have been submitted prior to that date.

(3) If, as a result of the reevaluation of the finding described in paragraph (e)(2), it is determined that there have been no significant changes, the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, will deny the request and will publish a notice of finding of no significant changes in the Federal Register. Such notice and finding shall become the final NRC decision thirty (30) days after being made and only in the event that the Commission has not exercised sua sponte review.

(4) If the Director of Nuclear Reactor Regulation of the Director of Nuclear Material Safety and Safeguards, as appropriate, concludes that significant changes have occurred since the completion of the antitrust review in connection with the construction permit, the provisions of § 2.102(d) shall apply.

3. 10 CFR Section 2.102 is amended by revising paragraphs (d)(1) and (d)(2) to read as follows:

§ 2.102 Administrative review of application.

* * * * *

(d) (1) The Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as

appropriate, will refer and transmit a copy of each docketed application for a construction permit or an operating license for a utilization or production facility under section 103 of the Act to the Attorney General as required by section 105c of the Act.

(2) The requirements of paragraph (d)(1) do not apply to an application for an operating license for a production or utilization facility under section 103 of the Act for which the construction permit was also issued under section 103, unless the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, determines, after consultation with the Attorney General and in accordance with § 2.101(e), that such review is advisable on the ground that significant changes in the licensee's activities have occurred subsequent to the previous review by the Attorney General and the Commission under section 105c of the Act in connection with the construction permit.

* * * * *

Appendix A to 10 CFR Part 2 is amended as follows:

1. The authority citation for Appendix A reads as follows:

Authority: (Sec. 161, 68 Stat. 948 (42 U.S.C. 2241); sec. 161, Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); sec. 201, as amended, Pub. L. 93-438, 88 Stat. 1243, Pub. L. 94-79, 89 Stat. 413 (42 U.S.C. 5841)).

2. Appendix A to 10 CFR Part 2 is amended by revising paragraph X(a), revising and redesignating paragraph X(b), as X(b)(1), adding subparagraphs X(b)(2)–X(b)(5), and revising paragraph X(c) to read as follows:

X. Proceedings For the Consideration of Antitrust Aspects of Facility License Applications

(a) Under the Atomic Energy Act of 1954, as amended, the Commission is required, with respect to applications for construction permits or operating licenses for production and utilization facilities for industrial or commercial purposes licensed under section 103, which include power reactors subject to the manadatory hearing requirements of section 189a of the Act, to follow procedures for antitrust review in section 105 of the Act. This section outlines the procedures used by the Commission to implement that section.

(b)(1) When an application for a construction permit or an operating license for a facility under section 103 of the Act subject to antitrust review under section 105 is received, the notice of receipt of application published in the Federal Register will state that persons who wish to have their views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the Commission within sixty (60) days after publication of the notice.

(2) Upon receipt of the antitrust portion of an application for a facility operating license under section 103 of the Act, the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, will publish in the Federal Register and in appropriate trade journals a "Notice of Receipt of Operating License Application and Request for Antitrust Information." Such notice will invite persons to submit within sixty (60) days after publication of the notice comments or information concerning the antitrust aspects of the application to assist the Director in determining whether significant changes in the licensee's activities or proposed activities have occurred since the completion of the previous antitrust review in connection with the construction permit pursuant to section 105c of the Act. Such notice will also state that persons who wish to have their views on the antitrust aspects of the application presented to the Attorney General for consideration should submit such views within sixty (60) days after publication of the notice to: U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Utility Finance Branch.

(3) If the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, after reviewing any comments or information received in response to the published notice and any comments or information regarding the applicant received from the Attorney General, concludes that there have been no significant changes since the completion of the previous antitrust review in connection with the construction permit, a finding of no significant changes will be published in the Federal Register, together with a notice stating that a request for reevaluation of such proposed finding should be submitted within sixty (60) days of publication of the notice. If no requests for reevaluation are received within that time, the proposed finding shall become the NRC's final determination. Requests for a determination of significant changes will be accepted after the date when the NRC determination becomes final but before the issuance of the OL only if they contain new information such as information of facts or events of antitrust significance that have occurred since that date, or information that could not reasonably have been submitted prior to that date.

(4) If, as a result of the reevaluation of the proposed finding described above, it is determined that there have been no significant changes, the Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate, will deny the request and will publish a notice of his finding of no significant changes in the Federal Register. Such notice and finding shall become the final NRC decision thirty (30) days after being made and only in the event that the Commission has not exercised sua sponte review.

(5) If the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, concludes that significant changes have occurred since the completion of the previous antitrust review in connection with the construction permit, the provisions of § 2.102(d) shall apply.

(c) (1) The Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate, will refer and transmit a copy of each application for a construction permit or an operating license for a utilization or production facility under Section 103 of the Act, to the Attorney General as required by section 105c of the Act. Under that section, the Attorney General will, within a reasonable time, but in no event to exceed 180 days after receipt, render such advice to the Commission as he determines to be appropriate in regard to the finding to be made by the Commission as to whether the activities under the license would create or maintain a situation inconsistent with the antitrust laws specified in section 105c of the Act.

(2) Such review is not required for applications for operating licenses for production or utilization facilities under section 103 of the Act for which the construction permit was also issued under section 103, unless the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards, as appropriate, determines, after consultation with the Attorney General and in accordance with § 2.101(e), that such review is advisable on the ground that significant changes in the licensee's activities or proposed activities have occurred subsequent to the previous review by the Attorney General and by the Commission under section 105c of the Act in connection with the construction permit.

10 CFR Part 35

Therapeutic Treatment of Cardiac Dysfunction by Iodine-131

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of intention to retain existing regulation.

SUMMARY: The Nuclear Regulatory Commission is issuing this notice of intent to retain in its regulations the treatment of cardiac dysfunction by iodine-131 as an accepted therapeutic procedure. In 1978, this procedure was reclassified by the Food and Drug Administration (FDA) as lacking substantial evidence of effectiveness. However, NRC's Advisory Committee on the Medical Use of Isotopes, the American College of Cardiology and several physicians have recommended that this treatment should not be removed from NRC regulations since this would be detrimental to the health of some patients.

DATES: Comment period expires May 26, 1981. Comments received after May 26, 1981, will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before May 26, 1981.

ADDRESSES: Interested persons are invited to submit written comments and suggestions on this notice to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received by the Commission may be examined at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Deborah A. Bozik, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (Phone 301-443-5860).

SUPPLEMENTARY INFORMATION: Section 35.100(d)(1) of 10 CFR Part 35, "Human Uses of Byproduct Material," permits the use of iodine-131 as therapeutic treatment of cardiac dysfunction. This notice sets out the reasons for the Commission's decision to retain this regulation. Iodine-131 in the form of sodium-iodide is used as a therapeutic agent in the treatment of euthyroid heart diseases such as angina pectoris and congestive heart failure. This treatment of cardiac dysfunction with iodine-131 was introduced approximately thirty years ago. FDA has on record clinical studies which document safety when iodine-131 is used to treat cardiac dysfunction. While the application of iodine-131 to the thyroid during the therapeutic treatment of cardiac dysfunction does damage the thyroid, the net effect on patients has been demonstrated through clinical tests to be beneficial and no major adverse side effects have been identified. In 1971, the Food and Drug Administration classified the therapeutic treatment of cardiac dysfunction with iodine-131 as possibly effective. Since no person submitted any clinical data to support the possibly effective indication, the FDA reclassified the treatment of cardiac dysfunction as lacking substantial evidence of effectiveness in 1978 (41 FR 36000). Other alternatives, principally non-radioactive drug therapy, have largely replaced iodine-131 for the treatment of cardiac dysfunction.

Although FDA's action was based on lack of evidence of effectiveness, this should not be taken as a definite conclusion that the treatment of cardiac dysfunction with iodine-131 is ineffective.

Since 1951, the FDA has recorded three adverse reactions to the use of iodine-131 in the therapeutic treatment of cardiac dysfunction. Two of these reactions were classified as possibly drug related, and the third was classified as remotely drug related.

On February 9, 1979, NRC published a final Medical Policy Statement, 44 FR 8242, which stated in part that "NRC will continue to restrict the uses of therapeutic and certain diagnostic radioactive drugs to the indicated procedures that have been approved by FDA." However, FDA's basic regulatory policy does not infringe on the physician's medical treatment prerogatives. NRC's Medical Policy Statement establishes that, in the best interest of the patient, a proper balance and flexibility should exist between the exercise of governmental regulatory authority in the nuclear medicine area and the practice of medicine by physicians. The Policy Statement conveys this idea as follows:

> The NRC will minimize intrusion into medical judgments affecting patients and into other areas traditionally considered to be part of the practice of medicine.
>
> The Commission recognizes that physicians have the primary responsibility for the protection of their patients. The Commission believes that basic decisions concerning the diagnosis and treatment of disease are a part of the physician-patient relationship and are traditionally considered to be a part of the practice of medicine. NRC regulations are predicated on the assumption that properly trained and adequately informed physicians will make decisions in the best interest of their patients.

Both the American College of Cardiology and several physicians have indicated that the therapeutic treatment of cardiac dysfunction by iodine-131 should not be removed from NRC regulations since this would be detrimental to the health of some patients. In accord with this indication, at its most recent meeting on August 18, 1980, NRC's Advisory Committee on the Medical Uses of Radioisotopes recommended that cardiac dysfunction therapy with iodine-131 should be unconditionally retained in the regulations.

The Commission has concluded that NRC should unconditionally retain in § 35.100(d)(1) of 10 CFR the use of iodine-131 for the therapeutic treatment of cardiac dysfunction. The Commission believes that this decision is in consonance with the expressed intent of the Medical Policy Statement which was formulated to encompass a proper balance and flexibility so that the best interests of patients would not be compromised. The Commission believes that this position exemplifies and accentuates the balance which was built into the Medical Policy Statement.

Comments, suggestions, or recommendations concerning this action by the Commission are invited from all interested persons.

(Secs. 81, 161, Pub. L. 83-703, 68 Stat. 935, 948 (42 U.S.C. 2111, 2201); Sec. 201, Pub. L. 93-438, 88 Stat. 1242 (42 U.S.C. 5841))

Dated at Washington D.C., this 19th day of March 1981.

For the Nuclear Regulatory Commission.
Samuel J. Chilk,
Secretary of the Commission.

Notices

Federal Register
Vol. 46, No. 58
Thursday, March 26, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Agency Decisional Processes, Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-163), notice is hereby given of a meeting of the Committee on Agency Decisional Processes of the Administrative Conference of the United States, to be held at 10:00 a.m., Monday, April 13, 1981 at the office of Ginsburg, Feldman, Weil & Bress, 1700 Pennsylvania Avenue, NW., Suite 300, Washington, D.C.

The Committee will meet to discuss its draft recommendation on separation of functions and staff communications with decisionmakers in agency proceeding.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administration Conference at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact Charles R. Pouncy, staff attorney, Administrative Conference of the United States, 2120 L Street NW., Washington, D.C. (202-254-7065). Minutes of the meeting will be available upon request.

Richard K. Berg,
Executive Secretary.

DEPARTMENT OF AGRICULTURE

Forest Service

Stillwater PGM Resources Proposed Platinum Mining and Milling Facilities, Gallatin National Forest, Big Timber Ranger District, Sweet Grass County, Mont.; Intent to Prepare an Environmental Impact Statement

Pursuant to the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an environmental impact statement for the development of the proposed Stillwater PGM Resources platinum mining and milling facility on the Big Timber Ranger District.

The environmental impact statement will be written as a joint federal-state document with the Montana Department of State Lands.

A range of alternatives will be considered for this project. The alternatives will include alternate sites for the various facilities. Specific alternatives will be developed as the scoping process evolves.

Early in the environmental analysis, Federal, state, and local agencies, and individuals or organizations who may be interested in or affected by the decision will be invited to participate in the scoping process, which includes: (a) indentification of those issues to be addressed; (b) identification of issues to be analyzed in depth; and, (c) elimination of insignificant issues, or those which have been covered by a previous environmental review.

John Drake, Forest Supervisor, Gallatin National Forest, is the responsible official. Questions about the proposed action and environmental impact statement should be directed to Sherm Sollid, the geologist in the Forest Supervisor's Office (phone 406-587-5271).

The analysis is expected to take about 21 months. The draft environmental impact statement should be available for public review by September 1982. The final environmental impact statement is scheduled to be completed in January 1983.

Written comments and suggestions concerning this analysis should be sent to John Drake, Forest Supervisor, Gallatin National Forest, P.O. Box 130, Bozeman, Montana, 59715, by June 15, 1981.

Dated: March 20, 1981.
John T. Drake,
Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

International Trade Administration

Sugar From the United Kingdom; Preliminary Results of Administrative Review of Countervailing Duty Order and of Tentative Determination To Revoke

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Countervailing Duty Order and of Tentative Determination to Revoke.

SUMMARY: This notice is to advise the public that the Department of Commerce has conducted an administrative review of the countervailing duty order on sugar from the United Kingdom. As a result of this review, the Department has preliminarily determined to revoke such order on the grounds that the subsidy practices cited in the final determination have been terminated and that the merchandise has been covered by a subsequent order. Interested parties are invited to comment on this decision.

EFFECTIVE DATE: March 26, 1981.

FOR FURTHER INFORMATION CONTACT: Joseph A. Black or Josephine A. Russo, Office of Compliance, Room 1126, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-1774 or 377-2786).

SUPPLEMENTARY INFORMATION:

Procedural Background

On January 22, 1938, the Department of the Treasury imposed a countervailing duty order (T.D. 49344) on refined sugar from the United Kingdom of Great Britain and Northern Ireland ("the UK"). The order stated that exports of this merchandise benefitted from bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303)("the Act"). Accordingly, imports into the United States of this merchandise were subject to countervailing duties.

On January 1, 1973, the UK became a member of the European Communities

("the EC"). On July 28, 1978, a notice of "Final Countervailing Duty Determination," T.D. 78-253, was published in the **Federal Register** (45 FR 33237) regarding exports of sugar from the EC. On January 1, 1980, the provisions of title I of the Trade Agreements Act of 1979 ("the TAA") became effective. The authority for administering the countervailing duty law was transferred from the Department of the Treasury to the Department of Commerce ("the Department") on January 2, 1980. The Department published in the **Federal Register** of May 13, 1980 (45 FR 31455), a notice of intent to conduct administrative reviews of all outstanding countervailing duty orders. As required by section 751 of the Act, the Department has conducted an administrative review of the order on sugar from the UK.

Scope of the Review

Imports covered by this review are sugar from the UK. Sugar is currently classifiable under items 155.20 and 155.30 of the Tariff Schedules of the United States. The countervailable program cited in the final determination was the excessive drawback of customs duties on imported raw sugar.

Preliminary Results of the Review

As a result of our review, we preliminarily conclude that the imported merchandise no longer benefits from subsidies from the Government of the UK. The Department has received official confirmation that the UK eliminated the program of excessive duty drawbacks, and that sugar from the UK does not benefit from any subsidies other than those available under programs of the EC. In addition, entries of this merchandise are presently covered by the countervailing duty order on sugar from the EC.

Therefore, in accordance with § 355.42(c)(2) of the Commerce Regulations, the Department has tentatively determined to revoke the countervailing duty order concerning sugar from the UK. If this order is revoked, it shall apply to unliquidated entries of UK sugar entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. There are no known unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption prior to April 4, 1980, the date of suspension of liquidation of all entries covered by the countervailing duty order on sugar from the EC. Entries on or after April 4, 1980 of UK sugar will be included in the Department's administrative review of the order on sugar from the EC.

Interested parties may submit written comments on this decision within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 25 days of the date of publication. Any request for an administrative protective order must be made within 5 days of the date of publication. The Department will publish the final results of the administrative review after analysis of issues raised in written comments or at a hearing.

This administrative reivew, tentative determination to revoke, and notice are in accordance with sections 751 (a)(1), (c) of the Act (19 U.S.C. 1675 (a)(1), (c)) and §§ 355.41 and 355.42 of the Commerce Regulations (19 CFR 355.41, 355.42).

John D. Greenwald,

Deputy Assistant Secretary for Import Administration.

March 20, 1981.

BILLING CODE 3510-25-M

DEPARTMENT OF COMMERCE

International Trade Administration

DEPARTMENT OF THE INTERIOR

Office of Territorial and International Affairs

Rules for the Allocation of Watch Quotas for Calendar Year 1981 Among Producers Located in the Virgin Islands, Guam, and American Samoa

AGENCY: Import Administration, International Trade Administration, Department of Commerce; Office of Territorial and International Affairs, Department of the Interior.

ACTION: Final annual rules.

SUMMARY: The rules establish the formula for allocation of calendar year 1981 watch quotas among producers in the Virgin Islands and Guam; raise the maximum of wages per person that shall be credited in the wage factor of the formula; reduce the weight assigned to taxes in the allocation formula; increase the weights assigned to wages and shipments; and set aside quota for applications from new firms in the Virgin Islands and American Samoa. The Departments published the rules in proposed form on November 24, 1980 (45 FR 77496 (1980)), and invited comments from interested persons. A summary and discussion of the comments received is contained in Supplementary Information below.

DATE: These rules are effective March 26, 1981.

FOR ADDITIONAL INFORMATION CONTACT: Mr. Frank W. Creel, who can be reached on 202-377-1660.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291 dated February 17, 1981, the Departments of Commerce and the Interior have determined that these rules do not constitute a "major rule" as defined by Section 1(b) of the Order. They are not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices in either the public or private sector; or

(3) Significant adverse impact on the domestic economy or on the ability of U.S. enterprises to compete with foreign enterprises.

Additionally, to further the intent of the Regulatory Flexibility Act, the Departments have determined that publication of these rules will have no adverse impact on small business entities. The interests of the small business entities affected by the rules, in fact, require their publication in order that the Departments might timely allocate the duty-free quotas upon which the continued existence of these small business entities depends.

Finally, the Departments have determined that publication of these rules will result in negligible additional paperwork the burden of which is limited solely to those entities receiving the associated federal benefits. Accordingly, publication of these rules is consistent with the Departments' responsibilities under the paperwork Reduction Plan Act of 1980.

In response to their invitation for comments, the Departments received two submissions. One Commentor expressed its general support for the rules as proposed and had no objections to any of the proposed provisions.

The other commentor, the Guam Department of Commerce, commented as follows:

> As of 1980, the firms engaged in the assembly of watches and bands in Guam have discontinued their operations. The major cause for the failure of watch assembly operations in Guam was the year to year changes in watch quota allocations and other non-quota barriers. Quota restrictions and the threat of their impositions seriously detain the establishment of stable industries in the territories. In certain cases, quotas were allocated at a late date allowing inadequate time for the marketing process which includes the production plan and provision of supplies. Without consideration of these basic business practices, the firms were incurring unnecessary expenses leading to discontinued operations.

This commentor observed that industrial development in the U.S. territories could not, because of its inherently small scale, pose any threat to the U.S. domestic industry; that self-sufficiency of the territories would alleviate an undesirable drain on the federal budget; and concluded that, "in order to have the Headnote 3(a) become a genuine impetus for the development of the territories, it is necessary to have legally binding assurances that the exports of the territories to the U.S. under the Headnote 3(a) will not be subject to quotas or any other non-quota barrier."

The Departments note that the comments of the Guam Department of Commerce are essentially concerned with legislative issues which might be presented to the Congress, and not with regulatory provisions of existing law. The quota itself, for example, is a statutory provision which the Departments are charged with allocating, and may not be removed except by act of the Congress. It is also provided by law that the amounts of the territorial quotas be determined by the International Trade Commission and communicated to the Departments by April 1 each year. Accordingly, the Departments are not authorized to make full annual allocations of quota prior to April 1.

We note, however, that implementing regulations provide for initial quota allocations, pending the annual allocations, which permit operational continuity by all firms, whether in Guam or the Virgin Islands. Also, the Departments selected during 1980 a new Guam firm which is expected to commence operations early in 1981. Provided the firm is successful and conducts its operations in accordance with the projections contained in its new-entrant application, the Departments fully expect its contributions to the Guam economy will substantially exceed the respective contributions of firms which formerly operated in Guam.

When the Departments published the proposed rules, certain circumstances pertaining to the allocation of the 1981 Guam quota were not yet clear. In this connection, there were no shipments from Guam during 1980, either by the firm which was an eligible producer on the basis of its 1979 shipments or by the new firm selected by the Departments during 1980. The former producer, in addition, did not submit an application for quota in 1981 and thereby relinquished its status as an eligible producer. The new firm, although unable to commence assembly operations and make shipments during 1980, has applied for quota in 1981. Section 2 of the final rules makes appropriate provisions for allocating the 1981 Guam quota to this single eligible producer in Guam.

Accordingly, the final 1981 watch quota allocation rules are adopted as shown below.

(Pub. L. 89-805, 80 Stat. 1521 (19 U.S.C. 1202) as amended; 15 CFR Part 303)

Issued at Washington, D.C., on March 23, 1981.

Wesley Partridge,

Deputy to the Deputy Assistant Secretary for Import Administration, International Trade Administration, U.S. Department of Commerce.

Ruth G. Van Cleve,

Deputy Assistant Secretary for Policy, Territorial and International Affairs, U.S. Department of the Interior.

Section 1. (a) A portion of the 1981 Virgin Islands quota determined in accordance with subsection (b) below will be allocated on the basis of (1) the dollar amount of wages, up to a maximum of $17,000 per person, paid by each producer during calendar year 1980 to Virgin Islands residents and attributable to each producer's headnote 3(a) watch and watch movement assembly operations, (2) the dollar amount of income taxes paid by each producer during calendar year 1980 attributable to its headnote 3(a) watch and watch movement assembly operations (excluding penalty payments and income tax refunds and subsidies paid by the Virgin Islands government during calendar year 1980), and (3) the number of units of watches and watch movements assembled in the Virgin Islands and entered by each producer duty-free into the customs territory of the United States during calendar year 1980.

(b) In making allocations under this formula, a weight of 70 percent will be assigned to the wage factor, a weight of 5 percent will be assigned to the income tax factor, and a weight of 25 percent will be assigned to the shipment factor. An amount representing that portion of the 1981 Virgin Islands quota equal to the ratio of general headnote 3(a) shipments of watches and watch movements from the territory during 1980 to the total 1980 Virgin Islands quota will be allocated among the producers in the Virgin Islands, in accordance with the allocation factors and weights specified in (a) above.

Section 2. Sixty percent of the 1981 Guam quota may be allocated, pursuant to § 303.5(a)(4) of Title 15 of the Code of Federal Regulations, to the new Guam firm selected in 1980 (see also subsection 3(b) and Section 6, below).
